I. Introduction

Q. Please introduce the members of the Revenue Requirements Panel.

A. The Panel consists of James M. Molloy, David B. Doxsee, and Stephanie A. Briggs.

Q. Is this the same Panel that previously submitted direct and supplemental direct testimony on behalf of KEDNY in this proceeding?

A. Yes. The terms defined in the Panel's direct and supplemental direct testimony have the same meanings here.

Q. What is the purpose of the Panel's corrections and updates testimony?

A. The Panel's testimony explains and supports certain corrections and updates to KEDNY's April 30, 2019 base rate filing ("April 30 filing") in this proceeding.

Q. Does the corrections and updates testimony also address the June 11, 2019 supplemental filing?

A. No. The supplemental filing was made to illustrate the potential impacts to the April 30 filing if KEDNY is unable to obtain incremental natural gas supplies from the NESE project. At this time, the Company remains optimistic that the NESE project will be approved. Therefore, all corrections

and/or updates pertain to the revenue requirement set forth in the April 30 filing. The Company will continue to update the parties on the status of the NESE project and implications, if any, to this rate filing.

Q. Does the Panel sponsor any exhibits?

A. Yes. The Panel sponsors the following exhibits, all of which were prepared by or under the supervision and direction of one or more members of the Panel and which, in all cases, refer to KEDNY:

Exhibit __ (RRP-1CU)	Statement of Operating Income
Exhibit __ (RRP-3CU)	O&M Expenses by Expense Type
Exhibit __ (RRP-4CU)	Depreciation Expense
Exhibit __ (RRP-5CU)	Taxes Other than Income Taxes
Exhibit __ (RRP-6CU)	Federal and State Income Taxes
Exhibit __ (RRP-7CU)	Rate Base
Exhibit __ (RRP-8CU)	Inflation Factors
Exhibit __ (RRP-9CU)	Deferral Exhibits
Exhibit __ (RRP-11CU)	Workpaper Data Supporting Certain Exhibits
Appendix B (CU)	Current and Proposed Revenue Adjustments and Incentives

Q. Please explain how the corrections and updates are organized.

A. The exhibits submitted in this filing show corrections and/or updates and indicate the change from the original filing. The exhibits are labeled with "CU" after the original label. For example, Exhibit __ (RRP-1) in the April 30 filing is the Statement of Operating Income. The exhibit showing the corrections and/or updates to the Statement of Operating Income is labeled Exhibit ___ (RRP-1CU). The first page of each exhibit provides a summary of all adjustments made and reflected in that exhibit. This summary, or lead page, is identified as "Corrections and Updates" under each exhibit number. The revised schedules and pages supporting each exhibit correspond to the schedules and pages originally filed. The Company has only included exhibits, summaries, schedules, and pages where corrections and/or updates were made.

The information requests referenced in the Panel's testimony are included in the workpapers in Exhibit ___ (RRP-11CU) and correspond to the specific exhibits and schedules where the corrections and/or updates were made. For example, if a correction and/or update is shown in Exhibit ___ (RRP-3CU), Schedule 2 based on a response to an information request, that information request is included in the workpapers supporting Exhibit ___ (RRP-3CU),

Schedule 2. Where the attachments to information requests are voluminous, the Company included only the written response and relevant attachments.

Q. What impact do the corrections and updates have on KEDNY's revenue requirement in this proceeding?

A. The April 30 filing reflected a Rate Year revenue requirement that was $236.8 million greater than revenue at present rates. The corrections and updates decrease the Company's revenue requirement for the Rate Year by $41.1 million, to $195.6 million, as shown in Exhibit ___ (RRP-1CU), Page 2, and the table below.

Rate Year	April 30th Filing	Corrections & Updates	Increase/ (Decrease)
KEDNY	$237m	$196m	($41m)

Q. What are the primary drivers of the decrease to the revenue requirement in the Rate Year?

A. The primary drivers of the decrease to the revenue requirement in the Rate Year are (i) an update to the Company's revenue forecast that increased gas sales revenues, (ii) updates and corrections that decreased KEDNY's capital forecast and (iii) corrections that collectively reduced the Company's O&M expense.

II. Operating Income by Component

Q. Please describe Exhibit ___ (RRP-1CU).

A. Exhibit ___ (RRP-1CU) summarizes the impact of all corrections and/or updates presented in this filing to the Company's operating income. This exhibit consists of lead Corrections and Updates pages and a Summary with three pages showing the calculation of the Company's operating income for the Rate Year. The exhibit also contains a presentation change from the original filing to remove the federal tax reform surcredit. The Panel used the updated revenue forecast presented in Exhibit ___ (RDP-2CU) in developing the revenue requirements.

III. Operation and Maintenance ("O&M") Expenses

Q. Please explain Exhibit ___ (RRP-3CU).

A. Exhibit ___ (RRP-3CU) provides the corrections and/or updates to KEDNY's O&M expenses for the Rate Year and Data Years. The exhibit consists of a lead Corrections and Updates page, a Summary showing total departmental O&M expenses in the Historic Test Year, Rate Year, and Data Years, and 40 schedules. The schedules are numbered to correspond to the schedules submitted in the Company's April 30 filing. For example, in the April 30 filing, Exhibit ___ (RRP-3), Schedule 4, showed the costs associated with

employee expenses. The corrections and/or updates to employee expenses are reflected in Exhibit ___ (RRP-3CU), Schedule 4.

Q. Please explain the expense specific schedules in Exhibit ___ (RRP-3CU).

A. The expense specific schedules that reflect corrections and/or updates to the April 30, 2019 filing are discussed below. To the extent the updated inflation projection is the only reason for a change in a schedule, the revised schedule is not separately discussed, but is included in the revised schedules in this filing. A list of expense specific schedules that are affected only by inflation is provided following the Panel's testimony.

Schedule 1 – Consultant Expense

Schedule 1 reflects two adjustments to consultant expense. The first adjustment was made in accordance with the Company's response to Information Request No. DPS-379 to reflect the amortization of KEDNY's allocable share of the contract costs related to the management and operations audit in Case 18-M-0195. The second adjustment reflects the effects of the updated inflation factor to consultant expense.

Schedule 2 – Contractor Expense

Schedule 2 reflects eight adjustments to contractor expense.

The first four adjustments were made for presentation purposes to reclassify paving expense from Schedule 2 to Schedule 40 (paving). The purpose of the change is to provide all paving-related costs in one schedule. There is no revenue requirement impact from the re-classifications, which are discussed in the Company's response to Information Request No. DPS-236 Supplemental.

The fifth adjustment was made to reclassify an accrual from contractors to other expense. In the April 30 filing, the Company made a normalization adjustment to contractor expense. However, the adjustment related to an accrual that was booked to other expense. This adjustment corrects the error by re-classifying the normalization to other expense.

The sixth adjustment pertains to a normalization adjustment to disconnect and reconnect expense that the Company inadvertently made to the Rate Year in the April 30 filing, that should have been made instead to the Historic Test Year. The correction moves the adjustment from the Rate Year to the Historic Test Year and includes the change in inflation.

The seventh adjustment was made to reflect the update to the Local Law 30 forecast and correct the normalization adjustment made to the Rate Year that should have been made instead to the Historic Test Year.

The eighth adjustment updates the inflation rate.

Schedule 4 – Employee Expenses

Schedule 4, Page 1 has been updated to correct a formula error. The correction does not impact the revenue requirement. The Schedule also contains an adjustment to update the inflation rate.

Schedule 7 – Other

Schedule 7 reflects four adjustments to other expense. The first adjustment corrects a formula error, as explained in the Company's response to Information Request No. DPS-515. The correction does not impact the revenue requirement. Similarly, the second adjustment, which moves an accrual reversal from contractor expense to other expense for presentation purposes, has no revenue requirement impact. The third adjustment was made in accordance with the Company's response to Information Request No. DPS-627 to remove an accrual from the Historic Test Year for the appreciate program. The fourth adjustment updates the inflation factor.

