I. Introduction and Qualifications

Q. Please introduce the members of the Revenue Requirements Panel.

A. The Panel consists of James M. Molloy, Paula Leaverton, Mark W. Stiner, John E. O'Shaughnessy, and Sam Dunton.

Q. Mr. Molloy, please state your name and business address.

A. My name is James M. Molloy. My business address is 170 Data Drive, Waltham, Massachusetts 02451.

Q. By whom are you employed and in what capacity?

A. I am employed by National Grid USA Service Company, Inc. ("National Grid Service Company"), a subsidiary of National Grid USA ("National Grid"), as Vice President of New York Regulation and Pricing. In that position, I am responsible for the rates and regulatory affairs of National Grid's New York operating companies including The Brooklyn Union Gas Company d/b/a National Grid NY ("KEDNY" or "Company") and KeySpan Gas East Corporation d/b/a National Grid ("KEDLI") (collectively KEDNY and KEDLI are referred to as the "Companies").

Q. Please describe your educational background.

A. In 1992, I graduated from Catholic University with a Bachelor of Arts in Accounting. In 1994, I received a Master's in Business Administration with a concentration in Finance from the William E. Simon Graduate School of Business Administration at the University of Rochester.

Q. What is your professional background?

A. In 1995, I was hired by the New England Power Service Company as an Assistant Rate Analyst. In 1996, I was promoted to the position of Rate Analyst. In 1998, I was promoted to the position of Senior Rate Analyst. In those positions, I was responsible for rate design analysis for various New England Electric System ("NEES") companies. Specifically, I conducted allocated distribution cost of service studies and supported others in the development of cost allocation and rate design studies. In addition, I performed rate and cost allocation analytical work in the unbundling of rates for the NEES retail companies in preparation for industry restructuring. Further, I developed and implemented the rate plan for the merger of Narragansett Electric, Blackstone Electric, and Newport Electric. In 2001, I was promoted to the position of Principal Regulatory Analyst. In this position, I was responsible for the development and implementation of the Niagara Mohawk Power Corporation d/b/a National Grid ("Niagara Mohawk") and National Grid plc

merger rate plan. In 2004, I was promoted to Manager of New York accounting. In this position, I was responsible for the books and records of Niagara Mohawk as well as the regulatory filings associated with the acquisition of KeySpan Corporation. In 2008, I was promoted to the position of Director of Regulatory Compliance. In 2009, I became the Director of Regulatory Accounting. In 2011, I became the Director of Revenue Requirements, and in 2019, I became the Vice President of New York Regulation and Pricing, which is my current position.

Q. Have you previously testified before a regulatory commission?

A. Yes. I have testified numerous times before the New York State Public Service Commission ("Commission"), the Massachusetts Department of Public Utilities, and the Rhode Island Public Utilities Commission. Most recently, I testified on behalf of Niagara Mohawk in Cases 20-E-0380 and 20-G-0381 ("2020 NMPC Rate Case"). I also testified on behalf of KEDLI and KEDNY in Cases 19-G-0309 and 19-G-310 (collectively, the "2019 Rate Case").

Q. Ms. Leaverton, please state your name and business address.

A. My name is Paula M. Leaverton and my business address is 170 Data Drive, Waltham, Massachusetts 02451.

Q. By whom are you employed and in what capacity?

A. I am currently employed by National Grid Service Company as Director of the Property Tax department. In this capacity, I am responsible for directing and managing all aspects of real estate and personal property tax payment, compliance, and strategy for National Grid's US operating companies, including KEDNY and KEDLI.

Q. Please describe your educational background.

A. I received a Bachelor of Arts in English from the University of Massachusetts at Amherst in 1986.

Q. What is your professional background?

A. I joined National Grid in April 2010. Prior to taking my current position, I was employed from 1997 to 2010 by Stop & Shop Supermarket Company as Senior Manager of Lease Administration and Property Tax. In this role, I directed and managed the lease administration and property tax functions for 1,350 investment and corporate facilities. My responsibilities included all property tax payment and compliance functions, property tax strategy for new retail locations, directing the real estate and personal property tax abatement program, and initiating appeals with tax assessors and local government bodies. From 1987 to 1997, I was employed as the Sales, Use and Property

Tax Manager for Equis Financial Group. My responsibilities included all sales, use, and property tax payment and reporting for leased equipment assets throughout the US. From 1986 to 1987, I was employed by the Commonwealth of Massachusetts Department of the Attorney General as a Consumer Complaint Mediator.

Q. Have you previously testified before the Commission?

A. Yes. I testified on behalf of KEDNY and KEDLI in the 2019 Rate Case and in Cases 16-G-0058 and 16-G-0059 ("the 2016 Rate Case"), and on behalf of Niagara Mohawk in the 2020 NMPC Rate Case and in Cases 17-E-0238 and 17-G-0239.

Q. Mr. Stiner, please state your name and business address.

A. My name is Mark W. Stiner. My business address is 300 Erie Boulevard West, Syracuse, New York 13202.

Q. By whom are you employed and in what capacity?

A. I am employed by National Grid Service Company as Principal Analyst of Revenue Requirements for New York, supporting the New York operating companies, including KEDNY, KEDLI, and Niagara Mohawk.

Q. Please describe your educational background.

A. I received a Bachelor of Science in Finance from Siena College in 1985. I received a Master in Business Administration with a concentration in Accounting from Fordham University in 1994.

Q. What is your professional background?

A. Prior to joining National Grid, I held various positions of increasing responsibility in the Accounting department of Mitsui & Co. (U.S.A.), Inc., including assistant general manager of external financial reporting. I joined the Finance department of Niagara Mohawk in 1999 as a Financial Analyst with various responsibilities, including developing a budgeting system for Niagara Mohawk. Following the merger in 2002, I transitioned to National Grid as an Enterprise Resource Planning ("ERP") Senior Analyst leading the financial business planning team on the ERP system project and in 2005 was promoted to Principal Analyst in Financial Systems and Support leading the support of long-term financial planning. In 2009, I became Lead Specialist in the Regulatory and Pricing department responsible for supporting New York revenue requirements. In 2019, I was promoted to Principal Analyst of Revenue Requirements for New York, which is my current position.

Q. Have you previously testified before a regulatory commission?

A. Yes. I testified on behalf Niagara Mohawk in the 2020 NMPC Case.

Q. Mr. O'Shaughnessy, please state your name and business address.

A. My name is John E. O'Shaughnessy. My business address is 2 Hanson Place, Brooklyn, New York 11217.

Q. By whom are you employed and in what capacity?

A. I am employed by National Grid Service Company as a Director of Revenue Requirements for New York, supporting National Grid's New York operating companies, including KEDNY and KEDLI, and responsible for providing leadership and oversight of the preparation of various exhibits and analyses associated with the Company's cost of service and revenue requirement filings in this case.

Q. Please describe your educational background.

A. I received a Bachelor of Science degree in Accounting from Long Island University at C.W. Post and also hold an Associate of Science degree in Engineering Science and an Associate of Applied Science degree in Accounting from Suffolk County Community College. I am a Certified Public Accountant

licensed in the State of New York and a Member of the American Institute of Certified Public Accountants.

Q. What is your professional background?

A. Prior to joining the Long Island Lighting Company ("LILCO") in 1993, I was employed as a Senior Auditor by Ernst and Young LLP. In my nearly 30 year tenure at National Grid and its predecessors, I have served in a number of positions and worked on a number of corporate strategic initiative teams including Principal Accountant in Regulatory and Financial Reporting (1993-1997). I also served as a Merger Integration Team member working on the merger between LILCO and the Brooklyn Union Gas Company that resulted in the creation of KeySpan Corporation ("KeySpan") (1997-1998), Senior Analyst for Financial Planning (1998-1999), Senior Analyst for Accounting Systems (1999-2000), Implementation Team Member for KeySpan's new Oracle Financial System (2000-2001), Manager of New Financial Systems Planning (2001-2002), Director of Internal Audit Services (2002-2005), Director Downstate NY Rate Case Team (2005-2007), Director of Service Company Accounting and Support (2009-2011), Director of Service Company Audits (2011-2012) and Principal Program Manager for Downstate New York Revenue Requirements, a position I held until assuming my present responsibilities in the spring of 2014.

Q. Have you previously testified before any regulatory agencies?

A. I have testified before the Commission in Cases 06-G-1185 and 06-G-1186 and before the New Hampshire Public Utilities Commission in Case DG 08-009.

Q. Mr. Dunton, please state your name and business address.

A. My name is Samuel F. Dunton and my business address is 170 Data Drive, Waltham, Massachusetts 02451.

Q. By whom are you employed and in what capacity?

A. I am employed by National Grid Service Company as Director of Finance Business Partnering for Performance and Regulatory. In that position, I am responsible for managing the financial performance of National Grid's New York operating companies including KEDNY and KEDLI.

Q. Please describe your educational background.

A. In 2012, I graduated from Indiana University, Kelley School of Business with a Bachelor's degree in finance.

Q. What is your professional background?

A. In 2017, I was hired by National Grid as a Senior Financial Analyst supporting the New England business for budgeting, forecasting, and financial reporting activities. In 2018 I was promoted to manager of Finance Business Partnering for Customer Operations where I was responsible for assisting in the achievement of financial commitments within that department. In 2019 I assumed the position of Manager of Corporate Finance supporting US level budgeting, forecasting and financial reporting. I was subsequently promoted to Director in 2020 within the Corporate Finance team. In 2021 I joined the New York team as the Director of Financial Planning and Analysis, overseeing New York financial reporting and performance. In 2023 I assumed my current position within the New York Finance team as the Finance Business Partner for Performance and Regulatory. Prior to joining National Grid, I was employed by IBM from 2012-2017 where I held various financial positions supporting their consulting business.

II. <u>Purpose of Testimony and Overview of Filing</u>

Q. What is the purpose of the Panel's testimony?

A. The purpose of the Panel's testimony is to support KEDNY's request to increase its gas delivery rates. In support of this request, the Panel will:

(i) present KEDNY's historic and forecast financial data for various periods in a manner consistent with the Commission's regulations and policies;

(ii) describe KEDNY's forecast of operation and maintenance ("O&M") expenses, as well as adjustments to those expenses that were made to normalize the historic test year amounts;

(iii) describe KEDNY's efforts to reduce its cost of service and detail how savings related to specific Company productivity initiatives were reflected in the filings;

(iv) discuss the development of KEDNY's gas rate base;

(v) support KEDNY's forecast of regulatory deferral balances, including the proposal to aggregate and net together certain regulatory asset and liability accounts and recover the net balance in base rates over a 10-year amortization period; and

(vi) describe proposed treatment for deferrals that the Commission has previously adopted, as well as proposed new deferral mechanisms.

The Panel will also describe the Company's efforts in connection with the preparation of this rate filing to review the accuracy of costs in the historic test year and to appropriately normalize these results for known and measurable

changes that have or will occur between the end of the historic test year and the rate year.

Q. Is the Panel sponsoring any exhibits as part of its testimony?

A. Yes. The Panel sponsors the following exhibits and appendices that were prepared by or under the supervision and direction of the Panel:

Exhibit __ (RRP-1)	Statement of Gas Operating Incomes, by Component, for the Historic Test Year Ended December 31, 2022, Rate Year Ending March 31, 2025, and Data Years Ending March 31, 2026, March 31, 2027, and March 31, 2028;
Exhibit __ (RRP-2)	Summary of Normalizing Analysis and Adjustments;
Exhibit __ (RRP-3)	Gas O&M Expenses by Expense Type for the Historic Test Year Ended December 31, 2022, Rate Year Ending March 31, 2025, and Data Years Ending March 31, 2026, March 31, 2027, and March 31, 2028;
Exhibit __ (RRP-4)	Gas Depreciation Expenses for the Historic Test Year Ended December 31, 2022, Rate Year Ending March 31, 2025, and Data Years Ending March 31, 2026, March 31, 2027, and March 31, 2028;
Exhibit __ (RRP-5)	Gas Taxes Other than Income Taxes for the Historic Test Year Ended December 31, 2022, Rate Year Ending March 31, 2025, and Data Years Ending March 31, 2026, March 31, 2027, and March 31, 2028;
Exhibit __ (RRP-6)	Gas Federal and State Income Taxes for the Historic Test Year Ended December 31, 2022, Rate Year Ending March 31, 2025, and Data Years Ending March 31, 2026, March 31, 2027, and March 31, 2028;

Exhibit __ (RRP-7)	Gas Rate Bases for the Historic Test Year Ended December 31, 2022, Rate Year Ending March 31, 2025, and Data Years Ending March 31, 2026, March 31, 2027, and March 31, 2028;
Exhibit __ (RRP-8)	Table of Inflation Factors;
Exhibit __ (RRP-9)	Deferral Exhibits;
Exhibit __ (RRP-10)	Various Historic Financial Exhibits for Calendar Years 2018 through 2021; and
Exhibit __ (RRP-11)	Workpaper Data Supporting Certain Exhibits
Appendix A	Description of Regulatory Assets and Liabilities
Appendix B	Current and Proposed Revenue Adjustments and Incentives

Q. What is the historic test year in these proceedings?

A. The historic test year in these proceedings is the twelve months ended December 31, 2022 ("Historic Test Year"). The Historic Test Year data consists of the costs recorded on the books of KEDNY, including: (i) costs incurred directly by the Company; (ii) costs charged to KEDNY from National Grid Service Company and National Grid Engineering & Survey, Inc. (collectively, the "Service Company"); and (iii) costs charged to KEDNY from other affiliated companies.

Q. What Historic Test Year and Rate Year information is the Company presenting?

A. The Company is presenting operating results for the Historic Test Year and forecast data for the rate year, which is the twelve months ending March 31, 2025 ("Rate Year"). In addition, the Company is including forecast data for the twelve months ending March 31, 2026 ("Data Year 1"), March 31, 2027 ("Data Year 2"), and March 31, 2028 ("Data Year 3") (collectively, the "Data Years") for informational purposes and to facilitate the possibility of a multi-year rate settlement in these proceedings. The forecast data provides the basis for computing the revenue requirement for the Rate Year and Data Years in these proceedings. The information presented in these filings is consistent with that required under the Commission's "Statement of Policy on Test Periods in Major Rate Proceedings."

Q. What are KEDNY's revenue requirements and associated revenue deficiencies based on current rates?

A. Based on the cost of services set forth in the Company's filing, for the Rate Year, KEDNY's revenue deficiency is $414.222 million, based on a 9.8 percent return on equity and a 48 percent common equity ratio, as supported by Company Witness Joshua Nowak and the Capital Structure Panel. If a four-year settlement is reached, the Company proposes that a return on equity of 10.3

percent be used to calculate the revenue requirement, as supported by Mr. Nowak.

In the absence of the rate relief requested in this filing, KEDNY projects that it would earn a rate of return in the Rate Year of 2.96 percent, which equates to a return on equity of 1.18 percent – well below KEDNY's currently authorized return of 8.8 percent.

Q. How does KEDNY propose to address the current revenue deficiencies?

A. The Company is proposing to increase base delivery rates, which were last set in the 2019 KEDNY and KEDLI Rate Cases, to permit the Company to recover its costs of providing service and allow the Company an opportunity to earn a fair return. As part of a multi-year settlement, the Company would consider levelizing the proposed rate increase to ease the impact on customers.

Q. Please describe Exhibit __ (RRP-1).

A. Exhibit __ (RRP-1) consists of six summary pages showing the calculation of KEDNY's operating incomes for the Historic Test Year, Rate Year and Data Years. The exhibit presents the computation of the base gas revenues in these proceedings, comprising:

- Operating Revenues, Commodity Revenue, Gross Revenue Taxes, and Total Delivery Revenue for the Rate Year and Data Years at present rates supported by Exhibit __ (RDP-2);
- O&M Expenses supported by Exhibit __ (RRP-3);
- Depreciation, Amortization, and Loss on Disposition supported by Exhibit __ (RRP-4);
- Taxes Other Than Income Taxes supported by Exhibit __ (RRP-5);
- Total Income Taxes supported by Exhibit __ (RRP-6); and
- Rate Base and amortization of the Site Investigation and Remediation ("SIR") regulatory deferral supported by Exhibit __ (RRP-7).

The summary page one contains six columns that show by component: (i) the Historic Test Year actual operating income at present rates; (ii) adjustments to normalize the Historic Test Year; (iii) adjustments to reflect conditions in the Rate Year; (iv) the Rate Year operating income at present rates; (v) the base rate revenue increase required by the Company; and (vi) the Rate Year operating income with the base rate revenue increase. The summary pages two, three and four contain five columns that show by component: (i) the prior Rate Year or Data Year; (ii) adjustments to reflect conditions in the Data Year; (iii) the Data Year operating income at prior year's rates; (iv) the base rate revenue increase required by the Company; and (v) the Data Year operating income with

the base rate revenue increase. The summary pages five and six include the capital structure for the Rate Year and Data Years supported by the Capital Structure Panel.

III. Historic Test Year Cost Review and Trend Analysis

Q. What efforts did the Company undertake to ensure the accuracy of its Historic Test Year costs?

A. The Company recognizes the importance of demonstrating the accuracy of its Historic Test Year costs. Accordingly, to validate the accuracy and integrity of Historic Test Year costs, and to facilitate Staff's review of these costs, the Company undertook extensive efforts to ensure that costs incurred in the Historic Test Year were thoroughly reviewed and appropriately normalized.

Q. Did the Company's review of Historic Test Year transactions follow the same general process as the reviews conducted in prior National Grid rate cases?

A. Yes. As discussed in detail below, the Company followed the same general process undertaken in the 2019 KEDNY and KEDLI Rate Cases and the 2020 NMPC Rate Case for all cost areas throughout the Historic Test Year.

Q. Please describe the Company's review of Historic Test Year costs.

A. The Historic Test Year includes (i) costs charged to the Company (direct or allocated) from the Service Company and (ii) costs either originating in the Company or charged to it by its affiliates. The Company reviewed costs in both categories to confirm that the Historic Test Year contains costs appropriately charged to KEDNY and to provide the Company with additional assurance that Historic Test Year costs are correctly stated (the "Historic Test Year Review").

Table 1 reflects the total Service Company and operating company costs by cost area and the total amounts the Company examined, including a percentage breakdown.

Table 1: Examination Summary

KEDNY Cost Area	Total Costs considered for examination	Total Examined	Percentage Examined
Vendor Cost	786,585,708	605,267,928	77%
Labor Cost	276,193,424	276,193,424	100%
Employee Expenses	2,862,925	1,188,716	42%
Manual Journal Entries	310,106,525	51,829,354	17%
TOTAL	**1,375,748,582**	**934,479,422**	**68%**

Service Company Cost Area	Total Costs considered for examination	Total Examined	Percentage Examined
Vendor Cost	1,885,055,940	1,464,843,270	78%
Labor Cost	604,525,577	376,035,848	62%
Employee Expenses	23,602,005	5,139,229	22%
Manual Journal Entries	723,494,128	249,791,403	35%
TOTAL	**3,236,677,650**	**2,095,809,750**	**65%**

Q. Please describe the approach taken by the Company to conduct the Historic Test Year Review.

A. The review was focused on testing that costs were appropriately charged to the Company, including those allocated from the Service Company, and reflected the actual costs incurred to deliver service during the Historic Test Year. The review was designed to identify errors, positive or negative, that may have occurred.

The Company reviewed four types of charges: (i) vendor costs; (ii) labor costs; (iii) employee expense costs; and (iv) manual general ledger journal entries. For those charges reviewed, the Company reviewed supporting documentation (*e.g.*, invoices, expense reports, time entry data, receipts, journal entry support) and tested that: (i) the charge was recorded to or allocated to the appropriate company(ies); (ii) if allocated, an appropriate allocation code was used; and (iii)

the work for which the charge was incurred took place (collectively, the "Examination Process").

If, after the Examination Process and the testing, the Company believed the charge was recorded inconsistently with the examination criteria outlined in the Report (discussed below), the Company identified the amount as an exception.

Q. Did the Company document its review and findings?

A. Yes. The Company prepared a report entitled "Historic Test Year Financial Review Results" that is included in Exhibit __ (RRP-2), Schedule 2 (the "Report"). The Report is divided into four main sections:

- *Risks and Approach* – describes the cost areas the Company reviewed (*e.g.*, vendor costs, labor costs, employee expenses, and manual general ledger journal entries) and the manner in which the Company identified and tested those costs.
- *Results and Findings – Summary Impact on KEDNY and KEDLI* – summarizes the impact of the testing on KEDNY and KEDLI and includes the total dollar amounts reviewed in each cost area, the number of exceptions identified, and the net effect of the exceptions.
- *Results and Findings* – presents the detailed findings for each of KEDLI, KEDNY, and the Service Company. These sections contain

specific information for each of the four cost areas reviewed, identifying, for example, each vendor, the number of items reviewed for that vendor, and the amount of the exceptions.

- *Summary of Costs* – contains a detailed summary of the costs reviewed in each quarter of the Historic Test Year and further information describing the manner in which the Company tested those costs.

Q. Please summarize the Company's findings.

A. The review demonstrated that the Historic Test Year costs included in the scope, including those charged from the Service Company, as adjusted, are, in all material respects, accurate and properly recorded. As shown in the *Results and Findings – Summary Impact on KEDNY and KEDLI* section of the Report, the review noted exceptions of $(224,960) for KEDNY and $(618,096) in Service Company charges impacting KEDNY. The total findings for KEDNY are approximately 0.14 percent of its O&M costs, supporting the determination that the cost data in the Historic Test Year is accurate and a reasonable basis for establishing rates.

Q. Did the Company make an adjustment to reflect the exceptions?

A. KEDNY made adjustments to reduce the Historic Test Year expense of various expense types by a total of $0.902 million, the details of which are provided in

Exhibit __ (RRP-2), Schedule 3. The Company did not make an adjustment for the remaining exceptions because those costs were either already corrected by the Company, not included in the Historic Test Year O&M amounts (*e.g.,* were already included below the line in the cost of service), or it was not possible to determine if adjustments were warranted without the benefit of future period data (specifically, as related to the accruals findings).

Vendor Costs

Q. Please describe the Company's review of vendor costs.

A. For each quarter of the Historic Test Year, the Company:

- Examined 40 percent of each unique transaction type per vendor and a minimum of 10 percent of the invoices per unique transactions for both KEDNY and KEDLI. A "transaction" was defined as a vendor's work on a particular project, within a particular department at National Grid. For example, if a vendor was performing work for one department under ten different projects, each project would each be considered a unique transaction (of which the Company would review at least 40 percent). A minimum of 10 percent of the invoices for each of the transactions selected for testing was also examined.

- For Service Company, the same sampling approach was adopted for all vendors, which represented aggregate costs of more than $1.465 billion (roughly 78 percent of the population).

As part of the Examination Process, the Company compared the costs recorded in the general ledger to the supporting documentation, tested that the services related to the company to which they were charged and, for charges assigned to capital projects, tested that the service was performed in support of the capital program.

Table 2 shows the total dollar amounts and number of invoices reviewed, the net impact of the exceptions, and the number of exceptions.

Table 2: Vendor Cost Summary

	Presented in Summary of Costs ($)	Presented in Summary of Costs #	Net impact of exceptions ($)	Number of exceptions
KEDNY	605,267,928	9,287	(211,194)	29
KEDLI	246,020,408	3,092	8,622	9
ServCo	1,464,843,270	8,167	(1,016,731)	172
TOTAL	**2,316,131,606**	**20,546**	**(1,219,303)**	**210**

Labor Costs

Q. Please describe the Company's review of labor costs.

A. The Company conducted a number of tests of labor costs.

For Service Company employees, the Company selected for testing a sample of base time and overtime pay charges recorded by cost centers in the 15 largest departments as determined by labor costs incurred, and 25 departments selected without bias that were ranked greater than 15 based on labor costs incurred. The Company tested whether the costs charged were consistent with the employee's job title and functional area.

For the Company's operating company employees, the Company selected a sample of base time and overtime pay charges. As part of the Examination Process, the Company used metrics to identify outlier entries (*e.g.*, more than 12 hours in a day, hours worked between midnight and 04:00 hours, and multiple entities charged in one day). When an outlier was identified, the Company investigated to determine whether the charge was appropriate.

Table 3 shows the total dollar amounts reviewed, the net impact of the exceptions, and the number of exceptions.

Table 3: Labor Cost Summary*

	Presented in Summary of Costs($)	Net impact of exceptions ($)	Number of exceptions
KEDNY	276,193,424	0	0
KEDLI	168,995,417	0	0
ServCo	376,035,848	(3,606)	35
TOTAL	**821,224,689**	**(3,606)**	**35**

* Labor costs considered for examination included all labor dollars and therefore the number of items is not applicable.

Employee Expense Costs

Q. Please describe the Company's review of employee expenses.

A. For each quarter of the Historic Test Year, the Company selected and tested the following charges:

- the top 25 single employee expense reports and top 50 purchase credit card ("P-card") transactions based on dollars approved for payment;
- 15 sampled expense reports selected without bias ranked between 26 and 100 based on dollars approved for payment;
- 10 sampled expense reports selected without bias ranked greater than 100 based on dollars approved for payment; and
- 25 sampled P-card transactions selected without bias ranked greater than 50 based on dollars approved for payment.

As part of the Examination Process, the Company reviewed whether the charges complied with the Company's U.S. Business Travel and Expense Policy and P-card guidelines.

Table 4 shows the total dollar amounts and number of expense reports/P-card transactions reviewed, the net impact of the exceptions, and the number of exceptions.

Table 4: Employee Expense Cost Summary

	Presented in Summary of Costs ($)	Presented in Summary of Costs #	Net impact of exceptions ($)	Number of exceptions
KEDNY	1,188,716	500	(8,037)	80
KEDLI	536,246	500	(961)	61
ServCo	5,139,229	499	(67,915)	93
TOTAL	**6,864,191**	**1,499**	**(76,913)**	**234**

Q. Did the Company perform any additional reviews of employee expenses?

A. Yes. The Company performed a keyword search of employee expenses to identify charges that should be normalized. If a keyword came up during the search, the Company performed a more detailed review to investigate whether the charge should be removed. Lastly, consistent with prior National Grid rate filings, the Company removed Band A (senior officers) employee expenses from the Historic Test Year. Adjustments identified as part of this additional

review of employee expenses are reflected on Exhibit __ (RRP-3), Schedule 4 and Exhibit __ (RRP-2), Schedule 3.

General Ledger Journal Entries

Q. Please describe the Company's review of operating expense general ledger journal entries.

A. The Company selected for testing a sample of manual journal entries, focusing on manual entries as the likelihood of a potential misallocation is greater with manual entries than system-generated entries. The categories of journal entries are listed in the "Summary of Costs" section of the reports.

Table 5 shows the total dollar amounts and number of journal entries (a single journal entry can contain hundreds of line items of accounting) reviewed, the net impact of the exceptions, and the number of exceptions.

