I. Introduction

Q. Please introduce the members of the Revenue Requirements Panel.

A. The Panel consists of James M. Molloy, Paula Leaverton, Mark Stiner, John E. O'Shaughnessy, and Sam Dunton.

Q. Is this the same Panel that previously submitted direct testimony on behalf of KEDNY in this proceeding?

A. Yes. The terms defined in the Panel's direct testimony have the same meanings here.

Q. What is the purpose of the Panel's corrections and updates testimony?

A. The Panel's testimony explains and supports certain corrections and updates to KEDNY's April 28, 2023 base rate filing ("April 28 filing") in this proceeding.

Q. Does the Panel sponsor any exhibits?

A. Yes. The Panel sponsors the following exhibits, all of which were prepared by or under the supervision and direction of one or more members of the Panel and which, in all cases, refer to KEDNY:

Exhibit __ (RRP-1CU) Statement of Operating Income

Exhibit __ (RRP-3CU) O&M Expenses by Expense Type

Exhibit __ (RRP-4CU) Depreciation Expense

Exhibit __ (RRP-5CU)	Taxes Other than Income Taxes
Exhibit __ (RRP-6CU)	Federal and State Income Taxes
Exhibit __ (RRP-7CU)	Rate Base
Exhibit __ (RRP-8CU)	Inflation Factors
Exhibit __ (RRP-9CU)	Deferral Exhibits
Exhibit __ (RRP-11CU)	Workpaper Data Supporting Certain Exhibits
Exhibit___(RRP-12CU)	Information Request Responses

Q. Please explain how the corrections and updates are organized.

A. The exhibits submitted in this filing show corrections and/or updates and indicate the change from the original filing. The exhibits are labeled with "CU" after the original label. For example, Exhibit __ (RRP-1) in the April 28 filing is the Statement of Operating Income. The exhibit showing the corrections and/or updates to the Statement of Operating Income is labeled Exhibit ___ (RRP-1CU). The first page of each exhibit provides a summary of all adjustments made and reflected in that exhibit. This summary, or lead page, is identified as "Corrections and Updates" under each exhibit number. The revised schedules and pages supporting each exhibit correspond to the schedules and pages originally filed. The Company has only included exhibits, summaries, schedules, and pages where corrections and/or updates were made,

except for in the case of Exhibit___(RRP-3CU), where all schedules are being included.

The information requests referenced in the Panel's testimony are all included in Exhibit ___ (RRP-12CU) in alphanumeric order. In the specific exhibits and schedules where the corrections and/or updates were made, the testimony will reference the specific information request. For example, if a correction and/or update is shown in Exhibit ___ (RRP-3CU), Schedule 2 based on a response to an information request, that information request is included in Exhibit____(RRP-12CU). Where the attachments to information requests are voluminous, the Company included only the written response and relevant attachments.

Q. What impact do the corrections and updates have on KEDNY's revenue requirement in this proceeding?

A. The April 28 filing reflected a Rate Year revenue requirement that was $414.2 million greater than revenue at present rates. The corrections and updates increase the Company's revenue requirement for the Rate Year by $35.9 million, to $450.1 million, as shown in Exhibit ___ (RRP-1CU), Page 1, and the table below.

Rate Year	April 30th Filing	Corrections & Updates	Increase/ (Decrease)
KEDNY	$414m	$450m	$36m

Q. What are the primary corrections and/or updates affecting the revenue requirement in the Rate Year?

A. The primary corrections and/or updates affecting the revenue requirement in the Rate Year are (i) an update to the Company's revenue forecast that decreased gas sales revenues, (ii) updates and corrections that increased KEDNY's excess earnings base adjustment partially offset by an accumulated deferred tax credit included in rate base, (iii) increased property taxes, and (iv) corrections and updates that collectively reduced the Company's O&M expense.

II. <u>Operating Income by Component</u>

Q. Please describe Exhibit ___ (RRP-1CU).

A. Exhibit ___ (RRP-1CU) summarizes the impact of all corrections and/or updates presented in this filing to the Company's operating income. This exhibit consists of two lead Corrections and Updates pages and a Summary with six pages showing the calculation of the Company's operating income for the Rate Year and Data Years. The Panel used the updated revenue forecast presented in Exhibit ___ (RDP-2CU) in developing the revenue requirements.

III. Operation and Maintenance ("O&M") Expenses

Q. Please explain Exhibit ___ (RRP-3CU).

A. Exhibit ___ (RRP-3CU) provides the corrections and/or updates to KEDNY's O&M expenses for the Rate Year and Data Years. The exhibit consists of a lead Corrections and Updates page, a Summary showing total departmental O&M expenses in the Historic Test Year, Rate Year, and Data Years, and 43 schedules. The schedules are numbered to correspond to the schedules submitted in the Company's April 28 filing. For example, in the April 28 filing, Exhibit ___ (RRP-3), Schedule 4, showed the costs associated with employee expenses. The corrections and/or updates to employee expenses are reflected in Exhibit ___ (RRP-3CU), Schedule 4.

Q. Please explain the expense specific schedules in Exhibit ___ (RRP-3CU).

A. The expense specific schedules that reflect corrections and/or updates to the April 28 filing are discussed below. To the extent the updated inflation projection is the only reason for a change in a schedule, the revised schedule is not separately discussed, but is included in the revised schedules in this filing. A list of expense specific schedules that are affected only by inflation is provided following the Panel's testimony.

Schedule 7 – Other

Schedule 7 reflects two adjustments to Other expense. The first adjustment was made in accordance with the response to Information Request No. DPS-271 to reflect the reversal of a December 2021 journal entry accrual related to the Appreciate Program. The second adjustment updates the inflation factor. These adjustments increase KEDNY's Other expense by $0.723 million in the Rate Year.

Schedule 9 – Service Company Rent Expense

Schedule 9 reflects two adjustments to Service Company rent expense. The first adjustment updates the Company's IT capital forecast for known changes to program forecasts and asset lives, as discussed in the corrections and updates testimony of the IT&D Panel. The second adjustment updates the facilities forecast for electric vehicle ("EV") chargers, which affects the revenue requirements in only the Data Years. This adjustment is discussed more fully in the corrections and updates testimony of the GIOP Panel, as well as in the responses to Information Request No. DPS-360 and DPS-362. Additionally, in accordance with the response to Information Request DPS-295, a presentation error was corrected to properly reflect all the charges originating from the Service Company, that did not impact the revenue requirement.

These adjustments decrease Service Company Rent expense by $0.029 million in the Rate Year, $0.134 million in Data Year 1, $0.401 million in Data Year 2, and $0.160 million in Data Year 3.

Schedule 13 - Healthcare

Schedule 13 reflects two adjustments to Healthcare expense. The first adjustment was made to reflect the normalization adjustment described on pages 51-52 of the Panel's direct testimony, which was inadvertently omitted from the Company's April 28 filing revenue requirement. The second adjustment updates the inflation factor. These adjustments increase Healthcare expense by $0.589 million in the Rate Year.

Schedule 14 – Group Life Insurance

Schedule 14 reflects two adjustments to Group Life Insurance expense. The first adjustment was made to reflect the normalization adjustment described on pages 51-52 of the Panel's direct testimony, which was inadvertently omitted from the Company's April 28 filing revenue requirement. The second adjustment updates the inflation factor. These adjustments increase Group Life Insurance expense by $0.022 million in the Rate Year.

Schedule 15 – Other Benefits

Schedule 15 reflects two adjustments to Other Benefits Expense. The first adjustment was made in accordance with the response to Information Request No. DPS-271 to reflect the reversal of the December 2022 journal entry accrual related to the Appreciate Program. The second adjustment updates the inflation factor. These adjustments reduce Other Benefits expense by $0.578 million in the Rate Year.

Schedule 17 – Thrift Plan

Schedule 17 reflects two adjustments to Thrift Plan expense. The first adjustment was made in accordance with the response to Information Request No. DPS-381 to correct the allocation of enhanced thrift plan expenses to KEDLI. The second adjustment updates the inflation factor. These adjustments increase Thrift Plan expense by $0.079 million in the Rate Year.

Schedule 18 – Workers Compensation

Schedule 18 reflects two adjustments to workers compensation expense. The first adjustment was made to reflect the normalization adjustment described on pages 51-52 of the Panel's direct testimony, which was inadvertently omitted from the Company's April 28 filing revenue requirement. The second

adjustment updates the inflation factor. These adjustments increase Workers Compensation expense by $0.057 million in the Rate Year.

Schedule 23 – Labor Expense

Schedule 23 reflects one adjustment to labor expense. The adjustment was made in accordance with the response to Information Request No. DPS-335 to correct a normalization adjustment to Miscellaneous Pay. This adjustment decreases labor expense in the Rate Year by $0.003 million. This schedule also reflects adjustments to workpapers to update the formula for calculating total part-time average salaries and to correct the Historic Test Year workpapers. Neither of these adjustments impacts KEDNY's revenue requirement.

Schedule 24 – Transportation

Schedule 24 reflects six adjustments to transportation expense. The first adjustment updates motor fuel expense based on the prices from the New York Mercantile Exchange as of June 8, 2023. The second adjustment updates fuel savings associated with the conversion of KEDNY's fleet to electric vehicles and was made in accordance with: (i) the response to Information Request No. DPS-360 for a reduction in the number of electric vehicles proposed; and (ii) the response to Information Request No. DPS-375 for a revision to the allocation of electric vehicles from the Service Company and based on the

updated fuel prices. The third adjustment was made in accordance with the response to Information Request No. DPS-360 to change the allocation of mobile charger costs based on the reduction in the number of electric vehicles proposed. The fourth adjustment was made in accordance with the response to Information Request No. DPS-362 to reduce lease expense for a reduction in the number of electric vehicles proposed. The fifth adjustment is a correction to the Historic Test Year transportation expense ratio in connection with an adjustment to remove Large Diameter Pipe Joint Encapsulation costs, which will be capitalized in future years (discussed in the direct testimony of the Gas Infrastructure and Operations Panel ("GIOP")). The sixth adjustment reflects the effects of the updated inflation factors.

The net impact of these adjustments is a decrease in Transportation expenses of $0.166 million in the Rate Year, $0.241 million in Data Year 1, $0.212 million in Data Year 2 and $0.195 million in Data Year 3.

Schedule 25 - Energy Efficiency

Schedule 25 reflects an adjustment to energy efficiency expense to align FY25 energy efficiency costs with the FY25 NE:NY budget and properly reflect the recovery of those costs through the Demand Capacity Surcharge Mechanism

during the Rate Year. The adjustment reduces Energy Efficiency expenses by $7.080 million in the Rate Year.

Schedule 26 – Injuries and Damages

Schedule 26 reflects five adjustments to injuries and damages expense. The first adjustment updates the Historic Test Year review adjustment for insurance expense to correct a backwards sign from positive to negative. The second adjustment updates the costs of insurance policies for actual costs incurred in the fiscal year ending March 31, 2023 ("FY 23"). The third adjustment corrects the inflation factor for the cost of railroad insurance protection. The fourth adjustment corrects a formula for the Adjusted Insurance Premiums line on Exhibit___(RRP-3CU), Schedule 26, Page 6. The fifth adjustment reflects the updated inflation factors. The sum of these adjustments decreases KEDNY's Injuries and Damages expenses by $0.265 million in the Rate Year.

Schedule 27 – Savings

Schedule 27 reflects four adjustments to KEDNY's forecast of savings. The first adjustment was made in accordance with the response to Information Request No. DPS-285 and reflects lower Rate Year savings for savings initiative PRJ-2271 – Investment Recovery Operations Support. The second adjustment was made in accordance with the response to Information Request

No. DPS-283 and reflects additional costs to achieve associated with National Grid's Reservoir Woods early termination initiative PRJ-2270. The third adjustment corrects the inflation calculation in Data Year 3. The fourth adjustment reflects the effect of the updated inflation factors. In total, the adjustments reduce the savings reflected in KEDNY's revenue requirement by $0.969 million in the Rate Year, $0.970 million in Data Year 1, $0.970 million in Data Year 2, and $0.974 million in Data Year 3.

Schedule 28 – Productivity

KEDNY's forecast of productivity savings as set forth in Schedule 28 reflects two adjustments. The first adjustment shows the flow through of the Miscellaneous Pay adjustment described at Schedule 23. The second adjustment corrects the amount of the imputed productivity savings for the linkage period between the end of the Historic Test Year on December 31, 2022 and the beginning of the Rate Year on April 1, 2024 by reducing the adjustment from 1.5 percent to 1.25 percent consistent with the 15-month period of the linkage period. These adjustments reduce Rate Year productivity savings by $0.473 million.

Schedule 29 – Rate Case Expenses

KEDNY's forecast of rate case expenses reflects an adjustment identified in the response to Information Request No. DPS-306 to include additional expenses associated with work related to the Company's depreciation study during the course of the case. These additional expenses were inadvertently omitted from the Company's April 28 filing. This adjustment increases Rate Case expense by $0.006 million in the Rate Year.

Schedule 31 – Uncollectible Expenses

KEDNY's forecast of uncollectible expenses reflects the flow through of the Company's updated forecast of revenues. This flow through adjustment reduces forecast uncollectible expense by $0.811 million in the Rate Year. In addition, in response to Information Request No. DPS-290, KEDNY identified an error in the write-offs and is reflecting the correction on Exhibit ___RRP-11CU, Workpapers to RRP3-CU, Schedule 31, Workpaper 1CU. This correction has no impact on the revenue requirement.

Schedule 33 – Economic Development

Schedule 33 reflects a correction to KEDNY's forecast of deferred economic development expense to reflect a reduction to the deferral balance due to the continuing amortization of the balance in the fiscal year ending March 31, 2024.

As discussed in the Customer Panel's corrections and updates testimony, these corrections have no impact on the Company's revenue requirement but reduce the deferred credit balance that the Company proposes to use to fund economic development programs during the Rate and Data Years. This adjustment reduces the Economic Development Fund expense forecast by $0.437 million in the Rate Year. Exhibit ___ (RRP-7CU), Schedule 2 reflects the change in an offsetting amortization.

Schedule 39 – Other Initiatives – Information Technology and Digital

Schedule 39 sets forth an update to KEDNY's OPEX/RTB (run-the-business) forecast for the Information Technology and Digital department. This adjustment, which is discussed in the corrections and updates testimony of the IT&D Panel, decreases run-the-business expenses by $0.090 million in the Rate Year, $1.915 million in Data Year 1, $0.106 million in Data Year 2, and $1.928 million in Data Year 3.