Schedule 9 – Service Company Rent Expense

Schedule 9 reflects eight adjustments to Service Company rent expense.

The first adjustment updates the Service Company asset recovery charge in accordance with the corrections and updates testimony of Company Witness Jonathan Cohen. The second adjustment was made to revise the allocation of the Gas Control Training Simulator Project to reflect the fact that this project benefits all National Grid gas companies and remove costs to maintain the existing Hicksville Office site in Data Years 2 and 3. These adjustments are discussed in more detail in the GIOP's corrections and updates testimony.

Adjustments three through eight relate to corrections and updates made by the IT Panel. Specifically, the third adjustment reflects the updated forecast for the CIS project; the fourth adjustment reflects revisions made to the mandated IT projects forecast; the fifth adjustment corrects an allocation error in Data Year 1; the sixth adjustment removes the costs associated with project INVP 5130 – CIAC Process Systems Enhancements; the seventh adjustment reflects the updated forecast for the SAP S/4 HANA project; and the eighth adjustment updates the in-service date for the IT/OT program, as discussed in the response to Information Request No. DPS-577.

The net effects of these adjustments are decreases of $1.450 million and $0.581 million in the Rate Year and Data Year 1, respectively, and increases of $0.252 million and $5.744 million in Data Years 2 and 3, respectively.

Schedule 11 and 16 – OPEB and Pension Expenses

Schedules 11 and 16 each reflect two adjustments to OPEB and pension expenses. The first adjustment updates the forecast expense amounts based on the recent actuarial forecast, resulting in decreases of $1.186 million and $0.728 million to OPEB and pension expenses, respectively, in the Rate Year. The second adjustment reflects a change in the labor capitalization rate from 50.35 percent to 49.92 percent due to a calculation error in the April 30 filing.

Schedules 12, 14, 17, and 18 – Fringe Benefits

Schedules 12, 14, 17, and 18 each reflect adjustments to correct the labor capitalization rate (as discussed above) and update the inflation factor.

Schedule 13 – Healthcare

Schedule 13 reflects four adjustments to healthcare expense. The first adjustment corrects the labor capitalization rate. The second adjustment was made to reflect KEDNY's allocated share of healthcare savings associated with the collective bargaining agreement between National Grid and the International Brotherhood of Electric Workers Local 1049 ("IBEW Local 1049"). Because certain IBEW Local 1049 employees are employed by the Service Company, KEDNY should receive a portion of the healthcare savings resulting from this agreement. The third adjustment reflects the change to

healthcare benefits contained in the recently negotiated collective bargaining agreement between National Grid and the Transport Workers Union of America, AFL-CIO, Local 101 ("TWU Local 101"), which is discussed in more detail in the corrections and updates testimony of Company Witness Maureen Heaphy. The fourth adjustment was made to update the inflation factor.

Schedules 23 (Labor Expense) and 28 (Productivity Adjustment)

Schedule 23 reflects three adjustments to labor expense. The first and second adjustments were made to reflect the base pay wage increase contained in the recently negotiated TWU Local 101 agreement, which is discussed by Ms. Heaphy and the Company's response to Information Request No. DPS-388. The third adjustment was made in accordance with the response to Information Request No. DPS-295 to correct the Historic Test Year adjustment made in the April 30 filing to originating company labor and variable pay associated with the capitalization policy change proposed by the GIOP.

Schedule 28 shows the flow through changes of the labor expense adjustments discussed above.

Schedule 24 – Transportation

Schedule 24 reflects three adjustments to transportation expense. The first adjustment updates motor fuel expense based on the prices from the New York Mercantile Exchange as of June 21, 2019. The second adjustment reduces Historic Test Year transportation costs in connection with the capitalization change proposed by the GIOP. This adjustment was made in accordance with the Company's response to Information Request No. DPS-323. The third adjustment reflects the effects of the updated inflation factor.

Schedules 25 (Energy Efficiency Program) and 31 (Uncollectible Expense)

Schedules 25 and 31 show the flow through effects of the updated revenue forecast, which is supported by the Rate Design Panel.

Schedule 27 – Other Initiatives

Schedule 27 reflects 12 adjustments to other initiatives expense.

The first adjustment pertains to labor overhead rates. The adjustment was made to re-calculate the labor overhead rate using Rate Year, instead of Historic Tear Year, labor and benefits, as discussed in the response to Information Request No. DPS-392. The adjustment also updates labor

overhead rates for changes in benefits and corrects a formula error contained in Data Year 2.

The second adjustment was made to correct certain FTE position titles that were inadvertently mis-stated in the April 30 filing. The corrections are shown in Exhibit ___ (RRP-11CU), Workpapers to Exhibit ___ (RRP-3CU), Schedule 27, Workpaper 2.

The third adjustment updates the non-labor forecast for the I&R Distribution Station Overpressure Protection and Control Line Survey and GPS Mapping Programs, and includes Rate Year non-labor costs for the Enhanced Inactive Accounts Program. These program updates are discussed in the corrections and updates testimony of the Gas Safety Panel.

The fourth adjustment was made to reflect the updated forecast of costs for the Inside Service Inspections Program, as discussed by the Gas Safety Panel.

The fifth adjustment was made to reflect the costs to implement Staff's operator qualification best practices, as discussed in the corrections and updates testimony of the GIOP.

The sixth adjustment updates the forecast of FTEs needed for the Enhanced Inactive Accounts Program, as discussed by the Gas Safety Panel.

The seventh adjustment corrects the FTE count for the Green Gas Tariff offering by adding two FTEs in the Rate Year that were inadvertently omitted in the April 30 filing. This adjustment is discussed in the corrections and updates testimony of the Future of Heat Panel.

The eighth adjustment updates hire dates for certain incremental FTEs to correct dates that were mis-stated in the April 30 filing and to reflect a better hiring schedule. This adjustment is also discussed by the GIOP and the response to Information Request No. DPS-374. The adjustment is presented on Exhibit__(RRP-11CU), Workpapers to Exhibit__(RRP-3CU), Schedule 27, Workpaper 2.

The ninth adjustment corrects a double-count of an adjustment that reduced disconnect and reconnect expense related to capital associated with KEDNY's HDPE Service Replacements Program. The adjustment is also described by the GIOP and in the response to Information Request Nos. DPS-499 and DPS-500.

The tenth adjustment updates the labor inflation rate on union FTEs for the new collective bargaining agreement with TWU Local 101, as discussed by Company Witness Maureen P. Heaphy.

The eleventh adjustment updates the O&M forecast for various IT projects as discussed in the corrections and updates testimony of the IT Panel.

The twelfth adjustment updates the general inflation rate.

The net results of these adjustments are decreases in the Rate Year and Data Year 1 by $1.529 million and $1.412 million, respectively, followed by an increase of $9.596 million in Data Year 2, and then a decrease of $0.885 million in Data Year 3.

Schedule 34 – Savings

Schedule 34 reflects an adjustment to update the Company's forecast of Accelerate Program savings in accordance with the response to Information Request No. DPS-396. The adjustment increases the total Rate Year Accelerate Program savings amount from $30.959 million to $31.499 million, or more than $125 million over the term of the proposed rate plan (not

including savings from the one percent productivity adjustment that the Company also imputed in the revenue requirement).

Schedule 40 – Paving

Schedule 40 reflects six adjustments to paving expense. As discussed above, the first four adjustments were made for presentation purposes to reclassify paving expense from Schedule 2 (contractor expense) to Schedule 40 and have no revenue requirement impact. The fifth adjustment was made to correct a formula error in Data Year 3. The sixth adjustment reflects the updated inflation factor.

IV. Depreciation Expense

Q. Please describe Exhibit ___ (RRP-4CU).

A. Exhibit ___ (RRP-4CU) provides the corrections and/or updates to depreciation expense for the Rate Year and Data Years to reflect flow-through adjustments related to the plant changes discussed below. The exhibit consists of a lead Corrections and Updates page and a Summary page showing the updated forecast of gas depreciation expense for the Rate Year and Data Years.