Table 5: Journal Entries Summary

	Presented in Summary of Costs ($)	Presented in Summary of Costs #	Net impact of exceptions ($)	Number of exceptions
KEDNY	51,829,354	190	(5,729)	6
KEDLI	14,213,857	147	1,476	6
ServCo	249,791,403	200	0	0
TOTAL	**315,834,615**	**537**	**(4,253)**	**12**

Additional Reviews

Q. Did the Company conduct any additional review of Historic Test Year costs?

A. Yes. The Company performed two additional reviews of Historic Test Year vendor costs to ensure that the costs are accurate and appropriate to use as a basis for forecasting the Rate Year ("Additional Review of Historic Test Year Costs"). The first review consisted of vendor charges organized by vendor name and expense type to identify potential charges that should be removed from the Historic Test Year, including, for example, charitable donations, lobbying expenses, and other charges that should be accounted for below the line for ratemaking purposes. The adjustments from the Additional Review of Historic Test Year Costs are presented as separate line items in Exhibit __ (RRP-2), Schedule 1.

The second review consisted of dues and subscriptions expenses incurred during the Historic Test Year. Pursuant to the recently enacted Public Service Law § 114-a, a utility is precluded from including in rates the cost of membership dues for any organization, association, institution, cooperation or any other entity that engages in legislative lobbying. The membership dues associated with organizations engaging in legislative lobbying have been

removed from the Historic Test Year, as shown in Exhibit __ (RRP-3), Schedule 7, Other Expense.

Trend Analysis

Q. Did the Company compare Historic Test Year operations and maintenance ("O&M") costs with prior period costs?

A. Yes. The Company performed an analysis to look at changes in expenses incurred by the Company from calendar year ("CY") 2018 through the Historic Test Year (the 12 months ended December 31, 2022). The purpose of the review was to look at trends in costs by functional area incurred by the Company directly, as well as from the Service Company and affiliates that charge the Company. The Company examines its total cost of providing service to draw meaningful conclusions regarding year-over-year variations. The Company conducted this examination by combining: (i) costs incurred directly by the Company, (ii) costs charged to the Company from the Service Company, and (iii) costs charged to the Company from other affiliates. The analysis of costs based on the combination of direct and indirect charges highlights and clarifies the factors driving cost increases and decreases by removing the impact of organizational changes that merely shift costs rather than actual changes in costs from year-to-year. Exhibit __ (RRP-2), Schedule 4 presents a comparison of total O&M costs for the period from CY 2018 through the Historic Test Year.

Q. What does Exhibit __ (RRP-2), Schedule 4 show?

A. Exhibit __ (RRP-2), Schedule 4 shows that the Company has been able to achieve lower departmental costs as compared to the Historic Test Year in the Company's previous rate case (*i.e.*, CY 2018) despite experiencing increased inflation over the analysis period. The reduction in departmental cost is the product of management efforts by the Company to contain costs to promote affordability as well as the ramp down of the Company's Local Law 30 program, which concluded in 2020. These reductions are partially offset by other net O&M increases resulting from changes in funding levels agreed to in the previous rate case and macroeconomic factors resulting in cost pressures. Comparing the Company's costs today to the previous test year shows that KEDNY reduced costs by $19 million or three percent during a period that saw significant inflationary pressures.

Regarding the source of the cost changes from CY 2018 to the Historic Test Year, Exhibit __ (RRP-2), Schedule 4 illustrates that costs directly incurred at KEDNY have increased by $21 million, cost incurred from the Service Company have decreased $1 million and costs from other affiliates have decreased $39 million.

Q. How does the Company determine whether the costs it incurs from the Service Company are reasonable?

A. The Company validates the accuracy of allocations, updates the calculations that support the allocation methods, and validates that the overall spending levels for the departments are reasonable. The allocations are validated to ensure they follow the Company's Cost Allocation Compliance Program and the overall spending levels are set and reviewed during the annual budget planning process, which includes financial leadership and jurisdictional president reviews.

The Company performs reviews and controls to ensure the allocations are accurate and in agreement with the Company's Cost Allocation Compliance Program. Reviews include vendor payments, employee expenses, and manual journal entries that originate from the Service Company. These reviews validate that the costs are allocated to the companies that cause the costs to be incurred. If errors are found, the Company will record correcting entries.

The Company recalculates rates used for the different allocation methods annually. Employee headcounts, customer counts, and financial data are gathered and used as support for the different allocation methods. Director level reviews are performed as a final check to ensure the accuracy of the updates.

To ensure the spending levels for all departments (including those originating from the Service Company) are properly funded, the Company performs reviews during the budget planning process. The funding levels are compared to prior year results with any significant changes being reviewed and agreed upon. These funding levels are reviewed by the Jurisdictional President and the leaders of each function to ensure they reflect the service levels required. Throughout the year reports are generated monthly that show functional spending for each Company by function. Monthly performance results are reviewed in total with the New York President and leaders of each function to ensure performance is aligned with expected levels of funding and deviations are discussed. Reviews can result in corrective action when necessary if a department begins to exceed agreed upon funding levels.

The combination of the controls in place that validate allocations align with the Company's Cost Allocation Compliance Program, the annual rate methodology updates and the annual budget planning process work together to ensure the costs incurred from the Service Company are reasonable.

IV. O&M Expenses

Q. Please explain the methodology for developing the forecast of O&M expenses in the Rate Year and Data Years.

A. To develop the O&M forecasts, the Company began by determining the costs incurred in the Historic Test Year for the various expense types. Next, the Company reviewed Historic Test Year charges to determine whether specific costs should be normalized, for example, as out-of-period or one-time charges. The inflation factors set forth in Exhibit __ (RRP-8) were then applied to the majority of expense types to forecast the Rate Year and Data Years. Forecasts of certain expenses were developed using a more comprehensive methodology than adjusting for inflation. For example, labor expense was developed by annualizing the monthly and weekly employees on payroll as of the end of the Historic Test Year, adjusting for known changes to the employee headcount, and applying contractual and projected wage increases to forecast the Rate Year and Data Years. Additionally, the Company adjusted forecast O&M expenses to reflect incremental work projected for the Rate Year or costs associated with new initiatives.

Q. What assumptions did the Company make regarding non-labor inflation?

A. Except where specifically identified otherwise, the Company applied the non-labor inflation factor of 6.54 percent to all non-labor expenses in the Historic

Test Year to forecast the Rate Year. This factor is equivalent to a 2.91 percent average annual increase between the Historic Test Year and the Rate Year. The Company applied the non-labor inflation factor of 1.93 percent to forecast Data Year 1, 1.81 percent to forecast Data Year 2, and 1.77 percent to forecast Data Year 3. These factors represent the forecast change in the Chained Price Index GDP Implicit Price Deflator ("GDPIPD") obtained from Moody's, as provided in Exhibit __ (RRP-8). The Panel addresses calculation of the non-labor inflation factor later in its testimony.

Q. What is the basis for the allocations between expense and capital in the Rate Year and Data Years?

A. Except as otherwise indicated, costs in the Rate Year and Data Years are allocated between expense and capital consistent with their Historic Test Year allocation.

Q. Please explain Exhibit __ (RRP-3).

A. Exhibit __ (RRP-3) includes 43 schedules and a summary that shows total adjusted departmental O&M expense for the Historic Test Year of $608.336 million, and a forecast for the Rate Year of $737.692 million. The summary also shows forecasts of total departmental O&M expense for Data Years 1, 2,

and 3 of $768.717 million, $783.725 million, and $800.624 million, respectively.

Each schedule pertains to a specific expense type and contains a minimum of four pages of detail. Page 1 of each schedule consists of three sections that show for each expense type: (i) the Historic Test Year expense per books by Provider Company; (ii) the adjustments to normalize the Historic Test Year expense by Provider Company; and (iii) the adjusted Historic Test Year expense by Provider Company. A Provider Company (also referred to as an originating company) is any company that charged KEDNY for services. Page 2 of each schedule also consists of three sections that show for each expense type: (i) the adjusted Historic Test Year information from Page 1; (ii) the adjustments made to the expenses in the Historic Test Year to reflect conditions in the Rate Year (*e.g.*, inflation) by Provider Company; and (iii) the adjusted Rate Year expense by Provider Company. Page 3 consists of the adjusted Rate Year expense information from Page 2; the adjustments made to expenses in the Rate Year to reflect conditions in Data Years 1, 2, and 3 (*e.g.*, inflation); and the adjusted Data Years 1, 2, and 3 expense by Provider Company. Page 4 consists of an explanation of the adjustments presented on Pages 1, 2, and 3.

Adjustments associated with the Company's review of charges originating from KEDNY and its affiliates are included as a separate line item on Page 4 of each schedule, where applicable, labeled "Historic Test Year Review" or "Additional Review of Historic Test Year Costs," and relate back to Exhibit __ (RRP-2).

Certain Schedules contain additional information relevant to the specific expenses addressed.

Q. Please explain the derivation of the Provider Company O&M expense on Pages 1 through 4 of each Schedule of Exhibit __ (RRP-3).

A. There are several National Grid entities that provide services directly and indirectly to KEDNY. The charges associated with those services are either directly charged to KEDNY or allocated among the various National Grid affiliates (including KEDNY) that receive the services. For example, when the Service Company performs a service for the benefit of a single company, that company is directly charged for that service. If the service is for the benefit of multiple companies, however, the charge is allocated to those companies using an appropriate allocator. Pages 1 through 3 detail charges to KEDNY from the Provider Companies, including the Service Company.

Q. What amount of Service Company costs were incurred by KEDNY in the Historic Test Year?

A. In the Historic Test Year, KEDNY incurred Service Company O&M costs of approximately $179.864 million. These costs are set forth in the summary page of Exhibit __ (RRP-3).

Q. Please describe how the Service Company charged KEDNY for services during the Historic Test Year.

A. Service Company charges were either directly charged to KEDNY or, when a service was performed for multiple affiliates, charges were aggregated and allocated to all affiliates that benefited from the service using approved allocation methodologies. These allocations have been developed to accommodate the different types of costs that are charged by the Service Company.

The allocators are based on cost causation principles and are designed to maximize use of direct allocation codes where charges have been incurred for the direct benefit of a single company. When it is not appropriate to use a direct allocation code, a cost causative code is assigned based on the appropriate causation driver. Where it is not appropriate to use a direct or cost causative code, then a general allocator is used. The general allocator used by the Service

Company is based on a three-point model using Net Margin, Net Plant, and Net O&M expense. These allocation principles are set forth in National Grid's Cost Allocation Manual.

Q. Please explain the expense specific schedules in Exhibit __ (RRP-3).

A. The expense specific schedules are as follows.

Schedule 1 – Consultants

Schedule 1 consists of four pages and shows the costs associated with external consultants performing services for the Company. Page 4 details adjustments to normalize the Historic Test Year, including adjustments to (i) remove costs associated with the Appreciate program, (ii) remove costs identified as part of the Historic Test Year Review, and (iii) remove costs in connection with the Additional Review of Historic Test Year Costs. The Company made an inflation adjustment to the remaining Historic Test Year costs.

Schedule 2 – Contractors

Schedule 2 consists of four pages and shows the costs associated with external contractors performing services for the Company. Page 4 details adjustments to normalize the Historic Test Year, including (i) an adjustment to remove demand response expenses recovered through the Demand Capacity Surcharge

Mechanism ("DCSM"), (ii) an adjustment to reflect a three-year average of collection replevin costs (discussed in the direct testimony of the Customer Panel), (iii) an adjustment to remove costs associated with the Appreciate program, (iv) an adjustment to remove Large Diameter Pipe Joint Encapsulation costs, which will be capitalized in future years (discussed in the direct testimony of the Gas Infrastructure and Operations Panel ("GIOP")), and (v) an adjustment to remove Residential Methane Detector Program costs to be replaced by the new program discussed in the direct testimony of GIOP. In addition, adjustments were made for the Historic Test Year Review and Additional Review of Historic Test Year Costs. These adjustments are further detailed on Exhibit __ (RRP-2), Schedules 1-3. The Company made a further adjustment to increase the remaining Historic Test Year costs by inflation.

Q. How were expatriate costs charged to the Company in the Historic Test Year?

A. Costs for expatriate labor and benefits are initially booked at National Grid plc. An analysis is then performed to determine whether the costs are recoverable from customers. Recoverable expatriate costs are compared to the current available Market Reference Point ("MRP") for comparable positions. The lower of the actual cost or MRP is subsequently recorded to the Service Company and assessed to the Company and/or other affected operating

companies. Accordingly, as costs were reviewed and adjusted before being charged to the Company, no adjustments were made for expatriate costs in the Historic Test Year.

Schedule 3 – Donations

Schedule 3 consists of four pages and shows the costs of charitable donations by the Company. Page 4 shows the removal of these costs from the Historic Test Year.

Schedule 4 – Employee Expenses

Page 4 details adjustments to normalize the Historic Test Year, including adjustments related to both the Historic Test Year Review and the Additional Review of Historic Test Year Costs. The Company applied the proposed inflation factor to the remaining Historic Test Year employee expenses.

Exhibit __ (RRP-2), Schedule 1 shows the removal of Band A employee expenses and the adjustments from the Additional Review of Historic Test Year Costs. Exhibit __ (RRP-2), Schedule 2 shows the adjustments related to the Historic Test Year.

Schedule 5 – Computer Hardware

Schedule 5 consists of four pages and shows the costs of computer hardware used by the Company. Page 4 details adjustments to normalize the Historic Test Year, including an adjustment to increase the remaining Historic Test Year costs by inflation.

Schedule 6 – Computer Software

Schedule 6 consists of four pages and shows the costs of computer software used by the Company. Page 4 details adjustments to normalize the Historic Test Year, including an adjustment to increase the remaining Historic Test Year costs by inflation.

Schedule 7 – Other

Schedule 7 consists of four pages and shows costs incurred by the Company for utility purposes that are not otherwise identified in specific expense types. Page 4 details several adjustments to normalize the Historic Test Year, including (i) the reclassification of Economic Development Grants to reflect them in individual schedules to provide greater transparency, (ii) an adjustment to remove costs associated with the Appreciate program, and (iii) an adjustment to remove dues and subscriptions costs. In addition, the Company made an adjustment to remove demand response expenses recovered through the DCSM. In addition, adjustments were made for the Historic Test Year Review and

Additional Review of Historic Test Year Costs. These adjustments are further detailed on Exhibit __ (RRP-2), Schedule 1-3. The Company applied the proposed inflation adjustment to the remaining Historic Test Year costs.

Schedule 8 – Rent Expense

Schedule 8 consists of 9 pages and shows the rent expense incurred by the Company. The first three pages are the same as the other schedules, and Page 4 details several adjustments to normalize the Historic Test Year and adjustments to reflect conditions in the Rate Year and Data Years. Pages 5 through 9 provide greater detail on the elements of cost by sub-function, as discussed below.

Q. What are the major components of rent expense?

A. The major components of rent expense include facilities leases and other rent expense such as non-fleet related vehicle rentals, airplane, right-of-way payments, and miscellaneous equipment rentals. Page 5 shows costs in the Historic Test Year and forecast Rate Year and Data Years organized by the sub-functions. Subsequent pages provide greater detail on each cost component.

Facilities Leases

Q. How did the Company develop the forecast for facilities leases?

A. The forecast is based on the expected lease payments for KEDNY's lease obligations and the Company's allocated share of Service Company lease obligations. Pages 6 and 7 detail facilities lease expense by leased property, segregated by facilities that are occupied by KEDNY (direct costs) and facility costs that are allocated to KEDNY (indirect costs).

Q. Does the Company's revenue requirement reflect any significant modifications to facilities leases?

A. There are two modifications to the Company's leased facilities portfolio forecasted for the Rate Year and subsequent Data Years. This includes the termination of the Metrotech Center Office and the Reservoir Woods Office leases. As shown on pages 6 and 7 of Exhibit __ (RRP-3), Schedule 8, the Company is no longer forecasting lease expenses for these two sites going forward as part of National Grid's Evolution Program to achieve efficiencies and manage controllable costs. The Evolution Program is described in Section IV below.

Other Rent Expense

Q. Please explain how other rent expense was calculated.

A. Pages 8 and 9 detail all other rent expense, such as non-fleet related vehicle rentals, airplane, right-of-way payments, and miscellaneous equipment rentals, both directly and indirectly incurred. The forecast amounts are based on the Historic Test Year values inflated to the Rate Year and Data Years using the inflation rate in Exhibit __ (RRP-8).

Schedule 9 – Service Company Rent Expense

The Service Company owns a number of shared assets that are used either by Service Company employees to provide services to affiliates or by the affiliates on a shared basis. These are primarily shared office facilities and information software and systems. When the Service Company owns the shared asset, it charges the affiliates, including KEDNY, an asset recovery charge based on a pre-tax return on the asset (net of deferred taxes) and booked depreciation expense. The asset recovery charge is recovered through rent expense.

Schedule 9 consists of four pages and shows the rent expense incurred by the Company from the Service Company. The first three pages are the same as the other schedules, with Page 4 detailing several adjustments to normalize the Historic Test Year and adjustments to reflect condition in the Rate Year and

Data Years. Workpapers 2 through 13 of Schedule 9 detail Service Company owned facilities assets and IT assets. IT assets are segregated by projects placed into service prior to or during the Historic Test Year characterized as (Existing), and projects to be placed in service in the Rate Year and Data Years characterized as (Forecasted).

Q. What rate of return did the Company utilize for the Service Company asset recovery charge?

A. The Company applied a weighted average pre-tax cost of capital ("pre-tax WACC") of 9.05 percent to calculate capital charges from the Service Company to KEDNY. The calculation of the WACC for the Service Company asset recovery charge is described in the direct testimony of the Capital Structure Panel. The calculation of the corresponding pre-tax WACC is set forth in Exhibit __ (RRP-11), Workpapers to Exhibit __ (RRP-3), Schedule 9, Workpaper 14.

IT Leases

Q. How did the Company develop the forecast for IT leases?

A. The forecast is based on the amortization and return on existing and forecast IT projects. Exhibit __ (RRP-11), Workpapers to Exhibit __ (RRP-3), Schedule 9, Workpapers 2, 3, 5, 6, 8, 9, 11, and 12 detail IT leases from the Service

Company, segregated by projects placed into service prior to or during the Historic Test Year, and by projects to be placed into service in the Rate Year and Data Years. IT capital investments utilized or proposed for use as Service Company assets are discussed in the testimony of the IT Panel and other Company witnesses. The IT Panel lists the investments and testimonies where various investments are discussed.

Schedule 10 – Construction Reimbursement

Schedule 10 consists of four pages and presents construction reimbursements received by the Company in the Historic Test Year. Page 4 reflects an adjustment to increase the remaining Historic Test Year costs by inflation.

Schedules 11 and 16 – OPEB and Pension Expenses

Schedules 11 and 16 each consist of seven pages that detail the estimated costs and assumptions associated with other post-employment benefits ("OPEB") and pension expenses.

Q. Please explain how KEDNY accounts for pension and OPEB costs.

A. KEDNY accounts for pension and OPEB costs in accordance with the Commission's "Statement of Policy on Pensions and Other Postretirement Benefits Other Than Pensions," issued September 7, 1993, in Case 91-M-0890

("P&OPEB Policy"). Under the P&OPEB Policy, KEDNY is required to use internal reserve accounting to account for any amount of pension and OPEB expenses recovered in rates but that are either not deposited in an external trust fund or paid out as benefits. Amounts reflected in KEDNY's internal reserve accrue carrying costs at the Commission-authorized pre-tax cost of capital.

Q. How are OPEB and pension expenses currently recovered in KEDNY's rates?

A. KEDNY's current rate allowances for OPEB and pension expenses are $(3.339) million and $(1.044) million, respectively. The Company reconciles the rate allowances with the actual OPEB and pension expenses it books for GAAP purposes and defers under or over recoveries pursuant to the Commission's P&OPEB Policy.

Q. What amount of OPEB and pension expenses is the Company proposing to include in the Revenue Requirements in this case for the Rate Year and Data Years?

A. As shown in Schedules 11 and 16, KEDNY is proposing to set the rate allowance for its pension and OPEB expenses in the Rate Year to $0 for all years. The Company is proposing allowances set to $0 for OPEB and pension expense because the forecasts of pension and OPEB expenses provided by its

actuary, Aon Hewitt ("Aon"), and detailed in Schedules 11 and 16, respectively, show that both pension and OPEB expenses will be negative. This position reflects the well-funded nature of the pension and OPEB trusts, which is the result of historic contributions, favorable asset returns and National Grid's ongoing efforts to contain pension and OPEB costs.

Q. Given that the pension and OPEB expenses as determined by the Company's actuary are negative, why is the Company not proposing to reflect negative pension and OPEB expenses in its revenue requirement?

A. The assets in the OPEB and pension trusts cannot be withdrawn without significant penalty under the Internal Revenue Code. Thus, including negative pension and OPEB expenses in the Company's revenue requirement would adversely impact the Company's cash flow because the Company would not be able to offset the negative expense with cost-effective withdrawals from the pension and OPEB trusts.

Q. Does the Company believe that its proposal to establish a rate allowance of $0 for pension and OPEB expenses under these circumstances is consistent with the P&OPEB Policy?

A. Yes. The P&OPEB policy is designed to ensure that utilities recover, and customers pay, no more and no less than actual costs of pension and OPEB benefits. The Company's proposal in this proceeding will achieve that result.

Q. If the Commission approves the Company's proposals to establish $0 rate allowances for pension and OPEB expenses, will the Company continue to reconcile the rate allowances to the Company's actual annual expense consistent with the P&OPEB Policy?

A. Yes. The Company proposes to continue to reconcile the rate allowances with the actual OPEB and pension expenses it books for GAAP purposes and defer under or over recoveries pursuant to the P&OPEB Policy.

The Panel addresses pension and OPEB deferral activity and proposals later in this testimony.

Schedules 12, 13, 14, 15, 17, and 18 – Fringe Benefits

Schedules 12, 13, 14, 15, 17, and 18 represent employee fringe benefits, exclusive of OPEB and pension costs, as follows:

Schedule 12 – FAS 112 Long-Term Disability Retirement

Schedule 12 consists of five pages. Pages 1 through 3 present the costs associated with fringe benefits in the Historic Test Year and the forecast Rate Year and Data Years. These expenses are accounted for in accordance with Financial Accounting Standards ("FAS") 112. Pages 4 and 5 detail adjustments to normalize the Historic Test Year and inflation adjustments, where necessary, to forecast the Rate Year and Data Years. The adjusted Historic Test Year FAS 112 expenses are $0.314 million. For the Rate Year and Data Years 1, 2, and 3, the projected costs are $0.335 million, $0.341 million, $0.348 million, and $0.354 million, respectively.

Q. How were the adjustments to normalize the Historic Test Year FAS 112 expense developed?

A. Page 5 sets forth the process utilized to normalize costs incurred in the Historic Test Year for FAS 112. The adjusted Historic Test Year FAS 112 expenses were based on new claimant information prepared by the Company's actuary, Aon, for fiscal year ("FY") 2023. The Company then applied a uniform Historic Test Year capitalization rate of 52.79, which is based on the ratio in the Historic Test Year of capitalized labor to total labor for the Company. For Service Company charges made indirectly to KEDNY, the Company applied a

percentage of total Service Company payroll charged to KEDNY of 12.14 percent and a Historic Test Year capitalization rate of 25.84 percent using the same methodology to arrive at the total FAS 112 expense.

Schedules 13 (Healthcare), 14 (Group Life Insurance) and 18 (Worker's Compensation)

The revenue requirements associated with Healthcare, Group Life Insurance, and Worker's Compensation fringe benefits are all based on adjusted Historic Test Year costs for these expenses, adjusted for inflation to arrive at Rate Year and Data Year expense amounts.

Q. How were the adjustments to normalize the Historic Test Year Healthcare, Group Life and Worker's Compensation expenses developed?

A. For charges made directly to KEDNY, the Company started with total Historic Test Year expense (gross expenses prior to any adjustment for capitalization). It then applied the uniform capitalization rate of 52.79 percent, which is based on the ratio in the Historic Test Year of capitalized labor to total labor for KEDNY, to determine the portion of the gross expenses that were capitalized. The non-capitalized portion of the gross expenses were the total O&M expenses applicable to KEDNY. For Service Company costs, the Company applied the

percentage of total applicable Service Company payroll charged to expense at KEDNY.

Schedule 15 – Other Benefits

Schedule 15 consists of four pages and presents costs for providing other benefits, including employee wellness programs and other employee benefits. The Other Benefits expense is not capitalized largely because of the relatively small dollars associated with this expense. Page 4 details an adjustment to normalize the Historic Test Year, including an adjustment to remove vendor costs associated with the Appreciate Program. The Rate Year and Data Year amounts for Other Benefits reflect the Historic Test Year adjusted for inflation.

Schedule 17 – Thrift Plan (401k Matching)

The adjusted Historic Test Year Thrift Plan expenses were based on contributions made by the Company in the Historic Test Year. Based on the Company's contributions, the adjusted Historic Test Year expenses for KEDNY are $9.952 million. For the Rate Year and Data Years 1, 2, and 3, the projected costs are $10.603 million, $10.808 million, $11.003 million, and $11.197 million, respectively.

Q. How were the adjustments to normalize the Historic Test Year Thrift Plan expense developed?

A. Workpaper 1 to Schedule 17 sets forth the process used to normalize costs incurred in the Historic Test Year for Thrift Plan expenses. The Company based the adjusted Historic Test Year on actual payments to the Thrift Plan. For payments made directly on behalf of KEDNY, the Company started with total payments in the Historic Test Year. It then applied the uniform capitalization rate of 52.79 percent, which is based on the ratio in the Historic Test Year of capitalized labor to total labor for KEDNY, to arrive at the total expense applicable to KEDNY. For Service Company payments made into the plan, the Company applied a percentage of total applicable Service Company payroll charged to KEDNY. This amount, in addition to expense directly applicable to KEDNY, results in the total Thrift Plan expense.

Q. What adjustments were made to Thrift Plan expense in the Rate Year?

A. The Company adjusted its Historic Test Year Thrift Plan expense to reflect non-incremental new employees who are replacing employees previously employed as participants in the Pension Plan. These new employees will be covered by the Enhanced Thrift (401K) plan and therefore receive a core contribution in addition to the matching contribution received by Pension Plan employees. An average of the number of Pension Plan employees who left the Company to be

replaced by Enhanced Thrift employees was used to determine the amount of this adjustment. While the amount of the core contribution begins at four percent and escalates progressively to eight percent based on age and years of service, four percent was used for this adjustment. The applicable capitalization and allocation rates were used to determine the portion to be charged to expense from KEDNY and the Service Company.

Q. Please describe the method for normalizing the fringe benefits of Service Company employees charged to KEDNY.

A. Similar to the fringe benefits charged to KEDNY, the Company started with the total Service Company charges for fringe benefit expense (gross expenses prior to any adjustment for capitalization). The Company then allocated the total fringe benefit expense on the same basis that Service Company historic labor is allocated to KEDNY, to expense, or 12.26 percent.

Schedule 19 Materials

Schedule 19 consist of four pages and shows costs related to materials purchased from outside vendors, materials released from inventory, and material stores handling costs incurred by the Company. Page 4 details an adjustment in connection with the Historic Test Year Review. This adjustment is further detailed on Exhibit __ (RRP-2), Schedule 3. The Rate Year and Data

Year amounts for Materials reflect the normalized Historic Test Year adjusted for inflation.