Schedule 40 – Other Initiatives – Customer, Facilities and Fleet

Schedule 40 reflects three adjustments to expenses associated with initiatives related to customer, facilities, and fleet expenses. The first two adjustments were made in accordance with the responses to Information Requests Nos. DPS-360 and 362 to (i) update the forecast of EV-related electric consumption

for the overall reduction in the number of proposed EVs, and (ii) adjust the forecast of EV electric make ready costs for the overall reduction in the number of EV chargers to be installed. These adjustments are discussed in the corrections and updates testimony of the Company's GIOP Panel. The third adjustment reflects the updated inflation factor. In total, these adjustments reduce KEDNY's expenses by $0.560 million in the Rate Year, $0.100 million in Data Year 1, $0.300 million in Data Year 2, and $0.390 million in Data Year 3. In addition, the Company is reflecting a correction in RRP-11CU, Workpapers to RRP3-CU, Schedule 40, Workpaper 6CU in accordance with response to Information Request No. DPS-347. This correction has no impact on the revenue requirement.

Schedule 41 – Other Initiatives – Workforce Adjustments

Schedule 41 reflects six adjustments associated with KEDNY's workforce adjustment proposals. The first adjustment was made in accordance with the response to Information Request No. PULP-03 and reflects updates to add incremental FTEs as discussed in the Customer Panel's corrections and updates testimony. The second adjustment updates KEDNY's proposal to eliminate two proposed FTEs in accordance with the response to Information Request No. DPS-274 and as described more fully in the GIOP's corrections and updates testimony. The third adjustment was made in accordance with the response to

Information Request No. DPS-273 to reflect changes in the start dates and positions of certain FTEs proposed by the GIOP and Customer (Demand Response FTEs). The fourth adjustment reflects a correction to the pension burdens applied in determining the costs for incremental FTEs. The fifth adjustment reflects a correction to management and labor inflation rates for an incorrect link in the revenue requirement model**.** The sixth adjustment updates the inflation factor. In total, these adjustments decrease expense by $0.060 million in the Rate Year and increase expense by $0.052 million in Data Year 1, $0.084 million in Data Year 2, and $0.116 million in Data Year 3.

Schedule 42 – Other Initiatives – GIOP and Gas Safety Panel O&M

Schedule 42 reflects two adjustments. The first adjustment updates the costs of leak detection surveys of large emitter leaks as discussed in the GIOP's corrections and updates testimony. The second adjustment updates the inflation factor. These adjustments increase expense by $0.259 million in the Rate Year, $0.271 million in Data Year 1, $0.284 million in Data Year 2, and $0.298 million in Data Year 3.

IV. Depreciation Expense

Q. Please describe Exhibit ___ (RRP-4CU).

A. Exhibit ___ (RRP-4CU) provides the corrections and/or updates to depreciation expense for the Rate Year and Data Years to reflect flow-through adjustments related to the plant changes discussed below. The exhibit consists of a lead Corrections and Updates page and a Summary page showing the updated forecast of gas depreciation expense for the Rate Year and Data Years.

V. Taxes Other Than Income Taxes

Q. Please describe Exhibit ___ (RRP-5CU).

A. Exhibit ___ (RRP-5CU) consists of a lead Corrections and Updates page, a Summary with three pages, and four schedules for the Rate Year and Data Years.

Q. Please describe the changes made to the forecast of Property Tax expense for the Rate Year and Data Years, as presented in Exhibit___(RRP-5CU), Schedule 1.

A. To update the forecast of property/special franchise tax expense the Company made four adjustments to its real estate tax forecasts. First, the Company reflected the flow through adjustments of all plant changes based on the Company's updated net utility plant forecast discussed later in the Panel's

testimony. Second, because FY 2023 property tax expense data is now available, the Company updated the forecast using FY 2023 actuals, which increased $6.838 million from the Historic Test Year. Third, the Company updated the average tax rate for the CY 2022 known rate. Fourth, the Company updated property tax growth rates for the three-year average based on FY 2021 – FY 2023 data. The updated property tax growth rate is 11.37 percent compared to 11.58 percent based on FY 2020 – FY 2022 data utilized in the Company's April 28 filing. The impact of the updated utility plant data, FY 2023 actuals, updated growth rates, and updated average tax rate applied to forecast net plant additions are shown in revised forecasts of property tax expense in Exhibits ___ (RRP-5CU), Schedule 1. The total of KEDNY's adjustments increase the property tax expense reflected in the Rate Year by $7.020 million, in Data Year 1 by $8.991 million, in Data Year 2 by $9.920 million, and in Data Year 3 by $10.313 million.

Q. Please describe the changes made to the Payroll Tax forecast included in (RRP-5CU), Schedule 2.

A. Payroll tax reflects the flow through impacts of the change of the labor forecast as described above in Exhibit___(RRP-3CU), Schedule 23.

Q. Please describe the changes made to the Other Tax forecast included in (RRP-5CU), Schedule 3.

A. Other Tax reflects two adjustments. The first adjustment corrects a Data Year 1 inflation formula error. The second adjustment updates the inflation factor.

Q. Please describe the changes made to the Gross Revenue Tax forecast included in (RRP-5CU), Schedule 4.

A. The Company reflected the flow through effect of the updated gas revenue forecasts presented in Exhibit____(G-RDP-2CU) to the gross revenue tax forecasts in the Rate Year and Data Years.

VI. Federal and State Income Taxes

Q. Has the Company made any corrections or updates to federal and state income tax expense?

A. Yes, the Company made adjustments to reflect changes to the amortization of excess accumulated deferred income tax ("ADIT") to reflect the impact of the extension of the temporary New York State ("NYS") tax rate increase of 7.25 percent through Data Year 3, and to reflect the flow through effect of changes in the revenue requirement and rate base on income tax expense, as shown in Exhibit ____(RRP-6CU).

Q. Please describe the change to the amortization of excess ADIT.

A. The Company adjusted the balance of the overall excess ADIT to reflect adjustments stemming from the settlements of the federal income tax audits for the periods ended March 31, 2010 through March 31, 2018. For the temporary audit adjustments agreed to in the settlements with the Internal Revenue Service ("IRS"), the current taxes were recorded at a 35 percent tax rate (the tax rate in effect for the years under audit), but the deferred taxes were recorded at a 21 percent tax rate (the tax rate in effect for the years ended after March 31, 2018). The resulting difference in the applicable tax rates increased the regulatory liability for excess ADIT. The Company applied amortization lives adopted in the 2019 KEDNY and KEDLI Rate Cases to the adjusted excess ADIT numbers, which changed the excess ADIT amortization amounts in the Rate Year through Data Year 3.

Q. Please describe the impact of the extension of the increased NYS tax rate.

A. On May 3, 2023, NYS enacted legislation that extends the expiration dates of the increased corporate tax rate and business capital base tax. The legislation extends the 7.25 percent corporate tax rate and the 0.1875 percent business capital base tax for an additional three years, through tax year 2026, which for the Company is FY 2027. The extension of the higher tax rate increases income tax expense in the Rate Year through Data Year 2. Additionally, the extension

of the higher tax rate extends the period in which excess or deficient accumulated deferred state income tax ("excess ADSIT" or "deficient ADSIT"), which gives rise to a tax regulatory liability or asset, may originate. Because the final amount of the excess or deficient ADSIT cannot be determined at this time, the Company removed the amortization of excess ADSIT for the period April 1, 2021 through March 31, 2022 from the calculation of the income tax expense in the Rate Year set forth in the "NYS & MTA Tax Rate Change 2021" line item in the Company's April 28 filing, as described in response to Information Request No. DPS-424.

VII. Rate Base

Q. Please explain Exhibit ___ (RRP-7CU).

A. Exhibit ___ (RRP-7CU) provides the corrections and/or updates to the Company's rate base for the Rate Year and Data Years. The exhibit consists of a lead Corrections and Updates page, a Summary with four pages, and six schedules showing the adjustments to net utility plant (Schedule 1), regulatory assets and liabilities (Schedule 2), and federal and state accumulated deferred income taxes (Schedule 3), working capital (Schedule 4), supply cash working capital/lead lag study (Schedule 5), and earnings base/capitalization (Schedule 6).

A. <u>Forecast of Net Utility Plant In Service</u>

Q. Please describe the changes made to the forecast of average net utility plant, as shown in Exhibit ___ (RRP-7CU), Schedule 1.

A. Schedule 1 reflects two adjustments. The first adjustment reflects updates to the Company's net utility plant forecast. The Company updated the forecast to use the actual March 31, 2023 construction work in progress, plant in service, depreciation reserve, and retirement work in progress beginning balances. The Company also updated the composite depreciation rates using depreciable plant balances as of March 2023.

The second adjustment updates the Company's capital forecast and associated in-service dates. The adjustment was made to update the capital and cost of removal forecasts and associated in-service dates for certain projects presented in Exhibit ___ (GIOP-1CU) for direct and indirect capital expenditures. The corrections and update testimony of the GIOP discusses the specific adjustments in more detail.

B. Deferred Taxes

Q. Please describe the changes made to the deferred tax forecasts, as shown in Exhibit ___ (RRP-7CU), Schedule 3.

A. The Company made changes to the deferred tax forecast to reflect (i) the updated ADIT balances from December 31, 2022 to March 31, 2023, (ii) the impact of the revenue requirement increase on net operating loss ("NOL") and the Corporate Alternative Minimum Tax ("CAMT"), (iii) the impact of the adjustments to excess ADIT, (iv) the impact of the extension of the temporary NYS Tax Rate increase, (v) the impact of the implementation of the IRS Revenue Procedure 2023-15, (vi) the impact of a correction to proration on the ADIT balances in the Company's April 28 filing, and (vii) the impact of changes to book plant additions, cost of removal and book depreciation on ADIT.

Q. How does the update of the ADIT balance from December 31, 2022 to March 31, 2023 impact rate base?

A. The actual activity giving rise to ADIT in the period from January 1, 2023 through March 31, 2023 was higher than estimated in the April 28 filing. Using actual amounts of ADIT increase for the three-month period resulted in a higher ADIT, which reduced rate base.

Q. How does the revenue requirement increase impact NOL, CAMT, and ADIT?

A. The inclusion of the revenue requirement increase in the calculation of the Company's taxable income resulted in a lower amount of NOL carryforward generated in the Rate Year through Data Year 3. The inclusion of the base revenue increase in the calculation of the Company's CAMT, however, resulted in a higher amount of CAMT and CAMT carryforward. Because the deferred tax impact of the decrease in NOL carryforward exceeded the deferred tax impact of the increase in CAMT carryforward, the inclusion of the base revenue increase resulted in higher ADIT, which reduced rate base.

Q. How does the adjustment to excess ADIT impact rate base?

A. As the Company returns excess ADIT, the excess ADIT regulatory liability that is included in rate base decreases and rate base correspondingly increases. The adjustments made to the amount of the overall excess ADIT regulatory liability increased the amount of excess ADIT amortization that flows through the cost of service in the Rate Year through Data Year 3. The increase in the excess ADIT amortization, therefore, increased rate base.

Q. How does the extension of the NYS Tax Rate increase impact rate base?

A. The extension of the NYS Tax Rate increase through fiscal year 2027 for the Company causes the incremental changes in state book-to-tax temporary differences that are expected to originate in the Rate Year through Data Year 2 to be subjected to, and accumulated at, the higher tax rate. The increased tax rate is therefore increasing ADIT, which reduces rate base.

Q. Has the IRS implemented any revenue procedures that impact rate base?

A. Yes. On April 14, 2023, the IRS issued Revenue Procedure 2023-15 ("Rev. Proc."), which outlines a safe harbor method of accounting that taxpayers may use to determine whether to deduct or capitalize expenditures to repair, maintain, replace, or improve natural gas transmission and distribution property.

Q. How does the implementation of IRS Revenue Procedure 2023-15 impact rate base?

A. While the IRS guidance is complex and requires further analysis, the Company made initial estimates of the impact of implementation of the Rev. Proc. As discussed in the response to Information Request No. DPS-425, the Company estimated, that to comply with the guidance in Rev. Proc, would cause the Company's gas repairs deductions to decrease by approximately 50 percent.

The decrease in the annual gas repairs deductions is expected to result in a decrease to ADIT. However, taken in conjunction with the impact of the lower gas repairs deduction on the NOL carryforward and CAMT carryforward, the implementation of the Rev. Proc. would result in an increase in ADIT in the Rate Year and Data Year 1, which decreases rate base, and a decrease in ADIT in Data Year 2 and Data Year 3, which increases rate base.

Q. Please describe the correction to the proration adjustment for the movement in the ADIT balance.

A. In the April 28 filing the Company inadvertently did not apply the proration adjustment required in accordance with Section 1.167(1)-1(h)(6) of the federal income tax regulations, as was described in the direct testimony. Following the April 28 filing, the Company identified a formula error, whereby the movement in the ADIT balance excluding the proration adjustment was used in the calculation of rate base. The Company has remedied the formula error and reflected the correct adjustment. The proration adjustment reduced ADIT, which increased rate base.

C. Working Capital

Q. Please describe the changes made to the Company's working capital costs.

A. Exhibit ___ (RRP-7CU), Schedule 4 reflects the flow through effects of changes to O&M expenses made in corrections and updates as compared to the April 28 filing.

Schedule 5 reflects the flow through effects of changes in the Company's gas forecast commodity revenue. The Materials and Supplies and Pre-Payments on Exhibit ___ (RRP-7CU), Summary, were updated for the revised inflation factor.

D. Earnings Base/Capitalization

Q. Please describe the corrections and updates shown in Schedule 6 of Exhibit ___(RRP-7CU).

A. The Company made three adjustments to the EBCAP balances at December 31, 2022. Those adjustments result in an increase to KEDNY's EBCAP adjustment of $221.427 million from ($9.187) million to $212.241 million. This increase, which increases the revenue requirement, resulted primarily from the correction of two errors and one update. First, as noted in the response to Information Request No. DPS-374, the Company incorrectly included $53.570 million of Regulatory Assets as Capitalization Adjustments. The effect understated

Capital Adjustments by $53.570 million and the EBCAP adjustment by an equal amount. The second error was the exclusion of certain liability accounts associated with Lease, Asset and Retirement Obligation and Environmental reserves from the Capital Adjustments. The error understated Capital Adjustments by $167.813 million and the EBCAP adjustment by an equal amount. The remaining change resulted from the update necessary to reflect the final historic year financial statement results as presented in the 2022 PSC Annual Report, which were not available at the time of the original filing. This update resulted in an overall decrease of $0.044 million to claimed rate base and an increase to the EBCAP adjustment of the same amount. A summary of the updates is presented in the table below:

Description	**Amount (000s)**
EBCAP adjustment in Original Filing	**(9,187)**
Correct link to exclude Reg. Assets from Capital Adjustments	53,570
Correct link to include additional accounts in Capital Adjustments	167,813
Update to reflect 2022 PSC Annual Report financial statements	44
EBCAP adjustment in C&U Filing	**$212,241**

VIII. Regulatory Assets and Liabilities and Amortization

Q. Please describe the corrections and updates shown in Schedule 2 of Exhibit ___ (RRP-7CU).

A. The Company made three adjustments to the forecast regulatory asset and liability balances at March 31, 2024 and one adjustment to amortization expense. The first adjustment to the regulatory asset and liability balance is to adjust the 2023 rate case expense and amortization. The second adjustment is to adjust the unamortized debt expense amortization. The third adjustment is to adjust Cost Sharing Agreement forecast. The amortization adjustment offsets the Economic Development adjustment in Schedule 33 of Exhibit___(RRP-3CU), discussed above.