V. Taxes Other Than Income Taxes

Q. Please describe Exhibit ___ (RRP-5CU).

A. Exhibit ___ (RRP-5CU) consists of a lead Corrections and Updates page, a Summary with three pages, and four schedules for the Rate Year and Data Years.

Q. Please describe the changes made to the real estate tax forecasts included in Exhibit ___ (RRP-5CU), Schedule 1.

A. The Company made four adjustments to the real estate tax forecasts. The first adjustment is a flow through adjustment of all plant changes based on the Company's updated net utility plant forecast discussed later in the testimony. The second adjustment revises the forecast to incorporate actual plant closings and retirements through March 2019. The third adjustment is to update the two-year growth rate to include the most recent fiscal year results, as discussed in the response to Information Request No. DPS-490. The fourth adjustment is to update the obsolescence rate for the 2019 award that the Company recently received from the Office of Real Property Services.

Q. Please describe the changes made to payroll taxes for the Rate Year and Data Years, as presented in Exhibit ___ (RRP-5CU), Schedule 2.

A. As described above, the Company made adjustments to Exhibit ___ (RRP-3CU), Schedules 23 and 28 in accordance with the response to Information Request Nos. DPS-388 and DPS-295. The changes made to Exhibit ___ (RRP-5CU), Schedule 2 are the effects of the same changes made to Schedules 23 and 28.

Q. Please describe the changes made to the other tax forecasts included in Exhibit ___ (RRP-5CU), Schedule 3.

A. The adjustment to other tax reflects the updated inflation factor.

Q. Please describe the changes made to the gross revenue tax forecasts included in Exhibit ___ (RRP-5CU), Schedule 4.

A. The Company reflected the flow through effect of the updated revenue forecast to the gross revenue tax forecasts in the Rate Year and Data Years.

VI. Federal and State Income Taxes

Q. Has the Company made any corrections or updates to federal and state income tax expense?

A. Yes, the Company made adjustments to reflect changes to the amortization of excess accumulated deferred income tax ("ADIT") and to reflect the flow through effect of changes in rate base on income tax expense, as shown in Exhibit ___ (RRP-6CU).

Q. Please describe the change to the amortization of excess ADIT.

A. The Company rolled forward the overall excess ADIT amount from December 2018 to March 2019 to match the plant roll forward balance and to reflect adjustments to income tax reserves that were due to the settlement of the August 24, 2007 to March 31, 2009 federal income tax audit. For the audit adjustments that were temporary, the current income tax was booked at 35 percent, the deferred tax was booked at 21 percent, and the difference increased or decreased the regulatory liability for excess ADIT. The amortization lives were applied to the adjusted numbers, resulting in changed total excess ADIT amortization amounts.

VII. Rate Base

Q. Please explain Exhibit ___ (RRP-7CU).

A. Exhibit ___ (RRP-7CU) provides the corrections and/or updates to the Company's rate base for the Rate Year and Data Years. The exhibit consists of a lead Corrections and Updates page, a Summary with four pages, and six schedules showing the adjustments to net utility plant (Schedule 1), regulatory assets and liabilities (Schedule 2), federal and state accumulated deferred income taxes (Schedule 3), working capital (Schedule 4), the lead lag study (Schedule 5), and City/State Construction Accounts Receivable (Schedule 7).

A. Forecast of Net Utility Plant In Service

Q. Please describe the changes made to the forecast of average net utility plant, as shown in Exhibit ___ (RRP-7CU), Schedule 1.

A. Schedule 1 reflects three adjustments. The first adjustment reflects updates to the Company's net utility plant forecast. The Company updated the forecast to use the actual March 31, 2019 construction work in progress, plant in service, depreciation reserve, and retirement work in progress beginning balances. The Company also updated the composite depreciation rates using depreciable plant balances as of March 2019.

The second adjustment updates the Company's capital forecast. The adjustment was made to update the capital and cost of removal forecasts for certain projects presented in Exhibit ___ (GIOP-1CU) for direct capital expenditures and Exhibit ___ (GIOP-7CU) for indirect capital expenditures. The corrections and update testimony of the GIOP discusses the specific adjustments in more detail.

The third adjustment updates the gas plant forecast to incorporate revised in-service dates for certain gas and facility projects, as discussed in the corrections and updates testimony of the GIOP.

B. <u>Deferred Taxes</u>

Q. Please describe the changes made to the deferred tax forecasts, as shown in Exhibit ___ (RRP-7CU), Schedule 3.

A. The Company made changes to rate base ADIT to (i) flow through the impact of the return of excess ADIT, (ii) add the impact of taking bonus depreciation on the fiscal year end March 31, 2019 federal income tax return, (iii) update ADIT balances from December 2018 to March 2019, and (iv) flow through the rate base ADIT impact of changes to book plant additions, cost of removal, and book depreciation.

Q. How does the change in excess ADIT amortization effect rate base?

A. As the Company returns excess ADIT, the excess ADIT regulatory liability that is included in rate base decreases and rate base is correspondingly increased. Rate base ADIT adjustments were made to reflect the updated amortization amounts that flow through cost of service. Also, the Company determined that in the April 30 filing, the rate base adjustment included the excess ADIT related to both National Grid USA Service Company and KEDNY. Accordingly, the Company updated the rate base formula to include only the amortization related to KEDNY.

Q. How did bonus depreciation change rate base ADIT?

A. After additional analysis and conversations with industry experts and other industry peers, the Company determined it would deduct additional bonus depreciation in accordance with the pre-tax reform regulations. Bonus depreciation will be 40 percent for those assets started before September 28, 2017 and placed in service between April 1, 2018 and December 31, 2018. Bonus depreciation of 30 percent will be taken on assets started before September 28, 2017 and placed in service between January 1 and March 31, 2019.

C. Working Capital

Q. Please describe the changes made to the Company's working capital costs.

A. Exhibit ___ (RRP-7CU), Schedule 4 reflects the flow through effects of changes to O&M expenses made in corrections and updates as compared to the April 2019 filing.

Schedule 5 reflects the flow through effects of changes in the Company's gas forecast commodity revenue. The Materials and Supplies and Pre-Payments on Exhibit ___ (RRP-7CU), Summary, were updated for the revised inflation factor.

Q. Please describe the update made to the adjustment associated with New York City's ("City") CSC accounts receivable balance in connection with the forecast changes in CSC construction activities, as shown in Exhibit ___ (RRP-7CU), Schedule 7.

A. Schedule 7 reflects two adjustments. The first adjustment reflects updates to the Company's CSC reimbursements forecast, which is presented in Exhibit ___ (GIOP-1CU) to the GIOP's corrections and updates testimony. As discussed in the response to Information Request No. DPS-352, question 1c, the Company received updated information from the City regarding its FY

2020 work plan. Based on this information, the Company updated the CSC reimbursable and non-reimbursable capital forecast, resulting in a decrease to the reimbursable portion of the forecast. This change requires a corresponding adjustment to the level of CSC reimbursements reflected in the adjustment to the City's CSC accounts receivable balance.

The second adjustment updates the billing lag assumption from 18 months to 21 months, as discussed in response to Information Request No. DPS-402, question 3. Based on recent payment history, along with the change in the Department of Environmental Protection audit process, which adds a new step to the reimbursement process, the Company believes increasing the billing lag assumption to 21 months is a reasonable and conservative estimate.

VIII. Regulatory Assets and Liabilities

Q. Please describe the corrections and updates shown in Schedule 2 of Exhibit ___ (RRP-7CU).

A. The Company made three adjustments to the forecast regulatory asset and liability balances at March 31, 2020.

The forecast Unamortized Debt Expense deferred balance was increased by approximately $6.085 million resulting from additional underwriter fees and

expenses associated with issuances of $550 million of 3.865 percent senior unsecured debt (due 2029) and $450 million of 4.487 percent senior unsecured debt (due 2049) in March 2019 that were identified and booked after the April 2019 filing.

Additionally, the forecast net Pension and OPEB deferred asset balance was reduced by approximately $1.3 million to reflect the changes resulting from the updated actuarial forecast (discussed above).