Schedule 20 – Legal (Expense Type Consultants, Contractors, and Other)

Schedule 20 consists of four pages and shows contractor, consultant, and other costs associated with legal expenses. These costs have been separately reflected in this schedule to provide greater transparency of legal expenses. Page 4 details adjustments to normalize the Historic Test Year, including (i) an adjustment for the removal of rate case expense and (ii) an adjustment for the removal of Appreciate Program expense. In addition, adjustments were made for the Historic Test Year Review and Additional Review of Historic Test Year Costs. The Company made a further adjustment to increase the remaining Historic Test Year costs by inflation.

Schedule 21 – Accounting (Expense Type Consultants, Contractors and Other)

Schedule 21 consists of four pages and shows contractor, consultant, and other costs associated with accounting expenses. These costs have been separately reflected in this schedule to provide greater transparency of accounting expenses. Page 4 reflects adjustments to normalize the Historic Test Year, including an adjustment for the removal of Appreciate Program Expense. In

addition, an adjustment was made for the Additional Review of Historic Test Year Costs. The Company made a further adjustment to increase the remaining Historic Test Year costs by inflation.

Schedule 22 – Postage

Schedule 22 consists of four pages and shows costs related to postage incurred by the Company. Page 4 details an adjustment to normalize the Historic Test Year, including an adjustment to reflect the Company's paperless billing program. The Rate Year and Data Year amounts for Postage reflect the normalized Historic Test Year adjusted for inflation.

Schedule 23 – Labor

Schedule 23 contains all O&M labor expense. The schedule consists of 14 pages and presents the labor expense forecasts for the Rate Year and Data Years. Schedule 23 also presents the adjustments the Company made to normalize the Historic Test Year and forecast labor expense for the Rate Year and Data Years. The schedule provides this information by Provider Company.

Q. Please explain the components of Schedule 23.

A. The first four pages of Schedule 23 depict the total labor charges that were expensed or forecast to be expensed for the Historic Test Year, adjusted Historic

Test Year, Rate Year, and Data Years. Pages 5 and 6 contain the calculation of adjusted Historic Test Year and forecast Rate Year and Data Years labor expense. Pages 7 and 8 present the allocation of total annualized adjusted base labor expense and adjusted variable compensation labor expense by Provider Companies to KEDNY. Pages 9 through 13 present labor expense charged by Provider Company, capital, expense, and other for the Historic Test Year, adjusted Historic Test Year, Rate Year, and Data Years. Page 14 depicts the number of forecast full-time equivalent employees ("FTEs") by Provider Company for the Historic Test Year and the Rate Year.

Q. Please explain the general methodology used to forecast labor expense for the Company.

A. The Company incurs labor charges from KEDNY employees and from employees of the Service Company. The Company also incurs labor charges from employees of other affiliated companies ("All Other Companies") allocated to KEDNY. The forecast in Schedule 23 begins with the Historic Test Year aggregate operating expense labor costs for KEDNY, which are shown segregated by Provider Company. Additionally, Pages 9 through 13 show the Historic Test Year allocations of total labor charged by KEDNY (to itself), and the Service Company. The Company forecast both components of labor costs: the costs KEDNY incurred and charged to itself and other companies and the

labor costs incurred by the Service Company and All Other Companies that are charged to KEDNY. The forecast of total labor costs charged by KEDNY and the forecast of total labor costs charged by the Service Company were developed utilizing adjusted FTEs as of December 31, 2022, which was the basis for the forecast Rate Year and Data Years. The results were prorated back by the accounting allocations for each Provider Company based on the Historic Test Year. Labor expense incurred by and for KEDNY was the basis for the forecast of O&M expense, as set forth in the summary schedule of Exhibit __ (RRP-3).

Q. How did the Company determine the appropriate labor headcount for the Rate Year?

A. The Company began with the labor headcount at the end of the Historic Test Year for KEDNY and the Service Company. The count of management FTEs as of December 31, 2022, as presented on Exhibit __ (RRP-3), Schedule 23, Page 14, was 144 for KEDNY and 5,916 for the Service Company. The collective bargaining unit FTEs as of December 31, 2022 were 1,321 for KEDNY and 1,450 for the Service Company. The Company then adjusted the total KEDNY management FTEs to 144 and the total KEDNY bargaining unit FTEs to 1,278 to establish the base for the forecast. The total Service Company

management FTEs and bargaining unit FTEs were adjusted to 5,900 and 1,388, respectively.

Q. Please explain the adjustments the Company made to the labor headcounts.

A. The Company made adjustments to the December 31, 2022 labor headcount to reflect conditions in the Rate Year to:

(i) remove employees from the management and represented headcounts who are on long-term leave and not expected to return; and

(ii) add the average headcounts for seasonal and temporary employees who were excluded from the December 31, 2022 employee headcounts.

Q. Please explain why employees who may not allocate time to KEDNY need to be reflected in the labor headcount of each Provider Company.

A. The Company forecasts labor by first calculating total labor costs by Provider Company and the Service Company. The Company next applies an allocation factor based on how labor was charged to KEDNY from these companies in the Historic Test Year. Therefore, all employees, regardless of how they charge their time, must be reflected in the calculation of total labor cost for each Provider Company to derive the correct total labor cost that will then be allocated to KEDNY based on Historic Test Year allocations.

Q. Please describe the process used to convert full time employees and part time employees into FTEs.

A. Full time equivalent status, shown on Page 14 of Schedule 23, was computed by the following method:

(i) All full time employees were considered FTEs.

(ii) Part time employees were converted to FTEs using the following formula: Average Part Time Employee Salary divided by Average Full Time Employee Salary times Part Time Employee Count. For KEDNY and the Service Company, there were 0 and 49 part time management employees, respectively, which equated to 0 and 28 FTEs.

The same procedure was used for represented employees. KEDNY and Service Company had 0 and 18 part time employees included in the represented labor base, which equated to 0 and 11 FTEs, respectively.

Q. How was management labor expense calculated for the Rate Year and Data Years?

A. Management labor expense for the Rate Year and Data Years was calculated using average salaries in effect at December 31, 2022, including base and variable compensation. The average base salaries were adjusted for salary increases, applying a 4.50 percent salary increase to management labor in

FY23, and a 4.00 percent increase to management labor through the Rate Year and Data Years. This salary increase and an explanation of the base and variable compensation structure are addressed in the direct testimony of the Company's Human Resources Panel.

Q. How was management variable compensation calculated for the Rate Year and Data Years?

A. The revenue requirement includes the portion of management variable compensation tied to the attainment of individual goals as well as metrics based on safety, reliability, and customer satisfaction. The Company is not seeking recovery of that portion of variable compensation tied to financial objectives. To calculate management variable compensation for the Rate Year and Data Years, the Company first applied maximum plan payout ratios to average base salaries adjusted for salary increases. A target payout rate of 50 percent was then applied to the maximum variable compensation plan payout to calculate the forecast. The Human Resources Panel addresses the Company's compensation plan.

Q. Has the Company reflected senior executive variable compensation in the forecast?

A. No. These costs are not included in Company's Rate Year O&M expense.

Q. How was represented employees' labor expense calculated for the Rate Year and Data Years?

A. The Company adjusted average base wages by applying the applicable effective wage increase (based on the current collective bargaining agreements) annually in the Rate Year through Data Year 3.

Q. How was represented employees' variable compensation calculated for the Rate Year and Data Years?

A. The revenue requirement includes 100 percent of represented employees' variable compensation, which provides direct incentives for such employees to meet or exceed metrics tied to safe, reliable, and efficient performance, and is included in the current collective bargaining agreement with the union. The forecast for the Rate Year and Data Years was calculated by applying the target payout rate of 2.50 percent for IBEW-1049 and 2.50 percent for TWU-101 and IBEW-3 to average base wages adjusted for wage increases, double time, and shift premiums and overtime.

Q. Please describe how overtime was calculated for the adjusted Historic Test Year total labor amounts.

A. The ratio of overtime pay to base salary and wages was calculated for the Historic Test Year. These rates were applied to the adjusted forecast management salaries and represented employees' wages for the Rate Year and Data Years. The overtime and premium rates were calculated by expense, capital, and other charge categories.

Q. Please describe the adjustments to miscellaneous pay for the Rate Year.

A. Miscellaneous pay was prorated based on the ratio of miscellaneous pay to base pay in the Historic Test Year. The Company normalized miscellaneous pay in the Historic Test Year to exclude a one-time "thank you" payment made to all non-executive employees in December 2022, miscellaneous executive payouts, defined contribution supplemental executive retirement plan payments, executive separation pay, COBRA subsidies paid to former executives, and other minor miscellaneous adjustments.

Q. Were any other adjustments made to the base Historic Test Year labor?

A. Yes. The Company made several adjustments to KEDNY and Service Company in the Historic Test Year. With respect to KEDNY, the Company made adjustments to (i) miscellaneous pay as discussed above; (ii) correctly reflect as overtime premium pay labor that was previously recorded as base labor; and (iii) to capitalize costs associated with large-diameter pipe joint

encapsulation that were previously expensed (discussed in the direct testimony of the GIOP). With respect to the Service Company, the Company made adjustments to: (i) miscellaneous pay as discussed above; and (ii) correctly reflect as overtime premium pay labor that was previously recorded as base labor.

Q. What percentage of labor costs did the Company forecast would be capitalized in the Rate Year?

A. The Company forecast 52.79 percent of total labor costs would be capitalized in the Rate Year. The forecast is based on the Historic Test Year percentage of labor costs capitalized.

Q. Please describe 53rd week labor costs.

A. Every five years there is an additional, or 53rd, pay week. Therefore, an amount equal to one-fifth of the weekly cost (*i.e.*, one day) is added to the labor cost to reflect the normalized cost of the 53rd week. Fifty-third week labor costs are associated with any employee who is paid weekly. Typically, these are represented employees. The 53rd week labor costs are added to the total Rate Year represented labor costs found on Pages 10 through 13 of Schedule 23.

Q. How were 53rd week labor costs calculated?

A. Fifty-third week labor costs were calculated by taking the estimated annual Rate Year labor costs for weekly paid employees divided by 2,080 hours and multiplied by eight hours. The 2,080 hours represents the total number of hours worked in a normal calendar year and the eight hours represents the normal work hours in a day (*i.e.*, one-fifth of the week). The calculation was performed by salary band for full time represented employees and part time represented employees.

Schedule 24 – Transportation

Schedule 24 consists of 15 pages and shows transportation costs incurred by the Company. The first four pages are the same as all other schedules, with Page 4 detailing adjustments to normalize the Historic Test Year and inflation adjustments to reflect conditions in the Rate Year and Data Years. Pages 5 through 15 provide greater detail on the elements of transportation costs such as lease expense, fuel costs, and other costs, including vehicle materials and maintenance.

Q. What are the major cost drivers of transportation expense?

A. The majority of costs associated with transportation expense pertain to (i) lease expense; (ii) motor fuel; and (iii) other expenses (*e.g.,* vehicle parts and

maintenance costs). Pages 5 through 7 detail the cost components in the Historic Test Year, Rate Year, and Data Years. Pages 8 through 15 provide a further breakdown of the components in developing the forecast.

Transportation Lease Expense

Q. Please describe the components of transportation lease expense.

A. Transportation lease expense consists of vehicles on lease in the Historic Test Year that will remain on lease through the Rate Year, and vehicles on lease in the Historic Test Year that will be replaced before or during the Rate Year. In addition, the Company's forecast of transportation lease expense reflects the costs of additional vehicle leases needed to achieve the proposed incremental work plan presented in this case. Finally, the Company included two adjustments to transportation lease expense related to electrification of a portion of the Company's fleet: an adjustment to reflect the incremental cost associated with replacing certain internal combustion engine ("ICE") vehicles with electric vehicles ("EVs") and an adjustment to add lease expense for twelve mobile chargers, which is split between KEDNY and KEDLI. The Company's fleet electrification program is discussed more fully in the GIOP testimony.

Q. How did the Company develop the forecast for transportation lease expense?

A. The Company began with the vehicle inventory as of December 31, 2022. From that, the Company first forecast the lease expense for existing leases as of December 31, 2022 through the term of the leases. Second, the Company added the forecast of lease expense associated with replacement vehicles scheduled to be acquired prior to or in the Rate Year and Data Years. In general, vehicles become eligible for replacement when fully amortized. Third, the Company increased the number of vehicles in fleet inventory to support the level of work the Company plans to deliver in the Rate Year. Fourth, the Company made an adjustment to reflect the incremental cost associated with replacing certain ICE vehicles with EVs. Finally, the Company reduced the forecast by estimated gains to be received from sales of replaced vehicles at auction.

Q. Please explain how transportation lease expense is calculated.

A. Estimated delivery dates are established for the replacement and additional vehicles along with projected acquisition costs. Lease expenses are then calculated using the acquisition cost, term of the lease, and projected interest rate provided by the leasing company.

Q. Why did the Company not simply adjust the Historic Test Year for inflation to forecast the Rate Year and Data Years?

A. The Company does not believe that adjusting for inflation provides an accurate projection of activity in the Rate Year and Data Years. Transportation lease expense is affected by changes in the Company's fleet. Specifically, increases or decreases in lease expense result from vehicles being removed, replaced, or added to the Company's fleet. In addition, the Company's fleet is comprised of many different types of vehicles and equipment. These vehicles vary in costs and lease terms. The Company's forecast takes into account these known and measurable changes and, therefore, provides a more accurate and reasonable forecast than simply adjusting for inflation.

Transportation Motor Fuel Expense

Q. How did the Company develop the forecast for motor fuel expense?

A. Motor fuel expense was calculated by multiplying the forecast prices from the New York Mercantile Exchange by the level of fuel consumption in the Historic Test Year. To determine the forecast of compressed natural gas ("CNG"), the Company utilized the 2022 Clean Cities Alternative Fuel Price Report issued by the US Department of Energy, which sets forth the average difference between retail diesel prices and the CNG price per gallon equivalent by state. For New York State, the midpoint of the difference was $1.045. The Company

subtracted this amount from the forecast retail diesel rates to arrive at the CNG forecast. The Company also made a discrete adjustment to Historic Test Year gallons of fuel consumption used to forecast Rate Year motor fuel expense by removing gallons associated with ICE vehicles operated in the Historic Test Year that are forecast to be replaced with EVs in the Rate Year and Data Years.

Other Transportation Expense

Q. Please describe the components of other transportation expense.

A. Other transportation expense includes items such as vehicle part costs and maintenance costs. Vehicle part costs are the actual costs paid to vendors for procured parts. Vehicle maintenance costs consist of actual costs paid to vendors when work is performed on Company vehicles by outside vendors.

Q. Please explain how other transportation expense was calculated.

A. The Company adjusted Historic Test Year costs for inflation to calculate the forecast for the Rate Year and Data Years.

Schedule 25 – Energy Efficiency Programs

Schedule 25 consists of four pages. The Company is proposing to use the pro-rated Commission-approved New Efficiency: New York ("NE:NY") budget for calendar year 2024 and 2025 as the amount included in the revenue requirement

for the Rate Year, adjusted for amounts previously recovered on an accelerated basis through the DCSM. The Company is further proposing to use the calendar year 2025 budget for the Data Years pending the outcome of the NE:NY interim review in Case 18-M-0084. This is discussed in more detail in the direct testimony of the Customer Panel.

Schedule 26 – Injuries and Damages

Schedule 26 consists of seven pages and shows the costs associated with claims expense and insurance premiums. Claims expense includes the amounts paid to third parties to resolve claims for property damage and bodily injury within the Company's self-insured retention levels. Insurance premiums are amounts paid to third-party insurers to obtain insurance coverage. Page 4 details adjustments to normalize the Historic Test Year by utilizing a three-year average of claims, and adjustments to normalize incurred but not reported ("IBNR") expense. The Rate Year was normalized to reflect forecast insurance premiums and an adjustment was made to increase the adjusted Historic Test Year costs by inflation.

Q. Why did the Company utilize a three-year average of claims to forecast claims expense?

A. The Company believes that its claims experiences in the last three years are representative of expected claims expense in the Rate Year and Data Years notwithstanding the pandemic. Use of a three-year average to forecast claims expense is also consistent with the treatment of this expense in the 2019 KEDNY and KEDLI Rate Cases and the recent 2020 NMPC Rate Case.

Schedule 27 – Savings

Schedule 27 consists of four pages and shows the adjustments made to reflect savings from National Grid's Evolution program, which is discussed in Section IV below, in the Rate Year and Data Years. As shown in Exhibit __ (RRP-11), Workpapers to Exhibit __ (RRP-3), Schedule 27, Workpaper 1, the Historic Test Year reflects $30.917 million in Evolution program savings for KEDNY, with additional savings of $14.022 million for KEDNY forecast to be achieved in the Rate Year (net of costs to achieve). The total amount of savings from the Evolution program included in the Rate Year revenue requirement is $44.939 million for KEDNY.

The "Rate Year Adjustment" column in Workpaper 1 reflects adjustments to remove savings that are reflected in other areas of the revenue requirements.

For example, the savings from the service line inspection program initiatives are reflected in the cost forecast for that program. The Company netted costs to achieve and increased the net result by an inflation factor for an overall Rate Year adjustment of $9.997 million for KEDNY, as shown on page 4 of Schedule 27. The Rate Year adjustment amounts were increased by inflation in each year to arrive at the amounts for the Data Years.

Schedule 28 – Productivity

Schedule 28 consists of four pages and shows the credits relating to the estimated productivity adjustment of a cumulative annual one percent of labor costs and payroll taxes. The adjustment represents a credit (*i.e.*, reduction in the revenue requirement) of $4.786 million in the Rate Year, $6.901 million in Data Year 1, $9.133 million in Data Year 2, and $11.487 million in Data Year 3, or a total of $32.307 million over the term of the proposed rate plan.

Schedule 29 – Rate Case Expense

Schedule 29 consists of four pages and shows the forecast costs of preparing this rate filing. The Company requests authority to amortize these costs over four years.

Schedule 30 – Regulatory Assessment Fees

Schedule 30 consists of ten pages and shows the costs associated with the annual Commission assessment paid by the Company. The assessment consists of the General and Energy Research and Development Authority ("ERDA") Assessments. Page 4 details adjustments to normalize the Historic Test Year and is supported by Pages 5 through 10 of this Schedule.

Schedule 31– Uncollectible Accounts

Schedule 31 consists of four pages and shows the uncollectible expense. The uncollectible rate, including how it was calculated, is discussed in the direct testimony of the Customer Panel. As discussed more fully in the Customer Panel's testimony, the Company is proposing to reconcile its actual uncollectible expenses to the amounts reflected in rates.

Schedule 32 – Site Investigation and Remediation

Schedule 32 consists of four pages and shows the costs associated with Site Investigation and Remediation ("SIR") expense. Page 4 details adjustments to normalize the Historic Test Year.

Q. How much SIR cost does KEDNY currently recover annually through base rates?

A. KEDNY currently recovers (i) historic, unrecovered SIR expenditures in an amount equal to the annual amortization of the SIR deferral balance as of December 31, 2016 and (ii) forecast SIR costs of $70.919 million (the "Forecast Rate Allowance"). Each year, KEDNY fully reconciles its actual SIR expense to the Forecast Rate Allowance. Any under or over expenditures are deferred for future refund to or recovery from customers (except for expenditures and recoveries associated with the Citizens site).

Additionally, if the difference between actual SIR expense and the Forecast Rate Allowance exceeds $25 million on a cumulative basis, KEDNY is authorized to recover through the SIR Recovery Surcharge (i) the difference between actual SIR expense and the Forecast Rate Allowance and (ii) any amount that was not recovered in the prior rate year's SIR Recovery Surcharge (if triggered) because the cumulative difference between actual SIR costs and the Forecast Rate Allowance did not exceed the $25 million threshold and/or the amount would have increased KEDNY's aggregate revenues by more than two percent.

Q. What is KEDNY's proposal for recovery of its SIR costs?

A. As discussed in the testimony of Company Witness Charles F. Willard, KEDNY proposes a base rate allowance of $100.00 million in the Rate Year and each of the three Data Years, which represents forecast SIR costs

In addition, the Company proposes to continue to include in base rates the current amortization of $18.521 million annually, representing one-tenth of the forecast deferral balance at December 31, 2016, as shown on the amortization of regulatory deferrals line on Exhibit __ (RRP-1), Summary. As this amount was a forecast, the Company will reconcile actuals at December 31, 2016, for future disposition.

Q. Does the Company propose to continue its current reconciliation and surcharge mechanism?

A. Yes. As discussed in Mr. Willard's testimony, the Company proposes to continue the current reconciliation and SIR Recovery Surcharge mechanism.

Schedule 33 – Economic Development Program

Schedule 33 consists of four pages and represents the costs associated with the Economic Development Grant Programs adopted in the 2019 KEDNY and KEDLI Rate Cases. Page 4 reflects an adjustment to reclass the $2.250 million

of Historic Test Year costs from Other Expense and adjust the rate allowance to $1.819 million in the Rate Year and subsequent Data Years. The Customer Panel testimony will provide additional detail on the proposed funding for the Grant Program. The proposed rate allowance will be offset by the amortization of the existing Economic Development Regulatory Deferral balance such that the revenue requirement associated with the Economic Development Project will be $0.

Schedule 34 – Low Income Program

Schedule 34 consists of four pages and represents the low income discounts approved by the Commission in Case 14-M-0565. For the adjusted Historic Test Year, the Company reflected customer charge revenues at full standard tariff rates and the customer discount forecast as O&M expense.

Schedule 35 – Incentive Programs

Schedule 35 consists of four pages and shows costs associated with incentive programs. The Historic Test Year costs have been reclassified from other schedules and separately reflected in this schedule to provide greater transparency of incentive program expense. Page 4 shows the removal of these costs from the Historic Test Year.

Schedule 36– Paving

Schedule 36 consists of four pages and shows costs associated with paving expense. These costs have been separately reflected in this schedule to provide greater transparency of paving expense. Page 4 details adjustments to normalize the Historic Test Year, including an adjustment to normalize costs associated with the Additional Review of Historic Test Year Costs. An additional adjustment was made to increase the Historic Test Year costs by inflation.

Schedule 37 – Joint Facilities

Schedule 37 consists of four pages and shows the Company's Historic Test Year share of carrying costs and operating and maintenance costs associated with the New York Facilities System ("NYFS"). The Company made an adjustment to remove the Historic Test Year amounts and include the net revenue and expense Rate Year and Data Year amounts in the forecast.

Schedules 38 through 42 – Other Initiatives

Schedules 38 through 42 consist of five pages and show the costs of other initiatives to be implemented or adjusted by the Company.

The schedules consistent of the following:

Schedule 38 sets forth the costs of the Newtown Creek facility.

Schedule 39 sets forth the costs of Information Technology run the business expenses.

Schedule 40 sets forth the costs of new programs to enhance customer experience, maintain, upgrade, and repair the Company's facilities, and electrify a portion of the Company's fleet.

Schedule 41 sets forth the costs of Workforce Adjustments (*i.e.,* Full-Time Equivalents)

Schedule 42 –sets forth GIOP and Gas Safety Panel O&M expenses related to increased capital expenditures and increased workload programs

The direct testimony of the Company's GIOP, Gas Safety Panel, IT Panel, and Customer Panel provides support for these costs.

Schedule 43 – O&M Summary of Changes

Schedule 43 provides a summary checklist of the O&M adjustments to the Historic Test Year. These adjustments are described throughout the Panel's testimony or by other Company witnesses as identified.

IV. Efficiency and Productivity Cost Reductions

Q. Please describe National Grid's efforts to reduce costs.

A. National Grid is committed to continuously identifying opportunities to be more efficient and productive for the benefit of its customers. In the 2019 Rate Case, the revenue requirements reflected more than $36 million of efficiency savings in FY 2023 (nine months of which encompassed the Historic Test Year) through traditional productivity and targeted savings initiatives. Recognizing that affordability continues to be the paramount concern of customers, National Grid once again undertook an aggressive efficiency program, known as the Evolution program, challenging itself to look for ways to further reduce costs in advance of these rate filings. This proactive effort has significantly mitigated the impact of rising inflation and other economic factors that have increased costs across all sectors. As a result of National Grid's effort, the revenue requirements reflect annual savings to customers of approximately $45 million for KEDNY.

The level of savings from the Evolution program far exceeds the productivity savings typically included in a one-year case but continues National Grid's trend of striving to keep customer bills as low as possible. In the recently concluded Management Audit in Case 18-M-0195, Staff commended National Grid for undertaking such comprehensive cost-savings initiatives. While

inflation and the need to invest in new programs to meet the CLCPA will undoubtedly challenge National Grid's ability to achieve these savings, KEDNY is nevertheless reflecting the full forecast of aspirational savings to mitigate rate impacts during this challenging time. On top of these savings, KEDNY is also including a one percent productivity adjustment totaling approximately $32 million over the four-year term of the proposed rate plan to further mitigate customer bills.

Q. Please describe the Evolution Program.

A. In FY 2022, National Grid undertook an ambitious efficiency challenge called the Evolution program, which set an aspirational, three-year cumulative efficiency goal of $196 million across the New York business by FY 2024. The target is measured against a baseline of FY 2020 performance. The Evolution program was aimed at improving both the quality and cost-effectiveness of National Grid's services to customers. This ambitious target was purposefully set to challenge the business and drive maximum customer value.

Q. Why did National Grid undertake this initiative?

A. Affordability is a significant concern for customers and is a key tenant of National Grid's vision and purpose. At the same time, the Company needs to make investments in new programs and technologies to meet the changing

energy landscape and the heightened expectations of customers, regulators, policy makers, and other stakeholders. These include investments to replace outdated systems, enhance the safety of the gas network, implement new digital solutions, increase energy efficiency and demand response, and enable renewable energy sources to meet the goals of the CLCPA. The need for these investments must be balanced against the financial impacts on customers. The Evolution program is National Grid's effort to address these potentially competing priorities. Through the program National Grid has identified efficiencies to enable ongoing critical investments and support the State's long-term policy and sustainability objectives, while mitigating customers' energy costs in a manner that maintains affordability.

Q. How is National Grid attempting to achieve its efficiency target?

A. National Grid undertook a variety of initiatives across its New York electric and gas businesses to reduce costs or standardize processes for more efficient operations. Example initiatives include programs that:

- Implement digital strategies to increase customer self-service and enhance the overall customer experience;
- Improve first call resolution in the call centers;
- Optimize office space;

- Update contract strategies to reduce contractor costs; and
- Utilize new technologies to drive field force efficiencies.

The Evolution program initiatives are being tracked in a web-based tool, known as Enterprise Hub ("EHub"). EHub delineates various maturity stages through which initiatives progress as well as confidence levels for delivering forecast benefits. A centralized repository for identifying and tracking the progress of the Evolution program initiatives provides transparency to National Grid leadership on the progress against targets and avoids overlap in counting benefits.

Q. Please explain the maturity stages used to track progress in EHub.

A. Each Evolution program initiative is placed at a maturity stage based on its level of development. There are four maturity stages:

- Identify – This is the initial stage. Here, initiatives are little more than ideas with high-level, conceptual estimates of potential benefits.
- Define – Teams refine the initiative from an idea to a more formalized concept. Plans are put in place to implement the initiative and refine potential benefits.
- Deliver – The business has begun implementing the initiative. Savings amounts, which could have changed from the original estimate, are

quantified and tracked and reviewed by Finance. There is a line of sight to the delivery of future benefits and improvements.