Q. Do the changes in regulatory assets and liabilities have any impact on the revenue requirement?

A. Yes. The impact increases the revenue requirement by $0.054 million in the Rate Year.

IX. Inflation Factors

Q. Please describe the update to the projected inflation factors used by the Company.

A. Based on updated inflation forecasts, the Company increases its projected rate of inflation from 6.54 percent to 6.59 percent. As discussed above, a list of expense specific schedules in this corrections and updates filing that are affected only by inflation is provided following the Panel's testimony.

X. Proposed Treatment of Existing Regulatory Deferral Accounts and New Reconciliation Mechanisms

Q. Please describe the corrections and/or updates shown in Schedule 1of Exhibit ___ (RRP-9CU)

A. The Company updated several deferral thresholds to reflect the updated rate allowances based on the adjustments discussed throughout this testimony. These are shown in Exhibit___(RRP-9CU).

Q. Does this conclude the Panel's testimony?

A. Yes, it does.

Table of Inflation Factors

The Brooklyn Union Gas Company d/b/a National Grid NY
CALCULATION OF INFLATION
OCCURRING BETWEEN THE TEST YEAR AND THE RATE YEARS

The value of the GDPIPD in the test year is equal to the average of the GDPIPD for the four quarters ended December 31, 2022:

Test Year GDPIPD = (124.209+126.914+128.276+129.502) / 4

= 127.22525

Forecasted values of the GDPIPD in years 2023 through 2028 are obtained from Moody's Analytics:

	Year	GDPIPD	Annual Rate
Historic Year Ended December 31, 2022	TY 2022	127.22525	
Rate Year Ending March 31, 2025	RY 2025	135.60426	6.59%
Data Year Ending March 31, 2026	RY 2026	138.22857	1.94%
Data Year Ending March 31, 2027	RY 2027	140.75289	1.83%
Data Year Ending March 31, 2028	RY 2028	143.26326	1.78%

Inflation between the test year and the 2025 rate year is: 6.5860%

135.604264220353 / 127.22525 = 1.06585967974402

Actual and Forecasted quarterly values used in the above calculations:

Actual[1] Year	Quarter	GDPIPD	Annual Rate	Average Annual GDPIPD
2021	1	116.19900	2.44%	114.5070
2021	2	117.97400	4.35%	115.7373
2021	3	119.76300	5.03%	117.1700
2021	4	121.75800	6.11%	118.9235
2022	1	124.20900	6.89%	120.9260
2022	2	126.91400	7.58%	123.1610
2022	3	128.27600	7.11%	125.2893
2022	4	129.50200	6.36%	127.2253
2023	1	130.79300	5.30%	128.8713
Forecast[2]				
2023	2	131.52748	3.64%	130.0246

KEDNY KEDLI Case 23-G-0225/0226 Data Requests

Request for Information

FROM: Christopher Logan

TO: National Grid

SUBJECT: Other Benefits Expense

Request:

In all interrogatories, all requests for workpapers or supporting calculations shall be construed as requesting any Word, Excel or other computer spreadsheet models in original electronic format with all formulae intact and unlocked.

1. For KEDLI, provide a breakdown of other benefits expenses, by date, by vendor, and by cost type and cost activity, with the associated dollar amounts for each calendar year, 2018 through 2022.

2. Referring to the KEDLI Revenue Requirement Panel Testimony on p. 51, in which it states, "Schedule 15 consists of four pages and presents costs for providing other benefits, including employee wellness programs and other employee benefits. The Other Benefits expense is not capitalized largely because of the relatively small dollars associated with this expense." Provide the following:

   a. A list of all employee wellness programs, and employee benefits allocated to other benefits expense:

   b. A rationale for why a portion of other benefits expense is not capitalized when considering the Company's treatment of other relatively small dollar expenses in the Historic Test Year where costs are being capitalized (e.g., Group Life Insurance).

Response:

1. Please see Attachment 1 for a breakdown of other benefits expenses for calendar years 2018 through 2022. Prior calendar year data represents unadjusted, per-books totals and has not been normalized.

2. a. The Company offers many employee benefit and wellness programs, such as health care, life insurance, and thrift plans. Employee benefit program expenses are

quantified in Exhibit __ (RRP-3), Schedules 11 through 18. The employee benefits allocated specifically to Other Benefits expense are shown in Attachment 1 in response to Part 1 above and include the ATI Soft Tissue Injury Prevention ("STIP") Program, the Bright Horizons Dependent Care Program, the Virgin Pulse Employee Wellness Program, UK to US Cross Charges, and the Appreciate Program. As noted in the response to DPS-258, vendor dollars associated with the Appreciate Program (through the vendor "XEXEC LIMITED") were normalized in the Company's initial filing; however, the accrual entry for December 2022 and the January 2022 reversal of the December 2021 accrual will be normalized in the Company's Corrections and Updates filing from Other Benefits and Other Expense, respectively.

b. There are capital expenditures associated with Other Benefits. The testimony referenced is referring to the burden clearing process for benefits such as health care and group life insurance, whereby labor benefits are booked to a clearing account and charged out according to how an employee charges their time, burdening their labor costs and following the same capital/expense allocations. Other Benefits follows a different process because of the nature of the charges. Specifically, there is no clearing process for Other Benefits. Instead, Other Benefits are booked to capital or operations and maintenance ("O&M") expense depending on the nature of work the same as they would be booked to a non-benefit, non-burden cost type (***e.g.,*** contractors, consultants, etc.).

KEDNY KEDLI Case 23-G-0225/0226 Data Requests

Request for Information

FROM: Christopher Logan

TO: National Grid

SUBJECT: Other Benefits Expense

Request:

In all interrogatories, all requests for workpapers or supporting calculations shall be construed as requesting any Word, Excel or other computer spreadsheet models in original electronic format with all formulae intact and unlocked.

1. For KEDNY, provide a breakdown of other benefits expenses, by date, by vendor, and by cost type and cost activity, with the associated dollar amounts for each calendar year, 2018 through 2022.

2. Referring to the KEDNY Revenue Requirement Panel Testimony on p. 52, in which it states, "Schedule 15 consists of four pages and presents costs for providing other benefits, including employee wellness programs and other employee benefits. The Other Benefits expense is not capitalized largely because of the relatively small dollars associated with this expense." Provide the following:

    a. A list of all employee wellness programs, and employee benefits allocated to other benefits expense:

    b. A rationale for why a portion of other benefits expense is not capitalized when considering the Company's treatment of other relatively small dollar expenses in the Historic Test Year where costs are being capitalized (e.g., Group Life Insurance).

Response:

1. Please see Attachment 1 for a breakdown of other benefits expenses for calendar years 2018 through 2022. Prior calendar year data represents unadjusted, per-books totals and has not been normalized.

a. The Company offers many employee benefit and wellness programs, such as health care, life insurance, and thrift plans. Employee benefit program expenses are quantified in Exhibit ___ (RRP-3), Schedules 11 through 18. The employee benefits allocated specifically to Other Benefits expense are shown in Attachment 1 in response to Part 1 above and include the ATI Soft Tissue Injury Prevention ("STIP") Program, the Bright Horizons Dependent Care Program, the Virgin Pulse Employee Wellness Program, UK to US Cross Charges, and the Appreciate Program. As noted in the response to DPS-259, vendor dollars associated with the Appreciate Program (through the vendor "XEXEC LIMITED") were normalized in the Company's initial filing; however, the accrual entry for December 2022 and the January 2022 reversal of the December 2021 accrual will be normalized in the Company's Corrections and Updates filing from Other Benefits and Other Expense, respectively.

b. There are capital expenditures associated with Other Benefits. The testimony referenced is referring to the burden clearing process for benefits such as health care and group life insurance, whereby labor benefits are booked to a clearing account and charged out according to how an employee charges their time, burdening their labor costs and following the same capital/expense allocations. Other Benefits follows a different process because of the nature of the charges. Specifically, there is no clearing process for Other Benefits. Instead, Other Benefits are booked to capital or operations and maintenance ("O&M") expense depending on the nature of work the same as they would be booked to a non-benefit, non-burden cost type (e.g., contractors, consultants, etc.).

KEDNY KEDLI Case 23-G-0225/0226 Data Requests

Request for Information

FROM: John Castano

TO: National Grid

SUBJECT: Other Initiatives

Request:

In all interrogatories, all requests for workpapers or supporting calculations shall be construed as requesting any Word, Excel or other computer spreadsheet models in original electronic format with all formulae intact and unlocked.

KEDNY anticipates hiring 133.9 full-time equivalent (FTE) employees, and KEDLI anticipates hiring 99.6 FTE employees by the end of the rate year.

1. For each FTE who had an anticipated start date prior to May 17, 2023, as shown on Exhibit__(RRP-11), Workpapers to Exhibit RRP-3, Schedule 41, Workpaper 2, provide the actual start date and the number of days between the anticipated start date and the actual start date.

    a. Identify whether each FTE position with an anticipated start date prior to May 17, 2023, is currently filled.

    b. Identify whether each FTE position with an anticipated start date prior to May 17, 2023, was filled internally or externally.

2. For each FTE position with an anticipated start date prior to May 17, 2023, that is not currently filled, explain why the position is not filled.

3. For any FTE positions that have been filled internally, has the Company back-filled the vacated position?

4. Provide monthly updates to the Company's responses to the questions above.

Response:

1. See Attachment 1, column “Z” for the FTE actual hire date and column “AE” for count of days between the anticipated hire date and actual hire date.

a. See Attachment 1, column “Y”. Also see column “AK” for additional notes that indicate the Company will be correcting the start dates of 73 positions and column “G” for the corrected Start Date. Because all dates impacted by the correction are prior to the start of the Rate Year, the correction is presentation only and has no revenue requirement impact. The correction will be made to Exhibit__(RRP-11), Workpapers to Exhibit RRP-3, Schedule 41, Workpaper 2 in Corrections and Updates.

b. See Attachment 1, column “AA” for an indication of whether a FTE was filled internally or externally.

2. See Attachment 1, column “AC.”

3. See Attachment 1, column “AB.”

4. The Company will continue to respond to this information request on a monthly basis.

KEDNY KEDLI Case 23-G-0225/0226 Data Requests

Request for Information

FROM: John Castano

TO: National Grid

SUBJECT: Savings

Request:

In all interrogatories, all requests for workpapers or supporting calculations shall be construed as requesting any Word, Excel or other computer spreadsheet models in original electronic format with all formulae intact and unlocked.

1. Referring to KEDNY's Exhibit__(RRP-11), Workpapers to Exhibit RRP-3, Schedule 27, Workpaper 1, explain how the cost to achieve the amount of $1.019 million was derived and provide all calculations and assumptions.

2. Referring to KEDLI's Exhibit__(RRP-11), Workpapers to Exhibit RRP-3, Schedule 27, Workpaper 1, explain how the cost to achieve the amount of $0.486 million was derived and provide all calculations and assumptions.

3. Explain why the Companies' cost to achieve are the same in the Rate Year, as they are in the Data Years.

Response:

1-2. To achieve the savings associated with initiatives PRJ 1715-1717 and 1720-1724, the Company incurred costs. These costs to achieve consisted of:

- Incremental employee costs that were not reflected in base rates established in Cases 19-G-0309 and 19-G-0310 to provide project management, training, and data analytic work. These costs totaled approximately $0.230 million and $0.100 million in each of the Rate Year and Data Years at KEDNY and KEDLI, respectively.
- Customer marketing, software and support expense of approximately $0.789 million and $0.376 million in each of the Rate Year and Data Years at KEDNY and KEDLI, respectively.

Program benefits are largely tied to the Companies' front-office and back-office operations with operational volumes largely being driven by customer counts across operating companies. The Service Company allocations to KEDNY and KELDI are 19.65 percent and 9.36 percent, respectively.

3. The Company amortized the cost to achieve over four years to align with the benefits that customers will receive over the same period.

Please note that, in preparing this response, the Company discovered that it inadvertently failed to reflect the costs to achieve associated with the Reservoir Woods early termination initiative (initiative no. PRJ-2270). The Companies will reflect this as an adjustment in Corrections and Updates

KEDNY KEDLI Case 23-G-0225/0226 Data Requests

Request for Information

FROM: John Castano

TO: National Grid

SUBJECT: Savings

Request:

In all interrogatories, all requests for workpapers or supporting calculations shall be construed as requesting any Word, Excel or other computer spreadsheet models in original electronic format with all formulae intact and unlocked.

1. For each savings initiative as identified in the Companies' Exhibit__(RRP-11), Workpapers to Exhibit-3, Schedule 27, Workpaper 1, provide:

   a. The current estimate of savings for National Grid USA.

   b. The allocator/basis of allocation.

   c. The reason for using that allocator/basis of allocation identified above.

   d. The current estimate of savings allocated to KEDNY.

   e. The current estimate of savings allocated to KEDLI.

   f. The current estimate of savings allocated to Other.

Response:

1. a./d./e./f. Savings are tracked at the jurisdictional level (*i.e.*, New York and Massachusetts). They are not tracked for NGUSA. Exhibit__(RRP-11), Workpapers to Exhibit___(RRP-3), Schedule 27, Workpaper 1 includes the savings estimates for KEDNY and KEDLI. Attachment 1 to DPS-284 is an updated version of this Workpaper that includes savings allocated to Other NY, which is Niagara Mohawk Power Corporation ("NMPC"), in column M for the initiatives listed in the Workpaper.

b./c. Each initiative was evaluated by the initiative owner and Finance to identify the operating companies that would benefit from the identified efficiency. Based on this review, the appropriate allocation was selected from recognized allocation codes. Attachment 1 to DPS-284 presents the allocations for each project and the reasoning for the allocation, in columns U and V, respectively.

