Re: Case 19-G-0309 – Proceeding on Motion of the Commission as to the Rates, Charges, Rules and Regulations of the Brooklyn Union Gas Company d/b/a National Grid NY for Gas Service

Case 19-G-0310 – Proceeding on Motion of the Commission as to the Rates, Charges, Rules and Regulations of KeySpan Gas East Corporation d/b/a National Grid for Gas Service

Dear Secretary Burgess:

Due to the unprecedented demands on City of New York ("City") personnel and resources responding to the COVID-19 pandemic, the City is unable to provide an Initial Post-Hearing Brief in Cases 19-G-0309 and 19-G-0310. The City submits this letter asking that the Public Service Commission ("Commission") take its prefiled testimony on all issues into consideration in making its decisions in these cases and reiterates the testimony supporting several of those positions below.

Policy Considerations

Even before the economic devastation that the COVID-19 pandemic has brought to the City, which will continue to be felt, and even multiplied, in coming months and years, the City urged that the Commission would have to balance a number of important policies in deciding these cases. As set forth in the testimony of the City's Policy Panel, affordable energy prices are critical to economic development and the continued prosperity of New York City, and in turn, New York State. (Tr. 5496.) As noted below, Brooklyn Union Gas Company d/b/a National Grid NY ("KEDNY") and KeySpan East Gas Corp. d/b/a National Grid ("KEDLI," and collectively with KEDNY, "National Grid" or "the Companies") are seeking extremely large rate increases that, if granted, will impose very significant burdens on all KEDNY and KEDLI customers. In addition, the Companies are seeking surcharges and shareholder rewards in excess of $125 million beyond their requested increases in rates. (Tr. 5502.) Given the incredible financial burden of the pandemic, the impact of these bill increases on ratepayers will be magnified.

In addition, the City's low income residents already are over-burdened with energy bills. Fundamentally, in deciding these cases, the Commission must ensure that ratepayers are not burdened with unfair bill increases during these historically difficult times, and it should provide additional protections for the City's most vulnerable residents.

The Commission also must ensure that important climate change policies are pursued. The City and State have enacted laws and policies to achieve expeditious and equitable decarbonization and sustainability. For example, the City has made unprecedented commitments to achieve its objectives of creating a resilient and low-carbon energy supply, improving air quality, and achieving carbon neutrality by 2050, as set forth in OneNYC 2050: Building a Strong and Fair City ("OneNYC"). The City's laws and policies align with the State's robust array of climate policies, and achievement of the City's objectives would help achieve the State's objectives, and vice versa. During the pendency of these cases, New York enacted the sweeping Climate Leadership and Community Protection Act ("CLCPA"), which sets the objective of 70 percent renewable electricity production by 2030 and zero-emission electricity generation by 2040.

In order to ensure that the goals of the aforementioned City and State laws and policies are achieved, the Commission must require that the Companies pursue immediate and aggressive increases in energy efficiency and demand response programs as an alternative to traditional infrastructure investments. It is the Commission's challenge in this proceeding to ensure that the Companies can provide safe and reliable service at just and reasonable rates, and at the same time implement important City and State climate goals.

Low Income

The Commission should eliminate reconnection fees altogether for both KEDNY and KEDLI low income customers. As the NYC Low Income Panel ("LIP") testified:

> Q. WHY SHOULD KEDNY ELIMINATE ITS RECONNECTION FEES FOR LOW INCOME CUSTOMERS?
>
> A. Eliminating reconnection fees for low income customers is appropriate because it will provide them with a better opportunity to remain utility customers and pay their utility bills. In particular, low income customers who are facing termination of service already have demonstrated an inability to pay utility bills. Requiring these customers to pay a fee to reconnect their gas service detracts from the amount they can put toward paying their past due bills, and creates an additional financial barrier for them to overcome. Customers and the utilities would be much better served if this money was instead put towards direct payment of the customers' utility bills.