- Realize – In the final stage, implementation is completed, and the improvements and benefits are being sustained. Actual realized savings have been confirmed by Finance.

Q. What was the process used to develop Evolution program initiatives?

A. National Grid's leadership challenged the business to be bold and think from an improvement mindset. Teams were encouraged to identify as many potential initiatives as possible with the understanding they would be refined as they progressed through the maturity stages. While some initiatives would ultimately not yield savings opportunities, many would – and the overall effort would benefit customers.

To provide further transparency, teams assigned a confidence level to each initiative in EHub. The confidence level included high, medium, and low confidence. In some cases, the initiative may have a low confidence of delivering savings because success could require the business to implement a new IT solution or a third-party vendor to agree to new contract terms. Confidence levels could change over time, as the teams revised their assessments and initiatives progressed. For example, following

implementation, anticipated user adoption could be lower than expected or unforeseen challenges may have arisen that changed the initial benefit assumptions. Specific to the Procurement function, because of the complexity in tracking procurement benefits, the Procurement team added an additional layer of maturity tracking to provide assurance to leadership that actual savings had been delivered.

Q. Was a governance process established to track Evolution program benefits?

A. Yes. A monthly governance cycle was put in place to track the benefits and monitor progress. Each month, teams update EHub with the latest maturities, confidence levels, benefits forecasts, and realized savings. The results are reported monthly to leadership.

Q. Please explain how O&M savings from Evolution program initiatives are reflected in the case.

A. The Company's revenue requirement reflects O&M savings associated with initiatives it believes are reasonably achievable and likely to deliver customer benefits (*i.e.,* those in the "Deliver" and "Realize" maturity stages). Given the immaturity of initiatives in the "Identify" and "Define" maturity stages, the Company did not reflect such savings because it is unknown whether the

initiatives will be implemented, and, if they are, the extent to which any savings will materialize. Similarly, within Procurement's Supply Chain Optimization initiatives, only underlying procurement opportunities with high maturity levels ("Benefits Approved" and "Carry Over") were reflected. In addition, the Company took a broad approach to including savings in the revenue requirements. In instances where the Rate Year forecast for an initiative was lower than the savings reflected in the Historic Test Year, the Company did not make a normalizing adjustment to lower the amount of savings. Instead, the Company retained the higher Historic Test Year amounts.

Q. Is there a list of the initiatives and the associated savings reflected in the revenue requirements?

A. Yes. Exhibit __ (RRP-11), Workpapers to Exhibit __ (RRP-3), Schedule 27, Workpaper 1 lists the initiatives, the affected operating companies, the allocation of savings to KEDNY, whether savings from initiatives were achieved in the Historic Test Year or are forecast to be achieved in the Rate Year, and how the savings are reflected in the revenue requirement. Workpaper 2 to that schedule contains the project white papers containing descriptions of the initiatives.

Q. Has KEDNY's full share of O&M savings from the Evolution program been reflected in the revenue requirements?

A. Yes. All known initiatives that are forecast to deliver measurable benefits have been identified in EHub and reflected in these filings. If an initiative moves into the Deliver and Realize maturity stages after the initial filing or an initiative reports a material change to its savings forecast, the Company will make an adjustment to reflect any benefits in corrections and updates.

Q. What is the total level of O&M savings reflected in the revenue requirements from the Evolution program?

A. As shown in Exhibit __ (RRP-11), Workpapers to Exhibit __ (RRP-3), Schedule 27, Workpaper 1, the Historic Test Year includes $30.917 million in Evolution program savings for KEDNY. These savings result in lower costs in the Rate Year. KEDNY forecasts additional savings of $14.022 million in the Rate Year (net of costs to achieve). In total, the revenue requirements reflect annual Evolution Program savings of $44.939 million for KEDNY.

To appreciate the magnitude of efficiencies delivered from the Evolution program, the approximately $45 million of savings reflected in the revenue requirements is more than nine times the size of the one percent productivity adjustment that is traditionally incorporated in a utility's rate filing for KEDNY.

Q. Has the Company imputed further efficiency savings by including a productivity adjustment?

A. While the Company does not believe that a separate productivity adjustment is required by Commission precedent, KEDNY included an adjustment to moderate bill impacts and to account for the possibility that initiatives in the "Identify" and "Define" maturity stages may move into the "Deliver" and "Realize" stages in the Rate Year. The productivity adjustment reduces the revenue requirements by $4.786 million in the Rate Year, for a total of $32.307 million over the four-year term of the proposed rate plan. These adjustments are shown in Exhibit __ (RRP-3), Schedule 28.

Q. Please summarize the level of savings that are reflected in KEDNY's revenue requirements.

A. The Rate Year reflects approximately $45 million in O&M savings for KEDNY from the Evolution program. Although the program ends in FY 2024, before the start of the Rate Year, the Company carried this same level of savings forward in the Rate Year and each of the Data Years and applied inflation in a manner that increased the level of savings. In doing so, KEDNY is assuming the risk that this level of savings can not only be achieved but sustained in subsequent years. On top of this, the Company is adding a one percent

productivity adjustment in each year. Thus, the Company is not only taking the risk that the savings from the Evolution program will not be offset by new costs from incremental work, but also that the Company will find one percent more of additional, unidentified savings each year. The combined level of O&M savings reflected in the filing in the Rate Year is:

Table 6: Rate Year Savings

KEDNY

Item	Rate Year
Evolution Program	$44.939 million
Productivity adjustment	$4.786 million
Total	**$49.725 million**

V. Depreciation Expense

Q. Please describe Exhibit __ (RRP-4).

A. Exhibit __ (RRP-4) consists of a summary page that presents the Company's actual Historic Test Year depreciation expense, along with the forecasts based on depreciable plant in service in the Rate Year and Data Years.

Q. Please describe how the Company developed depreciation expense for the Rate Year and Data Years.

A. Depreciation expense for the Rate Year and Data Years was developed by multiplying the monthly depreciable base by applicable composite depreciation rates. The monthly depreciable base for each plant account is the monthly

forecast beginning balance, which includes the prior month's estimated additions to plant in service, less the prior month's estimated retirements from plant in service. The composite depreciation rates were developed based on depreciable plant balances as of December 31, 2022.

Q. Did the Company perform a full depreciation study?

A. Yes. The Company performed a new depreciation study in 2022 to determine the appropriate depreciation and amortization amounts based on the Company's gas plant in service as of December 31, 2021. The depreciation study includes a proposal to accelerate the recovery of depreciation expense associated with leak prone pipe ("LPP") assets consistent with the Company's accelerated LPP program, as described in the Company's GIOP testimony. This proposal would align KEDNY's treatment of LPP for depreciation purposes with KEDLI. The depreciation rates from the study are included in the direct testimony of Company Witness Ned Allis of Gannett Fleming Valuation and Rate Consultants, LLC and are used in computing gas depreciation and amortization expense for the Rate Year and Data Years. However, to minimize the bill impacts of the proposed depreciation rates for non-LPP assets, the Company is proposing to phase the depreciation rates in over four years, Additionally, the Company is proposing to amortize the gas reserve deficiency in excess of ten percent of the book reserve, as identified in the depreciation study, over 20

years. To further mitigate bill impacts, the Company is not proposing to commence this amortization until Data Year 1, the twelve months beginning April 1, 2025.

Q. What is the forecast depreciation expense for the Rate Year and Data Years?

A. The annual provision for depreciation and amortization expense for KEDNY's gas plant is $210.729 million for the Rate Year and $260.578 million, $306.829 million and $353.551 million for Data Years 1, 2 and 3, respectively, as shown on Summary Page 1. The Rate Year and Data Years forecast includes $15.964 million related to the Company's accelerated leak prone pipe program, as described in Mr. Allis's testimony. Additionally, the Company's proposal to amortize the gas reserve deficiency in excess of ten percent of the book reserve over 20 years results in an annual increase of approximately $12.463 million commencing in Data Year 1.

Q. What is the effect of the gas depreciation study's proposed depreciation rates and amortizations on gas depreciation expenses in the Rate Year and Data Years?

A. The annual provision for depreciation and amortization for gas plant would increase (compared to existing rates) by approximately $32.821 million in the

Rate Year and increase by approximately $67.102 million, $93.717 million and $122.682 million for Data Years 1, 2 and 3, respectively, as a result of using the proposed phased-in depreciation rates and amortization of LPP assets and the gas reserve deficiency. The table below breaks out the gas depreciation study's proposals for the Rate Year and Data Years in addition to the depreciation impact for existing rates and the capital growth related to existing rates.

Table 7: Depreciation ($ millions)

	RY 1	DY1	DY2	DY3
Existing Rates	152.833	152.833	152.833	152.833
Capex Growth Related to Existing Rates	25.075	40.643	60.279	78.036
Proposed Study Rates (phased in over 4 years)	18.538	40.356	66.971	95.936
LPP Amortization	14.283	14.283	14.283	14.283
Reserve Deficiency over 20 years	-	12.463	12.463	12.463
Total Depreciation	210.729	260.578	306.829	353.551

Q. How does the percentage of the Company's existing depreciation to total net utility plant compare to other New York gas utility companies?

A. The Company's depreciation rate allowance approved in its 2019 Rate Case is 2.22 percent compared to a range of 3.38 percent to 4.01 percent either authorized by the Commission or included in Joint Proposals in recent other New York gas utility companies rate cases. The proposed depreciation rates

will increase the Company's depreciation percentage to the range of 2.57-3.42 percent over the Rate Year and Data Years. These depreciation percentages are more consistent with what other New York gas utilities have been allowed or have been included in Joint Proposals in recent rate cases.

Q. Is the Company proposing accelerated depreciation rates to reflect the potential impacts of decarbonization policies?

A. No. However, Mr. Allis discusses the Units of Production ("UOP") depreciation methodology as a means to accelerate depreciation to account for the potential impacts of the CLCPA and other decarbonization policies and provided the Company's UOP depreciation rates.

Q. Did the Company determine the effect of utilizing UOP rates on the Rate Year and Data Years?

A. Yes, if the Company utilized UOP depreciation rates prepared by Mr. Allis, the annual provision for depreciation and amortization for gas plant would increase (compared to existing rates) by approximately $65.846 million in the Rate Year and increase by approximately $125.606 million, $195.644 million and $274.049 million for Data Years 1, 2 and 3, respectively, as a result of phasing in the UOP depreciation rates over four years and amortization of LPP assets.

Q. What is the Company position on proposing accelerated depreciation rates in the revenue requirement due to decarbonization policies?

A. In November, the Company filed a depreciation study in the Gas Planning Proceeding (Case 22-G-0131) that considered the potential impacts of decarbonization policies on gas depreciation expense and rate base recovery. As discussed in the Policy Testimony, the Company has not included a policy-driven depreciation proposal in this rate filing because the Company fully anticipates the Commission will address the issue in the pending Gas Planning Proceeding. Given the evolving policy in this area, KEDNY proposes that any multi-year settlement should include a rate mechanism that would allow the Company to effectuate the Commission's policy determinations if decided during the term of the rate plan.

VI. Taxes Other Than Income Taxes

Q. Please describe Exhibit __ (RRP-5).

A. Exhibit __ (RRP-5) consists of a summary and four schedules showing real estate taxes, payroll taxes, other taxes, and gross revenue taxes for the Historic Test Year, Rate Year, and Data Years to present the total taxes other than income taxes booked to FERC Account 408.1. Schedule 1 presents real estate taxes for the Historic Test Year, Rate Year, and Data Years. Schedule 2 contains the computation of payroll taxes for the Rate Year and Data Years

based on tax rates currently in effect relative to labor costs forecast in Exhibit __ (RRP-3), Schedule 23, and allocated among expense, capital, and other accounts. Schedule 3 presents other taxes. Schedule 4 provides a calculation of gross revenue taxes for the Historic Test Year, Rate Year, and Data Years and is based on the operating revenues shown on Exhibit __ (RDP-2).

Q. How did the Company forecast real estate taxes?

A. The forecast of real estate taxes is based on KEDNY's actual calendar year 2022 property tax expense, updated for the property tax allocations based on the Office of Real Property Tax Services ("ORPS") calculation methodology, then adjusted for known changes in the obsolescence allowance and application of a growth factor to account for anticipated increases. The amount is then increased for real estate tax expense associated with incremental additions.

Q. How is the taxable value of the Companies' real property determined for property tax purposes?

A. Real property owned by KEDNY located in public rights-of-way is considered special franchise property and subject to a special franchise assessment. The preparation of special franchise assessments is the responsibility of the Valuation Services Division of the Office of Real Property Tax Services ("ORPTS") with the State Board of Real Property Services having the authority

to approve assessments. Real property owned by the Company located on private property is locally assessed. For purposes of property tax assessment, real property includes land, buildings, plant, and other equipment. Regardless of whether the property is subject to a special franchise or local assessment, the methodology for determining the assessment or taxable value of most utility property is the Reproduction Cost New Less Depreciation ("RCNLD") approach.

Q. What was the amount of property tax expense incurred by the Company in the Historic Test Year?

A. As shown in Exhibit __ (RRP-5), Schedule 1, Page 1, KEDNY's adjusted property tax expense in the Historic Test Year (the 12 months ended December 31, 2022) totaled $230.664 million.

Q. What is the forecast of property tax expense for the Rate Year and Data Years?

A. As shown in Exhibit __ (RRP-5), Schedule 1, Page 2, KEDNY forecasts property tax expense of $280.085 million, $307.636 million, $340.622 million, and $380.229 million in the Rate Year, Data Year 1, Data Year 2, and Data Year 3, respectively.

Q. How did the Company's actual property tax expense compare to the current rate allowance?

A. The Company's actual property tax expense exceeded the amounts recovered in rates. Table 8 below shows the rate allowances, the actual property tax expenses, and the resulting under-collections.

Table 8: Property Tax

KEDNY			
Fiscal/Rate Year	Rate Allowance ($000)	Actual Expense ($000)	Over/ (Under) Rate Allowance
FY2020	$165,901	$172,001	($6,100)
FY2021	$166,824	$187,862	($21,038)
FY2022	$199,354	$210,423	($11,069)

As shown in Table 8, KEDNY under-recovered property tax expense (based on the rate allowance and before operation of the existing reconciliation mechanism) by more than $38 million over this three-year period.

Q. How was the forecast of property tax expense calculated for these cases?

A. KEDNY began with the Historic Test Year property tax expense, which was normalized to reverse any property tax deferrals that were recorded on the Company's books. The normalized Historic Test Year expense was adjusted for known changes in the obsolescence allowance to be applied to the tax roll. The Company then applied a growth factor of 11.58 percent for the 15-month

link period of January 2023 through March 2024 (the "Link Period") to calculate forecast increases in property tax of $27.250 million. See Exhibit __ (RRP-5), Schedule 1, Page 3. The Company then added forecast property tax expense associated with incremental additions to plant in service of ($9.607) million for the Link Period. This process was then repeated for the Rate Year and Data Years. See Exhibit __ (RRP-5), Schedule 1, Page 3. The approach utilized by the Company is consistent with the methodology used to calculate the rate allowance for property taxes in the 2019 KEDNY and KEDLI Rate Cases.

Q. Please explain how the Company determined the proposed growth factor for property taxes.

A. The growth factor of 11.58 percent is based on the three-year experienced growth rate from fiscal year ("FY") 2019 to FY 2022 consistent with the three-year growth factor utilized in the 2019 KEDNY Rate Case. The calculation of the growth factor is shown on Exhibit __ (RRP-11), Workpapers to Exhibit RRP-5, Schedule 1, Workpaper 5.

Q. Please explain how tax rates are established.

A. Tax rates are set by local taxing jurisdictions (school district, city, county, town, special district) for each tax year. Each jurisdiction determines its revenue from

all sources other than property taxes, such as state aid, sales tax revenue, and user fees. Those revenues are subtracted from the jurisdiction's budget and the remainder becomes the property tax levy. In most cases, to determine the actual tax rate, the taxing jurisdiction divides the tax levy by the total taxable assessed value of all property in the jurisdiction.

Q. How did the Company calculate the average tax rate for the Historic Test Year?

A. The Company calculated its average tax rate for the Historic Test Year in three steps.

1. The Company identified all tax parcels for which the Company paid property taxes, including the location of the parcel, its assessed value, the equalization rate of the municipality where each parcel is located, and the taxes paid.
2. The Company then divided the assessed value of each parcel by the applicable equalization rate for the municipality, as established by ORPTS, to calculate 100 percent of taxable value for each property.
3. Finally, the Company divided the total property taxes paid by the result of step two above.

Q. How does the Company propose to reflect changes in the tax rate for the Rate Year and Data Years?

A. Changes in tax rates for the Rate Year and Data Years are implicit in the 11.58 percent annual growth factor. For purposes of determining the property taxes associated with the incremental plant additions, the Historic Test Year's average tax rate is used.

Q. Please describe the efforts undertaken by the Company to manage property tax expense.

A. Annually, the Company reviews property assessments to determine if they are reasonable using the RCNLD valuation method. This method develops what is considered a current value of the utility property and is the method used by ORPTS for valuation. If the actual assessments vary substantially from the Company's RCNLD calculations and the property tax dollar amounts are significant, the Company will file complaints with the applicable municipalities. The Company makes every effort to attempt to settle these complaints informally with the municipalities by meeting with the assessors and municipal officials. If, however, the Company is not successful with informal negotiations, it can and does pursue litigation.

Over the years, the Company has successfully contested a number of matters, resulting in substantial property tax savings for customers. KEDNY also petitions ORPTS for obsolescence allowances to be applied to the valuation of special franchise property.

Q. What is obsolescence and how does it affect property taxes?

A. Obsolescence is an impairment in the value of an asset that is distinct from physical depreciation. The RCNLD methodology used by ORPTS to develop assessments recognizes the existence of functional and economic obsolescence. To date, the economic obsolescence allowed by ORPTS is based on the Company not achieving certain economic performance metrics. If these metrics improve, the amount of economic obsolescence allowed by ORPTS will decrease, causing a corresponding increase in assessments and property taxes.

Q. Has ORPTS accepted the Company's applications for obsolescence allowances?

A. Yes, ORPTS has accepted the Company's applications for obsolescence as shown in Table 9 below.

Table 9: Obsolescence Allowances

KEDNY Obsolescence %	For Roll Year
37.44%	2018
40.42%	2019
47.42%	2020
47.42%	2021
48.42%	2022
46.42%	2023

Q. Please explain the Company's forecast obsolescence rate for the Rate Year and Data Years.

A. KEDNY forecast obsolescence for the Rate Year using the percentage allowed by ORPTS for the 2023 assessment roll of 46.42 percent. The Data Years were forecast using the change in the allowances for 2019-2022, which is embedded in the 11.58 percent growth factor. The obsolescence factors allowed by ORPTS are based on multi-year averages.

Q. What is the impact of capital additions on the forecast?

A. Capital additions increase the Company's taxable property and its ultimate property tax expense. KEDNY's 11.58 percent growth factor incorporates capital spending that is approximately equal to the three-year historic average. As shown in Exhibit __ (RRP-5), Schedule 1, property taxes on forecast capital spending over or under the three-year historic average have been separately calculated and added to the forecast property tax expense.

Q. How are refunds handled and what did the Company forecast for refunds during the Rate Year and Data Years?

A. Refunds are the result of successful litigation against municipalities and are therefore non-recurring and unpredictable. KEDNY does not have a basis for forecasting refunds that may be received in the Rate Year or Data Years. If any refunds are obtained, the Company will petition the Commission in accordance with 16 NYCRR Section 89.3 for disposition of any refunds, as they have in the past.

Q. Is the Company proposing a modification to the current reconciliation mechanism for property tax expense?

A. Yes. The current rate plans provide for variances from the rate allowance for property taxes to be shared 10 percent Company/90 percent customers with a cap on the Company's share equal to 7.5 basis points for Rate Year 1 (FY2021), 5.0 basis points for Rate Year 2 (FY2022), and 2.5 basis points for Rate Year 3 (FY2023). The current Rate Year 3 value of a basis point is $391,551.02 for KEDNY.

The Company is proposing to modify this mechanism. Given the variability, uncertainty, and difficulties associated with forecasting property tax expense,

the Company believes that modifying the current reconciliation mechanism to a fully symmetrical reconciliation mechanism is both reasonable and appropriate. Municipalities' economic instability impacting assessments and tax levies, difficulty in forecasting the impact of a new rate plan on obsolescence, and other factors outside the Company's control (e.g., New York City shifting tax levies among classes), all make forecasting property tax expense particularly difficult. Because KEDNY could continue to experience property tax expenses significantly above or below forecast levels, the Company believes that customers and the Company would be better protected by a full reconciliation mechanism.

Q. How does the Company propose to structure the reconciliation mechanism?

A. The Company proposes to recover or refund the difference between actual property tax expense and the rate allowance through the proposed Rate Adjustment Mechanism, which is discussed in the Rate Design Panel's testimony.

Q. Why is surcharge recovery appropriate?

A. The difficulties inherent in forecasting property tax expense have contributed to more than $38 million of property tax under-collection in recent years.

Under-collected property tax expense is the third largest regulatory asset for KEDNY at approximately $30 million. Including property tax expense in the Rate Adjustment Mechanism would enable more current recovery of this large expense, helping to reduce financing pressure and ensure adequate credit metrics. At the same time, customers will benefit through a sur-credit if the reconciliation results in an overcollection.

Q. You mentioned that there is a difficulty in forecasting property taxes. Please elaborate on that difficulty.

A. As we mentioned previously, property tax valuation is based on the RCNLD method. With the recently experienced increases in inflation, supply chain disruptions, and price increases in materials such as pipes and equipment, it has become increasingly difficult to forecast the valuation of property. If inflation increases over time, the valuations will become higher. On the other hand, if inflation were to abate, valuations in the future will be more moderate. Under these circumstances, a fully symmetrical property tax reconciliation mechanism with recovery or refund through the Rate Adjustment Mechanism is the fairest result for both the Company and its customers.

Q. Would a fully symmetrical reconciliation discourage the Companies from mitigating property tax expense?

A. No. As discussed earlier in the Panel's testimony, the Company has a long history of aggressively seeking to minimize property tax assessments. This includes efforts to work with ORPTS to aggressively pursue adjustments to obsolescence, litigation with taxing authorities, and challenging unfair assessments and unlawful tax charges. Even with a reconciliation mechanism, the Company is incented to continue aggressively pursuing tax mitigation measures in the interest of maintaining affordability and cost competitiveness, as well as potentially sharing in any tax savings achieved through litigation. Moreover, given the variability and uncertainty discussed above, a full and symmetrical property tax reconciliation mechanism also serves to protect the interests of customers from forecast variations.

VII. Federal and State Income Tax

Q. Please describe Exhibit __ (RRP-6).

A. Exhibit __ (RRP-6) consists of five pages. Page 1 shows the computation of federal income tax expense ("FIT") and state income tax expense ("SIT") for the Rate Year. Page 2 shows the computation of FIT and SIT for Data Year 1. Page 3 shows the computation of FIT and SIT for Data Year 2. Page 4 shows the computation of FIT and SIT for Data Year 3. Page 5 shows the computation

of the deductions for interest expense for the Rate Year and Data Years. If changes in the tax law become known during this proceeding, the Company will provide appropriate adjustments to the income tax expense computation.

Q. Please describe the method used to calculate the provision for FIT and SIT in the Rate Year and Data Years.

A. Beginning with operating income before income taxes, adjusted by interest expense in the revenue requirement model, the Company made adjustments for those items that are treated differently for book and income tax purposes and have a net effective income tax rate impact. Specifically, the Company adjusted for the permanent 50 percent disallowance for meals expense, the flow through treatment for equity allowance for funds used during construction ("AFUDC") and book depreciation on equity AFUDC. The results are multiplied by the statutory federal or state tax rate presently effective for the Rate Year and Data Years. Income tax-related discrete amortizations such as: 1) Federal Tax Rate Change 2018 (excess Accumulated Deferred Income Taxes ("ADIT")), 2) the New York State ("NYS") and Metropolitan Transport Authority ("MTA") Tax Rate Change 2016 and 3) NYS & MTA Tax Rate Change 2021 are separately included to arrive at net federal and state income tax expense. The federal portion includes the benefit of the state tax deduction.

Q. Please explain the "Federal Tax Rate Change 2018" (excess ADIT) item the Company included in FIT expense.

A. In 2017, as a result of the enactment of the Tax Cuts and Jobs Act (the "Act") the federal income tax rate was reduced from 35 percent to 21 percent, which was effective for the Company in April 2017. The deferred tax impact of this change (excess ADIT) is being amortized in rates in accordance with the method prescribed in the tax regulations and ordered by the Commission. The Rate Year and Data Years include the amortization of excess federal ADIT for the benefit of customers. This amortization reduces the Company's effective tax rate and mitigates the rate increase to customers.

Q. Please explain how the annual federal excess ADIT amortization was calculated.

A. The Company has split the excess ADIT between protected plant, unprotected plant, net operating loss ("NOL"), and unprotected non-plant balances. The split between protected plant and unprotected plant was determined following the application of a deferred tax module to the tax depreciation system, PowerTax. Protected plant excess ADIT relates to the temporary differences between book and tax depreciation methods and lives only. The Internal Revenue Service's normalization regulations require the Average Rate Assumption Method ("ARAM") to be used to calculate the return of protected

excess ADIT if the Company has the data available to implement ARAM. The PowerTax system is able to quantify the ARAM amortization for protected plant excess ADIT by applying the current book depreciation rates against the tax basis. The Company has a forecast of ARAM amortization for the Rate Year and Data Years from PowerTax. This amount is reflected in Exhibit __ (RRP-6), Summary, Workpaper 4.

Unprotected plant excess ADIT is a result of book and tax basis differences such as the repair deduction and contributions in aid of construction and other plant-related temporary differences such as the current tax deduction for cost of removal spending. The Company proposes to continue to use an amortization period of five years to return the unprotected balances to customers. As of the end of the Rate Year the entire balance of the unprotected Excess ADIT is expected to be returned to customers. The NOL unfunded ADIT is classified as a protected asset, as it was the difference between book and tax depreciation, including bonus depreciation, that caused the Company to be in an NOL position. The Company proposes to continue to amortize the unfunded NOL ADIT in the same amount as the protected plant amortization until it is fully utilized.

The Company also included an allocated amortization, over a ten-year life, of National Grid Service Company excess ADIT. Please see Exhibit __ (RRP-6), Summary, Workpaper 4b for the excess ADIT base by category and amortization amounts.

Q. Please explain the "NYS & MTA Tax Rate Change 2016" discrete amortization item the Company included in SIT expense.

A. In 2014, New York State enacted a law reducing the state income tax rate from 7.1 to 6.5 percent, which was effective for the Company in April 2016. The deferred tax impact of this change is being amortized in rates over ten years. Therefore, the Company adjusted the annual amortization to return the remainder of the trued-up excess state deferred income tax over the remainder of the ten-year amortization period. Exhibit __ (RRP-6), Summary, Workpaper 2, sets forth a detailed amortization schedule. This amortization reduces the Company's effective tax rate and mitigates the rate increase to customers.