Please note that the Company will be making two adjustments in Corrections and Updates to reflect updated savings for initiatives PRJ-5825 "Canceled Work Orders" and PRJ-2271 "Investment Recovery (Ops Support)."

- **PRJ-5825** – This is a new initiative that reflects incremental Rate Year savings of $0.201 million for KEDLI. No separate adjustment is being made for KEDNY because the Historic Test Year amount is higher than the Rate Year forecast.

- **PRJ-2271 –** The Company inadvertently reflected an incremental savings adjustment of $0.100 million for KEDNY in the initial filing. The savings associated with PRJ-2271 were achieved prior to the Historic Test Year, however, and are embedded in the revenue requirement. Therefore, a separate adjustment should not have been made and will be corrected in Corrections and Updates.

KEDNY KEDLI Case 23-G-0225/0226 Data Requests

Request for Information

FROM: John Castano

TO: National Grid

SUBJECT: Uncollectibles

Request:

In all interrogatories, all requests for workpapers or supporting calculations shall be construed as requesting any Word, Excel or other computer spreadsheet models in original electronic format with all formulae intact and unlocked.

1. For KEDNY, provide a schedule, in the same format as Exhibit__(RRP-11), Workpapers to Exhibit RRP-3, Schedule 31, Workpaper 1, for Calendar Years 2018-2022.

2. For KEDNY, provide a schedule, in the same format as Exhibit__(RRP-11), Workpapers to Exhibit RRP-3, Schedule 31, Workpaper 1, from January 1, 2023-April 1, 2023.

    a. Provide a monthly update to this schedule.

3. For KEDNY, regarding Exhibit__(RRP-11), Workpapers to Exhibit RRP-3, Schedule 31, Workpaper 1.

    a. Identify the revenues the Company excludes from its calculation of an uncollectibles rate (e.g., other revenues, etc.).

    b. Provide an explanation as to why the Company excludes such revenues from its calculation of an uncollectibles rate as identified in question 3a.

Response:

1. See Attachment 1 for the requested net write-offs by month for calendar years 2018 through 2022. Attachment 1 reflects a correction to Exhibit RRP-3, Schedule 31, Workpaper 1 for the year 2022 net write-off amounts in months October through December. The correction only applies to calendar year 2022, and therefore has no impact on the Rate Year revenue requirement. As set forth in the Direct Testimony of the Customer Panel (p. 67), the Companies calculated the Rate Year uncollectible expense using net write-off amounts from

2017-2019 to avoid the impact of COVID-related anomalies. The Company will update this response monthly.

2. See Attachment 1 for the Company's net write-offs by month for calendar year 2023, January through April. The Company will update this response monthly.

3. The Company includes tariff revenue and late payment charges revenue in the calculation of an uncollectible rate as these revenues flow through customers' bills. See Exhibit____(RRP-11), Workpapers to Exhibit RRP-3, Schedule 31, Workpaper 4 for the calculation in the Rate Year and Data Years. The calculation excludes miscellaneous revenue (other than late payment charges) associated with items such as rent from property, third-party billing, and billing service fees that are not included in customers' bills. A complete list of the miscellaneous revenue items for the Rate Year and Data Years can be found at the bottom of Exhibit___(RDP-2).

KEDNY KEDLI Case 23-G-0225/0226 Data Requests

Request for Information

FROM: John Castano

TO: National Grid

SUBJECT: Service Company Rents

Request:

In all interrogatories, all requests for workpapers or supporting calculations shall be construed as requesting any Word, Excel or other computer spreadsheet models in original electronic format with all formulae intact and unlocked.

1. For calendar years 2018-2021, in similar format to Exhibit__(RRP-3), Schedule 9, p. 4, provide:

   a. The total amount of Service Company Rent expense incurred by KEDNY;

   b. The total amount of Service Company Rent expense incurred by KEDLI;

   c. The amounts allocated to KEDNY from National GRID USA Service Company;

   d. The amounts allocated to KEDLI from National GRID USA Service Company;

   e. The amounts allocated to KEDNY from all other companies;

   f. The amounts allocated to KEDLI from all other companies.

Response:

1. Please see Attachment 1 for the total Service Company Rent expense amounts for KEDNY and KEDLI in the same format as Exhibit___(RRP-3), Schedule 9, Page 4. Please note that calendar year data for 2018-2021 represents per-books totals only adjusted to properly reflect Service Company/Operating Company splits and has not been normalized.

In preparing this response the Companies identified that they erroneously presented costs in the operating companies on pages 1-4 of Exhibit___(RRP-3), Schedule 9. In Corrections and Updates the Companies will update Exhibit___RRP-3, Schedule 9, pages 1-4 to properly reflect all of the charges originating from the Service Company. This correction does not impact the revenue requirement.

KEDNY KEDLI Case 23-G-0225/0226 Data Requests

Request for Information

FROM: Tshepo Simpson

TO: National Grid

SUBJECT: KEDNY and KEDLI Rate Case Expense

Request:

In all interrogatories, all requests for workpapers or supporting calculations shall be construed as requesting any Word, Excel or other computer spreadsheet models in original electronic format with all formulae intact and unlocked.

1. Exhibit__(RRP-11), Workpapers to Exhibit RRP-3, Schedule 29, Workpaper 2 shows a forecasted rate case expense categorized as Regulation and Pricing for both KEDNY and KEDLI. Provide supporting documentation for the grand totals of each item listed under Regulation and Pricing.

2. Exhibit__(RRP-11), Workpapers to Exhibit RRP-3, Schedule 29, Workpaper 2 shows forecasted rate case expense categorized as Legal for both KEDNY and KEDLI. Provide the supporting documentation for the grand totals of each item listed under Legal.

    a. Provide a detailed description of the Publication Requirement expense and the basis for the allocation of each Company's costs.

Response:

1. The Company forecasted Rate Case expense based on proposals it received from each vendor. Please see Attachment 1 for supporting documentation for the grand totals of each item listed under Regulation and Pricing. Please note that the estimate for Gannett Fleming, the Company's depreciation witness, only included costs through the direct filing. The Company will be updating this estimate to include $50,000 for preparing additional testimony and responding to information requests as well as attending hearings. The Company will incorporate the additional $50,000 estimate in its Corrections and Update filing.

2. Please see Attachment 2 for supporting documentation for the grand totals of each item listed under Legal.

a. The Publication Requirement expense was forecasted based on what the Company spent on advertising new rates in local newspapers in prior rate cases. Please see Attachment 3 for a breakdown of publication cost forecast by company and newspaper.

KEDNY KEDLI Case 23-G-0225/0226 Data Requests

Request for Information

FROM: Christopher Logan

TO: National Grid

SUBJECT: Labor-O&M Expense

Request:

In all interrogatories, all requests for workpapers or supporting calculations shall be construed as requesting any Word, Excel or other computer spreadsheet models in original electronic format with all formulae intact and unlocked.

Regarding page 63 of the Revenue Requirement Panel Testimony:

1. Provide the ratio of KEDLI miscellaneous pay to base salary and overtime pay for the Calendar Years 2018, 2019, 2020 and 2021.

2. Explain the annual variances in the miscellaneous pay ratios provided in response to Question 1 above.

3. Provide a breakdown of all KEDLI miscellaneous pay normalization adjustments to the Historic Test Year.

Response:

1. Please see Attachment 1 for the ratio of KEDLI miscellaneous pay to base and overtime pay for both KEDLI and Service Company for calendar years 2018 through 2021. Prior calendar year data represents unadjusted, per-books totals and has not been normalized.

2. The ratio of miscellaneous pay to base and overtime pay is relatively consistent year over year. Any variance is due to the specific miscellaneous pay items that are paid in a given year.

3. Please see Exhibit RRP-11, Workpapers to Exhibit RRP-3, Schedule 23, Workpaper 12 for a full breakdown of all miscellaneous pay normalization adjustments. Please note that the Company has identified an immaterial amount that was inadvertently omitted from the miscellaneous pay adjustment, which will be reflected in the Company's Corrections and Updates filing.

KEDNY KEDLI Case No. 23-G-0225/0226 Data Requests

Request for Information

FROM: Xenia Vega

TO: National Grid

SUBJECT: EAP Outreach and Education Funding Request

Request:

In all interrogatories, all requests for workpapers or supporting calculations shall be construed as requesting any Word, Excel or other computer spreadsheet models in original electronic format with all formulae intact and unlocked.

1. Referring to p. 35 of the Companies' Customer Service Panel testimony, the Companies propose to increase their EAP Outreach and Education (O&E) budget by $0.5 million, split evenly between KEDNY and KEDLI.

   a. For each item described on p. 1 of Exhibit (CP-6), Schedule 2, provide a description and line-item accounting of the Companies' $0.5 million projected costs. Include all workpapers, cost studies, vendor quotes or other documents the Companies used to forecast costs. For any cost component where documentation is not available, provide a description of how the Companies developed those costs. If a workpaper has already been provided, provide the name of the workpaper.

2. Referring to p. 31 of the Companies' Customer Service Panel testimony, provide a detailed description of how each proposed program will increase the Companies' reach into Disadvantaged Communities.

3 Referring to p. 13, Companies' Customer Service Panel testimony the Companies state that in early 2022, they engaged ESource to research Low to Moderate Income customers' needs. Provide any analysis and supporting documentation, workpapers, and research reports.

4. Referring to p. 33, the Companies state that survey results showed that 60 percent of its customers are interested in learning about financial assistance programs. Provide the Companies' survey results, and the analysis and supporting documentation or workpapers that the Companies used to determine the need for enhanced marketing and outreach.

Response:

1. A more detailed description of the EAP Outreach and Education budget, also referred to as the LMI Marketing and Outreach program budget referenced on page 35 of the direct testimony of the Customer Service Panel, is included in Exhibit_ (CP-1), Schedule 5. The workpapers for KEDNY's program budget are included as Exhibit_ (RRP-11), Workpapers to Exhibit __ (RRP-3), Schedule 40, Workpaper 3 in the direct testimony of KEDNY's Revenue Requirements Panel. The workpapers for KEDLI's program budget are in Exhibit__ (RRP-11), Workpapers to Exhibit __ (RRP-3), Schedule 40, Workpaper 2 in the direct testimony of KEDLI's Revenue Requirements Panel. The budget and associated workpapers were developed using costs for marketing activities completed in the past year to arrive at an estimated cost for each line item.

   The Disadvantaged Community Outreach program budget described in Exhibit__(CP-6), Schedule 2 is also described on page 101 through 103 of the direct testimony of the Customer Service Panel. The workpapers for KEDNY's program budget are in Exhibit __(RRP-11), Workpapers to Exhibit __ (RRP-3), Schedule 40, Workpaper 6 in the direct testimony of KEDNY's Revenue Requirements Panel. The workpapers for KEDLI's program budget are in Exhibit __(RRP-11), Workpapers to Exhibit __ (RRP-3), Schedule 40, Workpaper 5 in the direct testimony of KEDLI's Revenue Requirements Panel.

   For each item described on page 1 of Exhibit__(CP-6), Schedule 2, see the Companies' response below for a description of how the costs were developed. Please note that the workpapers incorrectly represented the budget total for both Companies rather than apportioning the budget evenly between the Companies. This will be corrected in the Companies' Corrections and Updates testimony.

   In-Person Events: Costs were forecast using costs developed for a similar program proposed by the Companies' Massachusetts affiliate. The program, known as the Mass Save Community First Partnership program, aimed to hold in-person events in environmental justice communities to promote clean energy initiatives. The Mass Save program targeted environmental justice communities similar to the Disadvantaged Communities the Companies are proposing to target for their clean energy programs.

   Localized Social Media Campaigns: Costs were estimated based on the Companies' residential weatherization marketing budget, which planned on spending 50 percent of the $1.6 million budget on paid social media. From there, the budget estimate was adjusted to assume paid social media would only be purchased for zip codes whose populations include at least 75 percent Disadvantaged Community customers, which is roughly 10 percent.

   Community Partnerships: Costs were forecasted using costs for the Mass Save CommunityFirst Partnership program that aimed to organize events with key community organizations in environmental justice communities to promote clean energy initiatives. The Mass Save program targeted environmental justice communities similar to the Disadvantaged Communities the Companies are proposing to focus on in their service territories.

   Distribution of Innovative Educational Materials: National Grid used innovative print

materials in its Residential Weatherization Program, which allocated roughly 20 percent of the budget to development and distribution of these materials. The costs for this program were forecast using this pricing and adjusted the budget to assume materials would only be distributed to zip codes whose populations include at least 75 percent Disadvantaged Community customers, which is roughly 10 percent.

Customer Referral Incentives: Costs were forecast for customer referrals by first estimating a sample size of 2,000 Disadvantaged Community customers to ensure statistical significance when evaluating the effectiveness of referral incentives. The Companies then estimated that a $25 incentive would be provided for the referral and a $5,000 budget for administrative costs to send out the incentives depending on method (*i.e.*, gift cards).

2. The Clean Energy Advisors will increase outreach into Disadvantaged Communities by assisting low-to-moderate income customers in these communities with accessing clean energy programs, attending community events and being liaisons to NYSERDA's Regional Clean Energy Hubs. The Disadvantaged Communities definition includes all households in New York State that report an annual income at or below 60 percent of the state median income and the criteria for the Disadvantaged Communities geographic areas includes census tracts with high percentages of low-to-moderate income customers. The work the Clean Energy Advisors will engage in with low-to-moderate income customers and communities in New York City and Long Island will benefit Disadvantaged Communities. There will additionally be the opportunity to focus customer and community outreach and assistance in Disadvantaged Communities by using the designated census tracts to plan marketing and outreach campaigns and community engagement activities.

3. Please see Attachments 1 and 2 for research reports developed through National Grid's engagement of ESource to research low-to-moderate income customers' needs across its New York and Massachusetts service territories. Images of customers' faces and homes have been removed to protect customer privacy.

4. Please see Attachment 3 for the results of a survey conducted with National Grid's Customer Council to better understand New York low-to-moderate income customer perceptions of paying their energy bills and relevant offerings that can help customers lower and/or better manage bills.

KEDNY KEDLI Case 23-G-0225/0226 Data Requests

Request for Information

FROM: Robert Cully

TO: National Grid

SUBJECT: Light Duty EV Fleet Deployment Schedule

Request:

In all interrogatories, all requests for workpapers or supporting calculations shall be construed as requesting any Word, Excel or other computer spreadsheet models in original electronic format with all formulae intact and unlocked.