Lastly, the forecast net regulatory asset associated with the Capital Tracker deferral and its associated carrying charges was increased by approximately $3 million to reflect the impact of the change in the capital forecast (also discussed above).

Q. Do the changes in regulatory assets and liabilities have any impact on the revenue requirement?

A. Only the change to the Unamortized Debt Expense deferred balance has a revenue requirement impact because this deferred balance is included in rate base. The impact increases the revenue requirement by $0.519 million in the Rate Year. All other adjusted regulatory assets and liability balances are

excluded from rate base and therefore have no effect on the revenue requirement.

IX. Inflation Factors

Q. Please describe the update to the projected inflation factors used by the Company.

A. Based on more recent economic factors, the Company reduced its projected rate of inflation form 4.87 percent to 3.96 percent. As discussed above, a list of expense specific schedules in this corrections and updates filing that are affected only by inflation is provided following the Panel's testimony.

X. Proposed Treatment of Existing Regulatory Deferral Accounts and New Reconciliation Mechanisms

Q. Please describe the corrections and/or updates shown in Schedules 1, 3, and 4 of Exhibit ___ (RRP-9CU).

A. The Company updated several deferral thresholds to reflect the updated rate allowances based on the adjustments discussed throughout this testimony. These are shown in Exhibit ___ (RRP-9CU) Schedules 1, 3, and 4.

Q. Please describe the corrections and/or updates shown in Schedule 2 of Exhibit ___ (RRP-9CU).

A. The Company updated the CSC deferral to include the CSC capital forecast changes, which are presented in Exhibit ___ (GIOP-1CU) to the GIOP's corrections and updates testimony. This is shown in Exhibit ___ (RRP-9CU) Schedule 2.

Q. Please explain Appendix B (CU).

A. Appendix B (CU) is a corrected version of KEDNY's current and proposed revenue adjustments and incentives. The Company inadvertently included the version of Appendix B that was applicable to KEDLI in its April 30 filing. Appendix B (CU) is the version that pertains to KEDNY.

Q. Does this conclude the Panel's testimony?

A. Yes, it does.

Corrections and Updates

Statement of Operating Income, By Component, for the

Historic Test Year Ended December 31, 2018 and

Rate Year Ending March 31, 2021 Summary

Exhibit_____(RRP-8CU)

Table of Inflation Factors

The Brooklyn Union Gas Company d/b/a National Grid NY
CALCULATION OF INFLATION
OCCURRING BETWEEN THE TEST YEAR AND THE RATE YEARS

The value of the GDPIPD in the test year is equal to the average of the GDPIPD for the four quarters ended December 31, 2018:

Test Year GPDPIP = (109.348+110.172+110.669+111.134) / 4

= 110.33075

Forecasted values of the GDPIPD in years 2018 through 2025 are obtained from Blue Chip Economic Indicators:

	Year	GDPIPD	Annual Rate
Test Year Ending December 31, 2018	TY 2018	110.33075	
Rate Year Ending March 31, 2021	RY 2021	114.69654	3.96%
Rate Year Ending March 31, 2022	RY 2022	117.09707	2.09%
Rate Year Ending March 31, 2023	RY 2023	119.48281	2.04%
Rate Year Ending March 31, 2024	RY 2024	121.81007	1.95%

Inflation between the test year and the 2021 rate year is: 3.9570%

114.696540923116 / 110.33075 = 1.03957002851078

Actual and Forecasted quarterly values used in the above calculations:

Actual[1] Year	Quarter	GDPIPD	Annual Rate	Average Annual GDPIPD
2017	1	107.23300	2.08%	106.4460
2017	2	107.55300	1.72%	106.8998
2017	3	108.13400	1.91%	107.4058
2017	4	108.80700	1.97%	107.9318
2018	1	109.34800	1.97%	108.4605
2018	2	110.17200	2.44%	109.1153
2018	3	110.66900	2.34%	109.7490
2018	4	111.13400	2.14%	110.3308

1) Revenue requirement assumes capital expenditures are placed in-service in the month spent.
2) Depreciation is based on existing composite depreciation rate for mains and services based on 3/31/2019 plant balances.
3) Utilizes pre-tax WACC by fiscal year per.
4) The FY 2021 incremental/under spend will be rolled forward to the FY 2022, FY 2023 and FY 2024 deferral, calculating a return on the net plant investment and associated depreciation expense.
5) The FY 2022 incremental/under spend will be rolled forward to the FY 2023 and FY 2024 deferral, calculating a return on the net plant investment and associated depreciation expense.
6) The FY 2023 incremental/under spend will be rolled forward to the FY 2024 deferral, calculating a return on the net plant investment and associated depreciation expense.

Notes

* Pursuant to Sections § 19-143 and § 24-521 of the New York City administrative code, utility companies are required to bear the cost of supporting and/or protecting their structures under the direction of the Commissioner of Design and Construction of NYC so that the construction and/or repair work of the city will not be delayed. Companies that fail to comply will be subject to criminal and civil penalties as prescribed by Sections § 19-149, § 19-150 and § 19-151 of the Administrative Code.

* Source of CSC Support and Protect (S&P) expense: BI report 4001 using a variable based on unique accounting for S&P expense

* Rate Year and Data Year totals equal to HTY inflated with general inflation rates

General Inflation

HTY to RY 2021	3.9570%
DY 2022	2.0929%
DY 2023	2.0374%
	1.9478%

SCHEDULE 4

Variable Pay Deferral

The Brooklyn Union Gas Company d/b/a National Grid NY
Deferral of Variable Pay Expense
($000's)

		Rate Year Ending March 31, 2021	Data Year Ending March 31, 2022	Data Year Ending March 31, 2023	Data Year Ending March 31, 2024
1	Actual Expense	$ 9,400.0	$ 10,500.0	$ 9,800.0	$ 11,000.0
2	Rate Allowance	$ 9,628.6	$ 9,995.3	$ 10,323.2	$ 10,642.8
3	Amount Deferred to Customers	$ 228.6	$ -	$ 523.2	$ -

If the actual expense is greater than the rate allowance, there is no additional recovery from customers. This is a downward only reconciliation.

Line Notes

1 Input Actual costs - Under the Company's management variable pay program (Annual Performance Plan) the evaluation period is on a fiscal year basis ending March Variable pay expense is accrued monthly, with the final accrual in March reconciling the annual variable pay total to the expected pay out in June.
2 Forecasted Rate Year and Data Years Variable Pay Expense
3 Line 2 less Line 1 (if Line 2 is greater than Line 1)

Request for Information

FROM: DPS Staff, John Holst

TO: National Grid, Philip A. DeCicco

SUBJECT: Management and Operations Audits

Request:

Note: In all interrogatories, all requests for workpapers or supporting calculations shall be construed as requesting any Word, Excel or other computer spreadsheet models in original electronic format with all formulae intact and unlocked.

1. Provide the following information related to cost recovery for the conduct of management and operations audits:
    a. All costs reflected in the Company's historic test year to conduct management and operations audits; and
    b. All costs reflected in the Rate Year related to the management and operations audit pursuant to Case 18-M-0195.

2. Provide the following information related to recently completed management and operations audits identifying both the individual costs and savings for each recommendation, as well as the aggregated costs and savings for all recommendations:
    a. Identify all capital and/or O&M costs reflected in the Company's historic test year resulting from the implementation of any of the recommendations from Cases 13-M-0314, 13-M-0449, and 13-G-0009.
    b. Identify any savings reflected in the Company's historic test year resulting from the implementation of any of the recommendations from Cases 13-M-0314, 13-M-0449, and 13-G-0009.
    c. Identify all capital and O&M costs reflected in the Rate Year resulting from the implementation of any of the recommendations from Cases 13-M-0314, 13-M-0449, and Case 13-G-0009.
    d. Identify any savings reflected in the Rate Year resulting from the implementation of recommendations from Cases 13-M-0314, 13-M-0449 and 13-G-0009.
    e. Identify all anticipated costs and savings for the implementation of recommendations from Case 18-M-0195, if any.