Q. Please explain the "NYS & MTA Tax Rate Change 2021" income tax discrete amortization item that the Company included in SIT expense.

A. In 2021, NYS enacted a law increasing the state income tax rate from 6.5 to 7.25 percent for tax years beginning after January 1, 2021 and before January 1, 2024, which is effective for the Company for the period from April 1, 2021

through March 31, 2024. The deferred tax impact of the temporary differences that originated during the period of increased tax rate resulted in excess accumulated deferred state income tax (excess ADSIT) and establishment of a tax regulatory liability to be returned to customers. The Company proposes to amortize the entire amount of excess ADSIT for the period from April 1, 2021 through March 31, 2022 in Rate Year. Please see Exhibit __ (RRP-6), Summary, Workpaper 3 for the calculation of excess ADSIT. This amortization reduces the Company's effective tax rate and mitigates the rate increase to customers.

VIII. Rate Base

Q. Please describe Exhibit __ (RRP-7).

A. Exhibit __ (RRP-7) consists of a summary and six schedules. The summary presents the rate bases for the Historic Test Year, Rate Year, and Data Years. Schedule 1 presents the monthly average balances of net utility plant for the Rate Year and Data Years. Schedule 2 presents forecast monthly average balances of regulatory assets and liabilities for the Rate Year and Data Years by account. Schedule 3 presents federal and state ADIT for the Rate Year and Data Years. Schedule 4 presents the O&M cash allowance included in working capital for the Historic Test Year, Rate Year, and Data Years. Schedule 5 presents the lead lag study reflecting the working capital requirements

associated with commodity purchases. Schedule 6 presents the comparison of Average Historic Rate Bases and Historic Capitalization. The difference between these components represents the adjustment for Excess Earning Base included on Page 4 of Schedule 6. Schedule 6 also sets forth materials and supplies and prepayments, which are components of working capital.

A. <u>Forecast of Net Utility Plant In Service</u>

Q Please explain Schedule 1 of Exhibit __ (RRP-7).

A. Schedule 1 consists of six pages and presents the monthly average balances of net utility plant for the Rate Year and Data Years. Pages 1, 2, 3, and 4 present the monthly average balances of gas net utility plant in the Rate Year and Data Years. Pages 5 and 6 present the forecast of capital expenditures and cost of removal.

Q. Please generally describe the methodology utilized to determine the forecast of average net utility gas plant.

A. Estimates of monthly plant in service, depreciation reserve, and non-interest bearing construction work in progress ("CWIP") balances are required to forecast the average net utility plant for the Rate Year and Data Years and are included in rate base pursuant to Commission precedent. The Company's projection of these monthly balances incorporates the following data: (i)

historic plant in service; (ii) historic depreciation reserve; (iii) historic CWIP; (iv) historic retirement work in progress ("RWIP"); (v) forecast capital expenditures; (vi) forecast net cost of removal; (vii) forecast closings to plant in service; (viii) forecast retirements; and (ix) forecast depreciation.

Schedule 1, Page 5, of Exhibit __ (RRP-7) shows the forecast of capital expenditures grouped by various categories along with plant closing rules and/or in-service dates for several major projects. The categories were determined by grouping capital expenditures together that have similar construction periods for purposes of closing capital expenditures to plant in service and for applying similar composite depreciation rates. Page 5 shows a three month capital forecast for the fiscal year ended March 31, 2023 and a five year capital forecast for the fiscal years ending March 31, 2024 through March 31, 2028. The capital forecasts provided in the Company's GIOP direct testimony include all capital related overheads, for example, Capital Addition Distributables ("CAD") and AFUDC. For capital forecasts, the Company allocated fiscal year total construction expenditures into monthly cash flows based on their respective two-year average percentage for calendar years 2021 and 2022. Those estimated monthly expenditures were added to the CWIP balances at December 31, 2022. Closing rules were developed to forecast additions to plant in service by analyzing and adjusting the Historic Test Year's

plant closing for each grouping level being forecast. Consistent with the analysis, the following closing rules were developed:

Gas Storage	9 months
Gas Mains and Services	8 months
Gas Meters and House Regulators	2 month
Gas Measuring and Regulating Station	9 months
Gas General Plant	2-9 months

The monthly expenditures were closed to plant in service the month after the applicable closing rule. For major projects with in-service dates provided, the expenditures were closed to plant in service in the month of the estimated in-service date.

The outstanding CWIP balances were allocated each month between interest and non-interest bearing CWIP based on an average historic percentage. The average historic percentage was developed by analyzing and adjusting the Historic Test Year's non-interest bearing CWIP and total CWIP. Forecast plant in service was developed by adding the monthly closings from CWIP for the period January 2023 through the Rate Year to the December 31, 2022 plant in service balance, and forecast retirements for the same period were subtracted.

Plant retirements were developed by analyzing and adjusting the Historic Test Year retirements as a percentage of adjusted Historic Test Year additions in aggregate. The historic retirement percentages were applied to forecast plant additions excluding additions related to new construction major projects (*e.g.,* the Kew Gardens Gate project). General equipment retirements were estimated based on amortization schedules provided by Plant Accounting. Property Services provided a specific retirement related to a Greenpoint building demolition project. Estimated retirements were included in both the plant in service and depreciation reserve ending balances each month. The depreciation reserve was developed starting with the Historic Test Year ending reserve balance, including RWIP at December 31, 2022, and adding forecast depreciation expense and subtracting forecast retirements and net cost of removal each month for the period January 2023 through March 31, 2028. Schedule 1, Page 6, of Exhibit __ (RRP-7) shows the estimated forecast cost of removal, which was based on information provided by the GIOP, grouped in the appropriate categories. Schedule 1, Page 6, shows a three-month forecast for the fiscal year ended March 31, 2023 and a five-year forecast for the fiscal years ended March 31, 2024 through March 31, 2028. Cost of removal was cash flowed consistent with the methodology utilized to cash flow the associated capital forecast.

B. Deferred Taxes

Q. Please explain the purpose of Schedule 3 of Exhibit __ (RRP-7).

A. Schedule 3 shows the average federal and state ADIT for the Historic Test Year, Rate Year, and Data Years, which reduce rate base.

Q. How did the Company develop the forecast of ADIT?

A. The Company began with the actual ADIT balances as of December 31, 2022 adjusted for the ADIT balances associated with non-rate base items and calculated the forecast based on changes in plant and regulatory assets and liabilities. The Company then made additional adjustments for NOL generation and utilization and income tax discrete amortizations to arrive at the forecast ADIT balances for the Rate Year and Data Years, as shown in Exhibit __ (RRP-7), Schedule 3.

Q. Please explain the change in ADIT related to plant changes.

A. The Company used its tax depreciation system, PowerTax, to forecast the tax depreciation on historic plant balances as of March 31, 2022, the fiscal year end of the most recently filed federal income tax return. All additional changes in ADIT related to plant are a direct result of forecast plant additions, forecast cost of removal, and forecast book depreciation. The Company forecast tax deductions related to plant additions in two layers. The first layer was the new

plant additions eligible for the repair deduction. The repair rate was applied as a percentage of total capital expenditures. The percentage was an estimate based on a trend analysis of the actual results of the prior three fiscal years' tax return study for capital plant repairs. The plant tax basis after the deduction for repairs was then subject to Modified Accelerated Cost Recovery System ("MACRS") depreciation, using a 20-year tax life. All tax plant deductions were compared to book depreciation and federal and state ADIT was computed on the temporary difference.

Q. Please explain the other discrete adjustments to rate base ADIT.

A. Rate base ADIT includes an asset for NOL because the Company is estimated to be in a loss position. The Company included an estimate of the generation of NOL carryforwards as an increase to rate base in each Rate Year and Data Years. The Company is also increasing rate base as the federal excess ADIT and NYS & MTA income tax rate changes are amortized through the income tax expense component of the revenue requirement, as described above. Lastly, the Company is reducing ADIT (increasing rate base) by the deferred tax asset for the estimated Corporate Alternative Minimum Tax credit carryforward.

Q. What is the Corporate Alternative Minimum Tax?

A. By the enactment of § 10101 of Public Law 117-169, 136 Stat. 1818, 1818-1828 (August 16, 2022), commonly referred to as the Inflation Reduction Act of 2022 (IRA), a new corporate alternative minimum tax (CAMT) was added to the Internal Revenue Code (IRC). The CAMT imposes a 15 percent tax on the Adjusted Financial Statement Income (AFSI) of applicable corporations for taxable years beginning after December 31, 2022. The CAMT is the excess of a tentative minimum tax (15 percent of AFSI) over regular tax for the taxable year. The applicable corporation is defined as a corporation whose average annual AFSI for the three-taxable-year-period ending with the taxable year exceeds $1,000,000,000 (general AFSI test) or, in the case of a corporation that is a member of a foreign-parented multinational group, is at least $100,000,000 (foreign-parented multinational group AFSI test). The CAMT can be claimed as a credit against the excess of regular tax over CAMT in future years.

Q. Is the Company expected to be subject to CAMT?

A. The Company is a member of a foreign-parented multinational group and has AFSI in excess of $100,000,0000; therefore, the Company expects to be subject to the CAMT. A "foreign-parented multinational group" is defined as two or more entities included in the same applicable financial statement with at least one entity being a domestic corporation and another entity being a foreign

corporation and the common parent of such entities is a foreign corporation. The Company is a domestic corporation included in the same financial statement as another foreign corporation and its common parent is a foreign corporation.

Q. How was CAMT and credit carryforward calculated?

A. The Company first derived AFSI by making the following adjustments to the pre-tax book income: 1) deduction for state and local income taxes, 2) reversal of book depreciation expense and 3) deduction for accelerated tax depreciation under the Modified Accelerated Cost Recovery System ("MACRS"). The Company applied a 15 percent tax rate to the resulting AFSI to derive tentative minimum tax. The Company then compared the tentative minimum tax to the regular tax and derived excess. The excess of tentative minimum tax over regular tax in each Rate Year and Data Years is an increase to income tax liability. This excess also constitutes the CAMT credit carryforward available to offset regular tax in future years.

Q. Why and how was CAMT Credit carryforward included in ADIT?

A. The Company included a deferred tax asset for the estimated CAMT credit carryforward as part of other discrete adjustments to rate base ADIT. Because CAMT increases income tax liability in the Rate Year and Data Years but is

available for carryforward as an offset to regular tax in the future years, it results in a deferred tax asset. The deferred tax asset is expected to be realized in future years when the regular tax will exceed the minimum tax and the credit carryforward can be utilized. The Company does not expect the estimated CAMT credit carryforward to be utilized against regular tax in the Rate Year or Data Years. Therefore, the balance of the deferred tax asset is included in ADIT balance and rate base in the Rate Year and Data Years.

Q. How did the Company reflect changes in regulatory assets and liabilities in the forecast?

A. Because the change in most regulatory assets and liabilities results in a book-tax timing difference, the existing deferred tax balances on the regulatory accounts included in rate base were adjusted by any forecasted change in those accounts in the Rate Year and Data Years.

Q. Please explain the proration adjustment as it relates to the forecast of movement in accumulated deferred federal and state income tax.

A. Section 1.167(1)-1(h)(6) of the federal income tax regulations provides requirements for the amount of reserve for deferred income tax that is included as a reduction to rate base in a rate filing. Part (ii) of this subsection requires a proration of monthly deferred tax amounts if the rates relate to a "future" period.

Proration is not, however, required for a "historic" period. "Future" periods are forecast periods after the date rates go into effect. "Historic" periods are all periods before the effective date for rates even if the underlying data is an estimate. In the filing, deferred tax balances are projected for each Rate Year.

The date the new rates go into effect for each rate year begins a "future" period, so the movement in the accumulated deferred income tax from that date onward is subject to proration.

The pro rata portion is determined by multiplying the monthly changes in deferred tax by a fraction, the numerator of which is the number of days remaining in the future period at each month's end and the denominator of which is the total number of days in the future period. Only the movement in ADIT changes for the difference between book and tax depreciation net of NOL is subject to proration.

C. Working Capital

Q. Did the Company make any adjustments for working capital?

A. Yes. As shown in Exhibit __ (RRP-7), the Company made the traditional adjustments to reflect one-eighth of O&M expense in rate base for the working

capital allowance along with an Earnings Base/Capitalization adjustment. In addition, the Company made an adjustment for gas purchases.

Q. Please explain the adjustment for gas purchases.

A. Schedule 5 of Exhibit __ (RRP-7) presents the calculation of the carrying charge applicable to the working capital requirements associated with gas purchases based on the lead-lag studies contained in this schedule. The Company used the same methodology as was approved by the Commission in the 2020 NMPC Rate Case and 2019 KEDNY and KEDLI Rate Cases for the gas study.

Q. What are the lead-lag studies used to measure?

A. The lead-lag studies are used to measure the working capital needed by the Company to support its gas purchases. The Company is required to provide working capital for the time between when the Company pays its suppliers for gas purchases and the time the Company receives payments for these purchases from its customers. The results of the studies are used to determine the working capital necessary for purchased gas expense.

IX. Regulatory Assets and Liabilities

Q. Please explain Schedule 2 of Exhibit __ (RRP-7).

A. Schedule 2 of Exhibit __ (RRP-7) sets forth KEDNY's regulatory assets and liabilities. The schedule lists the Historic Test Year and forecast balances by account.

A. Assets and Liabilities

Q. Please describe each deferral account.

A. Appendix A to the Panel's testimony describes the basis for each of the regulatory deferral accounts that have forecast balances through December 31, 2022. The Appendix includes the actual deferral balance at the end of the Historic Test Year and a table showing the forecast balance through March 31, 2024.

Q. How does the Company propose to treat the deferral account balances identified in Appendix A?

A. To address cash flow and recoverability concerns associated with significant regulatory asset balances on KEDNY's balance sheet, the Company is proposing to aggregate and net together certain regulatory asset and liability accounts resulting in a net regulatory asset balance of approximately $195.520 million to be recovered in base rates over a 10-year amortization period.

Schedule 3 of Exhibit __ (RRP-9) sets forth the list of regulatory assets and liabilities subject to aggregation, netting and amortization. The Company proposes to continue to apply carrying charges to the deferral balances, as previously approved by the Commission.

B. Other Assets and Liabilities

Q. Please describe the other deferral accounts shown in Schedule 2 of Exhibit __ (RRP-7).

A. Table 10 below summarize the actual balance for the other assets and liabilities accounts shown in Exhibit __ (RRP-7), Schedule 2 at the end of the Historic Test Year, the forecast balance at the start of the Rate Year, and the proposed treatment for accounts not included in rate base.

Table 10: KEDNY Other Accounts (included in Rate Base)

Account	Actual Account Balance at 12/31/22	Forecast Account Balance at 3/31/24	Proposed Treatment
Rate Case Expense	$0.399 million	$1.462 million	48 months
Unamortized Debt Expense	$16.905 million	$16.996 million	Continue current amortization
Cost Sharing Agreement	$39.571 million	$46.072 million	No request for amortization
Total Other Assets in Rate Base	**$56.875 million**	**$64.530 million**	

Q. Please describe the Unamortized Debt Expense account.

A. This account relates to costs associated with the issuance of debt. These costs are the unamortized cost to issue debt that are capitalized and amortized over the life of the debt.

Q. Please describe the Cost Sharing Agreement account.

A. This account reflects the costs associated with CSC reimbursable projects recoverable from the City. These costs are the operating expense related to CSC – (Public Works) reimbursable capital investment. These costs are not amortized. This account is adjusted when payments are received from the City.

Q. Please explain the Rate Case Expense account.

A. The current balance represents the remaining rate case costs from Case 19-G-0310 to be amortized in Rate Years 2023 and 2024. The forecast balance represents the forecast costs of preparing this rate filing.

Q. How does the Company propose to treat the balances of these accounts?

A. The Company proposes to recover these balances in base rates over the various amortization periods described in Table 10 above.

X. Inflation Factors

Q. Please explain Exhibit __ (RRP-8).

A. Exhibit __ (RRP-8) sets forth the table of inflation factors used to escalate expense and capital expenditures from the Historic Test Year to the Rate Year and Data Years. The exhibit consists of a Summary Page detailing the escalation rates.

Q. What inflation adjustment did the Company use for O&M expense?

A. The inflation adjustment factor for determining the level of O&M expense in the Historic Test Year to forecast the Rate Year is 6.54 percent. This is equivalent to 2.91 percent average annual increase between the Historic Test Year and the Rate Year.

Q. How was this inflation adjustment factor calculated?

A. The calculation is detailed in Exhibit __ (RRP-8). The approach uses the GDPIPD as the measure of the price level and percent changes in this index as the measure of inflation. The GDPIPD is released quarterly by the US Department of Commerce, Department of Economic Analysis. The inflation adjustment factor is calculated by relating the average of the GDPIPD in the Historic Test Year (the four quarters ended December 31, 2022) to the average of the forecast GDPIPD in the Rate Year (the four quarters ending March 31,

2025). Inflation between the Historic Test Year and Data Years was calculated in the same fashion.

XI. Proposed Treatment of Existing Regulatory Deferral Accounts and New Reconciliation Mechanisms

Q. Please describe the use and nature of regulatory deferral accounts.

A. Regulatory deferral accounts are used to track and reconcile expenses and associated revenue recoveries to ensure that the appropriate amount of costs are recovered from or returned to customers. As discussed above and in Appendix A, KEDNY has a number of deferral accounts previously created pursuant to various Commission orders. This section of the testimony will discuss:

(i) the Company's proposals to maintain or discontinue existing deferral accounts;

(ii) the Company's proposals to revise certain existing deferral accounts;

(iii) the Company's proposals to implement new regulatory reconciliation mechanisms that address discrete issues;

(iv) the Company's proposals to include a return on any balances in the deferral accounts using the weighted average cost of capital for KEDNY established in this proceeding; and

(v) the Company's proposed recovery mechanism for these accounts.

Q. Does the Company propose to continue or discontinue any existing deferral mechanisms?

A. Yes. Appendix A shows the existing deferral mechanisms that the Company proposes to continue or discontinue.

Q. Is the Company proposing any new or revised deferral mechanisms in this filing?

A. Yes. In addition to the deferrals identified for continuation in Appendix A, the Company proposes to modify some existing deferral mechanisms and establish some new ones.

With respect to new deferral mechanisms, the Company proposes the following:

- As discussed in the direct testimony of the Customer Panel, the Company proposes to (i) fully reconcile actual credit card and debit card transaction fees with the amount of the forecast fees included in rates; and (ii) add a two-way uncollectible expense reconciliation mechanism that would reconcile the uncollectible expense recovered in base rates against actual write-offs.

- As discussed in the direct testimony of the Capital Structure Panel, the Company is proposing to establish a long-term debt true-up mechanism that would reconcile the difference between the forecast costs of long-term debt embedded in the authorized rates and the Company's actual costs during each of the Rate Years and Data Years.
- As discussed in the direct testimony of the GIOP and Rate Design Panel, the Company proposes to reconcile revenues associated with the Newtown Creek Project and defer the difference for future recovery from or refund to customers.
- As discussed in the direct testimony of the Rate Design Panel, the Company proposes to reconcile late payment charge revenues.

The Company proposes to modify the following existing deferral mechanisms:

- As discussed above, the Company is proposing to continue the current property tax reconciliation but modify it to a full symmetrical reconciliation given the variability, uncertainty and difficulties associated with forecasting property tax expense. The difference between actual property tax expense and the rate allowance is being proposed to be recovered through the Rate Adjustment Mechanism as discussed by the Rate Design Panel.

- As discussed in the GIOP, the Company proposes to modify the current CSC capital reconciliation to a full true-up (from the current 90 percent/10 percent sharing mechanism) and add an O&M expense tracker.

In addition, as discussed by the Policy Panel, to the extent the Commission issues orders during the pendency of this rate proceeding or the subsequent rate plan concerning statewide policy issues that cause the Company to incur incremental costs, the Company proposes that it be permitted to defer (as necessary) and recover such cost through a surcharge mechanism such as the Rate Adjustment Mechanism.

Q. Please explain Exhibit __ (RRP-9).

A. Exhibit __ (RRP-9) consists of three schedules.

Schedule 1 summarizes the Rate Year threshold allowances for the new and modified deferral mechanisms.

Schedule 2 illustrates the proposed CSC O&M expense deferral mechanism, whereby the Company would defer O&M costs above/below the amount set in rates.

Schedule 3 illustrates the specific group of regulatory asset and liability balances the Company proposes to aggregate and net together for recovery over a 10-year amortization period.

Q. What does the Company propose with respect to these new reconciliation mechanisms for the years following the Rate Year?

A. The reconciliation mechanisms would continue to operate in the years after the Rate Year. The Company will maintain the authorized revenue requirement established in this case as the baseline cost for each deferral.

Q. Does the Company propose that carrying charges be applied to the new deferral accounts?

A. Yes. Except for non-cash pension and OPEB items, carrying charges calculated at the weighted average cost of capital used to set rates in this case should be applied to these deferral accounts, consistent with the Commission's Order in the 2019 KEDNY and KEDLI Rate Cases and the 2020 NMPC Rate Case.

Q. Why are pension and OPEB assets and liabilities exempt from carrying charges?

A. Pursuant to the Commission's P&OPEB Policy, utilities need only fund the respective trusts when the amounts deferred are collected from customers. Because the Company does not advance cash to fund the deferred amount, no carrying charge is warranted. When the Company recovers the deferral, it places the funds into the pension or OPEB trusts.

Q. Does the Company propose to update information on the regulatory deferral accounts throughout this proceeding?

A. Yes. The Company proposes to update the regulatory deferral accounts, if necessary. This is consistent with updates made in prior Company rate cases. If necessary, additional updates will be provided as appropriate.

XII. Miscellaneous

Q. Please describe Exhibit __ (RRP-10).

A. Exhibit __ (RRP-10) consists of twelve schedules that set forth various historic financial data in accordance with Commission regulations.

Q. Please describe Exhibit __ (RRP-11).

A. Exhibit __ (RRP-11) contains the workpapers supporting the exhibits sponsored by this Panel.

Q. Please describe Appendix B.

A. Appendix B sets forth the Company's current and proposed revenue adjustments and incentives.

The CLCPA Panel discusses the Company's proposal to implement earnings adjustment mechanisms.

Q. Does this conclude the Panel's direct testimony?

A. Yes, it does.

Description and Basis for Regulatory Assets and Liabilities

1. Capital Trackers

Basis for the Deferral

KEDNY's capital tracker deferral account consists of mechanisms established in Cases 06-M-0878, 06-G-1186, 12-G-0544, 16-G-0059 and 19-G-0309 .

a. 2008 – 2012 Deferrals

Section IX(C)(4) of the Merger and Gas Revenue Requirement Joint Proposal ("JP 2") in Case 06-M-0878 established two capital trackers for KEDNY: (i) the two-way City/State Construction Tracker and (ii) the Non-Growth-Related Capital Tracker.[1]

- *City/State Construction Tracker* – JP 2, Appendix 2 provides KEDNY's projected levels of city/state construction expenditures for Rate Years One (CY 2008) though Rate Year Five (CY 2012). KEDNY deferred to its Balancing Account the full revenue requirement effect associated with the difference between the actual City/State Construction spending, net of any reimbursements, and the rate allowance in Appendix 2.
- *Non-Growth-Related Capital Tracker* – KEDNY deferred to its Balancing Account the full revenue requirement associated with any shortfall between actual

[1] Case 06-M-0878, Joint Petition of National Grid PLC and KeySpan Corporation for Approval of Stock Acquisition and other Regulatory Authorizations, *Abbreviated Order Authorizing Acquisition Subject to Conditions and Making Some Revenue Requirement Determinations for KeySpan Energy Delivery New York and KeySpan Energy Delivery Long Island* (issued and effective August 23, 2007) (hereinafter the "August 2007 Order); Case 06-M-0878, Joint Petition of National Grid PLC and KeySpan Corporation for Approval of Stock Acquisition and other Regulatory Authorizations, *Order Authorizing Acquisition Subject to Conditions and Making Some Revenue Requirement Determinations for KeySpan Energy Delivery New York and KeySpan Energy Delivery Long Island* (issued and effective September 17, 2007) (hereinafter the "September 2007 Order").

expenditures and the forecast Non-Growth-Related Capital expenditure amounts set forth in JP 2, Appendix 2 at the end of any calendar year during 2008-2012.

b. 2013 – 2016 Deferrals

In 2013, the City/State Construction deferral mechanism was eliminated and KEDNY's capital tracker mechanism was modified to a downward-only net utility plant reconciliation mechanism that includes allocated common plant and depreciation expense.[2] To the extent that KEDNY's net utility plant, inclusive of allocated common plant and depreciation expense, falls below the combined target average net utility plant and depreciation expense revenue requirement, KEDNY is required to establish a regulatory liability for the benefit of customers. KEDNY is not permitted to establish a regulatory asset for any increase in the revenue requirement that results from the actual net utility plant and depreciation expense exceeding the targets. The mechanism was originally established to operate on a cumulative basis over the two-year term ending December 31, 2014 but was extended to four years by the Commission.[3] In October 2015, the Commission modified KEDNY's capital investment plan for 2015 and 2016, allowing KEDNY to use its deferred credit balance as of December 31, 2014 to offset the revenue requirement associated with its increased capital expenditures in 2015 and 2016.[4]

[2] Case 12-G-0544, In the Matter of the Commission's Examination of The Brooklyn Union Gas Company d/b/a National Grid NY's Earnings Computation Provisions and Other Continuing Elements of the Applicable Rate Plan, *Order Adopting Terms of a Joint Proposal* (issued and effective June 13, 2013), at 17-18 (hereinafter the "June 2013 Order").
[3] Case 12-G-0544, In the Matter of the Commission's Examination of The Brooklyn Union Gas Company d/b/a National Grid NY's Earnings Computation Provisions and Other Continuing Elements of the Applicable Rate Plan, *Order Modifying the Net Utility Plant Reconciliation Mechanism* (issued and effective October 19, 2015), at 2.
[4] *Id.* at 12-14.

c. 2017 – 2020 Deferrals

The Joint Proposal in Case 16-G-0059 established two capital trackers for KEDNY: (i) the City/State Construction Tracker and (ii) the Net Utility Plant and Depreciation Expense Reconciliation Mechanism.