On p. 92 of the KEDNY Gas Infrastructure and Operations Panel (GIOP) initial testimony, KEDNY states that it proposes to replace 413 KEDNY-leased internal combustion engine (ICE) vehicles and 36 leased Service Company vehicles with an equivalent number of electric vehicles (EVs) during the Rate Year and Data Years. On p. 92 of the KEDLI GIOP initial testimony, KEDLI states that it proposes to replace 234 KEDLI-leased ICE vehicles and 36 leased Service Company vehicles with an equivalent number of EVs during the Rate Year and Data Years.

1. Explain whether the 36 Service Company-leased vehicles referred to by KEDNY and KEDLI are the same vehicles, i.e. are there 36 total Service Company vehicles the Companies plan to replace, 72 Service Company vehicles, or some other number?

2. For KEDNY, provide the number of ICE vehicles the Company proposes to replace with EVs during each of the following periods:

    a. The Rate Year;
    b. Data Year 1;
    c. Data Year 2; and
    d. Data Year 3.

3. For KEDLI, provide the number of ICE vehicles that the Company proposes to replace during each of the following periods:

    a. The Rate Year;
    b. Data Year 1;
    c. Data Year 2; and
    d. Data Year 3.

4. Regarding the Service Company, provide the number of ICE vehicles that the Company proposes to replace during each of the following periods:

   a. The Rate Year;
   b. Data Year 1;
   c. Data Year 2; and
   d. Data Year 3.

Response:

1. Following the Companies' rate filing in April, National Grid reviewed its overall fleet electrification plans as part of its long-term fleet electrification strategy. A lack of available fit-for-purpose vehicles and marketplace uncertainty/unavailability drove the decision to reduce the number of electric vehicles ("EVs") and associated chargers being proposed in these rate cases. The Companies will provide these revised figures, with an explanation for the changes, as part of the Corrections and Updates filing. The numbers presented in this response reflect the revised plan.

   The proposed conversion of 36 Service Company-leased vehicles to EVs in both the KEDNY and KEDLI rate filings were referring to the same vehicles. In total, 36 Service Company vehicles were proposed for conversion to EVs, not 72. Based on the updated fleet electrification plan, 18 Service Company vehicles are now being proposed for conversion to EV.

2. The table below reflects the number of internal combustion engine ("ICE") vehicles the Company proposes to replace with EVs for KEDNY as part of its revised fleet electrification plan.

	RY (a)	**DY1 (b)**	**DY2 (c)**	**DY3 (d)**
KEDNY	33	85	11	67

3. The table below reflects the number of ICE vehicles the Company proposes to replace with EVs for KEDLI as part of its revised fleet electrification plan.

	RY (a)	**DY1 (b)**	**DY2 (c)**	**DY3 (d)**
KEDLI	38	24	17	15

4. The table below reflects the number of ICE vehicles the Company proposes to replace with EVs for Service Company-leased vehicles as part of its revised fleet electrification plan.

	RY (a)	**DY1 (b)**	**DY2 (c)**	**DY3 (d)**

KEDNY KEDLI Case 23-G-0225/0226 Data Requests

Request for Information

FROM: Robert Cully

TO: National Grid

SUBJECT: Level 2 and DCFC EV Charger Deployment at Company Sites

Request:

In all interrogatories, all requests for workpapers or supporting calculations shall be construed as requesting any Word, Excel or other computer spreadsheet models in original electronic format with all formulae intact and unlocked.

On p. 92 of the KEDNY Gas Infrastructure and Operations Panel (GIOP) initial testimony, KEDNY states that it proposes to install 430 Level 2 electric vehicle (EV) charging ports and 31 Direct Current Fast Charging (DCFC) EV charging ports at five KEDNY locations, as well as Level 2 and DCFC ports at other sites with an allocation to KEDNY. On pp. 92-93 of the KEDLI GIOP initial testimony, KEDLI states that it proposes to install 151 Level 2 EV charging ports and 28 DCFC EV charging ports at "various" KEDLI locations, as well as Level 2 and DCFC ports at other sites with an allocation to KEDLI.

1. Explain how the Companies developed their forecasts of the amount of Level 2 and DCFC chargers needed to support their light duty fleet electrification plans.

2. Provide a list of each KEDNY site at which EV charging ports will be installed, and identify the number of each plug type (Level 2 and DCFC) that will be installed at each site.

3. Provide a list of each KEDLI site at which EV charging ports will be installed, and identify the number of each plug type (Level 2 and DCFC) will be installed at each site.

4. For each site identified in response to Questions 2 and 3, above, explain whether the site is either: (a) within a Disadvantaged Community, (b) adjacent to a Disadvantaged Community, or (c) neither within nor adjacent to a Disadvantaged Community.

5. Provide the number of Level 2 chargers installed at KEDNY sites each year for:

    a. The Rate Year;
    b. Data Year 1;
    c. Data Year 2; and
    d. Data Year 3.

6. Provide the number of Level 2 chargers installed at other sites with an allocation to KEDNY each year for:

    a. The Rate Year;
    b. Data Year 1;
    c. Data Year 2; and
    d. Data Year 3.

7. Provide the number of Level 2 chargers installed at KEDLI sites each year for:

    a. The Rate Year;
    b. Data Year 1;
    c. Data Year 2; and
    d. Data Year 3.

8. Provide the number of Level 2 chargers installed at other sites with an allocation to KEDLI each year for:

    a. The Rate Year;
    b. Data Year 1;
    c. Data Year 2; and
    d. Data Year 3.

9. Provide the number of DCFC chargers installed at KEDNY sites each year for:

    a. The Rate Year;
    b. Data Year 1;
    c. Data Year 2; and
    d. Data Year 3.

10. Provide the number of DCFC chargers installed at other sites with an allocation to KEDNY each year for:

    a. The Rate Year;
    b. Data Year 1;
    c. Data Year 2; and
    d. Data Year 3.

11. Provide the number of DCFC chargers installed at KEDLI sites each year for:

    a. The Rate Year;
    b. Data Year 1;
    c. Data Year 2; and
    d. Data Year 3.

12. Provide the number of DCFC chargers installed at other sites with an allocation to KEDLI each year for:

a. The Rate Year;
b. Data Year 1;
c. Data Year 2; and
d. Data Year 3.

13. Explain whether the Level 2 and DCFC chargers installed at sites with an allocation to KEDNY and/or KEDLI are located within the KEDNY or KEDLI service territories.

    a. For any chargers installed at sites that are not within the KEDNY or KEDLI service territory, explain why the Company decided to allocate costs to KEDNY and KEDLI customers.

Response:

1. The Companies determined how many Level 2 and DCFC chargers were needed to support the proposed fleet EV program by analyzing the anticipated fleet replacement schedule over the Rate Year and Data Years, and determining which of the existing leased vehicles were able to be replaced with an EV available in the marketplace. The Companies determined the number and type of chargers required at each facility based on those findings and developed an annual plan for the installation of chargers prior to EVs being assigned to those locations.

   The proposed number of Level 2 chargers corresponds to light-duty vehicles being proposed for conversion to an EV to allow for dedicated overnight charging. The Companies are proposing one DCFC station for approximately every 10 light-duty vehicles proposed for conversion to an EV to allow for opportunistic charge during normal working hours. The ratios were recommended by an external consultant and are consistent with similarly sized fleet EV conversions.

   Following the Companies' rate filing in April, National Grid reviewed its overall fleet electrification plans as part of its long-term fleet electrification strategy. A lack of available fit-for-purpose EVs and marketplace uncertainty/unavailability drove the decision to reduce the number of EVs and associated chargers being proposed. The Companies will provide the revised figures, with an explanation for the changes, as part of the Corrections and Updates filing. The numbers presented in this response reflect the revised plan.

   Under the revised plan, the Companies propose to install 193 Level 2 and 29 DCFC stations at five KEDNY locations, 106 Level 2 and 14 DCFC stations at 11 KEDLI locations, and 21 Level 2 and three DCFC stations at two Service Company sites (Brentwood and Melville) with an allocation to KEDLI and KEDNY as outlined in Exhibit ___ (GIOP-10), and set forth in more detail in Exhibit ___ (RRP-11), Schedule 9, Workpapers 4, 7, 10, an 13.

2. The number of proposed Level 2 and DCFC stations, by site, for KEDNY are:

KEDNY Location	Level 2 Charging Stations	DCFC Stations
Canarsie	97	12
Greenpoint	60	10
Staten Island	23	5

KEDNY Location	Level 2 Charging Stations	DCFC Stations
Springfield	11	2
Bay Ridge / Brooklyn	2	0

3. The number of proposed Level 2 and DCFC stations, by site, for KEDLI are:

KEDLI Location	Level 2 Charging Stations	DCFC Charging Stations
Bellmore	29	4
Hewlett	13	3
Roslyn	13	2
Patchogue	15	2
Hicksville	9	2
Brightwaters	9	1
Brentwood	8	0
Shoreham	4	0
Glenwood	2	0
Holtsville	2	0
Riverhead	2	0

4. Sites within or adjacent to a Disadvantaged Community included in the response to Question 2 (KEDNY) are as follows:

Canarsie – adjacent to Disadvantaged Communities (Brownsville, East Flatbush, Canarsie)
Greenpoint – within a Disadvantaged Community
Staten Island – within a Disadvantaged Community
Springfield (Jamaica) – adjacent to a Disadvantaged Community (Locust Manor)
Bay Ridge – adjacent to a Disadvantaged Community (other sections of Bay Ridge)

Sites within or adjacent to a Disadvantaged Community included in the response to Question 3 (KEDLI) are as follows:

Bellmore – adjacent to a Disadvantaged Community (Freeport)
Brentwood – adjacent to a Disadvantaged Community (Central Islip and Brentwood)
Brightwaters – adjacent to a Disadvantaged Community (Bay Shore)
Glenwood – adjacent to a Disadvantaged Community (Sea Cliff and Glen Cove)
Hewlett – within and adjacent to a Disadvantaged Community (Valley Stream)
Holtsville – neither within nor adjacent to a Disadvantaged Community
Hicksville – adjacent to a Disadvantaged Community (New Cassel)
Patchogue – within a Disadvantaged Community
Shoreham – neither within nor adjacent to a Disadvantaged Community
Riverhead – within a Disadvantaged Community
Roslyn – neither within nor adjacent to a Disadvantaged Community

5.-12. Please see Attachment 1 for the information requested in questions 5 through 12.

13. and 13. a.

The Service Company will own Level 2 and DCFC stations that will be partially allocated to KEDNY and KEDLI. The Service Company charging stations will be installed within KEDLI's service territory; none are currently planned for KEDNY's service territory.

The costs associated with the Service Company charging stations are appropriately allocated to both KEDNY and KEDLI because these facilities will provide charging capabilities for EVs that support personnel while traveling between the service territories for meetings and other business purposes. For example, KEDNY personnel will be able utilize charging stations when receive training at National Grid sites in KEDLI's service territory.

KEDNY KEDLI Case 23-G-0225/0226 Data Requests

Request for Information

FROM: John Castano

TO: National Grid

SUBJECT: Earnings Base Capitalization (EBCAP)

Request:

In all interrogatories, all requests for workpapers or supporting calculations shall be construed as requesting any Word, Excel or other computer spreadsheet models in original electronic format with all formulae intact and unlocked.

1. Provide an explanation of what the Earnings Base Capitalization (EBCAP) represents, and how it is measured.

2. For KEDLI, identify the EBCAP adjustment reflected in the Company's annual excess earnings calculation for the Rate Years ending March 31, 2021, 2022 and 2023.

3. For KEDLI, provide a detailed balance sheet as of December 31, 2022, that identifies the capitalization and earnings base accounts (identify interest bearing and non-interest bearing) that reconcile to the EBCAP adjustment of $148.204 million as identified in Exhibit__(RRP-7), Schedule 6, p. 7.

    a. Explain why the Company removes Supply Cash Allowance from the EBCAP adjustment.

4. For KEDLI, in reference to Exhibit__(RRP-7), Schedule 6, p. 7, explain:

    a. Why the Company reflected approximately $385 million of certain balance sheet accounts reducing the EBCAP adjustment.

    b. Why the Company reflected approximately $49 million of deferred accumulated deferred income taxes in the EBCAP adjustment.

5. For KEDNY, identify the EBCAP adjustment reflected in the Company's annual excess earnings calculation for the Rate Years ending March 31, 2021, 2022 and 2023.

6. For KEDNY, provide a detailed balance sheet as of December 31, 2022, that identifies the capitalization and earnings base accounts (identify interest bearing and non-interest

bearing) that reconcile to the EBCAP adjustment of $9.187 million as identified in Exhibit__(RRP-7), Schedule 6, p. 7.

a. Explain why the Company removes Supply Cash Allowance from the EBCAP adjustment.

7. For KEDNY, in reference to Exhibit__(RRP-7), Schedule 6, p. 7, explain:

a. Why the Company reflected approximately $357 million of certain balance sheet accounts in the EBCAP adjustment.

b. Why the Company reflected approximately $49 million of deferred accumulated deferred income taxes in the EBCAP adjustment.

Response:

1. The Earnings Base Capitalization Adjustment ("EBCAP") is used to test the reasonableness of utility rate base in rate case proceedings and has been applied in New York since the 1970s.

The EBCAP adjustment is predicated on the principle that the real measure of the investment entitled to earn a fair return is the total capitalization dedicated to public service, as represented by the investments of the security holders in the Earnings Base of the utility and is not solely the investment in the assets themselves that the utility has dedicated to public service.

Capitalization dedicated to public service is used to fund the Earnings Base, which is comprised of the portion of invested capital used to fund the assets required to serve current customer needs, (i.e., the rate base) and that portion of invested capital used to fund the assets needed to serve future customer needs (i.e., Construction Work in Progress ("CWIP")).

Typically, utilities are compensated for the cost of capital supporting the portion of capitalization used to fund CWIP through the application of an Allowance for Funds Used During Construction ("AFUDC"), leaving the portion of the capitalization supporting the rate base to be compensated by current customers through the application of a reasonable rate of return on the utility's rate base.

Because the total amount of capital dedicated to public service is definite and measurable, the amount of the utility's rate base should not exceed or fall below the total capitalization dedicated to public service less the portion of capitalization that is funding the CWIP upon which AFUDC is applied.

The EBCAP adjustment simply measures the difference between the claimed rate base and the total capitalization dedicated to public service, less the portion of the earnings base being compensated by AFUDC (*i.e.*, the interest bearing CWIP). The claimed rate base is then adjusted either up or down to reflect the measurement result.

As a general rule, the difference between rate base and earnings base reflects the difference in working capital from the 1/8th of O&M expenses included in rate base and the actual balance sheet changes included in the earnings base.