Response:

1.

a. The Historic Test Year reflects costs of $0.071 million for KEDNY and $0.043 million for KEDLI related to the management and operations audit in Case 18-M-0195 ("Management Audit").

b. No adjustment was made to reflect Rate Year costs for the Management Audit. As such, the costs embedded in the Rate Year are equivalent to the Historic Test Year costs plus general inflation.

In preparing this response, the Company realized the above costs should be normalized and replaced with KEDNY and KEDLI's allocable share of the $1.988 million compensation limit set forth in the audit contract in the Management Audit. In corrections and updates, KEDNY and KEDLI will remove the amount included in the Historic Test Year and replace with the amortized portion of KEDNY and KEDLI's allocable share of the Management Audit contract costs.

2.

a-d. There are no costs or savings associated with implementation of recommendations in Case 13-G-0009 (Gas Management Audit), Case 13-M-0314 ("Data Audit"), or Case 13-M-0449 ("Staffing Audit") in the Historic Test Year or Rate Year, as the recommendations were implemented prior to the Historic Test Year and/or did not involve any incremental costs. Benefits were qualitative in nature with no savings identified in the Rate Year.

e. The Management Audit is ongoing with a final report scheduled for September 2019. As such, any potential costs or savings are unknown at the moment.

Name of Respondent: Philip DeCicco

Date of Reply: June 13, 2019

Due Date: June 11, 2019 NG Request No. NG-375

KEYSPAN GAS EAST CORPORATION d/b/a NATIONAL GRID
THE BROOKLYN UNION GAS COMPANY d/b/a NATIONAL GRID NY
Case Nos. 19-G-0309 & 19-G-0310
Gas Utilities Rates

Request for Information

FROM: DPS Staff, John Castano

TO: National Grid, Gas Infrastructure and Operations Panel / Revenue Requirements Panel (KEDNY)

SUBJECT: Paving

Request:

Note: In all interrogatories, all requests for workpapers or supporting calculations shall be construed as requesting any Word, Excel or other computer spreadsheet models in original electronic format with all formulae intact and unlocked.

1. As stated on pp. 97-98, lns 15-2 of KEDNY's Gas Infrastructure and Operations Panel. "The Company is proposing to remove the 50-foot threshold and capitalize all main installation activities in accordance with the FERC Chart of Accounts –Gas – Operating Expense Instructions, Accounts Mains and 376 Mains. This change will standardize the accounting treatment of these work activities between National Grid's New York gas distribution companies. As discussed in the testimony of the Revenue Requirements Panel, the Company has normalized its Historic Test Year (HTY) to reflect the change from expense to capital for distribution and transmission main installation, and the Company's capital investment forecasts also reflect this capitalization change."
   a. For KEDNY, identify the amount of paving costs associated with the installments of main under 50-feet, incurred during the HTY.
   b. For KEDNY, explain why the Company has not normalized paving expenses to account for the proposed accounting change.

Response:

a. The amount of paving costs associated with the installation of main segments under 50-feet during the HTY was $688,858, as presented on Exhibit RRP-11, Workpapers to Exhibit RRP-3, Schedule 2, Workpaper 4.

b. The Company has normalized expenses to account for the proposed accounting change. However, the total normalization adjustment, including the amount related to paving costs, was made to the general contractors exhibit, Exhibit RRP-3, Schedule 2. For the Company's Corrections & Updates filing, the paving component will be broken out from the general contractors normalization and included in the paving exhibit, Exhibit RRP-3, Schedule 40.

Date of Request: May 9, 2019 Request No. DPS-236 Supplemental
Due Date: May 20, 2019 NG Request No. NG-261 Supplemental

Gas Utilities Rates

Request for Information

FROM: DPS Staff, John Castano

TO: National Grid, Revenue Requirements Panel (KEDNY)

SUBJECT: Contractors Expense

Request:

Note: In all interrogatories, all requests for workpapers or supporting calculations shall be construed as requesting any Word, Excel or other computer spreadsheet models in original electronic format with all formulae intact and unlocked.

10. For KEDNY, with reference to the adjustment "Remove Gas Enablement Project Costs", as presented on Exhibit___(RRP-3), Schedule 2, p. 4:
    a. Explain what the adjustment represents.
    b. Explain how the Company derived and/or identified this amount. Provide all supporting documentation, calculations, and rationales.

11. For KEDNY, with reference to the adjustment "Capitalization Policy Change", as presented on Exhibit___(RRP-3), Schedule 2, p. 4:
    a. Explain what the adjustment represents.
    b. Explain how the Company derived and/or identified this amount. Provide all supporting documentation, calculations, and rationales.

12. For KEDNY, with reference to the adjustment "Remove Leak Repair Cost related to incentive", as presented on Exhibit___(RRP-3), Schedule 2, p. 4:
    a. Explain what the adjustment represents.
    b. Explain how the Company derived and/or identified this amount. Provide all supporting documentation, calculations, and rationales.

13. For KEDNY, with reference to the adjustment "Reverse CSC Accrual for Prior Period", as presented on Exhibit___(RRP-3), Schedule 2, p. 4:
    a. Explain what the adjustment represents.
    b. Explain how the Company derived and/or identified this amount. Provide all supporting documentation, calculations, and rationales.

14. For KEDNY, with reference to the adjustment "Remove LL30 Costs", as presented on Exhibit___(RRP-3), Schedule 2, p. 4:
    a. Explain what the adjustment represents.
    b. Explain how the Company derived and/or identified this amount. Provide all supporting documentation, calculations, and rationales.

15. For KEDNY, with reference to the adjustment "remove out of period D&R Reclass JE", as presented on Exhibit___(RRP-3), Schedule 2, p. 4:
    a. Explain what the adjustment represents.
    b. Explain how the Company derived and/or identified this amount. Provide all supporting documentation, calculations, and rationales.

Response:

Based on a discussion between the Company and Staff where Staff requested the Company to show a direct link between Workpaper 1 of the expense types in this request and the HTY normalization adjustments made by the Company in those expense types, the responses below are provided.

10. Please see Attachment 1 for a supplemental version of Exhibit___(RRP-11), Workpapers to RRP-3, Schedule 2, Workpaper 1. This workpaper to the Contractors exhibit shows the underlying derivation of the lines of accounting included in the adjustment to Remove Gas Enablement Project Costs.

11. Please see Attachment 1 and Attachment 3 for a supplemental version of Exhibit___(RRP-11), Workpapers to RRP-3, Schedule 2, Workpaper 1 and a workpaper in the same format for Schedule 40. These workpapers to the Contractors and Paving exhibits, respectively, show the underlying derivation of the Capitalization Policy Change adjustment. The Company's initial filing had the entire adjustment made to contractors; however, the Company's Corrections & Updates filing will show the adjustment to contractors and paving expense.

12. The adjustment to Remove Leak Repair Cost associated with the incremental leak repairs completed to achieve the incentive for lowering the type 3 backlog of leaks is not directly related to specific line items on the Contractors workpaper. Rather, the adjustment removes a set amount of leak repair cost calculated by taking the number of incremental leak repairs associated with lowering the type 3 leak backlog, 205 leak repairs in Calendar Year 2018, multiplied by the average unit cost of a leak repair which is equal to $4,596.

13. Please see Attachment 2 for a supplemental version of Exhibit___(RRP-11), Workpapers to Exhibit RRP-3, Schedule 7, Workpaper 1. This workpaper to the Other Expense exhibit shows the underlying derivation of the lines of accounting included in the adjustment to Reverse CSC Accrual for Prior Period. The Company's initial filing had the adjustment made to contractors; however, the Company's Corrections & Updates filing will show the adjustment to other expense.

14. Please see Attachments 1 and 3, described in response to Part 11 above, for the underlying derivation of the lines of accounting included in the adjustment to Remove LL30 costs. The Company's initial filing had the entire adjustment made to contractors; however, the Company's Corrections & Updates filing will show the adjustment to contractors and paving expense.