- *City/State Construction Tracker* – Section 6.2.2 of the Joint Proposal in Case 16-G-0059 requires that, to the extent that KEDNY's actual capital spending for City/State construction, net of reimbursements, differs from the forecast amount in a Rate Year, KEDNY defers the revenue requirement effect (excluding O&M expenses) associated with 90 percent of the difference.
- *Net Utility Plant and Depreciation Reconciliation* – Pursuant to Section 6.2.1 of the Joint Proposal in Case 16-G-0059, KEDNY implemented a downward only Net Utility Plant and Depreciation Expense Reconciliation Mechanism. Each Rate Year, KEDNY reconciles its actual average net utility plant and depreciation expense revenue requirement to the target average net utility plant and depreciation expense revenue requirement. The deferred balance is carried forward each Rate Year and summed at the end of the third Rate Year. If at the end of the third Rate Year the cumulative balance results in a regulatory liability, the Company defers the revenue requirement impact for the benefit of the customers. If the cumulative balance results in a regulatory asset, no deferral is recorded. In years that incremental Leak Prone Pipe replacement costs are recovered through the Gas Safety and Reliability Surcharge, the net plant and depreciation components of the Gas Safety and Reliability Surcharge for incremental LPP replacement costs are added to the overall Net Utility Plant and Depreciation Expense Mechanism target to avoid any double

recovery. Similarly, in years the City/State Construction Tracker mechanism applies, the net plant and depreciation components of the City/State Construction Tracker will adjust the overall Net Utility Plant and Depreciation Expense Mechanism target to avoid any double recovery. As of January 1, 2020, the Net Utility Plant and Depreciation Expense Reconciliation Mechanism will be converted into a two-way tracker until the earlier of the approval of new KEDNY rates via a general rate case or June 30, 2020.

d. Deferrals Established in Case 19-G-0309

- *City/State Construction Tracker* – Section 8.1.13 of the Joint Proposal in Case 19-G-0309 requires that, to the extent that KEDNY's actual capital spending for City/State construction, net of reimbursements, differs from the forecast amount in each Rate Year (and stay out period), KEDNY will defer the revenue requirement effect (excluding O&M expenses) associated with 90 percent of the difference.
- *Net Utility Plant and Depreciation Reconciliation* – Pursuant to Section 8.1.12 of the Joint Proposal in Case 19-G-0309, KEDNY will continue a downward only Net Utility Plant and Depreciation Expense Reconciliation Mechanism. Each Rate Year, KEDNY reconciles its actual average net utility plant and depreciation expense revenue requirement to the target average net utility plant and depreciation expense revenue requirement. The deferred balance is carried forward each Rate Year and summed at the end of the third Rate Year. If at the end of the third Rate Year the cumulative balance results in a regulatory liability, the Company defers the revenue requirement impact for the benefit of the

customers. If the cumulative balance results in a regulatory asset, no deferral is recorded. The net plant and depreciation components of the City/State Construction and Customer Connections Trackers will adjust the overall Net Utility Plant and Depreciation Expense Mechanism target to avoid any double recovery. As of April 1, 2023, the Net Utility Plant and Depreciation Expense Reconciliation Mechanism will be converted into a two-way tracker through March 31, 2024 (capped at the Companies current capital forecast levels for the twelve months ending March 2024).The Company will establish a surcharge mechanism to be included in the DRA to recover the pre-tax revenue requirement associated with their capital investments to the extent they exceed the level of net utility plant and book depreciation expense reflected in rates.

Actual Deferral through December 31, 2022

The actual deferral balance as of December 31, 2022 was a **debit of $44.143 million.**

Forecast of Deferral through March 31, 2024

As of March 31, 2024, the forecast deferral balance is a **debit of $53.890 million.**

2. Electric Gas Generator Rev Deferral

Basis for the Deferral

Beginning 2017, pursuant to Section 6.1.8 of the Joint Proposal in Case 16-G-0059 and continued in the current rate case per Section 8.1.8 of the Joint Proposal in Case 19-G-0309, KEDNY reconciles the difference between the electric generator revenues imputed in its revenue requirement and the actual revenues it recovers from the electric generators

in each Rate Year. Any difference would be credited or surcharged to firm sales and firm transportation customers through the DRA for the 12-month period starting July 1, 2022 under the current rate plan.

Actual Deferral through December 31, 2022

The actual deferral balance as of December 31, 2022 was a **credit of $0.650 million.**

Forecast of Deferral through March 31, 2024

As of March 31, 2024, the forecast deferral balance is a **credit of $0.650 million.**

3. Economic Development Grant Programs

Basis for the Deferral

Pursuant to Section 7.7 of the Joint Proposal in Case 19-G-0309, during each rate year the Company's funding will be set at $2.25 million. Each rate year KEDNY will amortize prior economic development credits so that the net revenue requirement for each Company is $500,000. The Economic Development Grant Program is subject to down-ward only reconciliation over the term of the rate plan. Any difference between the respective rate allowance and actual program costs in a given Rate Year will be carried forward and reconciled at the end of Rate Year Three, with any under-expenditure to be deferred for future use in the respective Economic Development Grant Program.

In previous rate plans this deferral contains two items (i) Economic Development Super Storm Sandy Program costs and (ii) Economic Development Grant Program costs.

- *Economic Development Super Storm Sandy Program* – In Case 13-G-0001, the Commission authorized KEDNY to defer up to $10 million to fund Tier 2 and 3

grants to assist customers affected by Superstorm Sandy. The deferral is subject to the condition that if KEDNY and KEDLI collectively earn above their allowed return on common equity, the shareholder's portions of those earnings shall be applied against the deferrals.[5]

- *Economic Development Grant Program* – Section 6.1.9 of the Joint Proposal in Case 16-G-0059 required KEDNY to a downward only reconciliation for its Economic Development Grant Programs. Any under expenditures against the $2 million rate allowance in a given Rate Year (beginning 2017) are carried forward and reconciled at the end of 2019.

Actual Deferral through December 31, 2022

The actual deferral balance as of December 31, 2022 was a **debit of $1.885 million.**

Forecast of Deferral through March 31, 2024

As of March 31, 2024, the forecast deferral balance is a **debit of $0.780 million.**

4. Environmental Costs

Basis for the Deferral

Pursuant to Section 8.1.4 of the Joint Proposal in Case 19-G-0309, for each Rate Year KEDNY will fully reconcile actual Site Investigation and Remediation ("SIR") costs to the forecast rate allowance. Any under-or over-expenditures will be deferred for future refund to or recovery from customers with the exception of the Citizens site for KEDNY. To the extent that the difference between actual SIR expense (inclusive of

[5] Case 13-G-0001, Proceeding on Motion of the Commission Regarding the Brooklyn Union Gas Company d/b/a National Grid NY and KeySpan Gas East Corporation d/b/a National Grid for Approval of Emergency Economic and Community Redevelopment Program, *Order Approving Emergency Economic Development Programs with Modifications* (issued and effective October 18, 2013), at 11.

Gowanus Canal and Newtown Creek) and the forecast rate allowance exceeds $25 million on a cumulative basis, KEDNY will utilize the SIR Recovery Surcharge. The surcharge will be calculated annually and be limited to an amount no greater than two percent of KEDNY's prior year's revenues. In addition, to enable the continued recovery of historic SIR expenditures, base rates for each of the Rate Years will include the current amortization of $18.521 million annually for KEDNY, representing one-tenth of the forecast SIR deferral balances as of December 31, 2016.

As described in Gas Rates Joint Proposal in Case 06-G-1185, if the total cost of investigating and remediating the Coney Island site, plus the cost for investigating the Company's Citizens site, differs from $33.996 million, KEDNY would absorb or retain 10 percent of the difference, and the balance would be reflected in the Balancing Account as either a debit or credit.[6]

Pursuant to Section 6.1.4 of the Joint Proposal in Case 16-G-0059, each Rate Year, KEDNY fully reconciles actual SIR expense (inclusive of Gowanus Canal and Newtown Creek costs) to the Forecast Rate Allowance. Any under or over expenditures will be deferred for future refund to or recovery from customers (with the exception of the Citizens site referenced above).

[6] Case 06-G-1185, Proceeding on Motion of the Commission as to the Rates, Charges, Rules and Regulations of The Brooklyn Union Gas Company d/b/a KeySpan Energy Delivery New York for Gas Service, Gas Rates Joint Proposal (dated October 10, 2007) (hereinafter "JP 4"), at 11-12. JP 4 was adopted in the December 2007 Order; Case 06-G-1185, Proceeding on Motion of the Commission as to the Rates, Charges, Rules and Regulations of The Brooklyn Union Gas Company d/b/a KeySpan Energy Delivery New York for Gas Service, *Order Denying National Grid PLC's Petition for Rehearing* (issued and effective April 24, 2008).

Pursuant to JP-2, KEDNY defers for future recovery one hundred percent of actual SIR costs, with the exception of the Coney Island and Citizens sites, as discussed below. Deferred SIR costs include the remediation costs associated with KEDNY's manufactured gas plant sites and Superfund sites, including sites where KEDNY is named as a potentially responsible party. KEDNY generally recognizes its SIR responsibilities as a liability on its balance sheet as the sites are identified and costs are assessed. The liabilities are reduced as expenditures are made to clean up or remediate sites. The SIR deferral follows the cash expenditures.

Actual Deferral through December 31, 2022

The actual deferral balance as of December 31, 2022 was a **debit of $164.828 million.**

Forecast of Deferral through March 31, 2024

As of March 31, 2024, the forecast deferral balance is a **debit of $188.506 million.**

5. Exogenous Costs

Basis for the Deferral

Pursuant to Section 8.1.3 of the Joint Proposal in Case 19-G-0309, one hundred percent of all Exogenous Costs associated with or caused by an individual instance will be deferred, once such costs exceed the threshold in any one Rate Year of three percent of KEDNY's pre-tax utility income for the year in which the change first occurs, the total impact will be deferred. The balance in the Exogenous Deferral represents incremental service line inspection costs through March 31, 2020 and paving expenses as a result of new legislation.

Section 6.1.3 of the Joint Proposal in Case 16-G-0059 permitted KEDNY to defer one hundred percent of all Exogenous Costs associated with or caused by certain events (*e.g.*, any legislative, court, or regulatory change that imposes new or modifies existing obligations or duties) as set forth in the Joint Proposal. Specifically, the total cost impact of such an event will be deferred once Exogenous Costs in any one Rate Year exceed three percent of KEDNY's pre-tax utility income (determined in accordance with the methodology set forth for the Earnings Sharing Mechanism) for the year in which the change first occurs.

Actual Deferral through December 31, 2022

The actual deferral balance as of December 31, 2022 was a **debit of $101.499 million.**

Forecast of Deferral through March 31, 2024

As of March 31, 2024, the forecast deferral balance is a **debit of $101.499 million.**

6. Gas Safety and Reliability Surcharge

Basis for the Deferral

Pursuant to Section 3.10 of the Joint Proposal in Case 19-G-0309, the per therm Gas Safety and Reliability Surcharge ("GSRS") established in Case 16-G-0059 shall continue. The GSRS shall be modified to include recovery of the following: (i) incremental proactive LPP replacement costs up to 102 percent of the rate allowance unit cost; (ii) any earned leak repair Positive Revenue Adjustment; and (iii) incremental leak repair costs. The Company will not be permitted to recover any earned PRA for LPP removal through the GSRS.

Section 5.5.3 of the Joint Proposal in Case 16-G-0059 provides for a GSRS calculated by first allocating the return on investment, depreciation expense, and O&M expense (*i.e.,* disconnects and reconnects) associated with incremental LPP investment, leak repair costs, and any positive revenue adjustments earned for LPP productivity, LPP removals, or leak repairs (as specified in Section 8 of the Joint Proposal) to each firm service class by forecast delivery revenues, then developing a per therm rate per service class. The GSRS is collected in the delivery rate adjustment.

Actual Deferral through December 31, 2022

The actual deferral balance as of December 31, 2022 was a **debit of $0.091 million.**

Forecast of Deferral through March 31, 2024

As performance is measured each calendar year, KEDNY has not forecast future performance through March 31, 2024.

7. Gas Research Institute/Gas Millennium Deferral

Basis for the Deferral

KEDNY recovers and reconciles research and development Millennium Fund costs via a surcharge established in accordance with the Commission's Order in Case 99-G-1369.[7] The surcharge is set forth in Rule 40A of KEDNY's Tariff.

Actual Deferral through December 31, 2022

The actual deferral balance as of December 31, 2022 was a **credit of $0.974 million.**

Forecast of Deferral through March 31, 2024

As of March 31, 2024, the forecast deferral balance is a **credit of $0.974 million.**

[7] Case 99-G-1369, Petition of New York Gas Group for Permission to Establish a Voluntary State Funding Mechanism to Support Medium and Long Term Gas Research and Development Programs, *Order Approving Staff's Recommendation* (issued and effective February 14, 2000).

8. Low Income Program

Basis for the Deferral

Pursuant to JP 4, KEDNY's low income balancing account matched actual low income credits applied to customer bills to the budgeted program costs of $7.4 million during rate years one through five of the rate plan. Any over or underspending is reconciled on an annual basis. Deferred debits/credits accrue carrying charges at KEDNY's AFUDC rate and accrued carrying charges are reflected in KEDNY's low income balancing account. Any net positive balance in the low income balancing account at the end of the rate plan was to be used to enhance KEDNY's future low income programs.[8] Per the rate plan extension in Case 12-G-0544, the annual low income deferral threshold was increased to $10.4 million in Rate Year Six and decreased to $4.4 million in Rate Year Seven. If the actual costs of the low income program differ from the threshold amounts, the variance is deferred for future recovery from, or credit to, ratepayers.[9]

Actual Deferral through December 31, 2022

The actual deferral balance as of December 31, 2022 was a **debit of $0.708 million.**

Forecast of Deferral through March 31, 2024

As of March 31, 2024, the forecast deferral balance is **debit of $0.708 million.**

9. Negative or Positive Revenue Adjustments

Basis for the Deferral

[8] *See* JP 4, Section V(D)(3) and December 2007 Order, at 26.
[9] Case 12-G-0544, In the Matter of the Commission's Examination of the Brooklyn Union Gas Company d/b/a National Grid NY's Earnings Computation Provisions and Other Continuing Elements of the Applicable Rate Plan, Order Adopting Terms of a Joint Proposal (issued and effective June 13, 2013), at 9, 17-25 (hereinafter the "June 2013 Order").

Pursuant to Section 8.1.6 of the Joint Proposal in Case 19-G-0309, KEDNY defers any negative or positive revenue adjustments associated with the Service Quality Program, or the Gas Safety Performance Metrics. Any negative revenue adjustments associated with the Gas Safety Performance Metrics will be deferred for future disposition by the Commission.

Pursuant to Section 6.1.6 of the Joint Proposal in Case 16-G-0059, KEDNY defers any negative or positive revenue adjustments associated with the Service Quality Program (Section 7) or the Gas Safety Performance Metrics (Section 8), or any positive growth incentive (Section 9). KEDNY's customer service performance is measured for each Rate Year and a total pre-tax potential negative revenue adjustment of $11.7 million per year may be allocated against a set of four performance metrics: PSC Complaint Rate, Customer Satisfaction Survey, Adjusted Customer Bills, and Telephone Answer Response within 30 Seconds.

Section 7.8 of the Joint Proposal permits KEDNY to earn a positive revenue adjustment of $1.260 million or $0.540 million during each Rate Year if it achieves one or both targets as specified on residential service terminations for nonpayment and bad debt from residential accounts.

Section 9.4 of the Joint Proposal permits KEDNY to earn a positive incentive in each Rate Year of one basis point for each 10 percent increase in customers (excluding non-firm customers who migrate to firm service) KEDNY is able to achieve incremental to the customer growth target of 7,000 total customers based on the actual total count of customers at the beginning of each Rate Year. In addition, KEDNY earns a positive incentive in each Rate Year of one basis point for each 10 percent increase in customer

conversions for firm non-heat classifications to firm heating classifications that KEDNY is able to achieve incremental to 1,000 conversions annually. The customer growth target and customer conversion incentives are each capped at 5 basis points each year.

Section 8 of the Joint Proposal in Case 16-G-0059 provides that a total of 150 pre-tax basis points are at risk per calendar year for KEDNY's performance across specified Gas Safety Performance Metrics for leak prone pipe removal, leak backlog, damage prevention, emergency response, and compliance with certain gas safety regulations. Any negative revenue adjustments associated with the Gas Safety Performance Metrics will be deferred for future incremental safety programs.

Actual Deferral through December 31, 2022

The actual deferral balance as of December 31, 2022 was a **debit of $6.577 million.**

Forecast of Deferral through March 31, 2024

As performance is measured each calendar year, KEDNY has not forecast future performance through March 31, 2024.

10. Penalties

Basis for the Deferral

The Joint Proposal executed on August 17, 2007 ("JP 3") in Case 06-G-1185 established a comprehensive list of safety, reliability, and customer service performance requirements as well as negative revenue adjustments in the event that KEDNY fails to meet any of the requirements. The terms of JP 3 were generally adopted by the Commission, with modifications to the amounts at risk for each measure.[10] Any revenue adjustments arising from a failure to meet safety and reliability targets are credited to the

[10] September 2007 Order, at 143-49.

Balancing Account. The metrics were continued and slightly modified in Case 12-G-0544; however, the deferral mechanism remained the same.[11]

Actual Deferral through December 31, 2022

The actual deferral balance as of December 31, 2022 was a **credit of $6.644 million.**

Forecast of Deferral through March 31, 2024

As of March 31, 2024, the forecast deferral balance is a **credit of $4.634 million.**

11. Pension and Other Post Employment Benefits

Basis for the Deferral

Pursuant to Section 8.1.1 of the Joint Proposal in Case 19-G-0309, KEDNY will continue to defer and reconcile their respective actual pension and OPEB expenses to the levels allowed in rates in accordance with the Commission's Pension & OPEB Statement of Policy.

In accordance Section 6.1.1 of the Joint Proposal in Case 16-G-0059, the Commission authorized KEDNY to continue to defer and reconcile its actual pension and OPEB expenses to the levels allowed in rates. Carrying charges are not calculated on pension or OPEB deferred balances. For purposes of determining KEDNY's internal reserve and the carrying costs that apply to that reserve, KEDNY is authorized to combine the funding of its pensions and OPEBs. KEDNY accrues and defers carrying charges on the net unfunded pension and OPEBs amounts, until the net unfunded amount is funded.

Previously, per Section IX(C)(1) of JP 2, KEDNY reconciled its actual pension and OPEB expense to the Estimated Pension and OPEB Expense amounts set forth in the rate

[11] June 2013 Order, at 23-25.

plan. Fair value adjustments to the pension and OPEB plans made in connection with the National Grid merger are amortized over ten years in accordance with the Statement of Policy and reflected in the reconciliation of actual pension and OPEB expense to the Estimated Pension and OPEB expense in JP 2. The reconciliation does not include settlement and curtailment costs from merger-related programs as those costs are included in the costs to achieve. Subsequent stay out years are reconciled to the Rate Year Five Pension and OPEB Expense allowances set forth in JP 2.[12] KEDNY also reduced its annual revenue requirement for the five rate years by $6 million as payment for returning to the pension policy. The $30 million reduction, in addition to the $99 million reduction in revenue requirements over the five years, was recorded as a regulatory liability and amortized over the five rate years to match the adjustments to the cost of service in JP 2, Appendix 2 and fund KEDNY's Pension/OPEB plans in Rate Year One by $60 million, less the funding made by KEDNY since March 31, 2007.[13]

Actual Deferral through December 31, 2022

The actual deferral balance as of December 31, 2022 was a **debit of $68.067 million.**

Forecast of Deferral through March 31, 2024

As of March 31, 2024, the forecast deferral balance is a **debit of $67.544 million.**

12. Property Tax

Basis for the Deferral

KEDNY's property tax deferral account covers multiple rate plan periods.

a. Property Taxes (prior to 2017)

[12] *See generally* September 2007 Order.
[13] JP 2, Section IX(C)(1) and September 2007 Order.

Under JP 4, KEDNY's delivery rates during the rate period reflect an amortization over a seven year period of the deferred special franchise taxes it had incurred as of March 31, 2007, less a $22.5 million write off.[14] For the period from April 1, 2007 through September 30, 2007, KEDNY was permitted to defer 90% of the difference between its actual annualized special franchise tax and the annualized amount of $45.718 million established in Case 97-M-0567.[15]

In accordance with the order in Case 06-G-1185, KEDNY deferred 90 percent of the difference between its actual property and special franchise taxes and the amounts set forth in JP 2 Section IX(C)(2) in Rate Years One through Five. The other 10 percent of the difference was allocated to KEDNY. Subsequent rate years continued the 90/10 allocation and are reconciled for property and special franchise taxes to the Rate Year Five allowance.

b. Property Taxes (2017-2022)

Pursuant to Section 8.1.5 of the Joint Proposal in Case 19-G-0309, KEDNY defers the difference between the actual property and special franchise taxes expense to the rate allowance. The difference between actual property and special franchise taxes expense, excluding the effects of tax refunds, and the rate allowances will be deferred for future refund to or recovery from customers. In each rate year the differences will be shared 90 percent/ 10 percent between customers and KEDNY, respectively. KEDNY's 10 percent share above or below the level in rates will be capped at an annual amount equal to 7.5 basis points of return on common equity in Rate Year 1, 5.0 basis points in Rate Year 2 and 2.5 basis points in Rate Year 3.

[14] JP 4, at 19; December 2007 Order, at 54.
[15] December 2007 Order, at 52, 63.

In accordance with Section 6.1.5 of the Joint Proposal in Case 16-G-0059, KEDNY deferred the difference between actual property and special franchise taxes expense, excluding the effects of tax refunds, and the rate allowance. Differences are shared 85 percent/15 percent between customers and KEDNY, respectively.

Actual Deferral through December 31, 2022

The actual deferral balance as of December 31, 2022 was a **debit of $30.505 million.**

Forecast of Deferral through March 31, 2024

As of March 31, 2024, the forecast deferral balance is a **debit of $52.521 million.**

13. Regulatory Assessments

Basis for the Deferral

In 2009, New York State enacted a budget requiring the Department of Public Service to collect a Temporary State Energy and Utility Service Conservation Assessment (the "PSL 18-a Assessment"). The Commission directed utilities to implement tariff revisions to collect the PSL 18-a Assessment from customers through rates.[16] KEDNY collects and defers the PSL 18-a Assessment in accordance with the Commission's orders in Case 09-M-0311 and Rule 49 of its tariff. This deferral ended March 31, 2018.

Actual Deferral through December 31, 2022

The actual deferral balance as of December 31, 2022 was a **debit of $2.349 million.**

Forecast of Deferral through March 31, 2024

As of March 31, 2024, the forecast deferral balance is a **debit of $2.349 million.**

[16] Case 09-M-0311, Implementation of Chapter 59 of the Laws of 2009 Establishing a Temporary Annual Assessment Pursuant to Public Service Law § 18-a(6), *Order Implementing Temporary State Assessment* (issued June 19, 2009).

14. Revenue Decoupling Mechanism ("RDM")

Basis for the Deferral

Pursuant to Section 3.7 of the Joint Proposal in Case 19-G-0309, KEDNY's RDM was modified as follows: (i) a revenue-per class RDM implemented for Service Classification (SC) Nos. 1B and 1A; (ii) the incremental growth incentives will be eliminated from the revenue-per-class RDMs for SC 2 and SC3; (iii) RDMs are reconciled on a Rate Year basis rather than a Calendar Year basis; (iv) KEDNY refiled its annual RDM reconciliation for the period January 1, 2020, through March 31, 2021; and (v) new RDM targets.

Pursuant to Section 6.1.10 of the Joint Proposal in Case 16-G-0059, KEDNY's Revenue Decoupling Mechanism is adjusted to reflect updated revenue-per-customer targets for SC 1B and to implement revenue-per-class RDMs for SC 2 and SC 3 that allow KEDNY to keep all revenues calculated at the marginal cost rates from customer growth above the customer forecasts reflected in the Rate Years. KEDNY excludes revenues obtained from TC and IT customers that migrate to SC 2 and SC 3 firm services.

Actual Deferral through December 31, 2022

The actual deferral balance as of December 31, 2022 was a **credit of $24.314 million.**

Forecast of Deferral through March 31, 2024

As of March 31, 2024, the forecast deferral balance is a **credit of $24.314 million.**

15. Non-Firm Demand Response Services (formerly Temperature Controlled and Interruptive Service Sharing)

Basis for the Deferral

Section 8.1.7 of the Joint Proposal in Case 19-G-0309, states that each Rate Year KEDNY will fully reconcile actual Non-Firm Demand Response revenues to the amounts imputed in the revenue requirement. An adjustment will be made to the revenue targets to remove forecast revenues for Non-Firm Demand Response customers that migrate to firm service. Any difference between actual and imputed revenues will be credited or surcharged to firm sales and firm transportation customers through the DRA for the 12-month period beginning July 1, 2022.Beginning in 2017, pursuant to Section 6.1.7 of the Joint Proposal in Case 16-G-0059, each Rate Year, KEDNY fully reconciles actual TC and IT Services revenues to the amounts imputed in the revenue requirement. Any difference between actual and imputed revenues will be credited or surcharged to firm sales and firm transportation customers through the DRA for the 12-month period starting March 1.

The Joint Proposal dated February 22, 2013 in Case 12-G-0544 provides that KEDNY's revenue requirements includes Temperature Controlled ("TC") revenues of $100 million in Rate Year Six and $102.3 million in Rate Year Seven. To the extent KEDNY's actual TC revenues exceed those amounts, 90 percent of such excess revenues will be deferred for the benefit of customers and 10 percent will be retained by KEDNY. To the extent the Company's TC revenues are less than these levels, 90 percent of the TC revenue shortfall will be deferred for future recovery from customers.

Actual Deferral through December 31, 2022

The actual deferral balance as of December 31, 2022 was a **credit of $1.109 million.**

Forecast of Deferral through March 31, 2024

As of March 31, 2024, the forecast deferral balance is a **credit of $1.109 million.**

16. Energy Efficiency

Basis for the Deferral

Pursuant to Section 3.8 of the Joint Proposal in Case 19-G-0309, the Clean Energy Fund ("CEF") costs collection through the System Benefits Charge ("SBC") will be discontinued after December 31, 2020. Any over or under-collection identified in the final CEF, and EE Tracker reconciliation shall be deferred for later return or recovery from customers. KEDNY's energy efficiency costs will be recovered in base rates beginning in Rate Year 1 of the rate plan. In addition, if KEDNY does not file for new rates to become effective on or before April 1, 2023, the Companies will be permitted to recover through a surcharge any Commission-approved NE:NY budget not reflected in base rates in the Demand Capacity Surcharge Mechanism.

In Case 14-M-0094, NYSERDA's clean energy activities were consolidated under the umbrella of the CEF. The legacy program (and its associated deferral balance) existing prior to this case was consolidated into a combined deferral account to track CEF activity.

Actual Deferral through December 31, 2022

The deferred balance as of December 31, 2022 was a **credit of $27.654 million.**

Forecast of Deferral through March 31, 2024

As of March 31, 2024, the forecast deferral balance is a **credit of $30.217 million.**

17. Energy Affordability Program ("EAP")

Basis for the Deferral

Pursuant to Section 8.1.2 of the Joint Proposal in Case 19-G-0309, KEDNY will continue their EAP. Each Rate Year, KEDNY will fully reconcile EAP costs to the amounts reflected in rates. Amounts in excess of the rate allowance will be deferred for future recovery from customers. Any under-expenditures will be deferred for future use in a low-income program.

Pursuant to the *Order Approving Tariff Amendments on a Permanent Basis* issued and effective March 20, 2018 in Cases 14-M-0565 and 16-G-0059 (the "Energy Affordability Order"), the Company implemented tiered discount rates for customers enrolled in the Energy Affordability Program, effective January 1, 2018. The program provides several tiers of heating and non-heating monthly credits for eligible KEDNY customers. Each Rate Year, the Company adjusts the benefit levels to align the rate allowance to the two percent budget cap as directed in the Energy Affordability Order. Pursuant to the Section 6.1.2 of the Joint Proposal in Case 16-G-0059, KEDNY is authorized to reconcile low income program costs to the amounts reflected in rates. Amounts in excess of the rate allowance will be deferred for future recovery from customers. Any under expenditures will be deferred for future use in a low income program.