2. KEDLI's EBCAP adjustment was a reduction to claimed rate base of $24.379 million for the Rate Year ended March 31, 2021 and an increase to claimed rate base of $76.946 million for the Rate Year ended March 31, 2022. The earnings report for the Rate Year ended March 31, 2023 is not yet available and will be filed by August 31, 2023.

3. See Attachment 1 for a detailed Balance Sheet classifying and identifying the specific accounts used in determining the EBCAP adjustment of $148.204 million. A pivot table summary is included in Attachment 1 that summarizes the G/L account data by the rate base or EBCAP components that can be derived directly from distinct G/L account balances and provides references to the specific page and lines where the amounts are presented in Exhibit__ (RRP-7), Schedule 6. Note that the presentation of every component of the rate base and the EBCAP adjustment cannot be performed directly from balance sheet account level detail. For example, interest bearing and non-interest bearing CWIP is not recorded in distinct G/L accounts. The application of interest is assigned at the individual project/workorder level and must be extracted from PowerPlan, the Company's Plant Accounting subsidiary ledger. In addition, there are discrete adjustments to the Plant balances to exclude certain projects that are specifically excludable from calculating rate base, for example, certain LNG and vaporizer projects. This detailed information is sourced from Plant Accounting's monthly Net Utility Plant & Depreciation ("NUPD") capital tracker reconciliation, which is used to provide the information necessary to record the monthly capital tracker deferral. The summary page from the Historic Test Year End, December 2022 NUPD reconciliation is presented in Exhibit__ (RRP-7), Schedule 6 as a workpaper to support Exhibit__ (RRP-7), Schedule 6 pages 9 and19-21. A pivot table has been included in Attachment 1 to summarize the balances comprising the balance sheet categories of Net Utility Plan, CWIP and Accumulated Depreciation that reconcile with the amounts included and presented in the NUPD Summary page as presented in Exhibit__ (RRP-7), Schedule 6 as a workpaper to support pages 9 and 19-21. Additionally, the rate base also includes calculations for Cash Working Capital and Accumulated Deferred Income Taxes ("ADIT"), which are not linked directly to balance sheet account detail. Support for these components of the rate base calculation is provided in Exhibit__ (RRP-7), Schedule 6 on page 24 for the Cash Working Capital Allowance and page 28 for ADIT.

Note: The "EBCAP RATE BASE" pivot table schedule included in Attachment 1 identifies two clerical errors that will be corrected as part of the Company's Corrections and Updates filing. The impact of these adjustments as illustrated in the pivot table schedule is to increase the EBCAP adjustment by $30.6 million and the Rate Base by $13.1 million. Note too that the EBCAP calculation will also be updated to reflect the issuance of the PSC Annual Report financial statements, which were not available at the time of the Company's original rate case filing. A supplemental response to this IR will be issued after Corrections and Updates is filed to reflect the impact on the EBCAP and rate base calculations of any balance sheet or income statement adjustments reflected in the 2022 PSC Annual Report.

3. a. The supply cash allowance is a commodity-related cash working capital adjustment that is calculated and presented as a normalizing adjustment to the Historic Test Year rate base in Exhibit__ (RRP-7) Rate Base Summary. As such, this adjustment's effect must also be reflected as a normalizing adjustment to the calculation of the Historic Test Year EBCAP adjustment presented in Exhibit__ (RRP-7), Schedule 6. Accordingly, the Supply Cash Allowance adjustment is not actually removed from the EBCAP adjustment, rather the increase in the working capital allowance caused by the Supply Cash Allowance normalizing adjustment creates a corresponding increase to the claimed rate base (*i.e.*, rate base before the EBCAP adjustment), which results in an equal but offsetting effect on the EBCAP adjustment. The result of which yields no net effect to the adjusted rate base (*i.e.*, the rate base after EBCAP adjustment).

4. a. The $385.163 million adjustment to the capitalization dedicated to public service represents certain balance sheet accounts comprised of both assets and liabilities that are considered additional sources and uses of capital. The specific balance sheet accounts included in the adjustment are identified in Attachment 1. The assets represent a use of capital which reduces the available capital dedicated to public service and the liabilities represent a source of capital that increase the available capital dedicated to public service. The $385.163 million included in the EBCAP calculation is a net liability balance effectively increasing the total capital dedicated to public service and representing additional customer supplied funds that are generally available to support KEDLI's rate base investment beyond the amount of capital provided by investors through Long Term Debt and Common Stock.

   b. The $49.7 million of deferred accumulated deferred income taxes in the EBCAP adjustment represents the Federal and State ADIT adjustments associated with certain deferred balances contained within the $385.163 million of Capital Adjustments. The calculation of the Federal, ($33.2 million) and State ($16.5 million) ADIT adjustments totaling $49.7 million is shown in Exhibit__ (RRP-7), Schedule 6, page 28.

5. KEDNY's EBCAP adjustment was a reduction to claimed rate base of $23.903 million for the Rate Year ended March 31, 2021 and a reduction to claimed rate base of $56.641 million for the Rate Year ended March 31, 2022. The earnings report for the Rate Year ended March 31, 2023 is not yet available and will be filed by August 31, 2023.

6. See Attachment 2 for a detailed Balance Sheet classifying and identifying the specific accounts used in determining the EBCAP adjustment of $9.187 million. A pivot table summary is included in Attachment 2 that summarizes the G/L account data by the rate base or EBCAP components that can be derived directly from distinct G/L account balances and provides references to the specific page and lines where the amounts are presented in RRP-7 Schedule 6. Note that the presentation of every component of the rate base and the EBCAP adjustment cannot be performed directly from balance sheet account level detail. For example, interest bearing and non-interest bearing CWIP is not recorded in distinct G/L accounts. The application of interest is assigned at the individual project/workorder level

and must be extracted from PowerPlan, the Company's Plant Accounting subsidiary ledger. In addition, there are discrete adjustments to the Plant balances to exclude certain projects that are specifically excludable from calculating rate base, for example, certain LNG & Vaporizer projects. This detailed information is sourced from Plant Accounting's monthly NUPD capital tracker reconciliation, which is used to provide the information necessary to record the monthly capital tracker deferral. The summary page from the Historic Test Year End, December 2022 NUPD reconciliation is presented in Exhibit__ (RRP-7), Schedule 6 as a workpaper to support Exhibit__ (RRP-7), Schedule 6 pages 9 and 19-21. A pivot table has been included in Attachment 2 to summarize the balances comprising the balance sheet categories of Net Utility Plan, CWIP and Accumulated Depreciation that reconcile with those amounts included and presented in the NUPD Summary page as presented in Exhibit__ (RRP-7), Schedule 6 as a workpaper to support Exhibit pages 9 and 19-21. Additionally, the rate base also includes calculations for Cash Working Capital and ADIT, which are not linked directly to balance sheet account detail. Support for those components of the rate base calculation is provided in Exhibit__ (RRP-7), Schedule 6,page 24 for the Cash Working Capital Allowance and page 28 for ADIT.

Note: The "EBCAP RATE BASE" pivot table schedule included in Attachment 2 identifies a clerical error that will be corrected as part of the Company's Corrections and Updates filing. The impact of this corrective adjustment, as illustrated in the pivot table schedule, is to increase the EBCAP adjustment and the Rate Base by $53.6 million. Note also that the EBCAP calculation will also be updated to reflect the issuance of the PSC Annual Report financial statements, which were not available at the time of the Company's original rate case filing. A supplemental response to this IR will be issued after Corrections and Updates is filed to reflect the impact on the EBCAP and rate base calculations of any balance sheet or income statement adjustments reflected in the PSC Annual Report.

6. a. See the response to question 3(a), above

7. a. The $357.815 million adjustment to the capitalization dedicated to public service represents certain balance sheet accounts comprised of both assets and liabilities that are considered additional sources and uses of capital. The specific balance sheet accounts included in the adjustment are identified in Attachment 2. The assets represent a use of capital which reduces the available capital dedicated to public service and the liabilities represent a source of capital that increase the available capital dedicated to public service. The $357.815 million included in the EBCAP calculation is a net liability balance effectively increasing the total capital dedicated to public service and representing additional customer supplied funds that are generally available to support KEDNY's rate base investment beyond the traditional amount of capital provided by investors through Long Term Debt and Common Stock.

b. The Company understands the reference in question 7(b), above, should be to $33.918 million, as opposed to $49 million. The $33.918 million of deferred ADIT in the EBCAP adjustment represents the Federal and State ADIT adjustments associated with certain deferred balances contained within the $357.815 million of Capital Adjustments. The calculation of the Federal,

($22.67 million) and State, ($11.249 million) ADIT adjustments totaling $33.918 million is shown in Exhibit__ (RRP-7), Schedule 6, page 28.

KEDNY KEDLI Case 23-G-0225/0226 Data Requests

Request for Information

FROM: Robert Cully

TO: National Grid

SUBJECT: Allocation of Service Company EV Lease Expenses Allocated to KEDNY and KEDLI

Request:

In all interrogatories, all requests for workpapers or supporting calculations shall be construed as requesting any Word, Excel or other computer spreadsheet models in original electronic format with all formulae intact and unlocked.

The "Inputs and Assumptions" tab of workbooks "RRP-3 OM Sch 24 Transportation NY23" and "RRP-3 OM Sch 24 Transportation LI23" lists the allocations of Service Company Electric Vehicle (EV) lease expense as 3.69 percent and 2.88 percent, respectively.

1. Explain how the Companies developed these allocation factors.

2. Explain why such allocation methodology is appropriate for allocating the costs of Service Company EVs to KEDNY and KEDLI customers.

Response:

1. Exhibit___(RRP-11), Workpapers to RRP-3, Schedule 24, Workpaper 1 presents total Historic Test Year transportation costs originating from the Service Company and the proportion of that total charged to each receiving company, resulting in allocations of 3.69 percent to KEDNY and 2.88 percent to KEDLI. Please note, however, that these rates are presented for informational purposes only and were not used to allocate electric vehicle lease costs in the Company's Rate Year forecast.

2. As discussed in the response to part 1, these allocation percentages were not used to allocate the lease cost of electric vehicles to KEDNY and KEDLI. Please see Exhibit___(RRP-11), Workpaper to Exhibit RRP-3, Schedule 24, Workpaper 5 for the allocation of Service Company electric vehicle costs to KEDNY and KEDLI. As shown on this workpaper, 100% of the incremental costs for the proposed Service Company electric vehicles are allocated to KEDNY and KEDLI and split between the two companies using the same ratio that total electric vehicle lease expense is split between KEDNY and KEDLI.

After further consideration, the Company submits that the better method to allocate the Service Company electric vehicle lease expense to KEDNY and KEDLI is by using allocation percentages consistent with the approach for allocating costs for the Service Company facilities (Melville and Brentwood) at which the electric vehicles will be located. As discussed in the Company's response to DPS-362, parts 6 and 8, National Grid is installing four level 2 chargers at the Melville facility, which has an allocation of 31% to KEDLI and 54% to KEDNY, and 17 level 2 chargers at the Brentwood facility, with an allocation of 97% to KEDLI and 3% to KEDNY. The Company will allocate the Service Company electric vehicle lease expense proportionally to KEDNY and KEDLI using these ratios, resulting in an allocation of 85% to KEDLI and 15% to KEDNY. The updated allocations will be reflected in the Corrections and Updates filing.

KEDNY KEDLI Case 23-G-0225/0226 Data Requests

Request for Information

FROM: Christopher Logan

TO: National Grid

SUBJECT: Thrift Plan Expense

Request:

In all interrogatories, all requests for workpapers or supporting calculations shall be construed as requesting any Word, Excel or other computer spreadsheet models in original electronic format with all formulae intact and unlocked.

1. For KEDNY, provide a breakdown of thrift plan expense, by month, and by employee with the associated dollar amounts by year, for each Calendar Year, 2018, 2019, 2020, 2021, and 2022.

2. For the Service Company provide a breakdown of thrift plan expense, by month, and by employee with the associated dollar amounts by year, and the allocation percentage to KEDNY for each Calendar Year, 2018, 2019, 2020, 2021, and 2022

3. For KEDNY, in reference to p. 54 of the Revenue Requirements Panel, the Company indicates that for thrift plan expense, the Company allocated the total fringe benefit expense on the same basis that Service Company historic labor allocated to KEDNY, to expense, or 12.26 percent, however, in reference to the Company's Exhibit___(RRP-3), Schedule 17, Workpaper 2, p. 1, for adjustment "Pension Employees Who Left" the Company utilized an allocation to expense of 12.1 percent. Explain why these amounts are different.

4. For KEDNY, referring the Company's Exhibit___(RRP-3), Schedule 17, Workpaper 2, p. 1, provide:

    a. A detailed description of what the Enhanced Thrift Plan represents.

    b. An explanation as to why the Service Company's allocation to Opex is 74.2 percent, 33.9 percent, and why the Company is using two different allocations to Opex.

    c. An explanation for why the Company utilized a 4 percent average core contribution for new employees.

a. all assumptions, and calculations supporting the 4 percent contribution level to forecast the rate year.

d. The start dates for the 49 employees who backfilled the 49 pension employees who left in 2022. If all 49 employees haven't been hired yet, indicate how many open positions are still available and the anticipated date they will be filled.

e. The amount of thrift plan expense contributed from KEDNY from January 1, 2023, through May 31, 2023, related to the 49 new employees hired.

f. The amount of thrift plan expense contributed from the Service Company to KEDNY from January 1, 2023, through May 31, 2023, related to the 428 new employees hired.

Response:

1. As discussed with Staff, the initial request of thrift plan expense broken down by individual employee contributions would be unduly burdensome for the Companies. Instead, Attachment 1 sets forth the total KEDNY thrift dollars, the percentage of KEDNY labor charged to expense, and the number of participants contributing to the thrift plan for calendar years 2018 through 2022.

2. Again, the initial request of thrift plan expense broken down by individual employee contributions would be unduly burdensome for the Companies. Instead, Attachment 2 sets forth the total Service Company thrift dollars, the percentage of Service Company labor charged to KEDNY, the percentage of Service Company labor charged to KEDNY charged to expense, and the number of participants contributing to the thrift plan for calendar years 2018 through 2022.

3. The correct percentage of Service Company Historic Test Year labor allocated to KEDNY is 12.26 percent. This represents a blended rate of both National Grid USA Service Company and NG Engineering Services, LLC, commonly referred to in the filing, jointly, as "Service Company." Exhibit RRP-11, Workpapers to Exhibit RRP-3, Schedule 17, Workpaper 2 shows the three components of the Enhanced Thrift adjustment: one for National Grid USA Service Company, one for NG Engineering Services, LLC, and one for KEDNY direct employees. Each company has a different allocation rate to KEDNY operating expense, and so the individual allocation and expense percentages shown on Workpaper 2 are specific to only that company's historic test year labor. The Companies will correct the error on this workpaper, which incorrectly allocates KEDNY direct employees using the blended Service Company allocation rate, in their Corrections and Updates testimony.