    The Company is providing Attachment 4 showing the details of the LL30 forecast of $17m provided in the Company's initial filing. Attachment 4 also includes an updated LL30 forecast which lowers the Rate Year expense to $11m. Please see the notes section of Attachment 4 for the forecast assumptions and reasons for the update. This updated forecast will be reflected in the Company's Correction and Updates filing.

15. Please see Attachment 1, described in response to Part 10 and 11 above, for the underlying derivation of the adjustment to remove out of period D&R Reclass JE.

SCHEDULE 7

Other

The Brooklyn Union Gas Company d/b/a National Grid NY
Operating Expenses by Component
Other Expenses
Reversal of CSC Prior Period Accrual

Gas Utilities Rates

Request for Information

FROM: DPS Staff, Hina M Thalho

TO: National Grid, Revenue Requirements Panel

SUBJECT: Other Expenses- KEDNY

Request:

Note: In all interrogatories, all requests for workpapers or supporting calculations shall be construed as requesting any Word, Excel or other computer spreadsheet models in original electronic format with all formulae intact and unlocked.

1. KEDNY provided an Other Expenses amount by Provider Company (including "Keyspan Gas East Corporation and National Grid USA Service Company and National Grid USA Service Company and All Other Companies") for the Historic Test Year (HTY) in the Exhibit___(RRP-3), OM Schedule 7 Other, Tab, "Page 1" that are different than the amounts provided in the Exhibit___(RRP-11), Workpapers to RRP-3, Schedule 7, WP 1, Tab "Summary" explain the difference in the HTY amount for each Provider Company.

2. Referencing to Exhibit___(RRP-3), OM Schedule 7 Other, Tab, "Page 5," Cell, "H56" the exhibit shows Adjustments of $2,890.2. Whereas, Exhibit___(RRP-3), OM Schedule 7 Other, Tab, "Page 1," Cell, shows the Adjustments to Normalize Historic Test Year of "2,659.7." Explain the differences and reconcile the differences between the amounts.

Response:

1. The amounts listed for each Provider Company on Exhibit___(RRP-3), Schedule 7, Page 1 were developed immediately following the closing of the Company's books to populate the historic test year data. Upon subsequently running a new report to break out the individual lines of accounting by component for Exhibit___(RRP-11), Workpapers to RRP-3, Schedule 7, Workpaper 1, the accounting data was further delineated to break out costs by provider company. As noted, the total amount did not change. The resulting difference is a presentation issue; however, the end result is the same.

2. The formula on Exhibit___(RRP-3), Schedule 7, Page 1 by Provider Company inadvertently excluded Rows 19 and 20 of Exhibit___(RRP-3), Schedule 7, Page 5,

resulting in a difference of $0.230 million. However, the formula on Page 1 to break out by FERC category was correctly linked to Page 5 and this is the amount that is used to calculate total O&M expense. Therefore, this does not impact the revenue requirement. The Company will correct the formula for adjustments by Provider Company in the Corrections and Updates filing.

Request for Information

FROM: DPS Staff, Hina M. Thalho

TO: National Grid, Revenue Requirements Panel

SUBJECT: Other Expenses (FL Accrual)- KEDNY

Request:

Note: In all interrogatories, all requests for workpapers or supporting calculations shall be construed as requesting any Word, Excel or other computer spreadsheet models in original electronic format with all formulae intact and unlocked.

Referring to the MS Excel File, "Exhibit___(RRP-11), Workpapers to Exhibit___(RRP-3), Schedule 7, WP 1," explain what each CO Documents type of FL Accrual item listed below is and explain why KEDNY includes these amounts in other expenses.

1. 159414175 of $12.55 million;

2. WAN Invoice Allocations of $0.92 million;

3. Appreciate Award Dec FY19 of $0.49 million; and

4. Accrue Travel Expense of $0.04 million.

Response:

1. The purpose of this entry is to post an accrual related to City State Construction charges included in the deferred expense account that are in excess of the amounts billable under existing reimbursement agreements. Charges to the deferred expense account for disconnect/reconnect and watch guard work are billed to the City at an agreed upon rate and amounts above that are posted to expense. This accrual is an estimate of the amounts that should be posted to expense based on what has historically been invoiced. The accrual represents charges for active projects that will be billed at the completion of the project.

2. This amount represents the December 2018 accrual for network service and telecom vendors that have provided services for the month that have not been billed. The accruals are booked to other expense and reversed the following month.

3. This entry was to record the December 2018 accrual for the unbilled appreciate program costs. In addition, other expense in the historic test year includes the reversal of the prior year's accruals, resulting in a net amount related to appreciate program costs in other expense of $0.07 million.

   As described in the testimony of the Revenue Requirement Panel and shown on Exhibit__(RRP-3), Schedule 1, Workpaper 3, the Company removed from the Historic Test Year the vendor costs associated with the appreciate program. The Company inadvertently excluded the historic test year net accrual amount in other expense from the adjustment. The Company will remove the $0.07 million in its Corrections and Updates filing. KEDLI will also remove the $(.01) million from its other expense in Corrections and Updates filing.

4. The purpose of this entry is to accrue travel card transactions that have not posted to the books as of December 2018. The accrual is booked to other expense and reversed the following month. The actuals will subsequently be posted to the actual lines of accounting.

Gas Utilities Rates

Request for Information

FROM: DPS Staff, Keith Haugen

TO: National Grid, Information Technology Panel

SUBJECT: IT/OT Discovery and Implementation Phase

Request:

Note: In all interrogatories, all requests for workpapers or supporting calculations shall be construed as requesting any Word, Excel or other computer spreadsheet models in original electronic format with all formulae intact and unlocked.

1. For the IT/OT Discovery and Implementation program in the Rate Year, provide the approved sanction paper or approval document that describes the program or project, project justifications, cost breakdown, security benefits, and alternative solutions.

2. Provide in MS Excel file format, progress made in the IT/OT Discovery and Implementation program versus the projected schedule in the three previous calendar years 2016-2018, and to date 2019. Include a detailed explanation for any delays or unscheduled interruptions to the program.

3. Provide in MS Excel file format, the actual capital expenditures versus the approved capital expenditures budget for the IT/OT Discovery and Implementation program for the previous three calendar years 2016-2018, and to-date 2019.

Response:

1. Please see Attachment 1 for the sanction paper that was also provided in the response to DPS-487 at Attachment 4, page 107. Please note that the IT/OT Discovery & Implementation program has been renamed as the High Value Asset Discovery & Implementation project.

2. The project commenced in November 2018 and the project schedule is included in Section 1.14 (Key Milestones) of the sanction paper. The Company maintains a Portfolio tracking report but there is no separate spreadsheet in MS Excel File Format that tracks

project schedule information on an individual project basis. The information is also tracked and maintained within the Microsoft Project On-Line Tool.

The High Value Asset Discovery & Implementation was initially delayed due to a review of the Cyber Security strategy in 2018 and is currently paused as the new Chief Information Security Officer is reviewing the prioritization and timing of several initiatives.

In addition, the Company discovered that an incorrect project in-service date for the project was included in Exhibit_(ITP-4). This will be corrected in the Company's Corrections and Update Filing.

3. The project was budgeted for as part of the Digital Risk and Security (DR&S) Future Program in the FY19 Information Technology (IT) Investment Plan and as a separate standalone project (High Value Asset Discovery & Implementation) in the FY20 IT Plan. Please see Attachment 40 in the response to DPS-487 for a copy of the financial work book that contains up-to-date budget, actual, and project forecast information. Shown below is an excerpt of the budget and actuals for the project for FY19 and FY20.

	FY19 ($M)		FY20 ($M)	
	Capex	Opex	Capex	Opex
Plan	1.09	0.3	2	0.2
Actual	0.05	0.09	0.05	0.02

Lastly, please note that the financials are reported on a fiscal year basis as this is the Company's standard practice for tracking and reporting on project financials.