Actual Deferral through December 31, 2022

The actual deferral balance as of December 31, 2022 was a **credit of $7.335 million.**

Forecast of Deferrals through March 31, 2024

As of March 31, 2024, the forecast deferral balance is a **debit of $2.179 million.**

18. Excess Reserve-Tax Cuts & Jobs Act

Basis for the Deferral

This account includes the revenue requirement impacts of the change in the corporate federal income tax rate from 35 percent to 21 percent, the excess accumulated deferred income taxes related to the change in the corporate federal income tax rate, and the offsetting impacts of the elimination of bonus depreciation. The Commission's *Order Determining Rate Treatment of Tax Changes* in Case 17-M-0815 (issued and effective August 9, 2018) accepted the Company's proposal to defer both the pass back of calendar year 2018 tax savings and the amortization of excess ADFIT balances and retain the Calendar Year 2018 deferred amounts for future rate mitigation and/or to offset investments. This deferral is discontinued under the current rate case.

Actual Deferral through December 31, 2022

The actual deferral balance as of December 31, 2022 was a **credit of $40.351 million.**

Forecast of Deferrals through March 31, 2024

As of March 31, 2024, the forecast deferral balance is a **credit of $40.351 million.**

19. NY Facilities System ("NYFS")

Basis for the Deferral

Section 3.16 of the Joint Proposal in Case 19-G-0309, states that the New York Facilities reconciliation is changed from a calendar year to a fiscal year basis, commencing April 1, 2020. The NYFS costs shall be recovered on a fiscal year basis with revised surcharges effective July 1.

Under the Joint Proposal in Case 16-G-0059, the Company is recovering an estimate of NYFS costs in base delivery rates. The *Order Regarding New York Facilities System Agreement* in Case 18-G-0318 (issued and effective October 18, 2018), approved the Company's request to implement a NYFS Surcharge/Sur credit that would allow the Company to refund any over-recoveries of NYFS costs as compared to the amount reflected in base rates and recover any under-recoveries of such costs.

Actual Deferral through December 31, 2022

The actual deferral balance as of December 31, 2022 was a **debit of $1.020 million.**

Forecast of Deferrals through March 31, 2024

As of March 31, 2024, the forecast deferral balance is a **debit of $1.020 million**

20. Arrears Phase 1 EAP - Gas

Basis for the Deferral

On June 16, 2022, the New York Public Service Commission ("NYPSC") approved the Order Authorizing Phase 1 Arrears Reduction Program ("June 2022 Order") which encompassed the Proceeding to Address Energy Affordability for Low Income Utility Customers in Case 14-M-0565, the Proceeding Regarding the Effects of COVID-19 on Utility Service in Case 20-M-0266 and the Petition of Niagara Mohawk Power Corporation for Approval to Implement a COVID-19 Customer Assistance Program in Case 20-M-0479. In accordance with the June 2022 Order, the KEDNY was authorized to defer the difference between the bill credits related to the Phase 1 EAP arrears and the amount funded by other sources (i.e., ODTA administered programs, UARP) for future

recovery from customers. The NYPSC, in the Phase 1 Order authorized recovery of the Phase 1 EAP ARP ratepayer funded portion and associated carrying charges for KEDNY over a 3.5 year period effective August 1, 2022. Additional bill credits were recorded after the initial bill credits in July 2022 through December 2022 for ERAP and other OTDA pending applications to be finalized.

Actual Deferral through December 31, 2022

The deferred balance as of December 31, 2022 was a **debit of $35.079 million.**

Forecast of Deferral through March 31, 2024

As of March 31, 2024, the forecast deferral balance is a **debit of $32.741 million.**

21. COVID-19 Late Payment Charges

Basis for the Deferral

On June 16, 2022, the NYPSC approved the New York Gas Companies petition for an alternative recovery mechanism of COVID-19 Unbilled Fees in Cases 19-G-0309 and 19-G-0310, whereby, KEDNY and KEDLI will collect its deferral for Rate Year One of $12.959 million and $5.925 million, respectively, through a surcharge effective July 1, 2022, through June 30, 2023. In addition, the NYPSC authorizes the New York Gas Companies to surcharge or credit the deferred COVID-19 Unbilled Fees, net of related savings, for Rate Years Two and Three under its rate plan during the periods from July 1, 2023, through June 30, 2024, and July 1, 2024, through June 30, 2025, respectively.

Actual Deferral through December 31, 2022

The deferred balance as of December 31, 2022 was a **debit of $11.104 million.**

Forecast of Deferral through March 31, 2024

As of March 31, 2024, the forecast deferral balance is a **debit of $11.104 million.**

22. Customer Connections

Basis for the Deferral

Customer Connections Tracker – Section 8.2.7 of the Joint Proposal in Case 19-G-0309 requires that, to the extent that KEDNY's actual capital spending for Customer Connections differs from the forecast amount in each Rate Year (including any Stayout Period), KEDNY will defer the revenue requirement impact for future recovery from or return to customers. The Customer Connections reconciliation will work in conjunction with the Net Utility Plant and Depreciation Expense Reconciliation Mechanism.

Actual Deferral through December 31, 2022

The deferred balance as of December 31, 2022 was a **debit of $6.729 million.**

Forecast of Deferral through March 31, 2024

As of March 31, 2024, the forecast deferral balance is a **debit of $14.113 million.**

23. Earnings Adjustment Mechanism

Basis for the Deferral

Pursuant to Appendix 7 of the Joint Proposal in Case 19-G-0309, KEDNY will adopt three Earning Adjustment Mechanisms ("EAMs"): (i) Share the Savings ("STS"), (ii) LMI Energy Efficiency ("LMI EE") and (iii) Gas Peak Reduction ("GPR") . STS and LMI will be measured on a calendar basis, and GPR will be measured on a heating season basis and all EAMs commenced as of January 1, 2021. If any of the performance

levels are achieved as described in the appendix, KEDNY can earn an annual pre-tax positive revenue adjustment.

Actual Deferral through December 31, 2022

The deferred balance as of December 31, 2022 was a **debit of $4.738 million.**

Forecast of Deferral through March 31, 2024

As of March 31, 2024, the forecast deferral balance is a **credit of $0.375 million.**

24. Employee Transfer Credit to Unregulated Company

This deferral reflects a credit due customers for costs associated with an employee who transferred from KEDNY to an unregulated subsidiary.

Actual Deferral through December 31, 2022

The deferred balance as of December 31, 2022 was a **credit of $0.031 million.**

Forecast of Deferral through March 31, 2024

As of March 31, 2024, the forecast deferral balance is a **credit of $0.031 million.**

25. Levelization – 16-G-0058/0059

Basis for the Deferral

Under the Joint Proposal in Case 16-G-0058, beginning January 1, 2020 through March 31, 2020, KEDNY will defer the difference between the levelized rate increases and the calculated revenue requirements for the benefit of customers until new base rates are set.

Actual Deferral through December 31, 2022

The deferred balance as of December 31, 2022 was a **credit of $27.011 million.**

Forecast of Deferral through March 31, 2024

As of March 31, 2024, the forecast deferral balance is a **credit of $27.011 million.**

26. Long Term Capacity Projects

Basis for the Deferral

Pursuant to Section 3.22.3 of the Joint Proposal in Case 19-G-0309, KEDNY will be able to recover through the Demand Capacity Surcharge Mechanism ("DCSM") the revenue requirement for Long-Term Capacity projects, as long as the project is in service prior to the beginning of the Rate Year. If KEDNY fails to meet one or more of the Capacity Demand Metrics in a Rate Year, recovery of costs will be reduced per Section 5.3.3. Beginning in Rate Year 2, KEDNY was permitted to recover the deferred and on-going revenue requirement associated with projects placed in service in Rate Year 1. The Long-Term Capacity Projects will remain in effect provided KEDNY continues to meet the metrics, and until base rates are next set by the NYPSC.

Actual Deferral through December 31, 2022

The deferred balance as of December 31, 2022 was a **debit of $0.344 million.**

Forecast of Deferral through March 31, 2024

As of March 31, 2024, the forecast deferral balance is a **debit of $0.344 million.**

27. NE:NY – Base Energy Efficiency

Basis for the Deferral

Pursuant to Section 7.1 of the Joint Proposal in Case 19-G-0309, effective in Rate Year 1, the Company's energy efficiency costs will be recovered in base rates. The EE costs included in base rates for Base EE and Low-to-Moderate Income ("LMI") EE Programs

reflect the amounts authorized by the Commission in the NE:NY Proceeding. Consistent with Case 15-M-0252, EE costs are subject to a down-ward only reconciliation over the term of the rate plans. Any under-expenditures in a given Rate Year will be carried forward and at the end of Rate Year and will be used for other Commission-authorized EE programs in subsequent years or deferred for future disposition by the NYPSC.

Actual Deferral through December 31, 2022

The deferred balance as of December 31, 2022 was a **credit of $18.257 million.**

Forecast of Deferral through March 31, 2024

As of March 31, 2024, the forecast deferral balance is a **credit of $7.266 million.**

28. NE:NY – Low-Moderate Income

Basis for the Deferral

Pursuant to Section 7.1 of the Joint Proposal in Case 19-G-0309, effective in Rate Year 1, the Company's energy efficiency costs will be recovered in base rates. The EE costs included in base rates for Base EE and Low-to-Moderate Income ("LMI") EE Programs reflect the amounts authorized by the Commission in the NE:NY Proceeding. Consistent with Case 15-M-0252, EE costs are subject to a down-ward only reconciliation over the term of the rate plans. Any under-expenditures in a given Rate Year will be carried forward and at the end of Rate Year and will be used for other Commission-authorized EE programs in subsequent years or deferred for future disposition by the NYPSC.

Actual Deferral through December 31, 2022

The deferred balance as of December 31, 2022 was a **credit of $3.767 million.**

Forecast of Deferral through March 31, 2024

As of March 31, 2024, the forecast deferral balance is a **credit of $5.573 million.**

29. Newtown Creek Annual Revenue Reconciliation

Basis for the Deferral

Pursuant to Section 3.2.2 of the Joint Proposal in Case 18-G-0309, beginning in Rate Year 2, KEDNY will reconcile the actual revenues derived from the sales of gas and environmental attributes associated with the Newtown Creek Project to the amounts reflected in rates. If the actual revenues do not exceed the revenue reflected in rates as set forth in the Joint Proposal, then KEDNY will be permitted to defer for future recovery fifty percent of the difference between the amount reflected in rates and $1.6 million. The maximum amount of such deferrals is $2.167 million and $2.165 million for Rate Year 2 and Rate Year 3, respectively.

Actual Deferral through December 31, 2022

The deferred balance as of December 31, 2022 was a **debit of $2.167 million.**

Forecast of Deferral through March 31, 2024

As of March 31, 2024, the forecast deferral balance is a **debit of $2.167 million.**

30. NYS Tax Deferral

Basis for the Deferral

Due to changes in NYS tax law, effective April 1, 2021, KEDNY deferred the difference between the new NYS income tax rate and capital tax rate and the forecast of the tax expense in base rates for future recovery from customers.

Actual Deferral through December 31, 2022

The deferred balance as of December 31, 2022 was a **debit of $12.363 million.**

Forecast of Deferral through March 31, 2024

As of March 31, 2024, the forecast deferral balance is a **debit of $21.068 million.**

31. Paving Expense

Basis for the Deferral

Pursuant to Section 8.2.1 of the Joint Proposal in Case 19-G-0309, the amounts of paving expense reflected in KEDNY's revenue requirement total $25.465 million , $23.372 million, and $24.039 million in Rate Years 1, 2 and 3, respectively. KEDNY will defer the difference between its actual paving expense and the amount reflected in the revenue requirement.

Actual Deferral through December 31, 2022

The deferred balance as of December 31, 2022 was a **credit of $26.478 million.**

Forecast of Deferral through March 31, 2024

As of March 31, 2024, the forecast deferral balance is a **credit of $39.771 million.**

32. Pension/OPEB Reserve Liability

Basis for the Deferral

Pursuant to Section 8.1.1, KEDNY will continue to defer and reconcile the actual pension and Other Post-Employment Benefits ("OPEB") expenses to the levels allowed in rates in accordance with the Commission's Pension & OPEB Statement of Policy.

In accordance Section 6.1.1 of the Joint Proposal in Case 16-G-0059, the Commission authorized KEDNY to continue to defer and reconcile its actual pension and OPEB expenses to the levels allowed in rates.

Carrying charges are not calculated on pension or OPEB deferred balances. For purposes of determining KEDNY's internal reserve and the carrying costs that apply to that reserve, KEDNY is authorized to combine the funding of its pensions and OPEBs. KEDNY accrues and defers carrying charges on the net unfunded pension and OPEBs amounts, until the net unfunded amount is funded.

Actual Deferral through December 31, 2022

The deferred balance as of December 31, 2022 was a **credit of $15.323 million.**

Forecast of Deferral through March 31, 2024

As of March 31, 2024, the forecast deferral balance is a **credit of $15.323 million.**

33. Rate Plan Deferral Credit

Basis for the Deferral

Pursuant to Section 2.2 of the Joint Proposal in Case 19-G-0309, in order to achieve no revenue increase in Rate Year 1 and annual increases of 2.0 percent in Rate Years 2 and 3, KEDNY deferred and amortized $94.873 million of net regulatory liabilities over the term of the rate plan.

Actual Deferral through December 31, 2022

The deferred balance as of December 31, 2022 was a **credit of $13.418 million.**

Forecast of Deferral through March 31, 2024

As of March 31, 2024, the forecast deferral balance is a **credit of $4.800 million.**

34. Reconnect Fees

Basis for the Deferral

Pursuant to Section 8.2.8 of the Joint Proposal in Case 19-G-0309, KEDNY will be permitted to defer for future recovery from customers any reconnect fees waived for customers participating in the Energy Affordability Programs.

Actual Deferral through December 31, 2022

The deferred balance as of December 31, 2022 was a **credit of $0.332 million.**

Forecast of Deferral through March 31, 2024

As of March 31, 2024, the forecast deferral balance is a **credit of $0.332 million.**

35. Service Line Deferral

Basis for the Deferral

Inside Service Line Penalty revenue, as described in Section 5.8 of the Joint Proposal in Case 19-G-0309, which KEDNY defers to the benefit of customers.

Actual Deferral through December 31, 2022

The deferred balance as of December 31, 2022 was a **credit of $4.719 million.**

Forecast of Deferral through March 31, 2024

As of March 31, 2024, the forecast deferral balance is a **credit of $4.721 million.**

Executive summary

In preparation for Brooklyn Union Gas Company d/b/a National Grid NY ("KEDNY") and KeySpan Gas East Corporation d/b/a National Grid ("KEDLI") (collectively, the "Companies") rate case filing, a detailed and thorough review of the test year transactions ("Financial Review") was performed.

This document outlines the testing approach and results of the Financial Review of test year transactions incurred by the Companies, led by internal resources within the National Grid Finance Team (the "Finance Team").

Scope of our examination

Our examination is designed to cover subject matter that includes transactions recorded by the following subsidiaries of the National Grid USA ("NGUSA"):

- KEDNY
- KEDLI
- Service Company

For each entity, the Financial Review report comprises of a Summary of Selected Vendor Costs, a Summary of Selected Labor Costs, Employee Expense Costs, and Manual Journal Entries for the twelve-month period ended December 31, 2022.

Risk and approach

The Finance Team performed a sampling and testing approach consistent with the manner performed for prior cases filed with the New York State Public Service Commission to address the risks identified in each area of testing.

Our testing approach was designed to mirror that of an independent external audit. Though the Financial Review is being performed by National Grid employees, and is therefore not fully independent, the test is not being performed by those who have operated the related controls, nor by those who recorded the related transactions and therefore does have a substantial degree of independence from business process owners.

Results and findings

Our results and findings are detailed in the Results and Findings section. The findings include net amounts of $(0.225) million related to KEDNY (See section *"Results and Findings - KEDNY"*), $0.009 million related to KEDLI (See section *"Results and Findings - KEDLI"*), and $(1.09) million related to Service Company (See section *"Results and Findings - Service Company"*).

Risk and approach

The subject matter included in the Summary of Costs reports was developed as follows:

Vendor costs – The population for testing for vendor costs was from a list of amounts approved for payment to each vendor in each of the four quarters of calendar year 2022. Items were selected for testing using a risk-based sampling approach to achieve coverage over unique transactions and vendors. A unique transaction was defined as a vendor's work for a particular project with a particular department at National Grid (e.g., If a vendor was performing work for one department under ten different projects, they would each be considered a unique transaction of which the Finance Team would obtain 40 percent coverage [i.e. 4 projects]). A minimum of 10 percent of the number of invoices associated with each of the unique transactions selected for testing would also be examined. Vendors with transactions that aggregated to less than $100,000 thousand dollars were considered de minimis and therefore, not sampled.

Labor costs (KEDNY & KEDLI) – The population for testing for labor costs was based on a financial report which included base time and overtime pay but excluded labor-related overhead costs such as social security taxes, life insurance, pensions, post-retirement benefits other than pension, medical, dental and other welfare expenses. All relevant base time and overtime pay was selected for inclusion in the population and subject to analytical procedures.

Labor costs (Service Company) – The population for testing for labor costs was based on a financial report which included base time and overtime pay but excluded labor-related overhead costs such as social security taxes, life insurance, pensions, post-retirement benefits other than pension, medical, dental and other welfare expenses. Given the large volume of transactions, items were selected that represented (i) the 15 largest cost centers based on payroll costs incurred and (ii) 25 cost centers selected without bias ranked greater than 15.

Employee expense costs – The population for testing for employee expense costs was based on a financial report of amounts approved for payment in each quarter. Items were selected that represent the top 25 single employee claims ("trip reports") and top 50 purchase credit card ("P-card") transactions based on dollars approved for payment in each quarter, 15 trip reports selected without bias ranked between 26 and 100 based on dollars approved for payment in each quarter, 10 trip reports selected without bias ranked greater than 100 based on dollars approved for payment in each quarter, and 25 P-card transactions selected without bias ranked greater than 50 based on dollars approved for payment in each quarter. The Summary of Selected Employee Expense Costs did not include any expenses submitted for reimbursement by "Band A" employees, defined as senior executives of NGUSA, as well as other costs which were excluded following a keyword search – as these costs are not sought for recovery by the Companies.

General ledger entries – Testing for manual journal entries was based on a financial report of all journal entries that impacted manual journal accounts. For each system "document type" included in the list, items were identified for selection and presentation in the Summary of Selected General Ledger Entries based on dollar value, as detailed in the Notes to each of the Summary of Costs reports.

Cost area	**Test objective**	**Test details**
Vendor costs	To test the financial records that vendor costs are incurred and accurate	1. Compare costs recorded in the ledger to underlying vendor support (invoice or similar).
	To test the financial records that vendor costs are allocated to the correct company	2. Review the underlying vendor information for details of goods purchased or services performed and identify whether the goods or services relate to / benefit the entity to which they were charged.
	To test the financial records that costs related to capital programs or operating expenses are appropriately classified	3. Review the underlying vendor information for details of whether goods purchased, or services performed related to a capital program or not.
Labor costs		
	To ensure that payroll costs charged through Service Company orders and allocated to KEDNY & KEDLI are consistent with work performed	4. Review amounts charged by employees charging Service Company "X" orders and test whether the allocation charged is consistent with the employee's job title and functional area.
	To ensure that labor costs charged directly to KEDNY & KEDLI are accurate	5. For the 12-month period, review time capture records of outlier entries (e.g. more than 12 hours in a day, hours worked between midnight and 4 am, multiple entries charged in a day, order/region/segment/ company charged which is inconsistent with the employee's job title and functional area). Inquiry procedures were performed to investigate outliers.
Employee expenses	To test the financial records that employee expenses are accurate and submitted consistent with the Company policy	6. Perform a keyword search over the entire employee expense population to identify expenses which are not being sought for recovery. 7. Obtain the expense report information and supporting documents submitted; compare such documents to the requirements of the Company policy, including verification that the expenses are allocated to the correct general ledger account and order based on the employee's job title and functional area.
Journal entries	To test the financial records that the journal entries presented are accurately calculated and reflect the underlying transaction	8. Obtain copies of the approved journal entry submission and test that the entry ties to the underlying support. Review elements of the underlying support to validate its accuracy and that costs are appropriately classified.

Results and Findings – Summary Impact on KEDNY and KEDLI

KEDNY

Cost Area	Presented in Summary of Costs ($)	Presented in Summary of Costs (#)	Total Exceptions ($)	Number of Exceptions

Grand Total	**605,267,928**	**9,287**	**(211,194)**	**29**

The following tables are a breakdown of the total exceptions noted above. The table below includes capital program and non-capital program exceptions listed by vendor. A capital program exception represents a cost which was not part of a capital program but was charged to a work order implemented under a "C" capital program project; a non-capital program exception represents a cost which was part of a capital program but was charged to a work order coded under an expense-only project.

Positive numbers represent amounts which were inappropriately excluded from unadjusted ledger cost (i.e., expense) data; negative numbers represent amounts which were inappropriately included in unadjusted ledger cost data.

Vendor Costs	Capital Program Exceptions ($)	Capital Program Exceptions (#)	Non-Capital Program exceptions ($)	Non-Capital Program exceptions (#)

Total	**66,117**	**7**	**(273,907)**	**13**
Net Capital and Non-Capital program exceptions				**(207,790)**

This table represents the total allocation exceptions with an impact on KEDNY:

Vendor Costs	Amounts initially allocated ($)	Amounts correctly allocated ($)	Net Impact ($)	Number of Exceptions
KEDNY	(3,404)	-	(3,404)	1
KEDLI exceptions which impact KEDNY	-	-	-	-
Exceptions with no impact to KEDNY nor KEDLI	-	-	-	8
Total	**(3,404)**	**-**	**(3,404)**	**9**

Results and Findings – Labor Costs – KEDNY

The following table includes the total amount and number of items identified as exceptions. Positive numbers represent amounts which were inappropriately excluded from unadjusted ledger cost data; negative numbers represent amounts which were inappropriately included in unadjusted ledger cost data.

Labor Costs	Presented in Summary of Costs ($)	Total Exceptions ($)	Number of Exceptions
Total payroll included in Summary of Selected Labor Costs	276,193,424		
Differences identified related to incorrect order assigned	-	-	Not Applicable
Differences identified in initial time entry data		-	Not Applicable
Total	**276,193,424**	-	

Results and Findings – Employee Expense – KEDNY

The following table includes the total amount and number of trip reports identified as exceptions listed by error type. Positive numbers represent amounts which were inappropriately excluded from unadjusted ledger cost data; negative numbers represent amounts which were inappropriately included in unadjusted ledger cost data.

Employee Expense Costs	Presented in Summary of Costs ($)	Presented in Summary of Costs (#)	Total Exceptions ($)	Number of Exceptions
Total included in Summary of Selected Employee Expense Costs	1,188,716	500	-	-
Differences related to exclusions from cost of services (CapEx vs. OpEx)			6,851	51
Differences related to misallocated expenses (allocations)			(10,618)	26
Differences related to misallocated expenses (OpCo)			(4,270)	3
Total	**1,188,716**	**500**	**(8,037)**	**80**

Results and Findings – Journal Entries – KEDNY

The following table includes the total amount of exceptions listed by document type. Positive numbers represent amounts which were inappropriately excluded from unadjusted ledger cost data; negative numbers represent amounts which were inappropriately included in unadjusted ledger cost data.

General Ledger Journal Entries (Document Type)	Presented in Summary of Costs ($)	Presented in Summary of Costs (#)	Total Exceptions ($)	Number of Exceptions
AB	52,047,338	175	(5,729)	6
ZK	1,989,987	9	-	-
ZN	863,697	1	-	-

Grand Total	**246,020,408**	**3,092**	**8,622**	**9**

The following tables are a breakdown of the total exceptions noted above. The table below includes capital program and non-capital program exceptions listed by vendor. A capital program exception represents a cost

which was not part of a capital program but was charged to a work order implemented under a "C" capital program project; a non-capital program exception represents a cost which was part of a capital program but was charged to a work order coded under an expense-only project.

Positive numbers represent amounts which were inappropriately excluded from unadjusted ledger cost (i.e., expense) data; negative numbers represent amounts which were inappropriately included in unadjusted ledger cost data.

Vendor Costs	Capital Program Exceptions ($)	Capital Program Exceptions (#)	Non-Capital Program exceptions ($)	Non-Capital Program exceptions (#)
FIREMATIC SUPPLY CO INC	2,177	1	-	-
THE MOSAIC COMPANY	30,000	2	-	-
Total	**32,177**	**3**	**-**	**-**
Net Capital and Non-Capital program exceptions				**32,177**

This table represents the total allocation exceptions with an impact on KEDLI:

Vendor Costs	Amounts initially allocated ($)	Amounts correctly allocated ($)	Net Impact ($)	Number of Exceptions
KEDLI	(23,555)	-	(23,555)	5
KEDNY exceptions which impact KEDLI	-	-	23,555	-
Exceptions with no impact to KEDNY nor KEDLI	-	-	-	1
Total	**(23,555)**	**-**	**-**	**6**

Results and Findings – Labor Costs – KEDLI

The following table includes the total amount and number of items identified as exceptions. Positive numbers represent amounts which were inappropriately excluded from unadjusted ledger cost data; negative numbers represent amounts which were inappropriately included in unadjusted ledger cost data.

Labor Costs	Presented in Summary of Costs ($)	Total Exceptions ($)	Number of Exceptions
Total payroll included in Summary of Selected Labor Costs	168,995,417		
Differences identified related to incorrect order assigned	-	-	Not Applicable
Differences identified in initial time entry data		-	Not Applicable
Total	**168,995,417**	-	

Results and Findings – Employee Expense – KEDLI

The following table includes the total amount and number of trip reports identified as exceptions listed by error type. Positive numbers represent amounts which were inappropriately excluded from unadjusted ledger cost data; negative numbers represent amounts which were inappropriately included in unadjusted ledger cost data.

Employee Expense Costs	**Presented in Summary of Costs ($)**	**Presented in Summary of Costs (#)**	**Total Exceptions ($)**	**Number of Exceptions**
Total included in Summary of Selected Employee Expense Costs	536,246	500	-	-
Differences related to exclusions from cost of services (CapEx vs. OpEx)			4,496	36
Differences related to misallocated expenses (allocations)			(4,030)	19
Differences related to misallocated expenses (G/L accounts)			(1,428)	6
Total	**536,246**	**500**	**(961)**	**61**

Results and Findings – Journal Entries – KEDLI

The following table includes the total amount of exceptions listed by document type. Positive numbers represent amounts which were inappropriately excluded from unadjusted ledger cost data; negative numbers represent amounts which were inappropriately included in unadjusted ledger cost data.