> Moreover, the amount collected for reconnections is very small when considered in context. According to National Grid's response to City IR-106, on average over the last five years, KEDNY collected approximately $1.3 million in reconnection fees annually from all customers. According to National Grid's response to DPS IR-260, approximately $174,000 of that amount was collected annually from low income customers over the same time period. These amounts, and in particular the amount collected from low income customers, are insignificant when considered in context of the revenue requirement increase that KEDNY is seeking in this rate case, approximately $196 million in the Rate Year. We also understand that each Company's actual annual gas revenue requirements are in the billions of dollars.
>
> Conversely, KEDNY's reconnection fees are substantial, particularly from the perspective of a low income customer. As previously noted, KEDNY charges a reconnection fee of $66.13 (plus fees) for reconnecting service at the meter, which represents nearly 58 percent of an average KEDNY low income heating customer's monthly gas bill. Thus, in context, the loss of these reconnection revenues would be inconsequential for the Companies, but the savings could be material for a customer who already cannot afford his or her utility bill.
>
> Finally, elimination of KEDNY's reconnection fees for low income customers is appropriate to harmonize the utility's practices with those already adopted by KEDLI. This eliminates the possibility of low income customers residing in different portions of New York City (for example, on the Rockaways versus in Brooklyn) being subject to different rules on reconnection fees. (Tr. 5369-5371.)

Gas Safety

Ensuring the safety of New York City's gas system is of utmost importance. The Commission should continue pre-existing gas safety metrics as part of the forthcoming one year rate plan, subject to reasonable tightening of the individual metrics to ensure performance continues to improve over time. In addition, the Commission should not modify the current allocation of the 150 at-risk basis points among the safety metrics.

Attached to this letter is Exhibit 547, which provides the City's proposed incentive mechanisms and associated basis point allocations, including a comparison of the City's proposal against National Grid's current incentive mechanisms and basis point allocations.

Specific to the Leak Backlog Metric, the Commission should modify the targets such that the leak backlogs for both KEDNY and KEDLI are fully eliminated in five years. The City reiterates its position that these modified leak backlog targets can be achieved using the Companies' proposed funding amounts. As the NYC Gas Infrastructure and Safety Panel ("GISP") testified:

> Q. DO YOU BELIEVE THAT IT IS POSSIBLE FOR NATIONAL GRID TO ACHIEVE YOUR PROPOSED LEAK BACKLOG THRESHOLDS USING PROPOSED FUNDING AMOUNTS SET FORTH IN THE COMPANIES' PRE-FILED DIRECT TESTIMONY?
>
> A. Yes. Both Companies have made significant reductions in their total leak backlogs since 2014 – KEDNY has eliminated on average 316 leaks per year, and KEDLI has eliminated on average of 830, with both showing greater reductions in recent years as Proactive LPP replacement programs continue to ramp up. Combined with the synergies from replacing LPP, we believe that both Companies are capable of meeting these targets (particularly if, as proposed, KEDNY's Proactive LPP replacement program continues to ramp up over the next several years).
>
> Moreover, we are proposing to reset the leak backlog targets to the actual leaks remaining at the end of CY 2018 (2,803 for KEDNY; 8,199 for KEDLI). For KEDNY, at least, the Company should already be well below this target by the time the Rate Year starts. KEDNY reported in response to CNY-38 that its total leak backlog as of June 11, 2019 was 2,467, which is 336 leaks below our proposed reset of 2,803. KEDNY has another seven months before the Rate Year commences to lower its actual backlog even further, which should make these proposed annual reductions that much easier to attain.
>
> We understand that the Company identifies and repairs hundreds of leaks of all types each year. However, it has been doing so for many years, and it still has been able to eliminate a significant portion of its leak backlog as well. It may take five years to fully eliminate the backlog under our proposal, but that elimination should be the goal. Put another way, the goal should not be to simply maintain thousands of minor leaks each year (i.e., the status quo). (Tr. 5473-5474.)