4. a. Enhanced Thrift is a benefit offered to new and existing employees who are not covered by a defined benefit plan. Aside from offering a partial match of an employee's contributions, the Company makes a "core contribution" to the employee's thrift plan, irrespective of the employee's individual contribution.

b. As detailed in the response to Question 3, National Grid USA Service Company and NG Engineering Services, LLC, are distinct legal entities for employment purposes, and while generally used collectively in Company documentation, they have separate labor allocation and capitalization rates.

c. The percentage rate of the core contribution is determined by an employee's age and years of service. This contribution rate is floored at 4% and peaks at 8%. As such, given that the employees replacing the previously-pensioned employees are new, with unknown ages, the Companies took a conservative approach and used a 4% core contribution rate.

d. The Companies do not track the backfilling on a position-by-position basis of employees who leave National Grid.

e. Please see the response to subpart (d).

f. Please see the response to subpart (e).

KEDNY KEDLI Case No. 23-G-0225 & 23-G-0226 Data Requests

Request for Information

FROM: Christopher Logan

TO: National Grid

SUBJECT: Thrift Plan Expense

Request:

In all interrogatories, all requests for workpapers or supporting calculations shall be construed as requesting any Word, Excel or other computer spreadsheet models in original electronic format with all formulae intact and unlocked.

1. For KEDLI, provide a breakdown of thrift plan expense, by month, and by employee with the associated dollar amounts by year, for each Calendar Year, 2018, 2019, 2020, 2021, and 2022.

2. For the Service Company provide a breakdown of thrift plan expense, by month, and by employee with the associated dollar amounts by year, and the allocation percentage to KEDLI for each Calendar Year, 2018, 2019, 2020, 2021, and 2022.

3. For KEDLI, in reference to p. 54 of the Revenue Requirements Panel, the Company indicates that for thrift plan expense, the Company allocated the total fringe benefit expense on the same basis that Service Company historic labor allocated to KEDLI, to expense, or 8.23 percent, however, in reference to the Company's Exhibit___(RRP-3), Schedule 17, Workpaper 2, p. 1, for adjustment "Pension Employees Who Left" the Company utilized an allocation to expense of 7.9 percent. Provide an explanation as to why these amounts are different.

4. For KEDLI, referring the Company's Exhibit___(RRP-3), Schedule 17, Workpaper 2, p. 1, provide:

   a. A detailed description of what the Enhanced Thrift Plan represents.

   b. An explanation for why the Service Company's allocation to Opex is 65.9 percent and 34.1 percent. In addition, explain why the Company is using two different allocations to Opex.

   c. An explanation for why the Company utilized a 4 percent average core contribution for new employees. Provide all assumptions, and calculations

supporting the 4 percent contribution level to forecast the rate year.

d. The start dates for the 21 employees who backfilled the 21 pension employees who left in 2022. If all 21 employees haven't been hired yet, indicate how many open positions are still available and the anticipated date they will be filled.

e. The start dates for the 428 employees who backfilled the 428 pension employees who left in 2022. If all 428 employees haven't been hired yet, indicate how many open positions are still available and the anticipated date they will be filled.

f. The amount of thrift plan expense contributed from KEDLI from January 1, 2023, through May 31, 2023, related to the 21 new employees hired.

g. The amount of thrift plan expense contributed from the Service Company to KEDLI from January 1, 2023, through May 31, 2023, related to the 428 new employees hired.

Response:

1. As discussed with Staff, the initial request of thrift plan expense broken down by individual employee contributions would be unduly burdensome for the Companies. Instead, Attachment 1 sets forth the total KEDLI thrift dollars, the percentage of KEDLI labor charged to expense, and the number of participants contributing to the thrift plan for calendar years 2018 through 2022.

2. Again, the initial request of thrift plan expense broken down by individual employee contributions would be unduly burdensome for the Companies. Attachment 2 sets forth the total Service Company thrift dollars, the percentage of Service Company labor charged to KEDLI, the percentage of Service Company labor charged to KEDLI charged to expense, and the number of participants contributing to the thrift plan for calendar years 2018 through 2022.

3. The correct percentage of Service Company historic test year labor allocated to KEDLI is 8.23 percent. This represents a blended rate of both National Grid USA Service Company and NG Engineering Services, LLC, commonly referred to in the filing, jointly, as "Service Company." Exhibit RRP-11, Workpapers to Exhibit RRP-3, Schedule 17, Workpaper 2 shows the three components of the Enhanced Thrift adjustment: one for National Grid USA Service Company, one for NG Engineering Services, LLC, and one for KEDLI direct employees. Each company has a different allocation rate to KEDLI operating expense, and so the individual allocation and expense percentages shown on Workpaper 2 are specific to only that company's historic test year labor. The Companies will correct an error on this workpaper, which incorrectly allocates KEDLI direct employees using the blended Service Company allocation rate, in their Corrections and Updates testimony.

4.

a. Enhanced Thrift is a benefit offered to new and existing employees who are not covered by a defined benefit plan. Aside from offering a partial match of an employee's contributions, the Companies makes a "core contribution" to the

employee's thrift plan, irrespective of the employee's individual contribution.

b. As detailed in the response to Question 3, National Grid USA Service Company and NG Engineering Services, LLC, are distinct legal entities for employment purposes, and while generally used collectively in Company documentation, they have separate labor allocation and capitalization rates.

c. The percentage rate of the core contribution is determined by an employee's age and years of service. This contribution rate is floored at 4% and peaks at 8%. As such, given that the employees replacing the previously-pensioned employees are new, with unknown ages, the Company took a conservative approach and used a 4% core contribution rate.

d. The Companies does not track the backfilling on a position-by-position basis of employees who leave National Grid.

KEDNY KEDLI Case No. 23-G-0225/0226 Data Requests

Request for Information

FROM: Anthony DiGiacomo

TO: National Grid

SUBJECT: Exhibit RRP-11, Workpapers to RRP-6

Request:

In all interrogatories, all requests for workpapers or supporting calculations shall be construed as requesting any Word, Excel or other computer spreadsheet models in original electronic format with all formulae intact and unlocked.

The following questions pertain to KEDNY.

1. Regarding Exhibit__RRP-11, Workpapers to RRP-6, Workpaper 1, provide the supporting documentation behind the following:

    a. Gross Additions from 2006 to 2022.

    b. Gross Dispositions from 2006 to 2022.

2. Regarding Exhibit__RRP-11, Workpapers to RRP-6, Workpaper 2, provide the supporting documentation behind the following:

    a. 2017 Gross Balance in the amount of $6,577,057.

    b. 2021 Gross Balance in the amount of ($1,692,106).

3. Regarding Exhibit__RRP-11, Workpapers to RRP-6, Workpaper 2, provide the rationale behind the 7-year amortization period of the 2021 Gross Balance.

4. Regarding Exhibit__RRP-11, Workpapers to RRP-6, Workpaper 3, provide the supporting documentation behind the following:

    a. 2021 MTA State Gross - Temporary difference in the amount of ($2,556,192,476).

    b. 2021 NYS Rate Change - Temporary differences in the amount of ($3,326,636).

    c. 2021 NYS Rate Change - Temporary differences adjustments in the amount of ($333,253,655).

i. Each adjustment should be listed separately and include a rationale behind the adjustment made.

5. Regarding Exhibit__RRP-11, Workpapers to RRP-6, Workpaper 4, provide the supporting documentation behind the following:

   a. Total Protected Plant in the amount of $235,239,326.

   b. Net Operating Loss in the amount of ($58,917,227).

6. Regarding Exhibit__RRP-11, Workpapers to RRP-6, Workpaper 4, provide the calculation behind the Protected Plant amounts from FY2019 through FY2028.

7. Regarding Exhibit__RRP-11, Workpapers to RRP-6, Workpaper 4b, provide the supporting documentation behind all highlighted cells in the attached Excel file titled "2023 NG Downstate - AJD-15 - DPS-424 - Attachment 1."

Response:

1. Please see Attachment 1 – AFUDC Equity within the PowerTax reports from 2010-2022 with AFUDC equity additions and disposals amounts. Each year's PowerTax report shows the current year additions, dispositions and transfers, and the accumulated balance at the beginning and end of the year. The PowerTax reports from 2006-2009 are not readily available. Therefore, please see the table at the top left corner of the page 1, showing the reconciliation of the beginning balance in 2010 PowerTax report to the sum of the gross balances from 2006-2009 as reported in Exhibit__RRP-11, Workpapers to RRP-6, Workpaper 1.

2. Please see Attachment 2 - NYS & MTA Tax Rate Change 2016 for the supporting documentation. "State Rate Change" tab shows the state rate change that was included and approved in the previous rate case - Case 19-G-0309. RRP-11, Workpapers to RRP-6, Workpaper 1 and "Exhibit – A" tab are the support for the balances.

3. As described in the testimony of the Revenue Requirements Panel, in 2014, New York State enacted a law reducing the state income tax rate from 7.1 to 6.5 percent, which was effective for the Company in April 2016. As approved in the previous rate case (Case 19-G-0309), the deferred tax impact of this change is being amortized in rates over ten years. Therefore, the Company adjusted the annual amortization to return the remainder of the trued-up excess state deferred income tax over the remainder of the ten-year amortization period.

4. Please see Attachment 3 - NYS & MTA Tax Rate Change 2021 for the supporting documentation. Please note the NYS & MTA Tax Rate Change 2021 amortization will be removed in the Corrections and Updates because the temporary increase in state tax rate from 6.5% to 7.25% was extended to FY27 in the recently adopted NYS budget legislation.

   a. 2021 MTA State Gross – Temporary differences in the amount of ($2,556,192,476) are supported in "2021 MTA State Gross" tab. This tab shows the sum of the accumulated temporary difference balances up to fiscal year 2022

that will be deferred. The MTA surcharge rate changed from 29.4% to 30%. Therefore, the rate change is calculated on the accumulated gross temporary difference.

b. 2021 NYS Rate Change – Temporary differences in the amount of ($3,326,838) and ($333,253,655) are supported in "2021 NYS State Rate Change" tab. This tab shows the sum of the accumulated temporary differences for the fiscal year 2022 that will be deferred. The currently enacted state tax rate is 7.25%, however when the temporary state tax rate increase expires beginning with FY 2028, the temporary differences will reverse at the historic state tax rate of 6.5%.

5. The supporting documentation for the total protected plant in the amount of $235,239,326 and net operating loss in the amount of ($58,917,227) were provided and approved in the previous rate case - Case 19-G-0309. Please see Attachment 4 – Protected Plant Amortization and Attachment 5 – Excess ADIT for supporting documentation.

   a. Please see Attachment 4 – Protected Plant Amortization, Protected Rec Tab for 2018 protected plant balance per PowerTax Report for FY18 of $235,239,326.

   b. Please see Attachment 5 – Excess ADIT, Rate Change Detail to Data Tab, Cell H305 for the supporting documentation of Net Operating Loss in the amount of ($58,917,227).

6. Please see Attachment 4 – Protected Plant Amortization for the supporting documentation. The protected plant excess ADIT amortization amounts are presented on the PowerTax report for each year.

7. The supporting documentation for the Service Company excess ADIT allocated to KEDNY was provided in Case 19-G-0309. Please see Attachment 6 – Excess ADIT Serv for the supporting documentation.

KEDNY KEDLI Case 23-G-0225/0226 Data Requests

Request for Information

FROM: Anthony DiGiacomo

TO: National Grid

SUBJECT: Net Operating Loss

Request:

In all interrogatories, all requests for workpapers or supporting calculations shall be construed as requesting any Word, Excel or other computer spreadsheet models in original electronic format with all formulae intact and unlocked.

For both KEDNY & KEDLI, in reference to p. 116 of the Revenue Requirements Panel's testimony, the Companies state "[r]ate base Accumulated Deferred Income Taxes (ADIT) includes an asset for Net Operating Loss (NOL) because the Company is estimated to be in a loss position. The Company included an estimate of the generation of NOL carryforwards as an increase to rate base in each Rate Year and Data Years."

1. Explain what an NOL represents, how it is generated, and the supporting accounting transactions.

2. Explain whether each Company generates the NOL, or if the NOL is generated on a consolidated basis.

3. Explain how each Company's customers get the benefit of the NOL.

4. Identify the amount of ADIT associated with the NOL for Rate Year and subsequent Data Years.

5. Explain why the NOL creates accumulated deferred tax asset, increasing rate base.

6. Explain why the Company's customers are responsible for paying the deferred taxes associated with the NOL.

7. Explain how normalization of the NOL deferred tax asset impacts the income statement, and current income tax expense.

Response:

1. A Net Operating Loss (NOL), in a given period, represents an amount by which tax deductions reduce an entity's taxable income below zero. The NOL is generated when an entity's tax-deductible expenses exceed its taxable income in a given period. The amount of NOL generated in one period can be carried forward to reduce future taxable income and taxes payable. Therefore, the amount of NOL carryforward multiplied by the enacted tax rate results in a deferred tax asset. The most significant tax-deductible expenses giving rise to the NOL include: accelerated Modified Accelerated Cost Recovery System (MACRS) tax depreciation and repairs deductions.

2. The generation of NOL occurs on a standalone company basis driven by each company's taxable income and tax-deductible expenses.

3. The Companies' customers benefit from the tax-deductible expenses, such as the accelerated MACRS tax depreciation and repairs deductions, that reduce the Companies' taxable income and taxes payable. The mechanism by which customers benefit from the tax-deductible expenses is the inclusion of the deferred tax liability associated with these tax deductions as an offset to rate base. However, the tax-deductible expenses that exceed each Company's taxable income and give rise to the NOL cannot reduce taxes payable below zero. Therefore, the portion of the deferred tax liability associated with the tax-deductible expenses that could not reduce taxes payable below zero (*i.e.*, the portion of the tax-deductible expenses that do not provide a cash tax benefit) should not be included as an offset to rate base. The measure by which deferred tax liability that offsets the rate base needs to be reduced is the deferred tax asset on NOL. The deferred tax asset on NOL represents the currently ***unrealized*** portion of the tax benefit resulting from tax-deductible expenses. The inclusion of the deferred tax asset on NOL in rate base properly limits customers' benefit from the deferred tax liability on the tax-deductible expenses to that portion of the tax benefit that has been ***realized***.