KEYSPAN GAS EAST CORPORATION d/b/a NATIONAL GRID
THE BROOKLYN UNION GAS COMPANY d/b/a NATIONAL GRID NY
Case Nos. 19-G-0309 & 19-G-0310
Gas Utilities Rates

Request for Information

FROM: DPS Staff, John Castano

TO: National Grid, Revenue Requirements Panel (KEDNY)

SUBJECT: Labor - Capitalization

Request:

Note: In all interrogatories, all requests for workpapers or supporting calculations shall be construed as requesting any Word, Excel or other computer spreadsheet models in original electronic format with all formulae intact and unlocked.

1. On a monthly and on-going basis, provide an updated 12-month average of KEDNY's actual labor costs, broken down between expense, capital, and other, beginning January 2019.

2. As stated on p.63, ln 3 of KEDNY's Revenue Requirements Panel testimony, "The Company forecast 50.53 percent of total labor costs would be capitalized in the Rate Year (RY). The forecast is based on the Historic Test Year (HTY) percentage of labor costs capitalized."

    a. Does KEDNY anticipate a greater level of capital work to be performed during the RY? If yes, explain why the Company believes the amount of labor costs capitalized in the HTY, is indicative of the amount of labor costs to be capitalized in the RY.

    b. For KEDNY, provide the dollar amount of capital work performed during the HTY.

    c. For KEDNY, provide the dollar amount of capital work to be performed during the RY.

    d. For KEDNY, provide the dollar amount of capital work performed for Calendar Years (CY) 2016, and 2017.

    e. For KEDNY, provide the percent of total labor costs capitalized for CY 2016, and 2017.

3. As stated on p. 62, ln 9 of KEDNY's Revenue Requirements Panel testimony, "[w]ith respect to KEDNY, the Company made adjustments to: (i) reflect changes to the capitalization policy to remove the 50-foot threshold and capitalize all main installation activities…" Explain whether KEDNY accounted for this change when determining the HTY percentage of labor costs capitalized. If yes, provide the supporting calculation. If not, explain why not, and provide an updated calculation including this change.

Response:

1. Please see Attachment 1 for the rolling 12-month average of KEDNY's originating company labor costs, broken down between operating expense, non-operating expense, capital and other, beginning January 2019.

2a. Yes, the Company anticipates a greater level of capital work to be performed during the Rate Year. However, an increase in capital work does not warrant an adjustment to the Rate Year labor capitalization rate. The Company's labor expense forecast follows Historic Test Year ("HTY") accounting. Specifically, the labor model applies the HTY capitalization ratio to a total labor amount that is calculated based on headcount at the end of the HTY. The Company's level of O&M expense work in the HTY will not decrease in the Rate Year because of more capital work. Indeed, the same base level of O&M expense work is projected to continue in the Rate Year. Therefore, applying an HTY capitalization ratio is appropriate.

With respect to the projected increase in capital work, that work will be supported through the addition of the proposed FTEs set forth in Exhibit ___ (RRP-3), Schedule 27 (Other Initiatives). These incremental FTEs receive an 85 to 90 percent allocation to capital labor.

Importantly, use of the HTY capitalization rate to forecast Rate Year labor expense has been used to set rates in National Grid's most recent rate case proceedings (*see* Cases 16-G-0058 and 16-G-0059 and Cases 17-E-0238 and 17-G-0239). If the labor capitalization rate were adjusted, an adjustment would need to be made to increase contractor expense to cover the O&M expense work performed in the HTY that will continue in the Rate Year.

2b. Please see Exhibit __ (RRP-3), Schedule 23, Page 9 for the amount of capital labor charged to KEDNY during the Historic Test Year. Please see Exhibit ___ (GIOP-1) for the total gas direct capital work in the Historic Test Year.

2c. Please see Exhibit ___ (RRP-3), Schedule 23, Page 9 for the amount of capital labor charged to KEDNY during the Rate Year. Please see Exhibits ___ (GIOP-1) and (GIOP-7) for the total gas direct and indirect capital work in the Rate Year.

2d. Please see the response to DPS-032 for capital labor charged to KEDNY for calendar years 2016 and 2017. Please see the response to DPS-084 for total capital work performed in fiscal years 2014 through 2018.

2e. Please see Attachment 2 for the total labor capitalization rate for calendar years 2016 and 2017. The rate shown on Attachment 2 was calculated using the same components of total originating KEDNY labor as those used to calculate the referenced 50.53% capitalization rate.

3. Yes, the Company accounted for this change when determining the HTY percentage of labor costs capitalized. Please refer to Exhibit___(RRP-11), Workpapers to Exhibit RRP-3, Schedule 23, Workpaper 13 for the KEDNY HTY adjustment to reflect the change to the capitalization policy to remove the 50-foot threshold and capitalize all main installation activities.

KEDNY's adjustment to the HTY was a reduction of $539,068 to KEDNY's originating company labor expense and an increase to capital labor. In reviewing the adjustment, it was determined that the adjustment should have been $533,220 to KEDNY originating company labor costs and $4,425 to Service Company originating company labor costs. In addition, the Company inadvertently did not include the adjustment to the HTY for variable pay related to the capitalization change (KEDNY originating company of $16,369 and Service Company originating of $330). The Company will include these adjustments in its Corrections & Updates filing.

Date of Request: June 5, 2019 Request No. DPS-388
Due Date: June 17, 2019 NG Request No. NG-449

KEYSPAN GAS EAST CORPORATION d/b/a NATIONAL GRID
THE BROOKLYN UNION GAS COMPANY d/b/a NATIONAL GRID NY
Case Nos. 19-G-0309 & 19-G-0310
Gas Utilities Rates

Request for Information

FROM: DPS Staff, John Castano

TO: National Grid, Maureen Heaphy

SUBJECT: Labor

Request:

Note: In all interrogatories, all requests for workpapers or supporting calculations shall be construed as requesting any Word, Excel or other computer spreadsheet models in original electronic format with all formulae intact and unlocked.

Referring to pp.34-35 Maureen Heaphy's testimony, it states "[p]ursuant to their respective union contracts, members of TWU Local 101 (KEDNY) will receive a base wage increase of 1.5 percent on April 16, 2019; members of IBEW Local 3 (KEDNY) will receive a base wage increase of 1.5 percent on April 16, 2019, October 16, 2019 and April 16, 2020; and members of IBEW Local 1049 (KEDLI) received a base wage increase of 3.0 percent on February 14, 2019 and will receive 3.0 percent on February 14, 2020. These base wage increases are also set forth in Schedule 1 of Exhibit __(MPH-4). Because all of these collective bargaining agreements are scheduled to expire during the course of these rate proceedings (the TWU Local 101 contract expires on October 15, 2019, the IBEW Local 3 contract expires on October 15, 2020 and the IBEW Local 1049 contract expires on February 13, 2021), the Companies have included projected base pay increases in the revenue requirements, assuming new contracts are negotiated upon the expiration of the existing contracts. These projections are not intended to guarantee that increases will be included in the contract negotiations."

1. For KEDNY, provide the latest union contracts supporting the associated wage increases.

2. For KEDNY, referring to the Excel file for Exhibit___(RRP-3), OM Schedule 23, WP1. Annualize Payroll – OpCo, "Rep-Labor Workpapers," explain why the Company believes it is appropriate to reflect a wage increase of 1.5 percent in April and October for union TWU-101, when the latest union contract reflects a wage increase of 1.5 only for April.

Response:

1. Please see the Company's response to DPS-029 for the latest KEDNY TWU Local 101 and IBEW Local 3 union contracts supporting the associated wage increases used in the Rate Year labor forecast.

2. The KEDNY TWU Local 101 contract expires on October 15, 2019 and given the timing, it was reasonable to assume that the new bargained contract would, at a minimum, include a 1.5% wage increase for October 2019 as the terms of the recently expired contract included wage increases of 1.5% each April and October of 1.5%. Therefore, the Company included an assumption of a 1.5% wage increase for October 2019 in its Rate Year labor forecast.