Moreover, as the NYC GISP testified, the Commission should modify National Grid's leak survey practices:

> Q. WHAT IS YOUR RECOMMENDATION?

A. National Grid's leak survey practices should be aligned both internally and with Con Edison, so that the entire City is assessed in a consistent fashion. For example, KEDNY should conduct monthly mobile 'low speed' leak surveys, and KEDLI should perform similar surveys in the Rockaways portion of its service territory. In addition, KEDNY should perform walking surveys of gas service connections in non-business districts every three years, to align its practices with Con Edison and KEDLI. (Tr. 5478.)

Revenue Allocation and Rate Design

National Grid's proposed interclass revenue allocation should be adopted at whatever revenue requirements the Commission sets for the Companies. (Ex. 727, attached hereto.) As the City Rate Design Panel ("RDP") testified, the cost of service studies that the Companies filed are consistent with prior practice and Commission precedent and properly allocate the customer portion of distribution mains based on the number of customers and the demand component based on class contribution to design-day demand. (Tr. 5543-5544.) The City's RDP, including expert witness Mr. Richard Baudino, testified that the Companies' embedded cost of service studies ("ECOSS"), which utilized the minimum-system methodology to allocate distribution main costs, were consistent with accepted cost-causation principles and prior Commission precedent:

Q. HAS THE COMMISSION RECOGNIZED THE APPROPRIATENESS OF A CUSTOMER COMPONENT IN THE COST OF GAS DISTRIBUTION MAINS?

A. Yes. The Commission has accepted the use of a minimum-system methodology to classify and allocate distribution costs in past National Grid cases.

Q. DO YOU AGREE WITH THE COMPANIES' CLASSIFICATION AND ALLOCATION OF DISTRIBUTION MAINS?

A. Yes. As the RDP pointed out, distribution mains are installed to connect customers to the distribution system and to provide capacity to meet the winter peak. The Companies' ECOSS appropriately utilized a minimum-system study to estimate which portions of distribution mains are demand related and customer related, and then allocated costs to the various customer classes based on that relationship. We recommend that the Commission adopt the Companies' minimum-system methodology for classifying and allocating the cost of distribution mains. (Tr. 5544.)

With respect to KEDNY's proposed non-firm rates, all parties agreed that it is critical that National Grid retain all current non-firm customers and continue to convert new ones in order to meet projected demand into 2035. (Tr. 2961-2962).[1] Therefore, National Grid's proposal to reduce the rates for non-firm service should be approved.[2] For KEDNY, although the large subsidy being provided by non-firm customers would support more than a 2.4 percent decrease that is included in KEDNY's proposed interclass revenue allocation, the City supports the Tier 1 and Tier 2 rates proposed by the Companies. (Tr. 2830-2831.) The City RDP testified:

> For purposes of this case, we support the RDP's proposed rates and revenue allocation for the new SC 18-22 and SC-22 TC/IT classes, although TC/IT customers are providing a very large subsidy to other service classes and could have their rates reduced more significantly based on the results of the Companies' ECOSS. (Tr. 5547.)

For KEDLI, however, the City RDP took exception to the proposed increase to the non-firm rate classes that are providing a huge subsidy to the other classes. On rebuttal, the KEDLI Rate Design Panel agreed with the City and proposed a zero increase for the non-firm rate classes. (Tr. 2825.)

Importantly, with respect to non-firm rates, the City RDP emphasized that the proposed non-firm rates should be adjusted downward if the revenue requirements awarded by the Commission are less than what the Companies seek:

> Q. IF THE COMMISSION APPROVES A LOWER REVENUE REQUIREMENT INCREASE THAN KEDNY OR KEDLI ARE SEEKING IN THIS CASE, HOW SHOULD THIS LOWER INCREASE BE SPREAD AMONG THE COMPANIES' SERVICE CLASSES?