General Ledger Journal Entries (Document Type)	Presented in Summary of Costs ($)	Presented in Summary of Costs (#)	Total Exceptions ($)	Number of Exceptions
AB	13,172,837	116	1,476	6
ZK	2,479,112	23	-	
AC	678,183	1	-	
IG	(195,635)	4	-	
ZN	(500,760)	1	-	
ZQ	(1,419,880)	2	-	
Total	**14,213,857**	**147**	**1,476**	**6**

Results and Findings – Service Company

Results and Findings – Vendor Costs – Service Company

The following table includes vendors and amounts tested, as well as the total amount and number of invoices identified as exceptions listed by vendor. Note that the exceptions presented below are the full amount of the exceptions identified, prior to any corrections noted in the "Results and Findings – Summary impact on KEDNY and KEDLI and section of the report.

Positive numbers represent amounts which were inappropriately excluded from unadjusted ledger cost data; negative numbers represent amounts which were inappropriately included in unadjusted ledger cost data.

Vendor Costs	Presented in Summary of Costs ($)	Presented in Summary of Costs (#)	Total Exceptions ($)	Number of Exceptions

Total	**1,464,843,270**	**8,167**	**(1,016,731)**	**172**

The following tables are a breakdown of the total exceptions noted above. The table below includes capital program and non-capital program exceptions listed by vendor. A capital program exception represents a cost which was not part of a capital program but was charged to a work order implemented under a "C" capital program project; a non-capital program exception represents a cost which was part of a capital program but was charged to a work order coded under an expense-only project.

Positive numbers represent amounts which were inappropriately excluded from unadjusted ledger cost data; negative numbers represent amounts which were inappropriately included in unadjusted ledger cost data.

Vendor costs	Capital program exceptions ($)	Capital program exceptions (#)	Non-Capital program exceptions ($)	Non-Capital program exceptions (#)

Net Capital and Non-Capital program exceptions				**(581,562)**

The following table includes the total impact of allocation exceptions identified on Service Company. Positive numbers represent amounts which were inappropriately excluded from unadjusted ledger cost data; negative numbers represent amounts which were inappropriately included in unadjusted ledger cost data.

Vendor costs	Net impact ($)
Impact on KEDNY	(565,313)
Impact on KEDLI	(451,418)
Total	**(1,016,731)**

Results and Findings – Labor Costs – Service Company

The following table includes the total amounts identified as exceptions listed by department. Exceptions in the table below represent the net amount of payroll by department that were not allocated appropriately. The impact of these errors on individual companies is shown in the section below. Note that the exceptions presented below are the full amount of the exceptions identified, prior to the corrections noted in the "*Results and Findings – Summary impact on KEDNY and KEDLI*" section of the report.

Summary of Costs

The Brooklyn Union Gas Company ("KEDNY"),
KeySpan Gas East Corporation ("KEDLI"),
and National Grid USA Service Company ("Service Company")

The Brooklyn Union Gas Company ("KEDNY"), KeySpan Gas East Corporation ("KEDLI"),

and

National Grid USA Service Company ("Service Company")

Summary of Selected Vendor Costs, Summary of Selected Labor Costs, Summary of Selected Employee Expense Costs, and Summary of Selected General Ledger Entries for the twelve-month period ended December 31, 2022

Notes to the Summary of Costs

1.Background

a. KEDNY

The Brooklyn Union Gas Company d/b/a National Grid NY ("KEDNY") distributes natural gas to retail customers in the boroughs of Brooklyn, Staten Island, and two-thirds of the borough of Queens, all in New York City.

KEDNY is a wholly-owned subsidiary of KeySpan Corporation, which is a wholly-owned subsidiary of National Grid USA ("NGUSA"). NGUSA is a public utility holding company with regulated subsidiaries engaged in the generation of electricity and the transmission, distribution, and sale of both natural gas and electricity. NGUSA is a direct wholly-owned subsidiary of National Grid North America Inc. ("NGNA") and an indirect wholly-owned subsidiary of National Grid plc, a public limited company incorporated under the laws of England and Wales.

KEDNY separately issues financial statements prepared in accordance with the accounting requirements of the Federal Energy Regulatory Commission ("FERC") as set forth in its applicable Uniform System of Accounts and published accounting releases (together, the "FERC USoA"), as well as financial statements prepared in accordance with accounting principles generally accepted in the United States ("GAAP"). The subject matter presented in the Summary of Costs is prepared consistent with the "Basis of Accounting" described in notes 2 to 5 below, which are not necessarily the same as the accounting requirements of the FERC USoA or GAAP.

b. KEDLI

KeySpan Gas East Corporation d/b/a National Grid ("KEDLI") distributes natural gas to customers in Nassau and Suffolk counties in Long Island, New York, and the Rockaway Peninsula in Queens, New York.

KEDLI is a wholly-owned subsidiary of KeySpan Corporation, which is a wholly-owned subsidiary of NGUSA. NGUSA is a public utility holding company with regulated subsidiaries engaged in the generation of electricity and the transmission, distribution, and sale of both natural gas and electricity. NGUSA is a direct wholly-owned subsidiary of NGNA and an indirect wholly-owned subsidiary of National Grid plc, a public limited company incorporated under the laws of England and Wales.

KEDLI separately issues financial statements prepared in accordance with the accounting requirements of FERC as set forth in its FERC USoA, as well as financial statements prepared in accordance with GAAP. The subject matter presented in the Summary of Costs is prepared consistent with the "Basis of Accounting" described in notes 2 to 5 below, which are not necessarily the same as the accounting requirements of the FERC USoA or GAAP.

c. Service Company

National Grid USA Service Company ("Service Company") provides management, administrative, accounting, legal, engineering and other services to NG USA subsidiaries.

Service Company is, a wholly-owned subsidiary of NGUSA, provides management, administrative, accounting, legal, engineering, and other services to other NGUSA subsidiaries, including the KEDNY and KEDLI. Service Company provides its services on an "at cost" basis, determined using billing methods based on cost causative factors pursuant to service agreements and its Cost Allocation Manual, as further discussed in Note 6.

2. Vendor Costs

Summary of Selected Vendor Costs – During each of the quarters in the period from January 1, 2022 to December 31, 2022, KEDNY and KEDLI approved payments to third party vendors totaling $786,585,708, $322,768,627 and $1,885,055,940 for KEDNY, KEDLI and Service Company (collectively, the "Companies"), respectively. The Summary of Selected Vendor Costs represents vendor costs "approved for payment" during each of the quarters in the period from January 1, 2022 to December 31, 2022, related to the selected vendors listed. Irrespective of when the goods or services were received, for purposes of this presentation, vendor costs are considered approved for payment upon:

- internal acknowledgment that the goods or services have been received, and
- payment of the invoice.

The subject matter excludes amounts approved for payment related to purchased commodity as these costs generally are not recovered via KEDNY and KEDLI's base delivery rates.

To capture and account for vendor costs, the Companies initiate work orders under two types of projects, (1) capital projects, under which work orders are designed to capture costs incurred in the execution of the Company's capital programs, and (2) expense projects, under which work orders are designed to capture costs incurred in the performance of non-capital-related activity. The subject matter and basis of accounting reflects the initial determination of whether the vendor costs were assigned to capital projects or expense projects. System-generated entries (generally related to the allocation of engineering-related work order design adjustments, or the apportionment of overhead) and adjustments to allocate elements of work orders assigned to capital projects to expense are not contemplated in the subject matter.

All costs included in the Summary of Selected Vendor Costs have been "approved for payment" by the Companies, and properly allocated and charged to the Companies and their affiliates, in accordance with the NGUSA's Cost Allocation Manual. The Cost Allocation Manual is further described in Note 6. Note that vendor costs may have been incurred before the period from January 1, 2022 to December 31, 2022, but if both elements above were not present until after January 1, 2022 to December 31, 2022, such costs would consequently be "approved for payment" during the period presented and included in the accompanying Summary of Selected Vendor Costs. Likewise, vendor costs incurred during the period from January 1, 2022 to December 31, 2022, where both elements above were not present prior to December 31, 2022, are not considered "approved for payment" during the period presented, nor included in the accompanying Summary of Selected Vendor Costs. This accounting policy, applied in the Summary of Costs, is a basis of accounting other than GAAP and the FERC USoA.

Upon satisfaction of the conditions approving a cost for payment, the cost is assigned to a work order as follows:

- Costs incurred in support of the Companies' capital programs are assigned to work orders capturing costs under capital projects.

- Costs related solely to operating activities are assigned to work orders capturing costs under expense projects, or internal orders capturing expense items specific to one of the Companies and incurred outside of their respective capital programs.

3. Labor Costs

Summary of Selected Labor Costs – During the period from January 1, 2022 to December 31, 2022, recorded costs to employees of $276,193,424, $168,995,417 and $604,525,577 for KEDNY, KEDLI and Service Company, respectively, in consideration for work undertaken for the benefit of the Companies. This amount includes base time and overtime pay but does not include labor-related overhead costs such as social security taxes, life insurance, pensions, post-retirement benefits other than pension, medical, dental and other welfare expenses. All base time and overtime pay was selected for inclusion in the subject matter to employees of the Companies or their affiliates for time charged during the period presented and have been allocated consistent

with the Cost allocation Manual (Service Company only). Amounts presented in the Summary of Selected Labor Costs have been charged to capital and operating cost line items within the general ledger in a manner consistent with the nature of the work performed.

Employees of the Companies and their affiliates charge time to system work orders, similar to the process described above for vendor costs. Labor costs are recorded by the Companies' payroll and time capture system. Labor charges to work orders may be made by a direct employee of one of the Companies, or by an employee of an affiliate company who is performing work for the benefit of KEDNY, KEDLI, or Service Company, as applicable.

4. Employee Expense Costs

Summary of Selected Employee Expense Costs – During the period from January 1, 2022 to December 31, 2022, approved payments to employees as reimbursement for business expenses incurred totaling $2,862,925, $1,556,785 and $23,602,005 for KEDNY, KEDLI and Service Company, respectively. Business expenses are approved for payment if they are incurred in the normal course of business, in accordance with the Companies' internal policies, and include business travel, accommodation, spot purchases of goods, and other out-of-pocket expenses. The Summary of Selected Employee Expense Costs includes a subset of such expenses. This subject matter, designed to reflect a component of total employee expense costs, was developed as follows. The Finance Team obtained a list of amounts approved for payment by the Company in each quarter. Based upon this list, items were selected that represent the top 25 single employee claims ("trip reports") and top 50 purchase credit card ("P-card") transactions based on dollars approved for payment in each quarter, 15 trip reports selected without bias ranked between 26 and 100 based on dollars approved for payment in each quarter, 10 trip reports selected without bias ranked greater than 100 based on dollars approved for payment in each quarter, and 25 P-card transactions selected without bias ranked greater than 25 based on dollars approved for payment in each quarter. The Summary of Selected Employee Expense Costs also only includes expenses submitted by certain employees; it does not include any expenses submitted for reimbursement by "Band A" employees, defined as senior executives of NGUSA, as well as other costs which were excluded following a keyword search, as these costs are not sought for recovery by the KEDNY or KEDLI.

Irrespective of when the expense was incurred, for purposes of this presentation, employee expenses are considered approved for payment upon submission by an employee of a request for reimbursement for a business expense, accompanied by evidence of the expense, and recoverable consistent with NGUSA's US Business Travel & Expense Policy, effective January 18, 2011, updated December 8, 2020. This accounting policy, applied in the Summary of Costs, is a basis of accounting other than GAAP and the FERC USoA.

All costs included in the accompanying Summary of Selected Employee Expense Costs have been allocated to the Company in a manner consistent with the Cost Allocation Manual.

5. General Ledger Entries

Summary of Selected Manual Journal Entries – During the period from January 1, 2022 to December 31, 2022, the Company recorded entries to the general ledger via automated journal entry and manual journal entry processes. Entries in the Companies' general ledgers are assigned a "document type" (doc type), a unique two-digit code, designed to identify the source and nature of the journal entry. The complete population of operating expenses recorded is an aggregation of amounts recorded under all doc types to the relevant general ledger accounts. Costs approved for payment to vendors are recorded in the general ledger under doc types KR, RE, RS, and KG; labor costs are recorded under doc type AB; and employee expense costs under doc types TR and YU.

Additional entries to the general ledger to allow the Companies to maintain underlying books and records on a GAAP and FERC USoA basis are recorded via manual or automated entry under separate doc types.

A list of amounts recorded as operating expense under all doc types, and the items noted below were identified for selection and presentation in the Summary of Selected General Ledger Entries. "Operating expense" in

this case is defined as the aggregate of amounts recorded to general ledger accounts beginning with "C6", "U6", "C40", "U40", "C411" or "U411", excluding general ledger account C4000000 (Operating Revenue), and general ledger accounts related to income taxes. From this population, the method applied to select items for inclusion in the Summary of Selected General Ledger Entries was to select the items with the largest dollar net impact for the doc types considered for inclusion in the subject matter. The following entries have been accurately calculated and recorded to reflect in the appropriate period of the underlying transactions.

Doc type	Description
AB	Amounts presented in the Summary of Selected General Ledger Entries are a subset of entries recorded for manual adjustments to costs or internal orders for items other than labor costs. The Summary of Selected General Ledger Entries includes the impact of the largest entries identified as the largest entries impacting the largest general ledger line items (measured by absolute value). Amounts related to property tax expense, income tax expense, and depreciation expense were not included in the Summary.
AC	Amounts presented in the Summary of Selected General Ledger Entries are manual accruals either reversing or accruing for costs. The Summary of Selected General Ledger Entries includes the largest AC accruing entries (measured by absolute dollar impact on expense), and excluding amounts netting to zero for the calendar year.
IG	Amounts presented in the Summary of Selected General Ledger Entries are manual journal entries to record manual adjustments to costs or internal orders. The Summary of Selected General Ledger Entries includes the largest IG entries recorded measured by absolute dollar impact on expense.
SA	Amounts presented as in the Summary of Selected General Ledger Entries are manual entries used to record miscellaneous accounts receivable payments that do not follow the standard non-utility billing procedure, there are no invoices created for these. The summary of Selected General Ledger Entries includes the largest entries recorded during the period.
SK	Amounts presented as in the Summary of Selected General Ledger Entries are standard SAP delivered document type used to post adjustments by treasury team.
ZK	Amounts presented in the Summary of Selected General Ledger Entries are manual entries to record deferrals. The Summary of Selected General Ledger Entries includes the largest entries recorded during the period.
ZN	Amounts presented in the Summary of Selected General Ledger Entries are manual entries to record the amortization of prepaid entries. The Summary of Selected General Ledger Entries includes the largest entries recorded during the period.
ZQ	Amounts presented in the Summary of Selected General Ledger Entries are manual entries to record lock box payments made by customers in NUB process. The Summary of Selected General Ledger Entries includes the largest entries recorded during the period.

Not all doc types were considered for inclusion in the subject matter. Those that were excluded from consideration are shown below. Descriptions are provided in each of the company's summary of cost.

Category	KEDNY	KEDLI	Service Company
System generated settlement entries	02, DG, RB, RV, ST, WA, WE, WL, YM, YN, Z1, Z2, Z4, ZD, ZG, ZV	02, DG, PS, RV, ST, WA, WE, WL, YL, YM, YN, Z1, Z2, Z4, ZD, ZG, ZJ	01, 02, PP, PS, RB, RV, ST, WE, Y8, YL, Z1, Z4, ZC

6. Costs incurred and allocated by Service Company

Cost Allocation Manual and Service Agreements
Costs incurred by Service Company and by other NGUSA subsidiaries in providing services to NGUSA client companies ("Client Companies"), including KEDNY and KEDLI, are set forth in the service agreements and the Cost Allocation Manual (Revised July 2022) ("CAM") and include, but are not limited to, labor and related overhead costs (e.g., salaries of officers and other employees, employee welfare expenses such as social security taxes, life insurance, pensions, post-retirement benefits other than pension, medical, dental and other welfare expenses), training costs, facilities costs, information technology costs, and costs related to vendor and other contract services. The organization, conduct of business and method of cost allocation are designed to result in the performance of services and the provision of goods economically and efficiently for the benefit of the Client Companies at cost, fairly and equitably allocated among such companies.

The purpose of the CAM is to serve as a guide as to the manner in which costs should be charged to the Client Companies by the company incurring the cost. The prevailing premise of these cost allocation guidelines is that allocation methods should not result in subsidization of non-regulated services or products by regulated entities or subsidization of services or products from one regulated entity to another.

The provision of administrative services to the Client Companies by Service Company is specified in service agreements filed with the respective utility regulatory commissions.

Principles of cost allocation
The following principles guide the allocation of costs of products or services provided by Service Company and other operating subsidiaries to the Client Companies.

- Direct charging or direct assignment is the preferred allocation methodology and is used if the cost of providing a product or service can be identified with the Client Companies receiving the benefit of that product or service. Direct charging should only be used if the cost of providing a product or service to an individual Client Company can be isolated and reported separately from costs to provide other products or services and from costs to provide the same product and service to other Client Companies.

- The costs of products and services that cannot be direct charged should be allocated based on cost causative allocation bases representative of the underlying cost drivers of that product or service.

- The cost allocation methodology should be comprehensive, transparent, stable and administratively manageable and cost effective.

- The calculation of the cost allocation bases should be supported by a clearly defined methodology, model and supporting policy and procedure documentation.

- The cost allocation methodology should accommodate changes in the size of the allocation bases from period to period based on changes in the underlying cost drivers; the allocation bases should not vary significantly from period to period for uncontrollable factors not related to the underlying cost drivers.

- The calculation of the allocation bases should be updated at least annually and more frequently if needed to reflect significant events (e.g., the sale of a significant affiliate).

Costs are defined among the following four categories for purposes of allocating the costs of products and services to the Client Companies. This hierarchy represents the order of methodologies used when allocating costs. These four cost categories are:

- **Directly Assignable** – Expenses incurred for activities and services exclusively for the benefit of a Client Company.

- **Directly Attributable** – Expenses incurred for activities and services that benefit more than one Client Company and which can be allocated based on direct measures of cost causation; for example, number of employees or number of customers.

- **Indirectly Attributable** – Expenses incurred as a "cost of doing business" that do not relate to the provision of specific products and services. The costs typically benefit all entities within the corporate umbrella. Examples include governance costs, Corporate Secretary costs, and investor relations costs. These costs are typically allocated based on a general measure of cost causation, commonly referred to as the general allocator. Costs that cannot be directly identified with the provision of a particular product or service. This includes but is not limited to governance costs, insurance, and taxes as well the cost of services supporting Service Company such as Service Company accounting and recruiting for Service Company positions. The general allocator is the ratio of net plant, net margins and net operations and maintenance expenses, equally weighted.

- **Unattributable** – Expenses incurred for activities or services that have been determined as not appropriate for apportionment to the Client Companies. These costs relate primarily to activities such as corporate diversification, political or philanthropic endeavors and, as such, are charged directly to the parent company, NGUSA.

To apply these principles, Service Company and the Client Companies accumulate costs in system orders. The order design acts as the primary cost control element from which costs are billed to affiliates. For each order, an order design documents a description of the order's use and purpose, the activities associated with that particular order, and justification for the allocation methodology to be used for allocating the costs accumulated in the order. Only one allocation methodology can be used for each order.

Subsidiaries charge no more than actual costs for services provided to KEDNY, KEDLI, and other regulated affiliates.

The monthly settlements process includes only the costs accumulated in the open orders. There is no markup or profit included in allocations to the regulated affiliates. The allocations are based on the methodologies designated and described above. Accordingly, the unit cost (price) charged to these affiliates, including the KEDNY and KEDLI, is intended to reasonably approximate the actual costs of providing such services.

Section 7 of the CAM lists those services provided by ServCo and the Client Companies to whom these services are provided. These services are provided in accordance with the service agreements filed with the respective utility regulatory commissions.

Supplementary information to the Summary of Costs – KEDNY

The total amounts recorded by the Company for the twelve-month period ended December 31, 2022 in general ledger accounts representing operating expenses are summarized in the table below. The total ledger cost data (A) is the total of transactions recorded in KEDNY's general ledger that relate to operating costs considered for recovery in customer rates.

We have then subtracted items in the second column (B) costs incurred for energy efficiency programs and fleet, and accounting entries related to the accrual or deferral of regulatory accounting mechanisms, leaving the third column to show costs that the Finance Team selected and included in its examination (refer to the Notes to the Summary of Costs for more details on the method of selection). Column C, and the immediately preceding columns (d-h), include amounts cross-referenced to the Summary of Costs.

Supplementary information to the Summary of Costs – KEDLI

The total amounts recorded by the Company for the twelve-month period ended December 31, 2022 in general ledger accounts representing operating expenses are summarized in the table below. The total ledger cost data (A) is the total of transactions recorded in KEDLI's general ledger that relate to operating costs considered for recovery in customer rates.

We have then subtracted items in the second column (B) costs incurred for energy efficiency programs and fleet, and accounting entries related to the accrual or deferral of regulatory accounting mechanisms, leaving the third column to show costs that the Finance Team selected and included in its examination (refer to the Notes to the Summary of Costs for more details on the method of selection). Column C, and the immediately preceding columns (d-h), include amounts cross-referenced to the Summary of Costs.

Exhibit_____(RRP-8)

Table of Inflation Factors

The Brooklyn Union Gas Company d/b/a National Grid NY
CALCULATION OF INFLATION
OCCURRING BETWEEN THE TEST YEAR AND THE RATE YEARS

The value of the GDPIPD in the test year is equal to the average of the GDPIPD for the four quarters ended December 31, 2022:

Test Year GDPIPD = (124.209+126.914+128.276+129.502) / 4

= 127.22525

Forecasted values of the GDPIPD in years 2023 through 2028 are obtained from Moody's Analytics:

	Year	GDPIPD	Annual Rate
Historic Year Ended December 31, 2022	TY 2022	127.22525	
Rate Year Ending March 31, 2025	RY 2025	135.54619	6.54%
Data Year Ending March 31, 2026	RY 2026	138.16086	1.93%
Data Year Ending March 31, 2027	RY 2027	140.65663	1.81%
Data Year Ending March 31, 2028	RY 2028	143.14123	1.77%

Inflation between the test year and the 2025 rate year is: 6.5403%

135.546187715371 / 127.22525 = 1.06540319406228

Actual and Forecasted quarterly values used in the above calculations:

Actual[1] Year	Quarter	GDPIPD	Annual Rate	Average Annual GDPIPD
2021	1	116.19900	2.44%	114.5070
2021	2	117.97400	4.35%	115.7373
2021	3	119.76300	5.03%	117.1700
2021	4	121.75800	6.11%	118.9235
2022	1	124.20900	6.89%	120.9260
2022	2	126.91400	7.58%	123.1610
2022	3	128.27600	7.11%	125.2893
2022	4	129.50200	6.36%	127.2253
Forecast[2]				
2023	1	130.49858	5.06%	128.7976
2023	2	131.30980	3.46%	129.8966
2023	3	132.12818	3.00%	130.8596
2023	4	133.05509	2.74%	131.7479
2024	1	133.88196	2.59%	132.5938
2024	2	134.61486	2.52%	133.4200
2024	3	135.22438	2.34%	134.1941
2024	4	135.83479	2.09%	134.8890
2025	1	136.51072	1.96%	135.5462
2025	2	137.19589	1.92%	136.1914
2025	3	137.85010	1.94%	136.8479
2025	4	138.48465	1.95%	137.5103
2026	1	139.11281	1.91%	138.1609
2026	2	139.72933	1.85%	138.7942
2026	3	140.34897	1.81%	139.4189
2026	4	140.96777	1.79%	140.0397
2027	1	141.58044	1.77%	140.6566
2027	2	142.19860	1.77%	141.2739
2027	3	142.82007	1.76%	141.8917
2027	4	143.45340	1.76%	142.5131
2028	1	144.09286	1.77%	143.1412

Deferral Exhibits

SCHEDULE 1

Rate Allowances for Deferral Mechanisms

The Brooklyn Union Gas Company d/b/a National Grid NY
Rate Allowances for Deferral Mechanisms
Gas
(000's)

	Reference	Gas Rate Allowance for Rate Year Ending March 31, 2025
Property Tax	Exhibit____(RRP-5), Schedule 1	$ 280,085.3
Pension	Exhibit____(RRP-3), Schedule 16	$ -
OPEB	Exhibit____(RRP-3), Schedule 11	$ 0.0
Low Income Discounts	Exhibit____(RRP-3), Schedule 34	$ 46,895.3
SIR	Exhibit____(RRP-3), Schedule 32	$ 100,000.0
Variable Pay	Exhibit____(RRP-11), Workpapers to Exhibit RRP-3, Schedule 23, Workpaper 14	$ 12,392.1
Economic Development Grant Program	Exhibit____(RRP-3), Schedule 33	$ 1,818.9
Late Payment Charge Revenue	Exhibit____(RDP-2), Schedule 1	$ 23,840.0
Newtown Creek Revenues	Exhibit____(RDP-2), Schedule 1	$ 5,962.0
Long-Term Debt True-Up Mechanism	Exhibit____(CSP-1), Schedule 4	See Note
Credit/Debit Card Fees	Exhibit____(RRP-3), Schedule 40	$ 3,174.2
Uncollectible Expense Reconciliation	Exhibit____(RRP-3), Schedule 31	$ 18,657.5

Note: The long-term debt true-up mechanism would reconcile the difference between the forecast costs of long-term debt embedded in the authorized rates and the Company's actual costs during each of the Rate Year and Data Years and would be fully symmetrical

SCHEDULE 2

CSC Opex Mechanism

The Brooklyn Union Gas Company d/b/a National Grid NY
Deferral of City/State Construction Support and Protect Expense
($000's)

		Rate Year Ending March 31, 2025	Data Year Ending March 31, 2026	Data Year Ending March 31, 2027	Data Year Ending March 31, 2028
1	Actual Expense	$ 3,000.0	$ 2,000.0	$ 7,000.0	$ 5,000.0
2	Rate Allowance	$ 2,927.2	$ 2,983.7	$ 3,037.6	$ 3,091.2
3	Amount Deferred to (from) customers	$ (72.8)	$ 983.7	$ (3,962.4)	$ (1,908.8)

Line Notes

1 Actual costs - amounts shown for example only
2 Forecasted Rate Year and Data Years City/State Construction Support and Protect expense
3 Line 2 less Line 1 (if Line 2 is greater than Line 1)

The Brooklyn Union Gas Company d/b/a National Grid NY
City/State Construction
Support and Protect Operating Expense

City/State Construction Support and Protect Non-reimbursable O&M
Units: $

Notes

* Pursuant to Sections § 19-143 and § 24-521 of the New York City administrative code, utility companies are required to bear the cost of supporting and/or protecting their structures under the direction of the Commissioner of Design and Construction of NYC so that the construction and/or repair work of the city will not be delayed. Companies that fail to comply will be subject to criminal and civil penalties as prescribed by Sections § 19-149, § 19-150 and § 19-151 of the Administrative Code.

* Source of CSC Support and Protect (S&P) expense: BI report 4500 using a variable based on unique accounting for S&P expense

* Rate Year and Data Year totals equal to HTY inflated with general inflation rates

General Inflation	
HTY to RY 2025	6.5403%
DY 2026	1.9290%
DY 2027	1.8064%
DY 2028	1.7664%