   Notwithstanding the foregoing, on April 27, 2019 National Grid and TWU Local 101 negotiated a new three-year contract. The contract term, which commences on October 16, 2019 and ends on October 15, 2022, includes a wage increase of 2.75% effective October 16, 2019, a 3.0% wage increase effective on October 16, 2020 and a 3.0% wage increase effective on October 16, 2021. Please see Attachment 1 for the latest memorandum of agreement between National Grid and TWU Local 101 dated April 27, 2019. The increases resulting from this memorandum will be included in the Company's Corrections and Updates filing.

Due Date: June 11, 2019 NG Request No. NG-379

KEYSPAN GAS EAST CORPORATION d/b/a NATIONAL GRID
THE BROOKLYN UNION GAS COMPANY d/b/a NATIONAL GRID NY
Case Nos. 19-G-0309 & 19-G-0310
Gas Utilities Rates

Request for Information

FROM: DPS Staff, John Castano

TO: National Grid, Gas Infrastructure and Operations Panel (GIOP)

SUBJECT: Capitalization Policy Change

Request:

Note: In all interrogatories, all requests for workpapers or supporting calculations shall be construed as requesting any Word, Excel or other computer spreadsheet models in original electronic format with all formulae intact and unlocked.

1. As stated on pp. 97-98 of KEDNY's Gas Infrastructure and Operations Panel testimony, "[a]ccounting for installation of segments of main under 50 feet in length is currently expensed by the Company. This threshold is arbitrary; moreover, there is no similar threshold for main replacement in Niagara Mohawk's service territory. Applicable accounting principles and regulations permit capitalization of new main installations, and there is no minimum threshold. The Company is proposing to remove the 50-foot threshold and capitalize all main installation activities in accordance with the FERC Chart of Accounts –Gas – Operating Expense Instructions, Accounts 367 Mains and 376 Mains. This change will standardize the accounting treatment of these work activities between National Grid's New York gas distribution companies. As discussed in the testimony of the Revenue Requirements Panel, the Company has normalized its Historic Test Year to reflect the change from expense to capital for distribution and transmission main installation, and the Company's capital investment forecasts also reflect this capitalization change."

   a. For KEDNY, identify all cost elements in which a normalizing adjustment was made to account for the capitalization of installments of main under 50-feet.

   b. For KEDNY, identify the cost elements in which a normalizing adjustment was not made for the capitalization of installments of main under 50-feet, and explain why this normalizing adjustment was not warranted.

Response:

a. For KEDNY, all cost elements containing expenses in the HTY associated with 50 feet or less of main installation were normalized to reflect the Rate Year and Data Years change in capitalization policy described in the Gas Infrastructure and Operations Panel testimony at pages 97 and 98, with the exception of the transportation cost element discussed in Part (b) below.

Because the Rate Year and Data Years expense in the following cost elements is forecast by inflating the normalized HTY expense amount, these cost elements have discrete HTY normalization adjustments applied directly in the exhibit removing the amount of HTY expense related to the 50 feet or less of main installation:

i. RRP-3, Schedule 2: Contractors
ii. RRP-3, Schedule 4: Employee Expenses
iii. RRP-3, Schedule 7: Other
iv. RRP-3, Schedule 19: Materials-Outside Vendor
v. RRP-3, Schedule 20: Materials-Inventory
vi. RRP-3, Schedule 21: Materials-Stores Handling
vii. RRP-3, Schedule 23: Labor

The cost elements listed below do not have discrete normalization adjustments applied because the Rate Year forecast is not based on HTY expense inflated. Instead, the Rate Year and Data Years' amounts are forecast in total and the expense amount determined by applying the labor capitalization rate. Because labor has been normalized for the capitalization policy change (as shown in the cost elements list above), the labor capitalization rate based on that labor has been normalized. By applying that labor capitalization rate to the total forecast cost for the cost elements below, the resulting expense amount is normalized for the capitalization policy change.

viii. RRP-3, Schedule 11: FAS 106 – OPEB
ix. RRP-3, Schedule 12: FAS 112
x. RRP-3, Schedule 13: Healthcare
xi. RRP-3, Schedule 14: Group Life Insurance
xii. RRP-3, Schedule 16: Pensions
xiii. RRP-3, Schedule 17: Thrift Plan
xiv. RRP-3, Schedule 18: Worker's Comp
xv. RRP-3, Schedule 23: Labor (Variable Pay)

b. The one cost element that was inadvertently not normalized for the capitalization policy change is transportation expense. The capital and expense ratios of total transportation costs in the HTY are applied to the Rate Year and Data Years' forecast of total transportation costs to obtain the expense portion. Because the HTY capital and expense ratios for transportation costs were not normalized for

the capitalization policy change, the Rate Year and Data Years' transportation expense has not been normalized. HTY transportation expense associated with the 50 feet or less of main installation is $.068 million for KEDNY. The Company will make this adjustment in its Corrections & Updates filing.

THE BROOKLYN UNION GAS COMPANY d/b/a NATIONAL GRID NY
Case Nos. 19-G-0309 & 19-G-0310
Gas Utilities Rates

Request for Information

FROM: DPS Staff, Sarah E. Keymel

TO: National Grid, Revenue Requirements Panel

SUBJECT: Other Initiatives - FTEs

Request:

Note: In all interrogatories, all requests for workpapers or supporting calculations shall be construed as requesting any Word, Excel or other computer spreadsheet models in original electronic format with all formulae intact and unlocked.

1. In the same format as the "Labor Burdens" tab in the MS Excel Format Spreadsheet Workpaper, KEDNY Exhibit___(RRP-3), OM Schedule 27, Other Initiatives, provide the actual burden rates for each month from 1/1/16 to present.

2. In the same format as the "Labor Burdens" tab in the MS Excel Format Spreadsheet Workpaper, Exhibit___(RRP-3), OM Schedule 27, Other Initiatives, provide the labor burden rates using the rate year numbers.

3. Provide the analyses KEDNY performed to determine that using the adjusted Historic Test Year (HTY) amounts to calculate the labor burden rates was reasonable. If no analyses were performed, explain why the Company used the HTY amounts.

Response:

1. See Attachment 1 for the labor overhead rates. The labor overhead rates presented in Attachment 1 are from the Company's SAP accounting system for the periods indicated.

2. See Attachment 2 for the labor overhead rates in the Rate Year calculated as the ratio of each labor overhead to total base labor.

3. The Company applied HTY overhead rates to determine Rate Year labor overheads in Exhibit___(RRP-3), Schedule 27 but recognizes that applying overhead rates calculated on

Rate Year labor and benefits is a more reasonable forecast and will make this change in its Corrections and Updates filing.

Rate Change - Workpaper 3

3/31/2018

Purpose: To calculate and prove on the regulated entities the federal rate change tax impact that needs to be recorded to a regulatory liability
The federal rate change went from 35% in FY17 to a blended rate of 31.55% for FY18 activity and then to an ending rate of 21%.
This tab will portray the balances recorded at the different tax rates and calculate what the rate change impact is.

Workpaper 3

FY18 Activity not at 31.55%

35.00%	21.00%	35.00%	21.00%	35.00%	31.55%	21.00%

Breakout any activity not recorded at 31.55% rate

Rate Change - Workpaper 3

3/31/2018

Purpose: To calculate and prove on the regulated entities the federal rate change tax impact that needs to be recorded to a regulatory liability
The federal rate change went from 35% in FY17 to a blended rate of 31.55% for FY18 activity and then to an ending rate of 21%.
This tab will portray the balances recorded at the different tax rates and calculate what the rate change impact is.

Workpaper 3

Rate Change - Workpaper 3

3/31/2018

Purpose: To calculate and prove on the regulated entities the federal rate change tax impact that needs to be recorded to a regulatory liability
The federal rate change went from 35% in FY17 to a blended rate of 31.55% for FY18 activity and then to an ending rate of 21%.
This tab will portray the balances recorded at the different tax rates and calculate what the rate change impact is.

Workpaper 3

FY18 Activity not at 31.55%

35.00%	21.00%	35.00%	21.00%	35.00%	31.55%		21.00%

Breakout any activity not recorded at 31.55% rate