---

[1] *C.f.* Case 19-G-0678 – *Proceeding on Motion of the Commission to Investigate Denials of Service Requests by National Grid USA, The Brooklyn Union Gas Company d/b/a National Grid NY and KeySpan Gas East Corporation d/b/a National Grid*, Contingency and Implementation Plan (filed October 21, 2019), at 4 (describing increased discounts to non-firm customers as necessary to attract more customers to non-firm rates).

[2] The City RDP had other important recommendations to make non-firm service more attractive, including elimination of the unnecessary, and costly, second mandatory test in January (Tr. 5561-5562); developing energy efficiency programs tailored to non-firm customers (Tr. 5554-5557); explicitly setting forth the designated interruption temperatures in the Tariff (Tr. 5554); modifying the Tariff to make it clear that on-site alternate fuel is not a prerequisite to taking non-firm service (Tr. 5559) and the reduction of penalties under certain unique circumstances (Tr. 5562-5565). These too should be adopted.

A. If the Commission approves a lower revenue increase for the Companies, then we recommend that the service class increases shown in Table 2 (KEDNY) and Table 3 (KEDLI) be scaled back proportionately, with the exception of the KEDLI TC/IT class, which should remain at zero increase. (Tr. 5546-5549.)

Similarly, with respect to the National Grid's proposal to charge non-firm customers for the energy efficiency transition implementation plan ("ETIP"), the City RDP explained that, if and when these charges are included in non-firm rates, the aforementioned rates should be adjusted so that the designated discounts off firm rates are maintained:

Q. HOW SHOULD THE SBC BE APPLIED TO THE TIER 1 AND TIER 2 RATES OF THE NON-FIRM CUSTOMERS, ASSUMING THE COMPANIES OFFER SPECIFIC ENERGY EFFICIENCY PROGRAMS FOR SUCH CUSTOMERS?

A. The total Tier 1 and Tier 2 volumetric rates should not increase over the currently proposed Tier 1 and 2 rates because these rates are already greatly in excess of cost-based rates for Non-firm customers. This means that the if the SBC is added to these customers' rates, there should be a corresponding reduction in the applicable volumetric rates. (Tr. 5556-5557.)

These adjustments are necessary to maintain the value of the proposed non-firm discounts which, as noted earlier, based on the ECOSS should be more robust and already may not achieve the desired migration to non-firm service.

Finally, the DPS Staff Rate Panel ("SRP") recommended that non-firm customers be charged the "incremental cost of gas," or ICOG, rather than the weighted average cost of gas, or WACOG, which is what they are charged now. (Tr. 2966.) On rebuttal, National Grid's Rate Design Panel demonstrated why such a radical change is not justified and, in fact, would be counter-productive and harmful to existing non-firm customers and efforts to balance supply and demand on the KEDNY system:

Q. DO THE COMPANIES AGREE WITH THE SRP'S RECOMMENDATION TO USE ICOG INSTEAD OF WACOG IN THE GAS COST CALCULATION FOR NON-FIRM CUSTOMERS?

A. No. The Companies do not agree with this recommendation. KEDNY and KEDLI's combined portfolios include having gas available for TC and IT sales customers down to 15 degrees Fahrenheit. The Companies manage the KEDNY and KEDLI supply portfolios on a combined basis per Case

> 05-G-0903 to maximize supply and demand synergies. Therefore, it would be inequitable for any sales customers to pay only a portion of the supply portfolio costs. TC and IT gas costs have been calculated using the WACOG since January 1, 2017. The SRP states that the Companies have not created adequate incentives to prevent non-firm customer from migrating to firm service. **However, this recommendation would increase gas costs to non-firm sales customers because the ICOG is almost always higher than the WACOG. In addition, the SRP's argument that firm customers are subsidizing non-firm is not correct, because the times when the ICOG is likely to be set (e.g., the coldest days) are the times when non-firm customers can expect to be interrupted. When this happens, non-firm customers have no cost responsibility for setting the ICOG. The main result of using ICOG instead of WACOG would be to charge non-firm customers the costs they are trying to avoid, reducing their incentive to take non-firm service.** (Tr. 2834 [emphasis added]).