4. In the original rate filing, the Companies generated/(utilized) NOL with the following impact within ADIT:

KEDNY	Test year	Link Period	RY 1	RY 2	RY 3	RY 4
ADFIT - NOL Generation (Utilization)		17,315,433	84,091,121	48,558,574	2,593,937	(14,906,757)
ADSIT - NOL Generation (Utilization)	17,755,875	9,459,856	30,374,912	18,962,768	4,303,482	(1,351,022)
Total ADIT - NOL Generation (Utilization)	17,755,875	26,775,289	114,466,032	67,521,342	6,897,419	(16,257,779)
KEDLI	**Test year**	**Link Period**	**RY 1**	**RY 2**	**RY 3**	**RY 4**
ADFIT - NOL Generation (Utilization)		9,992,752	32,273,860	13,031,203	16,063,005	(19,275,427)
ADSIT - NOL Generation (Utilization)	5,166,704	7,541,633	12,790,012	5,778,302	6,686,549	(4,556,976)
Total ADIT - NOL Generation (Utilization)	5,166,704	17,534,385	45,063,872	18,809,505	22,749,554	(23,832,403)

Subsequent to the original submission, a number of changes were made to the ADIT calculation that resulted in the Companies no longer generating federal or state NOL. The primary driver of the change in taxable income position from a net operating loss to taxable income is a decrease in the estimate of the repairs deduction percentage from 56.49% to 29.11% for KEDNY and 57.08% to 29.41% for KEDLI. This update, which

will be reflected in the Companies' Corrections and Updates, was made as a result of the implementation of the Revenue Procedure 2023-15 issued by the IRS on April 14, 2023, which provided new guidance for determining the repairs deduction for natural gas transmission and distribution property. Additionally, the taxable income calculation in the original filing did not include the impact of the *base revenue increase required* shown in Summary-Rev Rqmt Exh for each rate year. Together the reduction in the repairs deduction and the increased income from the base revenue requirement result in the Companies no longer generating federal or state NOL. The table below shows the updated impact of NOL within ADIT.

KEDNY	Test year	Link Period	RY 1	RY 2	RY 3	RY 4
ADFIT - NOL Generation (Utilization)		0	0	0	0	0
ADSIT - NOL Generation (Utilization)	17,755,875	(3,599,807)	(11,897,257)	(2,258,811)	0	0
Total ADIT - NOL Generation (Utilization)	17,755,875	(3,599,807)	(11,897,257)	(2,258,811)	0	0
KEDLI	**Test year**	**Link Period**	**RY 1**	**RY 2**	**RY 3**	**RY 4**
ADFIT - NOL Generation (Utilization)		0	0	0	0	0
ADSIT - NOL Generation (Utilization)	5,166,704	(774,778)	(4,391,926)	0	0	0
Total ADIT - NOL Generation (Utilization)	5,166,704	(774,778)	(4,391,926)	0	0	0

5. As discussed in the response to question 1 above, the NOL is generated when an entity's tax-deductible expenses exceed its taxable income in a given period. The amount of NOL generated in one period can be carried forward to reduce future taxable income and taxes payable. Therefore, the amount of NOL carryforward multiplied by the enacted tax rate results in a deferred tax asset. The most significant tax-deductible expenses giving rise to the NOL include accelerated MACRS tax depreciation and repairs deductions. Because the deferred tax liability associated with the accelerated tax deductions is included in rate base, the deferred tax asset associated with the resulting NOL similarly needs to be included in rate base. Please refer to Attachment 1, Treasury Regulation 1.167(l)-1(h)(1)(iii), which makes it a normalization violation to exclude the deferred tax asset associated with the NOL that resulted from the tax depreciation deductions from rate base.

6. As discussed in responses to questions 3 and 5 above, customers benefit from the inclusion of the deferred tax liability associated with the accelerated tax depreciation and repairs deductions in rate base. However, such benefit should be limited to that portion of the accelerated tax depreciation and repairs deductions that reduces taxes payable. In the case when the accelerated tax depreciation and repairs deductions give rise to the NOL, a portion of the tax benefit associated with the deductions that gave rise to the NOL is not realized by the Company. Therefore, the deferred tax asset on NOL, which corresponds to the unrealized portion of the tax benefit associated with the tax depreciation and repairs deductions, serves as a limit on the amount of deferred tax liability included in rate base. Excluding deferred tax asset on NOL from rate base would give customers a tax benefit, which has not been realized by the Company, leading to a potential normalization violation as discussed in response to question 5.

7. As illustrated in Attachment 2, when tax-deductible expenses exceed taxable income, the Companies' current tax expense and taxes payable are reduced below zero. This tax

benefit, however, can only be realized by the Companies as a reduction in future taxable income rather than as a current tax refund claim from a taxing authority. Therefore, the Companies are required to establish an NOL carryforward and account for it as a reduction to ***current*** tax benefit (reducing current tax benefit to zero) and increase in a ***deferred*** tax benefit (deferred tax asset for NOL). The accounting for NOL has no impact on the total tax expense on the income statement, nor the total tax expense recovered from the customers as part of the "cost of service."

Treasury Regulation § 1.167(l)-1 Limitations On Reasonable Allowance In Case Of Property Of Certain Public Utilities.

1.167(l)-1(h)
Normalization Method Of Accounting--

1.167(l)-1(h)(1)
In General.

1.167(l)-1(h)(1)(i)
— Under section **167(l)**, a taxpayer uses a normalization method of regulated accounting with respect to public utility property

1.167(l)-1(h)(1)(i)(a)
— If the same method of depreciation (whether or not a subsection (l) method) is used to compute both its tax expense and its depreciation expense for purposes of establishing cost of service for ratemaking purposes and for reflecting operating results in its regulated books of account, and

1.167(l)-1(h)(1)(i)(b)
— If to compute its allowance for depreciation under section **167** it uses a method of depreciation other than the method it used for purposes described in (a) of this subdivision, the taxpayer makes adjustments consistent with subparagraph (2) of this paragraph to a reserve to reflect the total amount of the deferral of Federal income tax liability resulting from the use with respect to all of its public utility property of such different methods of depreciation.

1.167(l)-1(h)(1)(ii)
— In the case of a taxpayer described in section **167(l)** (1) (B) or (2) (C), the reference in subdivision (i) of this subparagraph shall be a reference only to such taxpayer's "qualified public utility property". See § 1.167(l)-2(b) for definition of "qualified public utility property".

1.167(l)-1(h)(1)(iii)
— Except as provided in this subparagraph, the amount of Federal income tax liability deferred as a result of the use of different method of depreciation under subdivision (i) of this subparagraph is the excess (computed without regard to credits) of the amount the tax liability would have been had a subsection (l) method been used over the amount of the actual tax liability. Such amount shall be taken into account for the taxable year in which such different methods of depreciation are used. If, however, in respect of any taxable year the use of a method of depreciation other than a subsection (l) method for purposes of determining the taxpayer's reasonable allowance under section **167(a)** results in a net operating loss carryover (as determined under section 172) to a year succeeding such taxable year which would not have arisen (or an increase in such carryover which would not have arisen) had the taxpayer determined his reasonable allowance under section **167(a)** using a subsection (l) method, then the amount and time of the deferral of tax liability shall be taken into account in such appropriate time and manner as is satisfactory to the district director.

KEDNY KEDLI Case 23-G-0225/G-0226 Data Requests

Request for Information

FROM: Anthony DiGiacomo

TO: National Grid

SUBJECT: Exhibit RRP-11, Workpapers to RRP-6

Request:

In all interrogatories, all requests for workpapers or supporting calculations shall be construed as requesting any Word, Excel or other computer spreadsheet models in original electronic format with all formulae intact and unlocked.

The following questions pertain to KEDLI.

1. Regarding Exhibit__RRP-11, Workpapers to RRP-6, Workpaper 1, provide the supporting documentation behind the following:

   a. Gross Additions from 2006 to 2022.

   b. Gross Dispositions from 2006 to 2022.

2. Regarding Exhibit__RRP-11, Workpapers to RRP-6, Workpaper 2, provide the supporting documentation behind the following:

   a. 2017 Gross Balance in the amount of $5,800,683.

   b. 2021 Gross Balance in the amount of ($1,136,677).

3. Regarding Exhibit__RRP-11, Workpapers to RRP-6, Workpaper 2, provide the rationale behind the 7-year amortization period of the 2021 Gross Balance.

4. Regarding Exhibit__RRP-11, Workpapers to RRP-6, Workpaper 3, provide the supporting documentation behind the following:

   a. 2021 MTA State Gross - Temporary difference in the amount of ($1,591,880,793).

b. 2021 NYS Rate Change - Temporary differences in the amount of ($165,875,797).

c. 2021 NYS Rate Change - Temporary differences adjustments in the amount of ($128,113,053).

d. Each adjustment should be listed separately and include a rationale behind the adjustment made.

5. Regarding Exhibit__RRP-11, Workpapers to RRP-6, Workpaper 4, provide the supporting documentation behind the following:

a. Total Protected Plant in the amount of $234,882,226.

b. Net Operating Loss in the amount of ($32,351,561).

6. Regarding Exhibit__RRP-11, Workpapers to RRP-6, Workpaper 4, provide the calculation behind the Protected Plant amounts from FY2019 through FY2028.

7. Regarding Exhibit__RRP-11, Workpapers to RRP-6, Workpaper 4b, provide the supporting documentation behind all highlighted cells in the attached excel file titled "2023 NG Downstate - AJD - 17 - DPS - 426 - Attachment 1."

Response:

1. Please see Attachment 1 – AFUDC Equity within the PowerTax reports from 2010-2022 with AFUDC equity additions and disposals amounts. Each year's PowerTax report shows the current year additions, dispositions and transfers, and the accumulated balance at the beginning and end of the year. The PowerTax reports from 2006-2009 are not readily available. Therefore, please see the table at the top left corner of the page 1, showing the reconciliation of the beginning balance in 2010 PowerTax report to the sum of the gross balances from 2006-2009 as reported in Exhibit__RRP-11, Workpapers to RRP-6, Workpaper 1.

2. Please see Attachment 2 - NYS & MTA Tax Rate Change 2016 for the supporting documentation. "State Rate Change" tab shows the state rate change that was included and approved in the previous rate case – Case 19-G-0310, RRP-11, Workpapers to RRP-6, Workpaper 1 and "Exhibit – A" tab are the support for the balances

3. As discussed in the testimony of the Revenue Requirements Panel, in 2014, New York State enacted a law reducing the state income tax rate from 7.1 to 6.5 percent, which was effective for the Company in April 2016. As approved in the previous rate case (Case 19-G-0310), the deferred tax impact of this change is being amortized in rates over ten years. Therefore, the Company adjusted the annual amortization to return the remainder of the trued-up excess state deferred income tax over the remainder of the ten-year amortization period.

4. Please see Attachment 3 - NYS & MTA Tax Rate Change 2021 for the supporting documentation. Please note the NYS & MTA Tax Rate Change 2021 amortization will be removed in the Corrections and Updates because the temporary increase in state tax rate from 6.5% to 7.25% was extended to FY27 in the recently adopted NYS budget legislation.

   a. 2021 MTA State Gross – Temporary differences in the amount of ($1,591,880,793) is supported in "2021 MTA State Gross" tab. This tab shows the sum of the accumulated temporary difference balances up to fiscal year 2022 that will be deferred. The MTA surcharge rate changed from 29.4% to 30%. Therefore, the rate change is calculated on the accumulated gross temporary difference.

   b. 2021 NYS Rate Change – Temporary differences in the amount of ($165,875,797) and ($128,113,053) are supported in "2021 NYS State Rate Change" tab. This tab shows the sum of the accumulated temporary differences for the fiscal year 2022 that will be deferred. The currently enacted state tax rate is 7.25%, however when the temporary state tax rate increase expires beginning with FY 2028, the temporary differences will reverse at the historic state tax rate of 6.5%.

5. The supporting documentation for the total protected plant in the amount of $234,882,226 and net operating loss in the amount of ($32,351,561) were provided and approved in the previous rate case – Case 19-G-0310. Please see Attachment 4 – Protected Plant Amortization and Attachment 5 – Excess ADIT for supporting documentation.

6. a. Please see Attachment 4 – Protected Plant Amortization, Protected Rec Tab for 2018 protected plant balance per PowerTax Report for FY18 of $234,882,226.

   b. Please see Attachment 5 – Excess ADIT, Rate Change Detail to Data Tab, Cell H305 for the supporting documentation of Net Operating Loss in the amount of ($32,351,561).

7. Please see Attachment 4 – Protected Plant Amortization for the supporting documentation. The protected plant excess ADIT amortization amounts are presented on the PowerTax report for each year.

8. The supporting documentation for the Service Company excess ADIT allocated to KEDLI was provided in the previous rate case (Case 19-G-0310). Please see Attachment 6 – Excess ADIT Serv for the supporting documentation.

KEDNY KEDLI Case 23-G-0225/0226 Data Requests

Request for Information

FROM: Andrew Saavedra

TO: National Grid

SUBJECT: Customer Service Panel

Request:

The Customer Service Panel Testimony, at 30, states that the addition of three Consumer Advocates by KEDNY would enable outreach to an additional 7,200 to 9,000 households and support approximately 108 community outreach events in KEDNY's service territory; while the addition of two full-time Consumer Advocates in KEDLI's service territory would enable outreach and assistance to an additional 4,800 to 6,000 households and support approximately 72 community outreach events annually.

1. What percentage of each proposed full-time equivalent ("FTE") Consumer Advocate position is anticipated to be dedicated to outreach to households?

2. Exhibit ___(CP-1), Schedule 3 at 3 includes a table forecasting one FTE with total annual labor and overhead costs of about $120,000 - $125,000 each for KEDNY and KEDLI for the Consumer Advocate program. However, the Companies state that 5 full-time advocates are proposed to be hired. Please clarify the proposed costs per FTE and the proposed total costs for KEDNY and KEDLI.

Response:

1. The Company anticipates that each proposed FTE will dedicate 50 percent of their time to outreach to households and 50 percent to community outreach and educational events.

2. The Company is proposing to add five full-time Consumer Advocates (three FTEs at KEDNY and 2 FTEs at KEDLI) as discussed in the Customer Service Panel’s testimony. The Company discovered that it inadvertently did not include the costs of two FTEs at KEDNY and 1 FTE at KEDLI. The Company will reflect these costs and update the table in Exhibit___(CP-1), Schedule 3 as well as Exhibit___(RRP-3), Schedule 41 in Corrections and Updates.

The proposed cost per FTE as stated is $120,000 - $125,000, bringing the total annual cost for KEDNY (3 FTEs) to $360,000 - $375,000 and the total annual cost for KEDLI (2 FTEs) to $240,000 - $250,000.