The fact that the Companies plan their gas procurement to include non-firm customers down to the designated gas interruption temperatures means that they should be treated the same as firm sales customers, which is exactly what the Companies are proposing by charging them WACOG and including them in the annual gas cost reconciliation. (*See* Tr. 2835.) Staff's proposal to dramatically change how non-firm customers are charged for the cost of gas should be rejected because it will drive customers away from non-firm service and further strain National Grid's ability to meet future demands, a result that no party wants.

Depreciation

The Commission should reject National Grid's proposal to significantly increase depreciation rates and expense for the LPP plant accounts by shortening the recovery period for the remaining net book value to 20 years and by significantly increasing the estimated cost of removing LPP assets. Initially, as City expert witness Lane Kollen testified, National Grid's proposal to shorten the amortization periods for the LPP assets is not supportable and will impose large and unnecessary rate increases on its customers:

> The Companies' proposal to shorten the amortization period is unreasonable. Once the net book value is reclassified to a regulatory asset, the remaining lives of the plant assets are irrelevant. There is no compelling reason for the Commission to accelerate the recovery of these costs even if it agrees with the Companies' plan to accelerate the retirement and replacement of the LPP plant assets. The Companies' proposal will compound the costs to customers, who will be required to pay for the cost

> of the retired LPP assets as well as the cost of the replacement assets. (Tr. 5398.)

Given the large increases sought by the Companies in these proceedings, the proposed changes to the LPP asset amortization periods should be rejected and the current depreciation rates maintained. In the alternative, Staff's proposed 30 year amortization periods should be adopted.

Similarly, the impact of the Companies' proposed changes in calculating the cost of LPP removal are extreme and so unreasonable that they should not be relied on. For example, the costs of LPP asset removal resulting from National Grid's flawed analyses sum to almost $900 million over the proposed twenty-year amortization period, nearly six times the remaining net book value of the plant being retired. (Tr. 5397-5398.) These analyses were based on a three year average of removal costs that was both limited and highly variable, and National Grid failed to conduct a reasonableness check against these statistical estimates based on their construction forecasts for the costs of the LPP plant replacement. (Tr. 5405-5406.) City witness Mr. Kollen testified that the Commission should reject National Grid's effort to inflate the estimated future cost of removal for LPP assets because it imposes an unnecessary and wholly avoidable burden on ratepayers:

> The better approach is for the Commission to direct the Companies to defer the actual costs of removal to the regulatory assets when the costs are incurred and then depreciate (amortize) the increase in the regulatory assets using the presently approved depreciation (amortization) rates. This approach is equitable to both the Companies and their customers and is fully compensatory to the Companies. It will permit the Companies to recover 100% of their actual costs of removal after they are confirmed. (Tr. 5399.)

The City's position of maintaining the current depreciation rates and deferring the actual costs of removal as they are incurred for recovery using approved amortization rates should be adopted. This approach is equitable because it is fully compensatory to the Companies without imposing large and unjustifiable rate increases on customers during these extraordinary times. Importantly, the City's depreciation expense adjustments would reduce the revenue requirements of KEDNY and KEDLI by $27.5 million and $24.5 million, respectively. (Tr. 5395.)

Respectfully submitted,

COUCH WHITE, LLP

Exhibit 547

PROPOSED AND CURRENT INCENTIVE MECHANISMS

This Exhibit provides the City's proposed incentive mechanisms to accompany the narrative descriptions in the Gas Infrastructure and Safety Panel's testimony. The corresponding incentive mechanism for the current rate plan follows each proposal. These current incentive mechanisms are found in the Joint Proposal ("JP") for the 2016 Rate Plan. The incentive mechanisms represented here are exclusive; the Commission should not approve proposals not contained herein.

A. Leak Prone Pipe Retirement

NYC Proposed Incentive

Year	KEDNY		KEDLI	
	Min. Target (mi)	NRA for failure to meet target (bp)	Min. Target (mi)	NRA for failure to meet target (bp)

H. Low-Pressure LPP Removal in the 2015 FEMA 500-Year Floodplain

NYC Proposed Low-Pressure LPP Incentive (CY 2020-2023)

Basis Points Awarded	0	1	2	3	4	5
Minimum Miles Removed (KEDNY)	8.2	10.2	12.2	14.2	16.2	≥ 18.2
Minimum Miles Removed (KEDLI)	6.6	8.6	10.6	12.6	14.6	≥ 16.6

Current LPP Removal Incentive (JP Sections IV.8.1.2 and V.8.1.2)

Calendar Year	KEDNY Mileage Baseline*	KEDLI Mileage Baseline*
2017	56	116
2018	61	136
2019	66	156

* KEDNY and KEDLI will earn two basis points for each full mile above the baseline, capped at 10 basis points per year.

I. Accelerated Leak Elimination Incentive

NYC Proposed KEDNY Leak Elimination Targets (CY 2020-2023)

Leak Elimination Target	Percent Above Minimum	PRA for Meeting Target (bp)
560	0%	0
616	10%	1
672	20%	2
728	30%	3
784	40%	4
840	50%	5

NYC Proposed KEDLI Leak Elimination Targets (CY 2020-2023)

Leak Elimination Target	Percent Above Minimum	PRA for Meeting Target (bp)
1,640	0%	0
1,804	10%	1
1,968	20%	2
2,132	30%	3
2,296	40%	4
2,460	50%	5

Currently, the Companies can earn one basis point for every 50 type 3 high-emitting leaks eliminated, to a maximum of five basis points per year. (JP Sections IV.8.2.2 and V.8.2.2.)

J. Summary of Maximum Positive Revenue Adjustments for KEDNY and KEDLI

NYC Proposed Maximum Positive Revenue Adjustment in Each Year

Incentive	Maximum Positive Revenue Adjustment
LPP Unit Cost Productivity Incentive	10
Low-Pressure LPP Incentive	5
Accelerated Leak Elimination Incentive	5
Total	**20**

Current Maximum Positive Revenue Adjustment in Each Year

Incentive	Maximum Positive Revenue Adjustment
LPP Unit Cost Productivity Incentive	10
LPP Removal Incentive	5
High-Emitting Leak Repair Incentive	5
Total	**20**

The SC-1 low income bill impacts are using the Energy Affordability Credit of a $3.00 for a customer in the Tier 1 benefit level.
In accordance with the Order in Case 14-M-0565 issued February 17, 2017, there are six Energy Affordability Credit tiers.
The Heating customers Tiers : Tier 1: $18.00, Tier 2: $37.00, Tier 3: $56.00, Tier 4: $42.00, Tier 5: $18.00, Tier 6: $18.00
The Non-Heating customers Tiers : Tier 1-Tier 6: $3.00

The SC-1 low income bill impacts are using the Energy Affordability Credit of a $3 for a customer in the Tier 1 benefit level.
In accordance with the Order in Case 14-M-0565 issued February 17, 2017, there are five Energy Affordability Credit tiers.
The Heating customers Tiers : Tier 1: $18.00, Tier 2: $37.00, Tier 3: $57.00, Tier 4: $42.00, Tier 5: $18.00
The Non-Heating customers Tiers : Tier 1-Tier 5: $3.00

The SC-1 low income bill impacts are using the Energy Affordability Credit of a $3 for a customer in the Tier 1 benefit level.
In accordance with the Order in Case 14-M-0565 issued February 17, 2017, there are five Energy Affordability Credit tiers.
The Heating customers Tiers : Tier 1: $18.00, Tier 2: $37.00, Tier 3: $57.00, Tier 4: $42.00, Tier 5: $18.00
The Non-Heating customers Tiers : Tier 1-Tier 5: $3.00
